

Thunderbolt 3 Mini Dock - Portable Dual Monitor TB3 Docking Station with DisplayPort 4K 60Hz - 1x USB-A (3.2) & GbE - 11" Attached Cable - Laptop Multiport Adapter - Mac/Windows

Product ID: TB3DKM2DPL

This certified Thunderbolt 3 docking station is a compact mini dock, delivering essential connections for productivity. The bus-powered dock connects dual 4K DisplayPort displays, Gigabit Ethernet, and one USB (Type-A) port and for flexible set up, the attached USB-C cable has an extended length of (11 in./ 28 cm).

Great for editing 4K video or other Ultra HD tasks, this portable Thunderbolt 3 to DisplayPort dock supports 40 Gbps of throughput and 4K resolution at 60Hz on dual HDMI monitors, through a single Thunderbolt 3 port. Run resource-demanding applications on two independent displays without draining system resources.

2x 4K DisplayPort (DP) displays (up to 4096 x 2160p @ 60Hz)

At just 2.4" x 4.9" (6.1 cm x 12.4 cm), this dock takes up minimal room on your desk and in your laptop case. The dock's 28 cm (11 inches) attached cable provides extended reach to reduce port/connector strain on MacBooks and laptops on riser stands, or if needed, offers the flexibility to position dock further away from the laptop on your desk.
1x USB 3.0 Gen 1 Type-A port (5Gbps)1x Gigabit Ethernet port (with PXE Boot and Wake-on-LAN support)

As many high powered, latest generation laptops require a power supply of more than 100W to stay charged, many users prefer to use their own power adapter instead of relying on PD passthrough many larger docking stations provide.

This bus-powered TB3 mini dock offers full Thunderbolt 3 docking station performance and functionality while allowing high powered workstations to use their proprietary power supply (also ideal for laptops with power barrel connector).

The TB3DKM2DPL is Thunderbolt Certified and backed by a StarTech.com 3-year warranty and free lifetime technical support.
