INTRODUCTION

The Integral Crypto Drive is one of the most secure USB Flash Drives available today. Sensitive data stored on the Crypto Drive cannot be compromised in the event of loss or theft of the Drive. With its rugged design, military level security and intelligent software, the Crypto Drive is the ideal choice for secure data storage.

FEATURES

- Military Level Security - AES 256 bit hardware encryption. Mandatory encryption of all files (100% privacy)

- FIPS 197 Approved - Certificate No. 1137

- Rugged Waterproof* Design - Steel inner casing and rubberised outer casing, designed to protect the data if dropped, crushed, submerged in water, or subjected to break-in

- Secure Entry - Data cannot be accessed or removed without the correct high strength 8-16 character password

- Intelligent Protection - Data will be automatically erased after 6 failed access attempts. Drive is then reset and can be re-used

- Personal ID Function (optional) - If misplaced, contact details can be accessed and the Drive can be returned, whilst confidential data remains secure

- Zero Footprint - No software installation required

- Easy To Use - Multi-lingual interface in 22 languages and a pre-loaded user interface

- Unique ID (optional) – The USB Flash Drive can be personalised with a designated company identifying name or number. This will allow a Network Administrator to block access to unrecognised USBs for security purposes, whilst allowing the Integral USB Flash Drive to function as the 'official' company drive.

- Customisation Available - Serial number etching, Flash Drive and GUI can be customised to suit your brand (subject to minimum order quantities)

*Up to 4 ft. water; conforms to IEC 60529 IPX8

PRODUCT TYPE
USB Flash Drive

INTERFACE CONNECTIVITY
1x Hi-Speed USB - 4 Pin USB Type A

COMPATIBILITY
XP, Vista and 7.

ENVIRONMENTAL PARAMETERS
Min Operating Temperature 0°c
Max Operating Temperature 60°c
