**XBOX 360<sup>®</sup> Communicator**

**User Guide**

## Setup

Insert the 2.5mm headset connector into the controller expansion port on the bottom of your XBOX 360® controller.

## About the XC1 Headset

The Turtle Beach XC1 enhances your XBOX LIVE® gaming experience, allowing you to communicate and strategize with your teammates more accurately and more comfortably than a standard communicator. The XC1 features a unique slotted ear cup design that lets you hear external sounds and chat at the same time, so you'll never miss out on the action.

## What's in the Box

## Configure XBOX 360 Settings

1. Press the XBOX guide button to access the XBOX 360 Dashboard.
2. Navigate to the “Settings” tab and select “Preferences”.
3. On Preferences menu, select “Voice”.
4. Select “Play Through Headset”.

## Safety Notice

To avoid potential damage to the device, always disconnect all cables before transporting it.

**WARNING:** Permanent hearing damage can occur if a headset is used at high volumes for extended periods of time, so it is important to keep the volume at a safe level. Over time, your ears adapt to loud volume levels, so a level that may not cause initial discomfort can still damage your hearing. If you experience ringing in your ears after listening with the headset, it means the volume is set too loud.

The louder the volume, the less time it takes to affect your hearing. So, please take care to listen at moderate levels.

- Before placing a headset on your ears, turn the volume down completely, then slowly increase it to a comfortable level.
- Turn down the volume if you can't hear people speaking near you.
- Avoid turning up the volume to block out noisy surroundings.

#### IC Radiation Exposure Statement for Canada

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with IC RF exposure compliance requirements, Please avoid direct contact to the transmitting. End users must follow the specific operating instructions for satisfying RF Exposure compliance. The equipment must not be co-located or operating in conjunction with any other antenna or transmitter. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. Caution: The device is incapable of transmitting in the band 5600-5650 MHz band in Canada.

#### FCC Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This product is CE marked according to the provisions of the R&TTE Directive (99/5/EC)
