## Status Icon Information

Your product may display status icons on the LCD screen for certain product status conditions. Press  to view or change the current network settings.

Icons	Description
	Displays additional information or instructions, such as on loading paper or placing a document.
	A document is in the Automatic Document Feeder (ADF).
	The ink cartridge is running low on ink or the maintenance box is nearly full. Press the <b>i Status</b> button to open the Status Menu, select <b>Printer Information</b> , and check the status of the consumables.
	The ink cartridge is expended or the maintenance box is full. Press the <b>i Status</b> button to open the Status Menu, select <b>Printer Information</b> , and check the status of the consumables.
	Unread or unprinted fax data is stored in the product. If you have set up the product to save received faxes on a computer or external storage device, this icon may also indicate that received faxes have not been saved on the computer or storage device.
	Fax memory usage.
	Fax memory is full. Delete received faxes you have already read or printed. If you have set up the product to save received faxes on a computer or external storage device, turn on the computer or connect the storage device to the product.
	A fax is sending or receiving.
	A Wi-Fi or an Ethernet connection is being processed.
	No Ethernet connection.
	An Ethernet connection has been established.

Icons	Description
	No Wi-Fi connection.
	A Wi-Fi network error has occurred or the product is searching for a connection.
	A Wi-Fi connection has been established. The number of bars indicates the connection's signal strength.
	An Ad hoc connection has been established.
	A Wi-Fi Direct mode connection has been established.
	A Simple AP mode connection has been established.
	Access to the product's functions are restricted to authorized users. Press the icon to log in to the printer. (You need to enter a user name and password.) Contact your administrator if you do not know the login information.
	Access to the product's functions are restricted to authorized users and a user is currently logged in. Press the icon to log out.

**Note:** If you see a numbered icon on top of the **Fax** icon on your product's LCD screen, received faxes have been temporarily saved to the product's memory.

**Parent topic:** [Control Panel Buttons and Lights](#)

### Status Button Information

Press the **i Status** button on the control panel to view the current product and job status.

Function	Description
Printer	Displays the status of consumables and any errors that have occurred with the product. Select the error from the list to display the error message.
Job Monitor	Displays the current job and any jobs waiting to be processed.

Function	Description
Job History	Displays the job history and any error codes for failed jobs in the history.
Job Storage	Select <b>Inbox</b> to display received faxes stored in the product's history.
Confidential Job	Displays jobs that require a password to print.

**Parent topic:** [Control Panel Buttons and Lights](#)

## Setting a Password and Locking the Control Panel

You can set an administrator password to lock the following settings and prevent them from being changed:

- System Administration Setup settings
- Eco mode settings
- Presets
- Contacts

**Note:** For more information on administration settings, see the [Administrator's Guide](#).

1. Press the  home button, if necessary.
2. Select **Setup**.

You see a screen like this:

3. Scroll down and select **Admin Settings**.

4. Select **Admin Password**.
5. Select **Register**.

You see a screen like this:

6. Use the displayed keyboard to enter a password, and press .
7. Enter your password again to confirm.
8. Select **OK**.
9. Select **Lock Setting** and select **On**.

When the control panel is locked, you must enter the password to access any of the locked settings.

**Note:** If you forget your password, contact Epson for assistance.

[Entering Characters on the LCD Screen](#)  
[Using Presets](#)

**Parent topic:** [Using the Control Panel](#)

## Entering Characters on the LCD Screen

Follow these guidelines to enter characters for passwords and other settings.

- To move the cursor, select  or .
- To change the case of letters, select .
- To delete the previous character, select .
- To enter numbers or symbols, select .
- To enter a space, select .

**Parent topic:** [Setting a Password and Locking the Control Panel](#)

## Using Presets

You can save frequently used copy, fax, and scan settings as presets. This lets you easily reuse them whenever necessary.

**Note:** Presets can be locked by an administrator. If you cannot access or change presets, contact your administrator for assistance.

1. Press the  home button, if necessary.
2. Select **Presets**. Enter the Administrator password, if necessary.

You see a screen like this:

3. Select **Add New**.
4. Select the function for which you want to set up a preset.

You see the main screen for that function, such as the Copy screen:

5. Select the settings you want to save, and select **Save**.

You see a screen like this:

6. Use the displayed keyboard to enter a name for the preset and press .
7. Select **Save**.

When you copy, fax, or scan, you can use the preset by selecting **Presets** and selecting your preset from the list.

**Parent topic:** [Setting a Password and Locking the Control Panel](#)

#### **Related tasks**

[Entering Characters on the LCD Screen](#)

## **Changing LCD Screen Language**

You can change the language used on the LCD screen.

**Note:** This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the  home button, if necessary.
2. Select **Setup**.

You see a screen like this:

3. Scroll down and select **System Administration**.
4. Select **Common Settings**.
5. Scroll down and select **Language**.
6. Select a language.

**Parent topic:** [Using the Control Panel](#)

## Adjusting Control Panel Sounds

You can adjust the sound level heard when you press buttons on the control panel.

**Note:** This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the **home** button, if necessary.
2. Select **Setup**.

You see a screen like this:

3. Scroll down and select **System Administration**.
4. Select **Common Settings**.
5. Select **Sound**.
6. Select **Button Press**.
7. Press  to decrease or  to increase the sound.
8. Select **OK**.

**Note:** You can also adjust the **Sound Type** and the sound level for various product functions.

**Parent topic:** [Using the Control Panel](#)

## Adjusting the Screen Brightness

You can adjust the brightness of the LCD screen.

1. Press the  home button, if necessary.
2. Select **Setup**.

You see a screen like this:

3. Scroll down and select **System Administration**.
4. Select **Common Settings**.
5. Select **LCD Brightness**.
6. Adjust the screen brightness by selecting a brightness level or by pressing the left and right arrow buttons.
7. Select **OK** to exit.

**Parent topic:** [Using the Control Panel](#)

## Turning Off the Operation Time Out Setting

The Operation Time Out setting causes the LCD screen to return to the Home screen after a few minutes of inactivity. This feature is enabled by default, but you can turn it off.

**Note:** This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the  home button, if necessary.
2. Select **Setup**.

You see a screen like this:

3. Scroll down and select **System Administration**.
4. Select **Common Settings**.
5. Scroll down and select **Operation Time Out**.
6. Select **Off**.

**Parent topic:** [Using the Control Panel](#)

## Product Parts Locations

See these sections to identify the parts on your product.

