

**Introducing the new Toshiba Satellite and Satellite Pro NB10 laptops:
where value-added flexibility meets feature-rich performance.**

- ***Satellite NB10 is light, easy to use with an optional touchscreen - an ideal secondary device or first Windows 8 laptop for pupils***
- ***Satellite Pro NB10 is the perfect IT solution for schools, thanks to easy manageability, flexibility and no compromise features***
- ***Cost-effective 29.5cm (11.6") laptops with a range of full size ports, dongle-free connectivity and a full keyboard***

London, UK, September 5th 2013 – Toshiba UK today announces the new Satellite and Satellite Pro NB10 laptops – rich in features without compromising on portability, these sleek, light and compact laptops are easy to manage, secure and use. With full Windows 8 functionality, including the option of touch, both versatile models are made to add value – either as a cost-effective laptop or an affordable IT solution in schools.

“These inventive laptops redefine what a small, ultra-mobile and affordable PC can offer,” says Matt McDowell, Marketing Director at Toshiba Europe GmbH. “The Satellite NB10 has all the functionality needed to enjoy consuming and creating content such as high quality stereo speakers or utilising the full size keyboard. The Satellite Pro NB10 is a flexible learning device, so schools gain the full set of features and ports required to teach pupils about or with IT. Whether it’s a parent buying for a child, a teacher using with pupils, a small business solution or a secondary device, both models offer excellent value for money from a brand they can trust.”

Smart, cost-effective mobile companion

Each affordably priced Satellite and Satellite Pro NB10 is beautifully styled, available in silver or black respectively, and light in weight, making it the ideal companion for entertainment on the move or productivity around the classroom. The 29.5cm (11.6") display with HD resolution means on-screen content is always clear down to the smallest detail – while the full-size keyboard makes typing easier and more convenient, for smoother working and data input without the hassle. Weighing from 1.3kg¹ for complete mobility, both models are easy to carry and use anywhere.

Feature-rich and value-packed

With full Windows 8 functionality and the option of a touchscreen, users have everything they need for fast, fluid working or entertainment - at home, in the classroom or on the move. Perfect for smaller fingers, children can tap, swipe and navigate their way around the intuitive touch display in a completely natural way using the Satellite or Satellite Pro NB10t. Available with the latest Intel® Celeron® or Pentium® processors, all models deliver great performance to power through everyday tasks with ease. Users also get a better overall performance with up to 4GB memory and plenty of storage for their favourite media and documents, with a 500GB HDD built in.

Comprehensive dongle-free connectivity

Despite their compact form factor, the Satellite NB10 and Satellite Pro NB10 come with a complete set of full-size ports, so there's no need to buy any special cables or adapters. A VGA and HDMI® port allow connection to external screens and projectors, making it easy to connect to a TV or larger display – particularly useful when sharing content or teaching a group of students. Data can also be transferred over to other devices via the multiple USB ports including one USB 3.0 port. The option of Wi-Fi® a/g/b/n allows ultra-fast speeds and makes web browsing and file downloads much quicker. Alternatively connecting to a network is possible using the LAN port – and with an SD card slot onboard users can extend their storage further.

Easy to use, manage and secure

Out of the box, these laptops are user-friendly and highly protective. The spacious HDD, RAM and Wi-Fi module is readily accessible for easy manageability while the EFI BIOS setting layout provides features like secure boot-up to keep your laptop safe. A Kensington® lock has also been included to reduce the chances of theft.

The Toshiba Satellite NB10 and Satellite Pro NB10 will be available in Europe during the fourth quarter of 2013.
