

Digital Camera d3500

The HP Digital Camera d3500 has the look and feel of a DSLR but the simplicity of a point-and-shoot camera. The d3500 offers 14 MP resolution photos, 720p HD video recording and powerful 36X optical zoom. With its large 3-inch LCD, framing and viewing photos is quick and easy. The 24 mm wide-angle lens delivers an extensive range of creative options from wide-angled landscape shots, to live sports, and wildlife close-ups. The d3500 has ample focusing precision to capture macro shots of your favorite flowers and insects.

High Definition Photos with Outstanding Clarity

The HP d3500 offers you 14 MP high resolution and 720p HD video recording to capture videos or photos with outstanding quality. With a powerful 36X optical zoom and wide-angle lens, the HP d3500 lets you magnify and capture photos in amazing detail. The HP d3500 offers you everything you need to capture special moments that you will want to share with family and friends.

Easy and Simple User Interface

The easy-to-use interface combined with the mode select wheel has modern icons and a logical layout for improved visibility when navigating the menu selections, even in bright light. The d3500 features an Auto Scene Mode that makes the complications of digital photography a thing of the past.

Fast and Reliable Performance

The HP d3500 takes point-and-shoot camera performance to a higher level. Its fast power on to shoot time helps you avoid missing those once in a lifetime impromptu photos. The HP d3500 can quickly focus on your subject, which reduces the frustration of missing a shot waiting for the camera to catch up with an ever changing situation. Use the burst mode to snap photos continuously while pressing the shutter button. The d3500 has fantastic low light performance so you can feel confident capturing photos indoors.

24mm Wide-angle Optical Zoom Lens

The 24mm wide-angle lens allows you to capture large family group shots from a few feet away, greatly improving the aesthetics of your photos. It is also perfect for taking photos in cramped spaces, as it increases the picture area and allows you to include more people and/or objects in the photograph.

The exceptional 36X optical zooms lens allows you to capture distant objects in brilliant, close-up detail in a manner which even some DSLRs cannot do with their standard lenses.

Over 20 Scene Modes

With 24 scene modes, you can easily ensure the best shot is captured in different shooting situations. Pick the mode that best matches your activity or use the Auto scene mode to let the camera detect the conditions and select the best mode for you.

You will have fun experimenting with the many scene modes. You can take the same shot with several modes and select the best for your photo collection.

More Control

The d3500 gives you more control of the camera settings. Rotate the mode select wheel to the desired setting of Program, Aperture Priority, Shutter Priority, and Manual mode (PASM). Having more control over your camera means having more control over how your pictures turn out.

Digital Camera d3500

SPECIFICATIONS