[Product Parts - Top](#)

[Product Parts - Inside](#)

[Product Parts - Back](#)

**Parent topic:** [Product Basics](#)

## Product Parts - Top

- 1 ADF cover
- 2 Automatic Document Feeder (ADF)
- 3 Edge guide
- 4 ADF input tray
- 5 ADF output tray
- 6 Paper cassette 1
- 7 Optional paper cassette unit
- 8 Optional paper cassette cover
- 9 Optional paper cassette 2

- 1 Edge guides
- 2 Paper stopper
- 3 Output tray extension
- 4 Output tray
- 5 Edge guides
- 6 Rear paper feed slot
- 7 Feeder guard

- 1 Document cover
- 2 Scanner glass
- 3 Control panel
- 4 USB Type A port for external devices

**Parent topic:** [Product Parts Locations](#)

## Product Parts - Inside

- 1 Ink cartridge slots
- 2 Front cover
- 3 Print head

Parent topic: [Product Parts Locations](#)

## Product Parts - Back

- 1 **Line** port
- 2 **EXT** port
- 3 **USB** port
- 4 **LAN** port
- 5 Service USB port (do not remove sticker)
- 6 Maintenance box
- 7 Rear cover
- 8 AC inlet

Parent topic: [Product Parts Locations](#)

## Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit the driver download site at ([U.S. downloads](#) or [Canadian downloads](#)).

- **Windows:** Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:
  - Accessing the Windows Desktop and right-clicking the product icon in the Windows taskbar

- On the **Maintenance** tab in the printer settings window

You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **EPSON Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

- **OS X:** You can manually update the software by opening the **Applications > Epson Software** folder and selecting **EPSON Software Updater**.

Parent topic: [Product Basics](#)

## Using Eco Mode and Other Power Saving Settings

Your product enters sleep mode automatically and turns off the LCD screen if it is not used for a period of time. You can make the time period shorter and select other options to save energy and resources.

[Changing the Eco Settings](#)

[Changing the Sleep Timer Settings](#)

[Changing the Power Off Timer Settings](#)

Parent topic: [Product Basics](#)

## Changing the Eco Settings

You can use the product's control panel to change the Eco settings.

**Note:** The Sleep Timer setting in Eco Mode overrides the Sleep Timer setting in the Common Settings menu. If you turn on Eco Mode, 2-sided copying is selected by default. The Eco Mode setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the  home button, if necessary.
2. Select **Eco Mode**. Enter the administrator password, if necessary.

You see a screen like this:

3. Select **On**.
4. Select **Configure**.
5. Change any settings as necessary.
6. Select **OK** to exit.

**Parent topic:** [Using Eco Mode and Other Power Saving Settings](#)

## Changing the Sleep Timer Settings

You can adjust the time period before your product enters sleep mode and turns off the LCD screen.

**Note:** This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance. The Sleep Timer setting in Eco Mode overrides this Sleep Timer setting.

1. Press the **home** button, if necessary.
2. Select **Setup**.
3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.
4. Select **Common Settings**.
5. Select **Sleep Timer**.

You see a screen like this:

6. Do one of the following:
  - Press the – or + icons to reduce or increase the number of minutes.
  - Press the number of minutes on the LCD screen, select the number of minutes from the on-screen keypad, then press .
7. Select **OK**.

**Parent topic:** [Using Eco Mode and Other Power Saving Settings](#)

## Changing the Power Off Timer Settings

You can have the product turn off automatically if it is not used for a specified period of time.

**Note:** This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the  home button, if necessary.
2. Select **Setup**.

You see a screen like this:

3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.
4. Select **Common Settings**.
5. Do one of the following depending on the setting you see displayed on the LCD screen:
  - Select **Power Off Timer**, then select a time period between **30minutes** and **12h** (12 hours).
  - Select **Power Off Settings**, then select **Power Off If Inactive** to adjust the time before the product turns off automatically or **Power Off If Disconnected** to turn the product off after 30 minutes of inactivity over the network.

## Epson Connect Solutions for Smartphones, Tablets, and More

Use your smartphone, tablet, or computer to print and scan documents, photos, emails, and web pages from your home, office, or even across the globe.

Print from anywhere with these Epson Connect solutions:

- Epson Email Print
- Epson iPrint Mobile App
- Epson Remote Print

Scan and send a file as an email or upload it to an online service directly from your Epson product with Epson Scan to Cloud or the Epson iPrint Mobile App.

[Using Epson Email Print](#)

[Using Epson Remote Print](#)

[Using Epson Scan to Cloud](#)

**Parent topic:** [Product Basics](#)

## Using Epson Email Print

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

1. Connect your product to your network. See the link below.
2. If you did not already set up Email Print when you installed your product software, see the link below to use your product control panel to activate your unique email address. Or visit [epsonconnect.com](http://epsonconnect.com) to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.
3. Now you are ready to send and print emails to your product's Email Print address.

**Note:** Go to [epsonconnect.com](http://epsonconnect.com) and log into your Epson connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.

**Parent topic:** [Epson Connect Solutions for Smartphones, Tablets, and More](#)

## Using the Epson iPrint Mobile App

Use this free Apple and Android app to print and scan with networked Epson products. Epson iPrint lets you print PDFs, Microsoft Office documents, photos, and web pages over a wireless network. You can scan and save a file on your device, send it as an email, or upload it to an online service such as Box, Dropbox, Evernote, or Google Drive.

1. Connect your product to your wireless network. See the link below.
2. Visit [epson.com/connect](http://epson.com/connect) to learn more about Epson iPrint and check the compatibility of your mobile device.
3. Download Epson iPrint from the Apple App Store or Google Play.
4. Connect your mobile device to the same wireless network as your product.
5. Open Epson iPrint and select your Epson product.

Now you are ready to print or scan with your mobile device and your Epson product.

**Parent topic:** [Epson Connect Solutions for Smartphones, Tablets, and More](#)

## Using Epson Remote Print

With Epson Remote Print software, you can print from your laptop or desktop computer to an Epson Email-enabled product anywhere in the world.

1. Connect your Epson product to your wireless network. See the link below.
2. If you did not already set up an Epson Connect account when you installed your product software, visit [epsonconnect.com](http://epsonconnect.com) to create your account and register your product to the Epson Connect service.

**Note:** Make a note of your product's email address.

3. Visit [epsonconnect.com](http://epsonconnect.com) to learn more about Remote Print and how to download the Remote Print Driver software.
4. Download and install the Remote Print software.
5. Enter the email address and optional access key of your Epson product during Remote Print setup.
6. Now you are ready to print remotely. Select the print command in your laptop or desktop computer application and choose the Remote Print option for your Epson product.

**Parent topic:** [Epson Connect Solutions for Smartphones, Tablets, and More](#)

## Using Epson Scan to Cloud

The Epson Scan to Cloud service allows you to scan and send a file as an email or upload it to an online service directly from your Epson product. Register an email address or online services such as Box, DropBox, Evernote, or Google Drive with your Epson Connect account.

