

USB 3.0 Capture Device for High-Performance VGA Video - 1080p 60fps - Aluminum

StarTech ID: USB32VGCAPRO

This capture device turns your USB 3.0 computer into a digital video recorder for high-quality VGA video, leveraging USB 3.0 transfer speed to capture raw 1080p video at 60 frames per second. The capture device records video from your VGA source device and also includes a 3.5 mm audio input jack, which lets you record the video's accompanying analog audio output, or add your own independent audio source for voice over commentary.

High-performance capture at 1080p 60 FPS

Record lossless video at 60 FPS, ensuring every frame of content is saved, unlike 30-frame-per-second capture devices that only catch half the action. 1080p60 exactly matches the output of most computer video cards, which is great for recording the output from your PC, server, or POS station, when you're creating software training and tutorial videos. Plus, with support for 1080p video, you can ensure crystal-clear capture quality at high-definition resolution, and create high-quality video to distribute internally throughout your business or over the internet.

Use your own software with DirectShow compatibility

This USB capture card is capable of capturing lossless raw video, making it compatible with Microsoft® DirectShow. With raw video capture you can record video using your preferred third-party DirectShow software such as Open Broadcaster Software (OBS).

H.264 encoding for wide device compatibility

The software that's included with the capture card encodes in H.264 -- the most widely adopted video codec in the world. H.264 encoding capability ensures the video files you save will be compatible with almost any video player, such as the media software on your PC, Mac, iOS or Android™ devices, with no editing or converting needed. H.264 is also widely supported by most software titles, including Adobe Premiere® and Windows Media® Encoder.

The USB32VGCAPRO is backed by a 2-year StarTech.com warranty and free lifetime technical support.

Applications

- Record video for training and tutorial purposes from technologies that output VGA
- Convert analog video to digital, in professional video archiving applications
- Capture raw, uncompressed video using your preferred DirectShow compatible software

Features

- Seamless picture quality with USB 3.0 bandwidth enabling you to capture 1080p video at 60 FPS
- Wide device playback support with H.264 encoded video files
- Use your own capture software, with lossless, raw video-capture capability ensuring DirectShow compatibility
- Separate 3.5 mm audio input

Technical Specifications

Warranty	2 Years
Audio	Yes
Converter Type	Format Converter
Industry Standards	MPEG4 (H.264)
Audio Specifications	2-channel stereo audio
Maximum Analog Resolutions	1920 x 1200 60 FPS
Supported Resolutions	1920 x 1200, 1920 x 1080, 1280 x 720, 1024 x 768, 800 x 600
Wide Screen Supported	Yes
Connector A	1 - VGA (15 pin; High Density D-Sub) Female Input
Connector A	1 - 3.5 mm Mini-Jack (3 Position) Female Input
Connector B	1 - USB Type-B (9 pin) USB 3.0 Female
OS Compatibility	Windows® 10, 8.1, 8, 7
Power Source	USB-Powered
Humidity	20% to 80% (non-condensing)
Operating Temperature	0°C to 40°C (32°F to 104°F)
Storage Temperature	-5°C to 40°C (23°F to 105°F)
Shipping (Package) Weight	0.9 lb [0.4 kg]
Included in Package	1 - USB 3.0 capture device for VGA video
Included in Package	1 - USB 3.0 cable
Included in Package	1 - quick start guide
