GOXTREME® REBEL

MANUAL

English

Introduction

Thank you for purchasing this action camera! Please read this manual carefully before using the device.
Important instructions

To ensure the optimal functioning of your GoXtreme Rebel Action Cam, please note the following important information:

1. Always protect your camera from falls, blows and bumps.
2. Keep a sufficient distance from objects that generate strong magnetic fields or radio waves, such Electrical appliances to prevent them from damaging the product or affecting the sound and image quality.
3. Store the device cool (at room temperature) in a dry and dust-free location and never expose the product to high temperatures or permanently direct sunlight.
4. For best results, we recommend using high quality Micro SD cards up to 32GB Class 10 with U3 High Speed or higher.
5. Before using the memory card for the first time, format it in the settings menu in your camera.
6. To avoid potential data errors, do not place Micro SD Cards near highly magnetic objects.
7. In the unlikely event of overheating, smokes or unpleasant odors coming out of the unit, disconnect it immediately from the charging cable and remove the battery to avoid a fire.
8. Keep the device away from children while charging.
9. The product should only be charged via the USB port of a laptop or computer or a USB power adapter with a maximum power of 1000mAh.
10. The recording time depends on the selected resolution.
11. The battery life is - depending on the settings and outside temperature - up to 80 minutes under optimal conditions.
12. After reaching a max. video recording time of approx. 22 minutes will automatically stop the recording. It must then be restarted manually.

FAQ

1. Crash, black and white phenomenon occurred during use

If the camera freezes during normal use, please remove and re-install the battery. The camera returns to normal operating after turning it on again.

2.In case, the camera will not turn on or operate

Please check, if the battery is fully charged. Otherwise pull out and reinsert the battery and turn the camera on.

3. Machine heating phenomenon occurs during use

Because this camera is a precision digital device with a better sealing, the machine will have a certain amount of heat during use. This is a normal phenomenon.

4. Record a video without sound, or play video with a lower sound

First make sure the device is not inside the waterproof case, because the waterproof case belongs to seal parts. The sound cannot be played, if the sound is turned off inside the menu.

5. Video is not running smooth, red and green blocks appear at the recording

Please format the memory card inside the camera using the settings menu under "format SD card" and make sure to use genuine high-speed memory card for recording.

6. WiFi signal instability

The WiFi signal susceptible to interference. Make sure that no barrier is around the unit to facilitate signal transmission and hold the smartphone not too far away from the camera unit.

7. WIFI Unable to connect

First, check that the WiFi is turned on the camera. Then re-connect the camera and the smartphone / tablet again with each other.

NOTE:

Recording times are depending on resolution.

Note: After reaching a max. video recording time of 22 minutes the camera will automatically stop. It can only be restarted manually.

1080P 12min / 720p 15min / VGA 22min

Battery life time - depending on settings and outdoor temperature - up to 80 min. under optimal conditions.

Before using your camera in the water please verify that all lids and locks are tightly closed and sealed on the camera and the underwater case. After use, clean the housing of salt and chlorine water and then let it dry.

The camera should not be exposed to large temperature and humidity differences in order to avoid condensation inside the housing or behind the lens. After underwater use, the case must be kept open to avoid condensation or rust.