1. Connect your Epson product to your network. See the link below.
2. If you did not already set up an Epson Connect account when you installed your product software, visit [epsonconnect.com](http://epsonconnect.com) to create your account and register your product to the Epson Connect service.

**Note:** Make a note of your product's email address and password.

3. Visit [epsonconnect.com](http://epsonconnect.com) to sign into your account with the email address and password you selected.
4. Select your product, select **Scan to Cloud**, and select **Destination List**.

5. Click **Add**, then follow the instructions on the screen to create your destination list.
6. Now you are ready to use Scan to Cloud. Select the setting for scanning to Scan to Cloud on your Epson product control panel.

[Wi-Fi or Wired Networking](#)

## Using Google Cloud Print

With a Google Account, you can print from your Apple or Android device to your Epson product. You can also print from Chromebooks and the Google Chrome browser without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Note your product's IP address by checking your network status. See the link below.

3. Connect your computer or your Apple or Android device to the same wireless network as your Epson product.
4. Enter your product's IP address into the address bar of a web browser.
5. Select the **Google Cloud Print Services** option.

**Note:** If you don't see the **Google Cloud Print Services** option, turn your product off and back on. If the option still doesn't appear, select the **Firmware Update** option and follow the on-screen instructions to update your product.

6. Click **Register**.
7. Select the checkbox to agree to the Usage Advisory and click **Next**.
8. Click **OK** to launch the sign-in page.  
A separate browser window opens.
9. Enter your Google Account username and password and click **Sign in**, or, if you don't have an account, click **Sign up for a new Google Account** and follow the on-screen instructions.
10. Click **Finish printer registration** to complete setup and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, computer, Apple or Android device with Internet access. Visit [Epson Support](#) for more information on using Google Cloud Print, or the [Google Cloud Print](#) website for a list of [supported apps](#).

[Wi-Fi or Wired Networking](#)

## Setting Up Google Cloud Print on a Chromebook

With a Google Account, you can print from a Chromebook without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Turn on your Chromebook and connect it to the same wireless network as your product.

**Note:** See your Chromebook's documentation for details on connecting to a network.

3. Do one of the following:
  - Click **Add to Cloud Print** in the notification that appears in the corner of your Chromebook screen.  
  
**Note:** If you do not see a notification, check to see if a number appears in the status area at the lower-right corner of the screen. Click this number to open the notifications menu, then click **Add to Cloud Print**.
  - Open a web browser and enter **chrome://devices** in the address bar. Skip to step 4.
  - If you see a registration confirmation screen instead, click **Register**.
4. Click **Add Device**.
5. Click the **Register** button that appears next to your product.
6. Click **Register** on the confirmation screen. Your product's LCD screen displays a confirmation message.
7. Select **OK** or press the **OK** button on your product to confirm the Google Cloud Print connection and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, iPhone, or Android phone with Internet access. Visit [Epson Support](#) for more information on using Google Cloud Print, or the [Google Cloud Print](#) website for a list of [supported apps](#)

[Wi-Fi Infrastructure Mode Setup](#)

[Wi-Fi Direct Mode Setup](#)

[Wi-Fi Protected Setup \(WPS\)](#)

[Printing a Network Status Sheet](#)

[Changing or Updating Network Connections](#)

## Wi-Fi Infrastructure Mode Setup

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

- 1 Epson product
- 2 Wireless router or access point

- 3 Computer with a wireless interface
- 4 Computer
- 5 Internet
- 6 Ethernet cable (used only for wired connection to the wireless router or access point)

### Selecting Wireless Network Settings From the Control Panel

Parent topic: [Wi-Fi or Wired Networking](#)

## Selecting Wireless Network Settings From the Control Panel

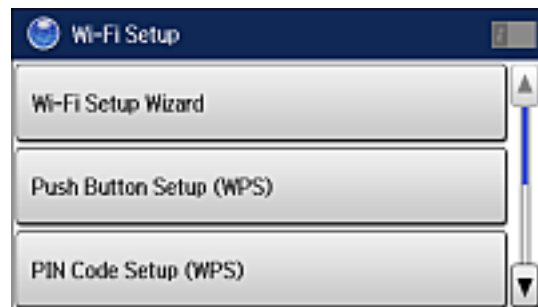

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the *Start Here* sheet and install the necessary software by downloading it from the Epson website. The installer program guides you through network setup.

**Note:** Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

1. Press the  home button, if necessary.
2. Press .
3. Select **Wi-Fi Setup**.

You see a screen like this:

4. Select **Wi-Fi Setup Wizard**.

**Note:** If you need to disable the wireless network to set up your product on an Ethernet network, scroll down and select **Disable Wi-Fi** instead. Then follow the instructions on changing to a wired network connection in this guide.

5. Select the name of your wireless network or enter the name manually.

**Note:** To enter the wireless network name manually, select **Other Networks** and select the **Network (SSID)** field. Use the displayed keypad to enter your network name.

6. Select the **Password** field and enter your wireless password using the displayed keypad.

**Note:** The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

- Press  or  to move the cursor.
  - Press  to change the case of letters.
  - Press  to delete the previous character.
  - Press  to enter numbers and symbols.
  - Press  to enter a space.
7. Press  when you finish entering your password and select **Proceed**.

8. Confirm the displayed network settings and select **OK** to save them.

**Note:** If you need to change a setting, press the ↶ back button.

9. If you want to print a network setup report, press the ⬠ **B&W** button. (Otherwise, select **Done**.)

10. Press the 🏠 home button to return to the Home screen.

If the network connection is successful, the Wi-Fi icon in the upper-right corner of the LCD screen is lit as shown.

**Parent topic:** [Wi-Fi Infrastructure Mode Setup](#)

**Related references**

[Control Panel Buttons and Lights](#)

## Wi-Fi Direct Mode Setup

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point.

- 1 Epson product
- 2 Computer with a wireless interface
- 3 Other wireless device

Your product automatically selects one of these modes to communicate with your computer or device:

### Access point mode

If your product is not already connected to a wireless network, it enters access point mode and the product itself acts as the network access point for up to 4 devices. When operating in this mode, your product displays an **AP** connection symbol on the LCD screen.

### Peer-to-peer mode

If your product is already connected to a wireless network, it enters peer-to-peer mode and disconnects from any other networks. This also disables any other product features requiring access to the Internet. When operating in this mode, your product displays a **Direct** or **D** connection symbol on the LCD screen.

**Note:** To disconnect a peer-to-peer mode connection, release the connection to your product from your computer or other device. Your product will reconnect to the previously used network.

