EPOS Enterprise Solutions

EXPAND Meeting Solutions

Seamless Collaboration

As virtual communication becomes increasingly important for businesses around the world, the quality and reliability of conferencing devices is more essential than ever. We created the EXPAND Line of premium audio and video tools to specifically address the needs of decentralized teams, often working across locations and time zones.

Whether collaborating in small, medium or large meeting rooms, huddle spaces or for portable use on-the-go, every model in the EXPAND Line is designed and crafted for clear conversation, ease-of-use and perfect connectivity with all your devices.

Thanks to enhanced voice pickup and superior speaker sound, everyone on conference calls can participate and engage with the same confidence and clarity as if being there in person.

Furthermore, with EPOS video conferencing solutions you can now upgrade your business with video technology for today's smart office. By enhancing audio-visual communication between your colleagues – and customers – the EXPAND Line gives you the tools you need for seamless collaboration.

EXPAND Speakerphones

Superior Audio for the Hybrid Workplace

Connecting colleagues is the challenge of today's hybrid workplace. With the EXPAND Line we've raised the bar when it comes to teamwork. All our speakerphones help you set up conference calls seamlessly and instantly with superior audio, are easy-to-connect, intuitive to manage, and configure themselves automatically with all your devices. EPOS craftsmanship is known around the world for quality, reliability, and superior materials – built into sleek and compact designs that perfect the essentials, without any unnecessary parts or buttons. Designed for personal and shared use, at the

office and on-the-go, the EXPAND Line gives you the freedom to turn any space into a hassle-free virtual meeting room, anywhere in the world. Intuitive and exceptionally easy to use, every solution is designed and crafted to perfection with best-in-class voice pick-up, guaranteeing outstanding sound for you, your team, and your customers. The EXPAND Line also includes the first ever smart speaker from EPOS in partnership with Microsoft. EXPAND Capture 5 offers an even richer collaboration experience via Microsoft Teams Rooms and empowers all meeting participants wherever they work from.

The Facts EXPAND

For the **69%*** of office workers who use a headset or speakerphone for conference calls, seamless collaboration is vital. Which is exactly why we created the EXPAND Line.

We know that **59%*** of workers use an audio solution every single day, so we created this line to be of the best quality and reliability out there.

Because **37%*** of everyday collaborators spend more than half their time away from their desk, the EXPAND Line is designed and crafted for flexibility, ease-of-use and perfect connectivity with all devices.

69%

Need seamless collaboration

59%

Use audio solution every day

37%

Of collaborators spend more than 4 hours away from desk

- for 2-6 individuals

For professionals that work with team members across geographic locations, often needing to meet and align in small huddle rooms.

Medium Meeting Rooms

Conferencing in medium to large meeting rooms
- For 6-12 individuals

For professionals that participate in regular, formal meetings, presentations and interviews across geographic locations in medium to large meeting rooms.

Large Meeting Rooms

Conferencing in large meeting rooms
- For 12+ individuals

For professionals that participate in regular, formal meetings, presentations and interviews across geographic locations in large meeting rooms.

EXPAND 80 Series

Unite Your Team

Unite colleagues with a premium, scalable Bluetooth® speakerphone for up to 16 in-room participants. Thanks to six adaptive, beamforming microphones that isolate the human voice from room reverb and ambient noise, everyone in the room can be heard and colleagues out of the office are closer to the conversation.

Connect easily via Bluetooth®, USB-C or NFC and listen as the room fills up with rich, natural sound – perfect for dynamic conferences

and audio-visual presentations. Crafted with high-quality materials and fabric by Kvadrat, you get excellent resonance damping and a professional aesthetic for your workplace. For even larger meetings, expansion microphones allow you to adapt to the demands of your business. EXPAND 80 offers a space to meet and align in real time – enabling the confidence and clarity that boosts collective performance.

Technologies and Services

We've Got you Covered

EPOS Technology

We divide our technologies into 3 subcategories: EPOS AI™, EPOS Sound™ and EPOS Voice™ to ensure a clear understanding of our technical spectrum at all ends. Our technologies span over the range of Artificial Intelligence to Sound Experience and Microphone Performance.

