

APC G Type Power Filters

The APC G Type Power Filters provides surge protection and noise filtering for high-performance AV systems. Isolated power filter banks eliminate electromagnetic and radio frequency interference (EMI/RFI) as a source of AV signal degradation.

Some G Type models include network manageable power filters allow for remote reboot of individual outlets and watchdog system automatically detects and restores lost connections.

For guaranteed protection from damaging power transients and performance-affecting EMI/RFI noise interference in a 1U rack-mount design, choose a G Type power filter.

APC G Type Power Filters

Guaranteed Surge Protected Outlets

Ensure connected devices like a TV, receiver, DVR, and sound system are safe and protected from surges, spikes, and lightning strikes.

Network Manageable*

Real-time remote monitoring of connected loads, user-defined alarms to warn of potential circuit overloads, and full control over outlets through remote commands and user interface settings. *G50NETB2 and G50NETB-20A2

Visual LED Indicators

LED status indicators provide visual unit and power status updates.

Isolated Power Filter Banks

Eliminate electromagnetic and radio frequency interference (EMI/RFI) as a source of AV signal degradation.

Sequenced On/Off

Helps power on components in the proper order to prevent speaker stress. Proper sequencing can also help manage current draw on startup to prevent unnecessary circuit breaker tripping.

Lifetime Warranty and Equipment Protection Policy

Lifetime warranty and \$450,000 Equipment Protection Policy.