### [Enabling Wi-Fi Direct Mode](#)

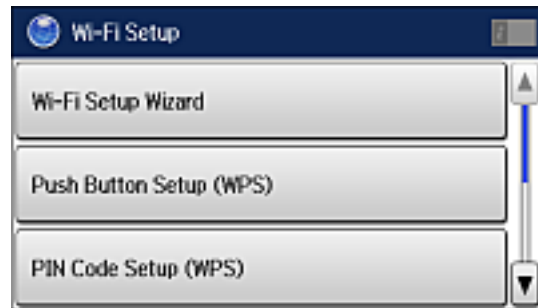

Parent topic: [Wi-Fi or Wired Networking](#)

## Enabling Wi-Fi Direct Mode

You can enable Wi-Fi Direct mode to allow direct communication between your product and computer or other devices without a wireless router or access point.

1. Press the  home button, if necessary.
2. Press .
3. Select **Wi-Fi Setup**.

You see a screen like this:

4. Scroll down and select **Wi-Fi Direct Setup**.
5. Select **Connection Setup**.
6. Select **Change Password** and select **Yes**.

**Note:** If you have already connected devices or computers to your product via Wi-Fi Direct, they are disconnected when you change the password.

7. Enter your Wi-Fi Direct password.

**Note:** Your password must be at least 8 and no more than 22 characters long.

- Press  or  to move the cursor.
- Press  to change the case of letters.
- Press  to delete the previous character.
- Press  to enter numbers and symbols.
- Press  to enter a space.

8. Press  when you finish entering your password.

You see a screen like this:

9. Scroll down to view the SSID (Wi-Fi network name) and password.
10. Use your computer or wireless device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.
11. Press the  home button to return to the Home screen.

You see either an **AP** or **Direct** connection symbol on the LCD screen and should be able to print directly to your product from your computer or device.

**Note:** If the **AP** or **Direct** connection symbol is not displayed on the LCD screen, Wi-Fi Direct mode is not enabled. Repeat these steps to try again.

## **Wi-Fi Protected Setup (WPS)**

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

**Note:** To check if your router is WPS-enabled, look for a button labeled **WPS** on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

[Using WPS to Connect to a Network](#)

**Parent topic:** [Wi-Fi or Wired Networking](#)

## **Using WPS to Connect to a Network**

If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

1. Press the  home button, if necessary.
2. Press .
3. Select **Wi-Fi Setup**.

You see a screen like this:

4. Select **Push Button Setup (WPS)**.
5. Follow the instructions on the LCD screen to complete WPS setup.
6. Press the 🏠 home button.

If the network connection is successful, the Wi-Fi icon in the upper-right corner of the LCD screen is lit as shown.

Parent topic: [Wi-Fi Protected Setup \(WPS\)](#)

## Printing a Network Status Sheet

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

1. Press the 🏠 home button, if necessary.

2. Select **Setup**.

You see a screen like this:

3. Select **Network Status**.
4. Select **Wi-Fi/Network Status**.

You see a screen like this:

**Note:** If you are connected to a wireless network, the signal strength is also displayed.

5. Select **Print**.
6. Press the **B&W** button to print the network status sheet.

Examine the settings shown on the network status sheet to diagnose any problems you have.

**Parent topic:** [Wi-Fi or Wired Networking](#)

## Changing or Updating Network Connections

See these sections to change or update how your product connects to a network.

[Accessing the Web Config Utility](#)

[Changing a USB Connection to a Wi-Fi Connection](#)

# Enabling Epson Universal Print Driver (PCL) or PostScript Printing

Before enabling Epson Universal Print Driver (PCL) or PostScript printing on your product, make sure you have installed the software as described on the *Start Here* sheet.

[Installing the Epson Universal Print Driver - Windows](#)

[Installing the PostScript \(PS3\) Printer Software - Windows](#)

[Installing the PostScript \(PS3\) Printer Software - OS X](#)

[Selecting PDL \(Page Description Language\) Settings](#)

[Selecting Printer Language and Interface Settings](#)

[Printing a PS3 \(PostScript\) Status Sheet](#)

## Installing the Epson Universal Print Driver - Windows

The Epson Universal Print Driver supports multiple printer languages, such as PCL and ESC/P-R, and can be installed on a Windows computer.

**Note:** Make sure your product is turned on and connected to the same network as your computer before installing the printer software. Depending on your model, not all printer languages may be supported.

1. Download the **EPSON Universal Print Driver** from [epson.com/support/wfm5694downloads](http://epson.com/support/wfm5694downloads).
2. Double-click the downloaded package.

3. Follow the on-screen instructions until you see this screen:

4. Select **Yes: Network connection** and click **OK**.

**Note:** Select the **Set Default of Printer Control Language to PCL6** checkbox if you want to set the default printer language to PCL6. Leave this option deselected to set the printer language to ESC/P-R. (You can change this setting later as needed.)

After the software finishes searching for products, you see a screen like this:

5. Do one of the following:
  - If you are installing one product, make sure **Add EPSON Universal Print Driver** is selected and continue with the next step.
  - If you are installing more than one product, select **Add found printers** and go to step 9.

**Note:** You can customize and filter your product search results by clicking **Display Settings**.

6. Open the **Select a port to connect a printer** menu and select an existing printer port, if necessary. Otherwise, skip this option to create a new port automatically.
7. Select the product you want to install from the Found Printers list.

**Note:** Deselect the **Set as default printer** checkbox if you do not want the product to be set as your default printer.

8. Click **OK**, then skip the remaining steps.
9. If you are installing more than one product, select the products from the Found Printers list and click **Add to Printer Folder**.

The selected products appear in the lower section of the screen.

10. Select the checkbox next to the product you want to make your default printer, if necessary.
11. Click **OK**.

**Parent topic:** [Enabling Epson Universal Print Driver \(PCL\) or PostScript Printing](#)

## Installing the PostScript (PS3) Printer Software - Windows

If you did not install the standard Epson printer software, you need to install the PostScript (PS3) printer software before you can adjust the print settings and print to your network printer.

**Note:** Make sure your product is turned on and connected to the same network as your computer before installing the printer software.

1. Download the **Drivers and Utilities Combo Package - PS3 PostScript** from [epson.com/support/wfm5694downloads](http://epson.com/support/wfm5694downloads).
2. Double-click the downloaded package.
3. Click **OK**.
4. Click **Accept**.
5. Click **Install**.
6. Click **Next** and follow the on-screen instructions.

**Parent topic:** [Enabling Epson Universal Print Driver \(PCL\) or PostScript Printing](#)

## Installing the PostScript (PS3) Printer Software - OS X

If you did not install the standard Epson printer software, you need to install the PostScript (PS3) printer software before you can adjust the print settings and print to your network printer.

**Note:** Make sure your product is turned on and connected to the same network as your computer before installing the printer software.

1. Download the **Drivers and Utilities Combo Package - PS3 PostScript** from [epson.com/support/wfm5694downloads](http://epson.com/support/wfm5694downloads).
2. Double-click the downloaded package.
3. Double-click **EPSON**.
4. Click **Continue** on the next two screens.

