Description

Perfect for your home or office workstation, the TLP808B Protect It! 8-Outlet Home-Computer Surge Protector features a surge suppression rating of 1440 joules to defend your sensitive electronic components against strong surges and spikes. In fact, Tripp Lite will repair or replace any connected equipment damaged by surges, including direct lightning strikes, up to \$75,000 for life (valid in the U.S., Canada and Puerto Rico only).

The TLP808B includes full normal mode (H-N) and common mode (N-G/H-G) line surge suppression, as well as technology that filters out disruptive EMI/RFI line noise, preventing interference from disrupting your electronics and inflicting damage or data loss.

Your computer and peripherals plug into eight NEMA 5-15R outlets, including three widely spaced outlets designed to accept bulky transformers without blocking adjacent outlets. Built-in child-safety covers block accidental contact with unused outlets. Integrated 15-amp circuit breaker protects all outlets against dangerous overloads. Lighted on/off switch provides one-touch control over connected equipment. LEDs indicate protection status and that your wall outlet is properly grounded.

The eight-foot AC power cord allows the TLP808B to reach distant outlets, while its right-angle NEMA 5-15P plug allows furniture and equipment to be moved flush against the wall to save space in your workstation. Keyhole slots on the bottom panel provide convenient wall or desk mounting options.
