Assemble the WALLMOUNT6

Warning! The WALLMOUNT6 can support up to 44.2 lb (20 kg). If you exceed the weight limit, the WALLMOUNT6 may not function as expected.

Use wall studs to attach the WALLMOUNT6 to a wall

The installation holes for wall mounting are 16 in. on center to allow for wall-stud mounting.

1. Attach the included stabilizing bracket.
2. Find the wall studs in the wall where you want to attach the WALLMOUNT6.
3. Insert the four M5-25 mm flat-head screws through the installation holes for wall mounting on the WALLMOUNT6 and then into the studs in the wall.

Note: If you attach the WALLMOUNT6 using wall studs, you don't need to use the plastic anchors.

Use plastic anchors to attach the WALLMOUNT6 to a wall

1. Attach the included stabilizing bracket.
2. Align the plastic anchors with the installation holes for wall mounting on the WALLMOUNT6.
3. Determine where on the wall you want to attach the WALLMOUNT6, making sure to align the plastic anchors with the installation holes for wall mounting.
4. Hammer the plastic anchors into the wall.
5. Insert the four M5-25 mm flat-head screws through the installation holes for wall mounting on the WALLMOUNT6 and into the plastic anchors in the wall.

Add equipment to the WALLMOUNT6

Use the included M6 cage nuts, screws, and washers to install equipment in the WALLMOUNT6.
