

HKBHIVUBKUP

ABOUT

The Accuratus 260 HiVis range opens up new opportunities for those with impaired eye sight. It has been widely recognised that people with impaired sight respond more positively to yellow fonts on a black background as opposed to white fonts on a black background. With its black background and enlarged yellow font the HiVis from Accuratus is a cost effective assistant. If the 260 is not enough for you why not take a look at the KeyMonster that has keys more than double the size of a conventional board.
