

imagePROGRAF iPF650

OVERVIEW

The 24" imagePROGRAF iPF650 is an ideal large format printing solution for personal and small workgroup users in education or office markets. Built for speed, quality and ease of use, the iPF650 is a versatile solution designed to simplify large format printing.

With a new space-saving, environmentally-conscious design, the iPF650 allows for outstanding ease-of-operation in any environment, whether you need to load paper or navigate through the intuitive control panel. And with accounting functionality, a sub-ink tank system, and Gigabit Ethernet support, this printer achieves exceptionally high measures of productivity. With on-board support for HP-GL/2 and HP RTL files, standard and HDI printer drivers, and included PosterArtist Lite, the iPF650 provides the versatility and flexibility needed to be used in a wide variety of industries and applications, all in one captivating package.

FEATURES

- ▶ High-Speed Printing: L-COA processor
- ▶ Space-saving, Environmentally-conscious Design
- ▶ Productivity: Print Longer without Interruption
- ▶ Precision Printing: High-Density PF-04 Print Head
- ▶ Print Job Accounting Manager
- ▶ Economy Print Mode
- ▶ Reactive Ink System
- ▶ HDI Driver
- ▶ Canon Printer Driver
- ▶ PosterArtist Lite
- ▶ Print Plug-in for Microsoft Office

High-Speed Printing: L-COA processor

Output a D-size (24"x36") drawing in approximately 28 seconds*. When you need to keep projects moving forward and meet deadlines, this kind of speed is critical. Powering these incredible print speeds is Canon's L-COA (Large Format Printer Common Architecture) print controller, driving the imagePROGRAF print engine to lay down ink with exceptional speed and precision. This unique, high-speed processor enables the print system to process large volumes of data while optimizing output of complex high-color GIS images and architectural renderings for maximum readability and color accuracy.

*When printing in fast mode on plain paper. Includes paper-cutting time.
