VisionTek®

Micro USB to USB Smart LED 1 Meter Cable

VisionTek Part# 900864

The VisionTek Micro USB to USB Smart LED 1 Meter Cable helps you make a reliable and affordable connection to a wide variety of micro USB based mobile devices. With full compatibility with Android OS, you'll enjoy error-free use while connecting to a USB port for charging and data syncing. At just over three feet in length, this handy cable offers device placement flexibility. Don't get caught not being able to charge in the car or office... this cable makes it the affordable spare cable solution.

Features

Patented LED Charging Status indicator:
- Pulsing red light when charging up to 90%.
- Flickering green light when approaching full charge.
- Solid green light when fully charged.
- Blue light indicates quick charge capable device has been identified and cable is operating in quick charge mode.

Reversible, gold-plated connectors: The USB Type A connector and the micro USB connector are both double-sided. This means you can plug in upside down or right-side up and still make a positive connection.

At-a-glance charging status: Eliminates turning on screen or fumbling with your phone in dark… LED gives instant at-a-glance charging status update.

Durable and versatile: Gold-plated connectors provide the ultimate connection for numerous devices. Slim tip fits many protective cases so you don't have to remove your case to charge a device.
