SureColor SC-P400

DATASHEET

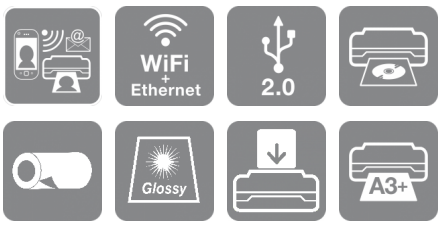

Photo enthusiasts can create professional-quality photo prints on a range of media in the home and studio

The SC-P400 combines professional pigment inks and enhanced connectivity in one affordable package. Perfect for creating glossy photos in sizes up to A3+, it provides the ideal entry into professional photo printing. It also comes with a range of mobile printing options and flexible connectivity features, making it extremely easy to use.

High quality
Create glossy photos with a wide range of vivid colours thanks to a seven-colour UltraChrome HiGloss 2 ink-set with gloss optimiser. Creating the smallest ink droplet size of any A3+ photo printer on the market[1], the SC-P400 delivers superb accuracy and overall quality.

Flexible and versatile
Designed to give photographers the choice to display their prints on different media, the SC-P400 supports fine art, glossy and matte papers, up to A3+ in size and up to 1.3mm thick. The ability to load paper from the rear allows you to print onto fine art paper easily, while printing on 2-inch core roll media allows to print panoramics and individual formats. CD and DVD printing is also supported.

Advanced connectivity
Designed for maximum connectivity, the printer features built-in Ethernet and USB capability as well as Wi-Fi for wireless printing from PCs, tablets and smartphones, supported by the free Epson iPrint App[2].

Compact and stylish
This stylish desktop printer complements any home, studio or office environment. It is also the smallest and lightest A3+ photo printer using pigment inks on the market[1] so it won't take up too much precious desk or counter space.

Reduces environmental impacts
In addition, the SC-P400 has a very low power consumption and is consequently EnergyStar 2.0 compliant.

KEY FEATURES

- **UltraChrome HiGloss 2 inks**
  Seven-colour pigment inks deliver superior quality prints
- **Highly accurate results**
  Minimum 1.5pl ink droplets produces accurate results
- **Print on a range of media up to A3+**
