Backup Window

0.35 MIN - 105.4 H

Longest job: 105.4 H
12-hour+ jobs: 196

Backup Success Rate

98%

Completed jobs: 15,829
Failed jobs: 215

Deduplication Saving Potential

95%(730.26 TB)

Total Backups: 767.13 TB
With StoreOnce: 36.87 TB

Average Restores per Week

0.06

Avg. weekly restores: 0.06

Free HPE StoreOnce NinjaProtected backup assessment

Backup assessments have become one of the most popular storage services from Hewlett Packard Enterprise. The process takes less than an hour, depending on the size of your environment. We capture meta data from the backup application itself and thereby access no real customer data.

Each assessment analyzes key industry backup metrics from all the backup jobs and provides: backup window, backup success rate, failed backups, number of restores, failed restores and potential saving through data deduplication.

After we analyze the data, you receive an executive report with an overall assessment of your backup environment and a benchmark for any future assessments.

NinjaProtected backup assessment value

The following is a list of information that the **free** NinjaProtected backup assessment provides:

• Backup window

• Backup job success and failure rates

• Top 15 backup jobs by runtime

• Restore operations statistics

• Data retention time frames

• Total capacity used

• RMC benefits analysis

• Opportunities for cost reduction

Get Protected Guarantee (GPG)

By performing a free NinjaProtected backup assessment, Hewlett Packard Enterprise and its partners can demonstrate how customers can reduce the amount of backup data they need to store by 95 percent—guaranteed.[1]

GPG program details

• Applies to any new HPE StoreOnce System including HPE StoreOnce VSA

• Data types include files servers, Microsoft® Exchange, and virtual machines (using agentless backup methods)

• Audio and video files cannot exceed 10 percent of the total data within a backup

• If the guarantee is not met, Hewlett Packard Enterprise will make up the difference with additional capacity and support

GPG program requirements

• Complete the NinjaProtected assessment to determine if you qualify for the GPG

• Backup applications supported: HPE Data Protector or Veritas NetBackup

• Customer must perform daily and weekly full backups to qualify for the 95 percent guarantee[1]

• Customer must retain their stored data for a minimum of 90 days

• Customer data may not be encrypted or pre-compressed

• Only specific data types are applicable for GPG; see the "**Terms and Conditions**" for details

[1] As compared to a fully hydrated backup

HPE StoreOnce Systems

- HPE StoreOnce VSA (4 TB, 10 TB, 20 TB, 50 TB)

- HPE StoreOnce 3100 (5.5 TB usable)

- HPE StoreOnce 3520 (Up to 15.5 TB usable)

- HPE StoreOnce 3540 (Up to 31.5 TB usable)

- HPE StoreOnce 5100 (Up to 216 TB usable)

- HPE StoreOnce 5500 (Up to 864 TB usable)

- HPE StoreOnce 6600 (Up to 1.7 PB usable)

Key features

Industry-leading, scale-out architecture from small and remote offices to enterprise data centers:

- Federated deduplication across the enterprise with a single deduplication technology

- Backup within your window and meet your restore service-level agreements (SLAs) with HPE StoreOnce

- Automated, efficient backup and disaster recovery operations with HPE StoreOnce Catalyst