5. Click **Agree**.
6. Click **Install**.
7. If necessary, enter the administrator password.
8. Click **Start** and follow the on-screen instructions.

**Parent topic:** [Enabling Epson Universal Print Driver \(PCL\) or PostScript Printing](#)

#### **Related topics**

[Printing with the PostScript \(PS3\) Printer Software - OS X](#)

## Selecting PDL (Page Description Language) Settings

You can select settings for PCL and PostScript printing using the control panel on the product.

**Note:** These settings can be locked by an administrator. If you cannot access these settings, contact your administrator for assistance.

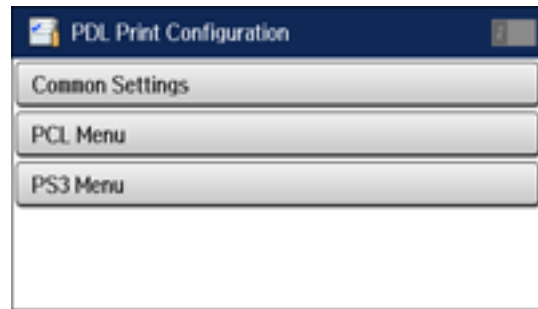

1. Press the  home button, if necessary.
2. Select **Setup**.

You see a screen like this:

3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.
4. Select **Universal Print Settings**.
5. Select **PDL Print Configuration**.

You see a screen like this:

6. Select one of the options shown above, then select the settings you want to use.
7. When you are finished, press the  home button.

[PDL Print Configuration Options](#)

**Parent topic:** [Enabling Epson Universal Print Driver \(PCL\) or PostScript Printing](#)

## PDL Print Configuration Options

Select the **PDL Print Configuration** options you want to use for PCL or PostScript printing.

PDL Print Configuration option	Available settings	Description
<b>Common Settings</b>		
<b>Paper Size</b>	Various sizes	Sets the default paper size for PCL or PostScript printing.
<b>Paper Type</b>	Various paper types	Sets the default paper type for PCL or PostScript printing.
<b>Orientation</b>	<b>Portrait</b>	Sets the default orientation for PCL or PostScript printing.
	<b>Landscape</b>	
<b>Quality</b>	<b>Draft</b>	Sets the quality for PCL or PostScript printing.
	<b>Standard</b>	
	<b>Best</b>	

<b>PDL Print Configuration option</b>	<b>Available settings</b>	<b>Description</b>
<b>Ink Save Mode</b>	<b>On/Off</b>	Saves ink by reducing print density.
<b>Print Order</b>	<b>Last Page on Top</b>	Starts printing from the first page of a file.
	<b>First Page on Top</b>	Starts printing from the last page of a file.
<b>Number of Copies</b>	1 to 999	Selects the number of copies to print.
<b>Binding Margin</b>	<b>Left Edge</b>	Specifies the binding edge for double-sided documents.
	<b>Top Edge</b>	
<b>Auto Paper Ejection</b>	<b>On/Off</b>	Ejects paper automatically when printing is stopped during a print job.
<b>2-Sided Printing</b>	<b>On/Off</b>	Selects duplex printing.
<b>PCL Menu</b>		
<b>Font Source</b>	<b>Resident</b>	Uses a font preinstalled on the printer.
	<b>Download</b>	Uses a font you have downloaded.
<b>Font Number</b>	1 to 111	Selects the default font number for the default font source.
<b>Pitch</b>	0.44 to 99.99 cpi	Selects the default font pitch if the font is scalable and fixed-pitch (availability depends on font source and number settings).
<b>Height</b>	4.00 to 999.75 pt	Selects the default font height if the font is scalable and proportional (availability depends on font source and number settings).
<b>Symbol Set</b>	Various	Selects the default symbol set. If the selected font is not available for the selected symbol set, the font source and number are replaced with <b>IBM-US</b> (the default setting).

PDL Print Configuration option	Available settings	Description
<b>Form</b>	5 to 128 lines	Sets the number of lines for the selected paper size and orientation. Changes the line spacing (VMI) stored in the printer. Later changes in page size or orientation cause changes in the <b>Form</b> value based on the stored VMI.
<b>CR Function</b>	<b>CR</b>	Selects the line feed command when printing with a driver from a specific operating system.
	<b>CR+LF</b>	
<b>LF Function</b>	<b>LF</b>	
	<b>CR+LF</b>	
<b>Paper Source Assign</b>	<b>4</b>	Makes the paper source select command compatible with HP LaserJet 4

# Loading Paper

Before you print, load paper for the type of printing you will do.

**Note:** Load only plain paper when printing with the PCL or PostScript (PS3) printer software.

[Loading Paper in the Cassette](#)

[Loading Paper and Envelopes in the Rear Paper Feed Slot](#)

[Paper Loading Capacity](#)

[Available Epson Papers](#)

[Paper or Media Type Settings - Printing Software](#)

[Selecting the Paper Settings for Each Source - Control Panel](#)

[Selecting Default Paper Settings - Administrator](#)

[Installing and Enabling the Optional Second Paper Cassette](#)

## Loading Paper in the Cassette

You can load plain paper in these sizes in the paper cassette:

- Letter (8.5 × 11 inches [216 × 279 mm])
- A4 (8.3 × 11.7 inches [210 × 297 mm])
- Legal (8.5 × 14 inches [216 × 356 mm])

1. Close the paper stopper and output tray, if necessary.

2. Pull out the paper cassette. If you are loading paper in the optional cassette, remove the paper cassette cover.

3. Slide the edge guides outward.

**Note:** If you are using legal-size paper, squeeze the tab and extend the paper cassette.

4. Set the front edge guide to the paper size you are using.

5. Load a stack of paper, printable side down, against the edge guide as shown.

**Note:** Make sure the paper is loaded against the edge guide and not sticking out from the end of the cassette.

- Slide the edge guides against the paper, but not too tightly. If you are loading paper in the optional cassette, reattach the paper cassette cover.

**Caution:** To prevent paper feeding problems, make sure the paper fits beneath the top edges of the guides.

- Keep the cassette flat as you gently insert it.

8. Extend the output tray and open the paper stopper.

**Note:** If you are using legal-size or longer paper, do not open the paper stopper. Do not remove or insert the paper cassette during printing.

9. Select the size and type of paper you just loaded on the product LCD screen.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your document faces.
- Load the printable side facedown.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the arrow mark inside the edge guides.
- Check the paper package for any additional loading instructions.

[Loading Paper and Envelopes in the Rear Paper Feed Slot](#)

## Loading Paper and Envelopes in the Rear Paper Feed Slot

You can print envelopes or documents in a variety of paper types and sizes in the rear paper feed slot.

