## EVOKE Mio

Radio with Character

With our well-known green credentials we're all for recycling here at PURE, so when we saw the opportunity to reuse a few design ideas from the 1950s, update the technology and add a PURE twist, we jumped at it. The resulting radio is as cute as it gets, so cute that we think it'll still look good in the 2050s.

More than just a design exercise, Mio sounds fantastic too. And so it should: under its retro-modern skin is our very own EVOKE-1S, What Hi-Fi Sound & Vision's 'Best Portable DAB Radio of 2007'.

Mio is our first portable radio to come with a removable ChargePAK pre-installed. Plug it in when you can and the ChargePAK charges while you listen; unplug it, and you've up to 24 hours portable DAB listening per charge.

A classic easy-to-use radio, Mio also includes an input for your iPod/MP3 player, Intellitext® and textSCAN™, FM with RDS, a striking new auto-dimming OLED display, an alarm, a kitchen timer and a USB connector for future product upgrades.

Two-tone leather and suede effect finish

Rechargeable with up to 24 hours of portable DAB listening per charge

Auto-dimming Organic LED display for superior contrast and readability

Connect an iPod/MP3 player or portable CD

## Features

DAB digital radio and FM with RDS.

Two-tone leather and suede effect finish.

Rechargeable with up to 24 hours of portable DAB listening per charge.

Auto-dimming Organic LED display for superior contrast and readability.

Connect an iPod, MP3 or CD player.

Browse stored scrolling text.

Pause and control scrolling text.

Dedicated kitchen timer button.

Easy to use tone or radio alarm.

30 DAB or FM presets.

Add new features as they become available via USB.

### i-10 Powered Universal iPod Dock Available Separately

- Connect to EVOKE Mio or any product with a 3.5mm stereo line input
- Charges the iPod while docked
- Navigate and control the iPod with the supplied remote control

EcoPlus

EcoPlus products are designed and manufactured to minimize their environmental impact, with:

- reduced power consumption in operation and standby (see graph opposite)
- use of materials from recycled and sustainable sources
- the smallest possible packaging
- components selected to minimize environmental impact

EVOKE Mio power consumption vs. industry average
