

CyberTrack 830

4K 11-Megapixel Dual Mode Document Camera and Webcam

The Cybertrack 830 is a powerful dual-mode document camera that functions as a webcam. Capable of using its adjustable multi-joint arm, and autofocus lens feature to capture real-time images of 3D objects, magazines, books, documents, and pictures then present them through a monitor or projector. Combined with a powerful visualizer software that allows the user to control more features such as annotation, zoom in, zoom out, rotate, mirror, freeze the live video, change the resolution, adjust exposure, split-screen to compare images, using the interactive whiteboard function, and more.

■ Dual Mode

Use the CyberTrack 830 as a convenient document camera or as a webcam to match your specific needs. Switch back and forth simultaneously by flipping the lens vertically.

■ 4K Ultra HD Video Resolution

The CyberTrack 830 lets your audience feel like they are in the room with you with 4k Ultra High Definition up to 3840X216 video resolution.

■ Distance Learning Camera

With the functionality of a camera you can use it to your advantage to do online learning, remote classes, and show-case your paperwork with just one device.

■ Autofocus with Digital Zoom

The unique down-facing lens makes repetitive image capturing, demonstrations, tutorials and lectures comfortable and simple with it's clear image.

■ Video Recording

Record videos of just about anything, edit images and videos with the advanced editing tools, plus enjoy the convenience of sharing.

■ Photo Capture

The unique down-facing lens makes repetitive image capturing comfortable and simple. Using autofocus lens.
