

## Jobsite FM Radio | 15 W | Bluetooth® | IPX5 | Carrying Handle | Yellow / Black

### General information

With an IPX5 rating this Nedis® jobsite FM Bluetooth® radio is protected against rain, spilled drinks and even water jets. This makes it the perfect heavy-duty audio solution to use it on construction sites and for your DIY projects at home. Shock-absorbing sides provide proper protection against accidental knocks and blows, the risk of which is already strongly reduced thanks to its bright, yellow colour.

With 20 preset stations, you don't have to search for your favourite FM radio station. You can also play your own tracks: either connect the 3.5-mm stereo audio input connector to your smartphone, or stream music via Bluetooth wireless technology.

This FM radio equals non-stop listening, throughout your entire on-site working day as it's powered by batteries (not included) but is also equipped with a power cable.

### Features

- IPX5 rating - to protect against water jets
- Shock absorbing - the shock absorbing sides gives it extra protection when needed
- Bluetooth® function - to select the music of your choice via a Bluetooth® device
- Excellent sound quality - thanks to its 15 W peak power
- 20 pre-set stations - to store your favourites
- Carrying handle - to easily take it with you
- 3.5-mm audio input - to connect 3.5-mm devices such as a smartphone
- Eye-catching - it stands out in every environment because of the design and striking colour
- Always playtime - both powered via a power cable and via 6x C batteries (not included)

### Specifications
