

Bright, compact and lightweight **laser** projection.

PRO | SCENE 506 series

Robust, **dependable** and maintenance-free.

Introducing the ProScene 506 series laser projectors by Optoma, the world's leader in 4K UHD projection technology, featuring stunning rich colors and image quality in a compact and lightweight design. The new ProScene lineup delivers in spades on brightness with 5,000 lumens, along with accurate color reproduction to enhance any small to large-sized venue.

Combining a flexible throw ratio, 1.6x zoom, four corner correction and robust input options, including compatibility with 4K UHD HDR sources, the Optoma ProScene projectors provide installation flexibility for a variety of professional environments, including board rooms, houses of worship, museums, entertainment venues and education settings.

Optoma ProScene laser projectors are engineered for challenging applications that demand a maximum level of technical ingenuity, quality manufacturing and specialized support services. Laser light source technology reduces operating costs by eliminating lamp and filter replacements for 20,000 hours of reliable, cost-efficient and maintenance-free operation.