EPOS AI™ – Creates an optimized audio experience

Through our commitment to exploring the Power of Audio we have developed an optimized audio experience that pushes your communication further and boosts your ability to succeed. With our user in mind, we implemented EPOS AI™ – a machine learning system embedded in EPOS audio devices that processes audio and takes decisions independently. By interacting with advanced beamforming and noise reduction algorithms, this system enables the device to automatically adapt to your speech while studying your sound environment. The technology within EPOS AI™ then successfully reduces the ambient sounds in your environment, thus, transmitting your speech loud and clear to your listener – where it matters most.

We aim to stay at the forefront of what is technically possible. With the ADAPT 660 we have launched the first edge AI based headset in the entire UC space, thus laying the groundwork to be pioneers within audio technology.

EPOS Sound™ – Sound as if you were right there

EPOS Sound™ makes the most out of your premium audio device by delivering a natural listening experience. Through continuous monitoring of ambient sound and varying noise levels, our technology helps you concentrate while taking care of your hearing: creating an augmented and immersive audio experience that sounds as if you are speaking to someone face-to-face or are right there in the same environment. No matter where you are. What's more, you can listen to your teammates or keep an ear out for announcements without removing your headset. For more focus, block out background noise with ease and enjoy the benefits of EPOS Sound™ – while watching your performance and energy levels rise.

EPOS Voice™ – Be understood in any environment

EPOS Voice™ improves your speech intelligibility and provides for a better conversation by creating an acoustic lens to focus on your speech. Through removing remaining noise disturbances, it ensures a more natural reproduction of the human voice. EPOS Voice™, furthermore, recognizes your environment in order to eliminate unpleasant background noise to clarify your sound picture. Making sure you can be heard no matter where you are – for the ultimate audio experience. With optimal control of noise levels, this technology allows for an effortless use of your digital voice assistants anytime, anywhere.

EPOS Manager

Empower Your Business Anywhere

Save valuable time and make life simpler and smarter for your IT department, your business and your colleagues. By keeping you in touch with all your EPOS devices, EPOS Manager puts you in control of your company's UC environment in three key areas:

Asset Management

Get the overview

See all your devices on the dashboard; from headsets to speakerphones and even non-EPOS devices. All users are registered in the system, which shows both active and inactive devices – who is using which device and how they are being used. Simply reallocate redundant resources to boost productivity. Reports on usage and firmware compliance keep you in complete control of company assets.

Update Management

Less downtime, more convenience

A flexible and cost-effective way to get the latest firmware updates to all your organization's EPOS devices, whenever it's convenient for you and your end-users. Push new updates to an unlimited number of devices across your organization from one simple dashboard. Schedule your automated updates to cause minimum downtime and disruption to your company's workflow.

Configuration Management

Easy for you, easy for end-users

The centralized configuration option allows all settings to be controlled from the IT department, ensuring that headset user's experience a simple plug and play solution. You can centrally push configurations or lock specific specifications on EPOS devices to comply with regulatory compliance settings for specific groups or individuals.

EPOS Manager for IT Administrators

EPOS Manager has been developed for companies with a need to control their UC environment in a fast and secure way. By installing the client application, EPOS Connect, on your end users' PCs, you gain a complete overview of all deployed devices and access to new updates and settings.

For companies with several locations, it's possible to manage, update and control settings for all end-users in the entire organization. For improved security, all communication and data are encrypted and no sensitive data is stored.

The resulting simplification of the asset, update and configuration management gives great savings in both time and money.

EPOS Connect for Speakerphones Users

EPOS Connect is the client application running in the background on the speakerphones user's PC. The solution ensures that EPOS headsets and speakerphones work seamlessly with various leading softphones and give you access to the latest firmware updates and personalized settings.

EPOS Connect is uniquely configured to either work together with a signed-up company account on EPOS Manager or as a stand-alone application for smaller companies or personal use.

Designed to be simple to use, the application allows EPOS headset and speakerphone users to enhance and personalize their experience and productivity simply and quickly.
