

High-performance media server with iSCSI for cross-platform content sharing and data protection

Ultra Series	ReadyNAS® Ultra 2	ReadyNAS® Ultra 4	ReadyNAS® Ultra 6
Ultra Plus Series	ReadyNAS® Ultra 2 Plus	ReadyNAS® Ultra 4 Plus	ReadyNAS® Ultra 6 Plus

Ultra fast. Ultra safe. Ultimate media experience.

High Performance:

- Powered by the fastest Intel® processors

Expandable Storage:

- Dynamic X-RAID2™ volume expansion technology

Convenient and Flexible:

- Front-loading drive bay, hot-swappable, diskless and populated configurations

Superior Media Features:

- DLNA® Certified™, remote and mobile access, HD photo sharing, and TiVo® streaming and backup support¹

¹In select locations where TiVo® DVR service is available.

The ReadyNAS® Ultra family is designed specifically for advanced media users in home and small business environments

Available in diskless and populated configurations, the NETGEAR® ReadyNAS® Ultra family provides advanced multimedia sharing, file sharing, iSCSI block access, and dynamic ReadyNAS® X-RAID2™ volume expansion technology so that advanced home and small business users will enjoy an optimal content sharing and data protection experience.

Home users will enjoy media-rich features such as ReadyDLNA™ media serving, ReadyNAS® Photos II HD photo sharing, ReadyNAS® private cloud technology, and ReadyNAS® mobile access for iOS and Android™ devices. Advanced home users can also download a wide selection of add-ons from the ReadyNAS® community to run on their ReadyNAS® storage device. Because the ReadyNAS® Ultra family is a Linux®-based storage platform, it can support just about any open-source program designed by our ReadyNAS® users—and there are plenty to choose from. ReadyNAS® users can, for example, transcode their videos on the fly using Plex or download peer-to-peer (P2P) files using Transmission.

Small business users, on the other hand, will appreciate NETGEAR's industry-leading warranty terms, ReadyNAS® Vault™ hybrid cloud solution, and other useful add-ons from NETGEAR® and NETGEAR® partners that support business continuity and growth.

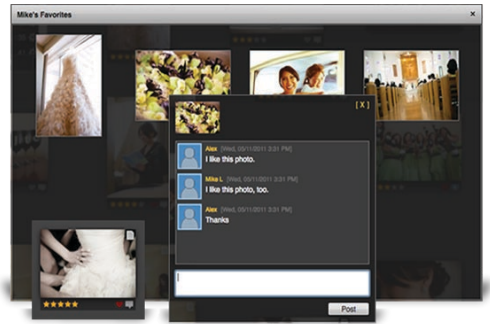

Create your own Private Cloud

With NETGEAR® ReadyNAS® private cloud technology, home and small business users can now turn their ReadyNAS® storage device into a private cloud so they can access, view, edit, or share their data remotely. ReadyNAS® users get bigger storage capacity, tighter privacy and security controls, and best-in-class storage features at affordable prices—without the monthly usage fees, subscription charges, or capacity limits. It has never been easier to store, share and protect your data.

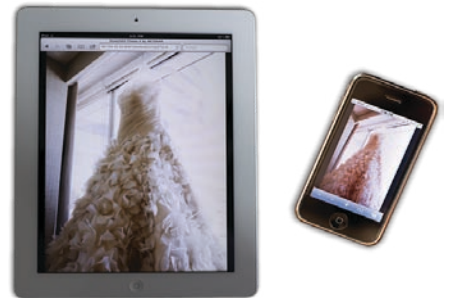

ReadyNAS® Photos II™ is an online photo sharing application that allows users to share their once in a lifetime moments with their social network—directly from their ReadyNAS® storage device.

- Host a premium photo site without paying any monthly fees
- Display HD photo albums beautifully in cover flow or slide show mode
- Add a custom playlist for a personal audio and visual experience

ReadyNAS® Remote™ is an advanced remote access application that allows users to transmit data securely over an encrypted tunnel so that data is protected as it transfers to/from the ReadyNAS®.

- Enjoy the simple drag-and-drop user interface on local, remote, and mobile devices
- Access and share data from anywhere quickly and easily without the clunky Web interface
- Save and modify files from anywhere using ReadyNAS® mobile app for iOS and Android™ devices

ReadyNAS® Vault™ is a hybrid cloud application embedded on all ReadyNAS® systems that offers maximum performance at the local level while providing automatic backup and disaster recovery solution at the Web-based storage level.

- Add a second layer of data protection by saving a copy to an off-site location that is Web-accessible
- Copy, modify, and recover files from one or more ReadyNAS® systems from anywhere in the world
- Synchronize files automatically with continuous backups or regularly scheduled backups
