STEP 1 - Introduction

OVERVIEW

The KV62-CBL is a 2-port DisplayPort USB KVM switch with 2 sets of USB KVM & Audio/Mic combo cables and a wired QuickSwitch button for easy connection to your two computers. It allows you to access, control, boot and reboot two USB-enabled multimedia computers with only one USB keyboard, mouse, display, speaker set and microphone. For easy and fast switching between two computers, you can use the QuickSwitch button.

The KV62-CBL DisplayPort USB cable KVM switch offers USB 2.0 interface technology for plug-and-play and hot-plug abilities. In addition to connect to mouse or keyboard, those two USB 2.0 ports can also be connected to other high-speed USB devices. Users can enjoy maximum flexibility and convenience with its compact and one-piece design.

STEP 2 - Installation

INSTALLATION STEPS

Take the cable KVM switch out of the box and follow the steps below for installation.

1. Connect a monitor, USB keyboard, and USB mouse to the respective consoles port on the KVM front panel.
 2. Connect the fixed KVM/audio and mic cables to a computer's connectors. Connect another set of cables to another computer.
- Installation is completed. Now you can operate the KVM switch immediately.

NOTE: Some older computers with USB interfaces might need to manually enable the USB option in the BIOS settings before you can use any USB devices. If your USB interface does not work, check the USB option status in the BIOS.

STEP 3 - Operation

There are two methods to control your KVM switch for computer and audio/mic port selection: using (1) QuickSwitch Button (a wired remote control) or (2) Keyboard hotkeys.

1. QuickSwitch Button (a wired remote control): The QuickSwitch button is a wired remote control that allows you a direct switching control. Simply press the button to toggle between two computers.

2. Keyboard Hotkeys: For keyboard hotkey operation, refer to the Quick Reference Table below.

TABLE 1 . QUICK REFERENCE TABLE

COMMAND	QUICK SWITCH BUTTON	KEYBOARD HOTKEYS	DESCRIPTION
Select PC Port	Press the button to toggle between the two computers.	Scroll-Lock + Scroll-Lock	Select PC Port

NOTE: Press each keystroke in a hotkey sequence within two seconds. Otherwise, the hotkey sequence will not be valid.