1. Extend the output tray and open the paper stopper.

**Note:** If you are using legal-size or longer paper, do not open the paper stopper.

2. Open the feeder guard and pull up the paper support.

3. Flip the feeder guard forward, then slide the edge guides outward.

4. If you are inserting a stack of paper, fan the sheets first and tap the stack on a flat surface to even the edges.

**Note:** You can load one sheet of binder paper with holes on one of the long edges as shown. Do not select automatic 2-sided printing for this type of paper.

5. Do one of the following:

- Insert paper, glossy or printable side up and short edge first, in the center of the tray.

**Caution:** To prevent paper feeding problems, make sure you do not load too much paper in the slot.

- Load envelopes short edge first, with the flap facing down and the flap edge to the left, in the center of the slot.

6. Slide the edge guides against the paper, but not too tightly.

7. Select the size and type of paper you just loaded on the product LCD screen.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your document faces.
- Load the printable side faceup.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the arrow mark inside the edge guides.
- If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
- If print quality declines when printing multiple envelopes, try loading one envelope at a time.
- Do not load envelopes that are curled, folded, or too thin.
- Check the paper package for any additional loading instructions.

[Faxing](#)

## Placing Originals in the Automatic Document Feeder

You can place multi-page original documents in the Automatic Document Feeder (ADF). You can also use the ADF to scan both sides of a 2-sided document. Make sure the originals meet the Automatic Document Feeder specifications before loading them.

**Caution:** Make sure your originals are not creased or folded, and do not contain holes, staples, tape, or other materials that could obstruct the feeder.

1. Slide the ADF edge guide outward.

2. Fan your stack of originals and tap them gently on a flat surface to even the edges.

3. Insert the originals into the ADF faceup and top-edge first.

The **ADF** icon on the control panel lights up.

4. Slide the ADF edge guide against the originals, but not too tightly.

**Note:** If you are copying two originals onto one sheet, make sure the originals are loaded as shown:

[Printing Your Document or Photo - Windows](#)

[Selecting Default Print Settings - Windows](#)

[Changing Automatic Update Options](#)

**Parent topic:** [Printing from a Computer](#)

## Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.

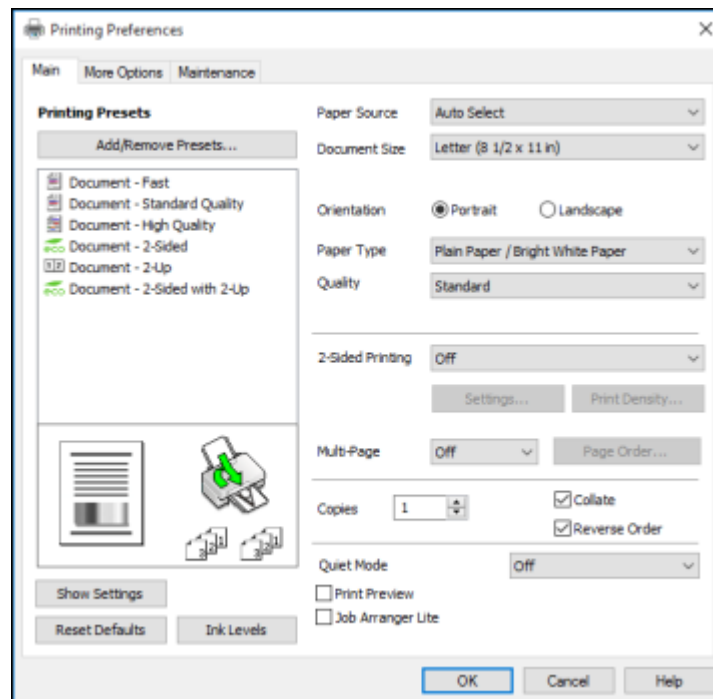

2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

**Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:

4. For the **Paper Source** setting, select where you loaded the paper you want to print on.
5. Select the size of the paper you loaded as the **Document Size** setting.

**Note:** You can also select the **User-Defined** setting to create a custom paper size.

6. Select the orientation of your document.

**Note:** If you are printing an envelope, select **Landscape**.

7. Select the type of paper you loaded as the **Paper Type** setting.

**Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

8. Select the **Quality** setting that matches the print quality you want to use.
9. To print on both sides of the paper, select the **2-Sided Printing** setting and select the options you want.
10. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.
11. To print multiple copies and arrange their print order, select the **Copies** options.
12. To preview your job before printing, select **Print Preview**.
13. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.
14. To reduce noise during printing when you select **Plain Paper/Bright White Paper**, select **On** in the Quiet Mode menu.

Select the **Booklet** checkbox and a binding option to print double-sided pages as a booklet.

**Parent topic:** [Selecting Double-sided Printing Settings - Windows](#)

**Print Density Adjustments - Windows**

You can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

**Print Density**

Sets the level of ink coverage for double-sided printing.

**Increase Ink Drying Time**

Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing to prevent ink smearing.

**Parent topic:** [Selecting Double-sided Printing Settings - Windows](#)

## Selecting Additional Layout and Print Options - Windows

You can select a variety of additional layout and printing options for your document or photo on the More Options tab.

1. To change the size of your printed document or photo, select the **Reduce/Enlarge Document** checkbox and select one of these sizing options:
  - Select the **Fit to Page** option to size your image to fit the paper you loaded. Select the size of your document or photo as the **Document Size** setting, and the size of your paper as the **Output Paper** setting. If you want to center your image on the paper, select the **Center** option.
  - Select the **Zoom to** option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the % menu.
2. To add the following features, click the **Watermark Features** button:
  - **Anti-Copy Pattern**: adds a watermark that only appears when your printout is copied
  - **Watermark**: adds a visible watermark to your printout

**Note:** Click the **Add/Delete** button to create your own watermark, and click the **Settings** button to customize the watermark.

- **Header/Footer:** adds information such as the date and time to the top or bottom of your printout

**Note:** Click the **Settings** button to customize the text and location of the header or footer.

3. To add a password to your print job, select the **Confidential Job** checkbox, then enter a password. Confidential jobs are stored in the product's memory without being printed. To print the job, enter the password for the confidential job on the product's control panel.

**Note:** Confidential print jobs are cleared from the product's memory after printing.

4. Select any of the Additional Settings options to customize your print.

[Printing Your Document or Photo - Windows](#)

### **Image Options and Additional Settings - Windows**

You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

#### **Image Options**

##### **Emphasize Text**

Adjusts the weight of printed text to increase readability.

##### **Emphasize Thin Lines**

Adjusts the weight of printed lines to increase visibility.

##### **Edge Smoothing**

Smooths jagged edges in low-resolution images such as screen captures or images from the Web.

