

### Product Overview:

The LPT-M1 ListenPoint Microphone/Media Interface Kit (M1) is a wireless microphone used by teachers and students so they can clearly be heard by everyone in the classroom. It has the ability to interface to external sources wirelessly such as smart phones and lap top computers. It offers exceptional audio quality, ease of use and years of dependable service. The intuitive design allows the user to control volume. The M1 uses advanced lithium ion battery technology and intelligent battery management to maximize battery life, minimize battery charging time and increases the time between battery replacements. The included drop-in charger makes charging simple and fast.

### Highlights:

- Wireless microphone worn by the teacher (lanyard or belt worn)
- Can also be used as a pass around microphone for students
- Teacher can adjust volume of microphone and all other connected audio sources
- Included drop-in charger
- Connect your smart phone, lap top or other device directly
- Advanced Lithium ion battery technology provides up to 8 hours of battery life and is charged in under 2 hours
- Battery is replaced much less often than other battery types
- Soft button can be customized to meet your specific needs, such as emergency call, screen control and more
