HP Recycled Series 15.6" Backpack

The backpack designed with the environment in mind

Helps protect the planet and your notebook[1] and daily essentials with the stylish, durable HP Recycled Series 15.6" Backpack, a carryall made from recycled plastics.[2]

From plastic bottles to beautiful backpack
Marvel at the innovation that converts shredded recycled plastics into small flakes and plastic chips, which are then heated and spun into yarn to create a weather-resistant fabric that looks sharp in and out of the office.

Pack it all in
Slide your notebook[1] into the padded compartment that keeps it securely in place. Store your AC adapter in the bottom zip compartment and essentials in the top compartment with an expandable pocket. The exterior holster holds your water bottle.

Comfort every which way
Keep comfortable with padded shoulder straps and a sternum strap that prevents riding up on the chest, or turn the bag and carry by the side handle. Stay cool with an air mesh back panel. Protect your valuables with a soft-lined quick access pocket.

Traveling is a breeze
Roll through the airport hands-free with the convenient luggage pass-through that supports stacking the backpack on a rolling suitcase. Master TSA check-ins with a notebook compartment that zips open and lays flat.

1. Up to 15.6" diagonal.
2. Backpack body material constructed with 70% recycled material (40% recycled polyvinyl butyral (RPVB); 60% recycled polyethylene terephthalate (RPET). The inner lining is 100% RPET. Webbing and hardware such as zippers and buckles are not made from recycled materials. Hardware is nickel-free.
