Overview

Today's information technology manager faces a variety of challenges, many of which are driven by dynamic business conditions. Mergers and acquisitions, migrations to new systems, and office consolidations often require the relocation of IT facilities.

However, relocating information systems means more than just moving boxes. Systems from a variety of vendors that are critical to the operation of your business may be involved. These systems can be fragile and may require special handling. In addition, it may be necessary to coordinate relocation of hardware from several vendors.

Relocation Services

Hewlett Packard Enterprise IT Relocation Services offer complete management of equipment relocation activities at a known fixed price.

Whether your relocation involves the move of a few servers or a complete data center, we can help. HPE coordinates all of the diverse activities and appropriate resources necessary to implement and conclude a successful move.

These flexible services can be tailored to your company's needs. We also offer a fully insured equipment moving service, whether you are moving across a room, or across the country.

HP Data Center Services

HPE IT Relocation Services are part of the portfolio of HPE Data Center Services. These services are designed to help organizations improve existing information technology (IT) facilities or build the physical aspects of new data centers.

Benefits to you

HPE Relocation Services deliver these benefits:

- Protection of your computing investment
- Assurance of an effective operating environment in your new location
- Time savings and minimized financial risk by having HPE coordinate and manage the move
- Minimal business disruption during relocation
- Convenience of a single point of contact for all aspects of the relocation
- Fixed price for a fixed scope of work

Solution brief

- Professional, insured equipment handling
- Equipment preparation, de-installation, and re-installation
- Clearly defined relocation terms and conditions
- Service delivery available on a 24x365 basis
- Relocation of HP and multivendor information technology hardware

Service Features

FEATURE	DELIVERY SPECIFICATIONS
Single Vendor Coordination	HPE manages all aspects of the relocation of your IT equipment, so you can focus on other activities necessary to minimize the effects of the relocation on your business operations. You avoid the need to contract with several different vendors to deliver each phase of the relocation. HPE insures the entire equipment move, which eliminates customer liability.
Site preparation and verification	At your new location, HPE can perform a complete site survey and make recommendations regarding requirements for electrical power, air conditioning, room layout, security, and other key computing environment factors. HPE then verifies that the recommendations have been properly implemented prior to the equipment move.
Professional, insured equipment handling	HPE contracts with a commercial carrier that specializes in moving sensitive electronic equipment, which reduces the risk of in-transit equipment damage. HPE reduces your financial risk by fully insuring the equipment during the move, and by assuming full responsibility for safely relocating your equipment. Before the move, HPE works with you to establish replacement values for obsolete and non-HP products.
Equipment preparation, deinstallation, and reinstallation	Relocation services include professional preparation and deinstallation of your equipment for shipment. HPE reinstalls your equipment, and verifies the configuration and functionality of your computing environment in its new location.
Clearly defined relocations Terms and Conditions	HPE clear relocation terms and conditions eliminate questions regarding scope of work and delivery—you know exactly what you are getting when you choose HPE to perform your relocation.
Service delivery available on a 24x365 basis	HPE offers a relocation service that is completely flexible with regard to timing. Moves can be performed after hours, on weekends, or in a phased approach that reduces the impact on your business.
Relocation of HPE and multivendor IT hardware	Complex data center environments typically include hardware from several vendors. HPE Relocation Services specialize in moving IT hardware, regardless of the manufacturer.
Consistent and proven relocations processes	HPE has performed thousands of relocations of IT equipment. This experience has allowed us to develop proven processes that enable an efficient move, with less disruption to your critical business operations.
