> ULTIMATE EQUIPMENT PROTECTION FROM THE ELEMENTS.

STRONGER BY DESIGN

The Pelican Protector Case uses an open cell core and solid wall construction, which is actually stronger and lighter than a solid core wall. Travel light with heavy protection. And you know it's a Pelican™ Case by the distinctive dual band top surface. Stainless steel pins are used

New Stronger Double-Throw Latch

for hinges and handles. The new Double-Throw latches are smarter and easier to open: it's the classic 'C' clamp design with a secondary movement that works like a pry bar to start the release and offers plenty of leverage to open with a light pull.

WATERTIGHT

The secret is the tongue-and-groove fit with Polymer o-ring acting as a waterproof seal. Also, the new

Automatic Pressure Equalization Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is even easier to open.

KEEP IT SHUT

Metal reinforced padlock protectors provide added strength and extra security against cutting and theft.

EXTRA PROTECTION

Pelican's Pick N Pluck™ foam lets you customize the interior according to your gear. An easy, do-it-yourself system for custom-shaping the interior of the case according to your equipment. Layers of foam are pre-scored in tiny cubes. Simply measure your equipment over the grid and pluck away. Contents stay in place and get extra protection at the same time.

EASY RIDING

Stainless steel ball bearing wheels (on select cases) last longer and ride smoother. The nylon hub adjacent to the stainless steel is made to resist heat. Result: less wear and tear on the polyurethane wheel.

NYLON HUB

STAINLESS STEEL BALL BEARING WHEELS

POLYURETHANE TIRE

Panel frame mounting system

Extra protection
