

Reliable and fast performance for multi-part forms or fine business correspondence

Rugged, reliable dedicated forms printers, backed by a 3-year standard warranty

Whether you need regular output of continuous multi-part forms, fine business correspondence or combinations of both, an OKI® ML400 Series printer is the solution.

ML400 Series printers—9-pin or 24-pin—handle the printing needs of the most demanding environments: point-of-sale, automation and utility applications such as wholesale or retail sales counters, financial departments, and manufacturing or warehouse sites. The 24-pin models also produce letter-quality type and high-resolution graphics for the office and executive suite.

Unequaled performance technology – ML400 Series printers sport features that give them a strong edge over their predecessors as well as the competition:

- An internal cooling fan provides continuous airflow for the printhead—maximizing throughput productivity for long, unattended print jobs
- Additional feed rollers provide precise forms handling and printed-character placement accuracy
- The 3-piece top cover provides easy access and unsurpassed break resistance

Fast, with finesse – ML400 Series printers run the gamut of paper types and envelopes at lightning speed: 9-pin ML420/421 models reach 570 cps in SuperSpeed Draft mode¹ and 24-pin ML490/491 models turn out 105 cps in Letter-quality mode².

All have a rugged printhead with an average life expectancy of 400 million-character, made up of powerful samarium magnets and stored-energy pins that deliver precise, sharp characters all the way through to the last page of a 6-part form.³

The patented OKI® closed-loop feedback system assures character placement accuracy. And a zero-tear feature accurately positions continuous forms for a clean tear at the perforation to eliminate wasted stock.

Sturdy and sophisticated – Field-proven reliability is just one reason OKI MICROLINE printers are the most widely-used impact printers in North America⁴. The rugged, reliable OKI ML400 Series printers are sure to win you over, too!
