Upgrade memory. Boost performance
If you are using a lot of memory-intensive applications and notice your laptop is running slow or crashing, consider adding 16GB 3200MHz DDR4 Memory. It’s an easy way to boost the performance and user experience from your current HP laptop PC.

Get more done
Do more with the HP laptop you already have. Add 16GB 3200MHz DDR4 Memory so you can run multiple applications concurrently and multitask like a pro.¹

Experience super-fast speed
Adding 16GB 3200MHz DDR4 Memory will increase the computing speed of your HP laptop. Plus adding super-fast, power-efficient laptop memory will address those annoyingly slow start-up times.

Memory you can trust
Buying generic laptop memory is risky because it is not always compatible. Leave uncertainty behind with genuine HP-branded memory that’s tested and certified for HP laptops and comes with a standard 1-year warranty.

¹. Due to the non-industry standard nature of some third-party memory modules, we recommend HP branded memory to ensure compatibility. If you mix memory speeds, the system will perform at the lower memory speed.

Compatibility

What’s in the box

Memory card and documentation

Country of origin

China

**NOTE:** Please check this product’s web page on HP.com for current compatibility information.

**NOTE:** Full availability of 4 GB or more of memory requires a 64-bit operating system. With Windows 32-bit operating systems, the amount of usable memory is dependent upon your configuration, so that above 3 GB all memory may not be available due to system resource requirements.

**NOTE:** All models may not be available in all regions.

**NOTE:** Memory modules support data transfer rates up to 3200 MT/s; actual data rate is determined by the system’s configured processor. See processor specifications for supported memory data rate.