#### **Additional Settings Options**

##### **Rotate 180°**

Prints the image rotated 180° from its original orientation.

**High Speed**

Speeds up printing but may reduce print quality.

**Mirror Image**

Flips the printed image left to right.

**Parent topic:** [Selecting Additional Layout and Print Options - Windows](#)

**Header/Footer Settings - Windows**

You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

**Note:** These settings are not saved with your document.

Top Left	Top Center	Top Right
User Name	None	Date/Time
Bottom Left	Bottom Center	Bottom Right
None	None	None

Reset Defaults OK Cancel Help

You can select to print the following information:

- User Name
- Computer Name
- Date
- Date/Time
- Collate Number (copy number)

**Note:** The user name, computer name, date, and time come from the Windows Control Panel on your computer.

**Parent topic:** [Selecting Additional Layout and Print Options - Windows](#)

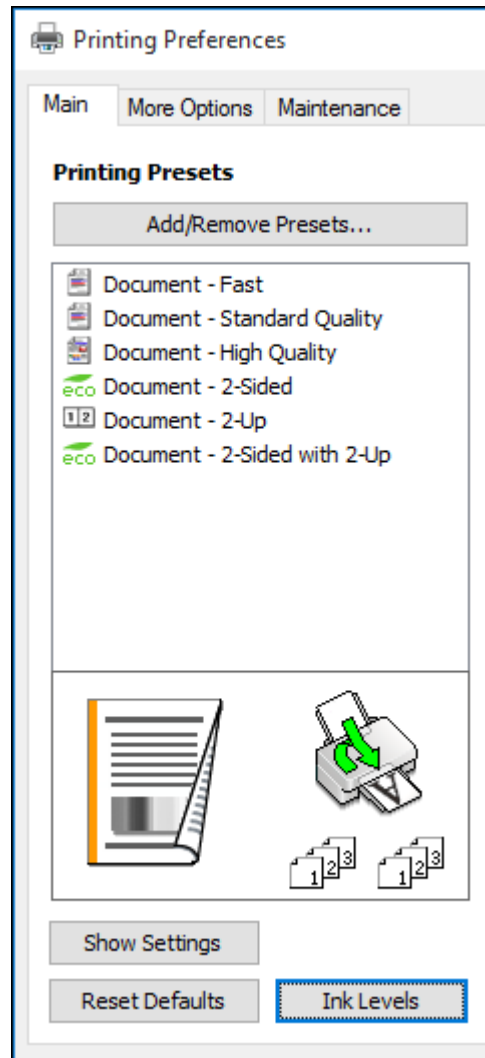

## Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset on the Main or More Options tab.

**Note:** You can create your own preset by clicking the **Add/Remove Presets** button.

1. Click the **Main** or **More Options** tab.

You see the available **Printing Presets** on the left:

2. Place your cursor over one of the **Printing Presets** to view its list of settings.
3. Click on a preset to change its settings, or use any of the available options on the screen to control your printing presets.

4. To choose a preset for printing, select it.
5. Click **OK**.

**Parent topic:** [Printing with Windows](#)

## Selecting Extended Settings - Windows

You can select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
3. Click the **Maintenance** tab.

You see the maintenance options:

4. Click the **Extended Settings** button.

You see this window:

5. Select any of the extended settings to customize your print.
6. Click **OK** to close the Extended Settings window.
7. Click **OK** to close the printer software window.

**Parent topic:** [Printing with Windows](#)

## Printing Your Document or Photo - Windows

Once you have selected your print settings, you are ready to save your settings and print.

1. Click **OK** to save your settings.

You see your application's Print window, such as this one:

2. Click **OK** or **Print** to start printing.

Parent topic: [Printing with Windows](#)

## Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.

You see the printer settings window:

3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click **OK**.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

[Changing the Language of the Printer Software Screens](#)

**Parent topic:** [Printing with Windows](#)

### Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.

You see the printer settings window.

3. Click the **Maintenance** tab.  
You see the maintenance options:

4. Select the language you want to use as the **Language** setting.
5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

**Parent topic:** [Selecting Default Print Settings - Windows](#)

## Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Software Update Settings**.

You see this window:

3. Do one of the following:
  - To change how often the software checks for updates, select a setting in the **Check every** menu.
  - To disable the automatic update feature, select the **Never** option.
4. Click **OK** to exit.

**Note:** If you choose to disable the automatic update feature, you can check for updates manually.

**Parent topic:** [Printing with Windows](#)

## Printing with OS X

You can print with your product using any OS X printing program, as described in these sections.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website.

[Selecting Basic Print Settings - OS X](#)

[Selecting Page Setup Settings - OS X](#)

[Selecting Print Layout Options - OS X](#)

[Selecting Double-sided Printing Settings - OS X](#)

[Managing Color - OS X](#)

[Selecting Printing Preferences - OS X](#)

[Printing Your Document or Photo - OS X](#)

**Parent topic:** [Printing from a Computer](#)

## Selecting Basic Print Settings - OS X

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.

You see the expanded printer settings window for your product:

**Note:** The print window may look different, depending on the version of OS X and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing.

6. Select the page setup options: **Paper Size** and **Orientation**.

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.
8. Select **Print Settings** from the pop-up menu.

You see these settings:

9. Select the **Paper Source** you wish to print from.
10. Select the type of paper you loaded as the **Media Type** setting.

**Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

11. Select the **Print Quality** setting you want to use.
12. Select any of the available print options.

### **Paper Source Options - OS X**

You can select any of the available options in the Paper Source menu to print on the paper loaded in that source.

#### **Auto Select**

Automatically selects the paper source based on the selected paper size.

#### **Cassette 1**

Selects the paper in cassette 1 as the paper source.

#### **Cassette 2**

Selects the paper in cassette 2 as the paper source.

#### **Rear Paper Feed Slot**

Selects the paper in the rear feed slot as the paper source.

**Parent topic:** [Selecting Basic Print Settings - OS X](#)

### **Print Quality Options - OS X**

You can select any of the available Print Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type setting you have chosen.

**Draft**

For draft printing on plain paper.

**Normal**

For everyday text and image printing.

**Fine**

For text and graphics with good quality and print speed.

**Quality**

For text and graphics with increased quality and print speed.

Parent topic: [Selecting Basic Print Settings - OS X](#)

## Selecting Page Setup Settings - OS X

Depending on your application, you may be able to select the paper size and orientation settings from the print window.

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

1. Select the size of the paper you loaded as the **Paper Size** setting.
2. Select the orientation of your document or photo as shown in the print window.

**Note:** If you are printing an envelope, select the  icon.

**Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

Parent topic: [Printing with OS X](#)

## Selecting Print Layout Options - OS X

You can select a variety of layout options for your document or photo by selecting **Layout** from the pop-up menu on the print window.

- To print multiple pages on one sheet of paper, select the number of pages in the **Pages per Sheet** pop-up menu. To arrange the print order of the pages, select a **Layout Direction** setting.
- To print borders around each page on the sheet, select a line setting from the **Border** pop-up menu.
- To invert or flip the printed image, select the **Reverse page orientation** or **Flip horizontally** settings.

Parent topic: [Printing with OS X](#)

## Selecting Double-sided Printing Settings - OS X

You can print on both sides of the paper by selecting **Two-sided Printing Settings** from the pop-up menu on the print window.

**Note:** Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network. This screen may be different, depending on the version of OS X you are using.

1. Select one of the **Two-sided Printing** options.
2. Select the type of document you are printing as the **Document Type** setting. The software automatically sets the Adjustments options for that document type.

3. If necessary, customize the Adjustments settings as instructed on the screen.
4. Print a test copy of your double-sided document to test the selected settings.
5. Follow any instructions displayed on the screen during printing.

[Double-sided Printing Options and Adjustments - OS X](#)

**Parent topic:** [Printing with OS X](#)

## Double-sided Printing Options and Adjustments - OS X

You can select any of the available options in the **Two-sided Printing Settings** or **Output Settings** pop-up menu to set up your double-sided print job.

### Two-sided Printing Options

#### Long-Edge binding

Orients double-sided printed pages to be bound on the long edge of the paper.

#### Short-Edge binding

Orients double-sided printed pages to be bound on the short edge of the paper.

### Adjustments

#### Print Density

Sets the level of ink coverage for double-sided printing.

#### Increased Ink Drying Time

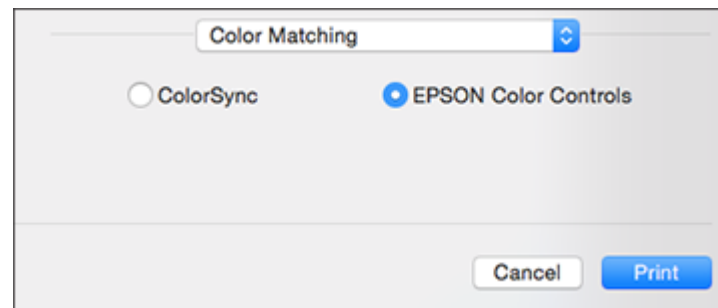

Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing.

**Parent topic:** [Selecting Double-sided Printing Settings - OS X](#)

## Managing Color - OS X

You can adjust the Color Matching settings to fine-tune the colors in your printout, or turn off color management in your printer software.

1. Select **Color Matching** from the pop-up menu in the print window.

2. Select one of the available options.

[Color Matching Options - OS X](#)

**Parent topic:** [Printing with OS X](#)

## **Color Matching Options - OS X**

You can select from these settings on the **Color Matching** menu.

### **ColorSync**

Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.

### **EPSON Color Controls**

Lets you manage color using controls in your printer software or turn off color management.

**Parent topic:** [Printing from a Computer](#)

## Synchronizing Printer Settings - Epson Universal Print Driver - Windows

You may need to synchronize the printer driver with the product if the printer driver does not detect the correct information or settings from the product.

**Note:** You must sync the printer driver before you can use any optional equipment installed on the product, such as an optional cassette unit.

1. Do one of the following:
  - **Windows 10:** Right-click  and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click **EPSON Universal Print Driver** and select **Printer properties**.
  - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click **EPSON Universal Print Driver** and select **Printer properties**.
  - **Windows 7:** Click  and select **Devices and Printers**. Right-click **EPSON Universal Print Driver** and select **Printer properties**.
  - **Windows Vista:** Click  and select **Control Panel**. Click **Printer** under **Hardware and Sound**, then right-click **EPSON Universal Print Driver** and select **Properties**.
  - **Windows XP:** Click **Start** and select **Printers and Faxes**. Right-click **EPSON Universal Print Driver** and select **Properties**.
2. Click the **Optional Settings** tab.

You see this window:

3. Make sure **Acquire from Printer** is selected and click **Get**.

**Note:** Select the **Only Optional Information** checkbox if you only want to enable optional equipment, such as an optional cassette unit.

The product's settings and other information appears in the Current Printer Information area.

4. Click **OK**.

**Parent topic:** [Printing with the Epson Universal Print Driver - Windows](#)

## Selecting Basic Print Settings - Epson Universal Print Driver - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.

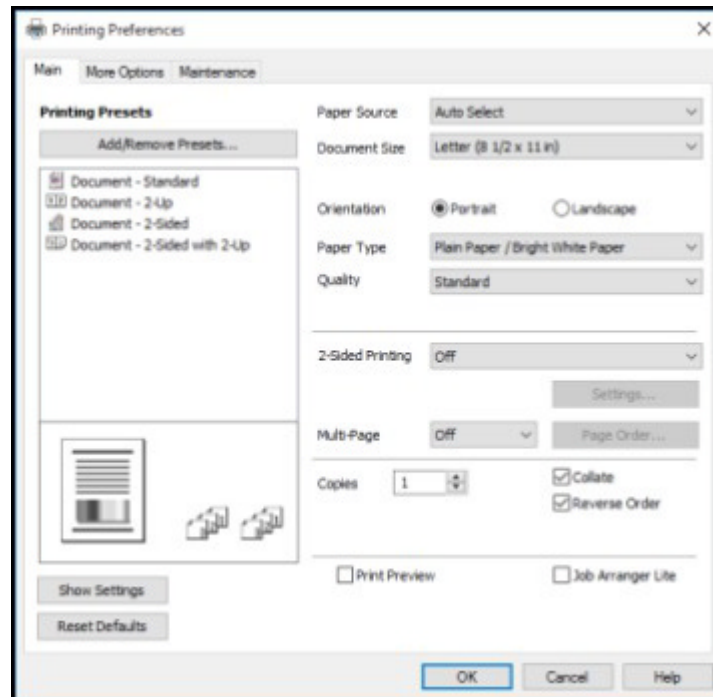

2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select **EPSON Universal Print Driver** as the printer you want to use.

**Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:

**Note:** For more information about a setting, right-click it and select **Help**.

4. For the **Paper Source** setting, select where you loaded the paper you want to print on.

5. Select the size of the paper you loaded as the **Document Size** setting.

**Note:** You can also select the **User-Defined** setting to create a custom paper size.

6. Select the orientation of your document.

**Note:** If you are printing an envelope, select **Landscape**.

7. Select the type of paper you loaded as the **Paper Type** setting.

**Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

8. Select the **Quality** setting that matches the print quality you want to use.

9. To print on both sides of the paper, select one of the **2-Sided Printing** settings.

10. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.

11. To print multiple copies and arrange their print order, select the **Copies** options.

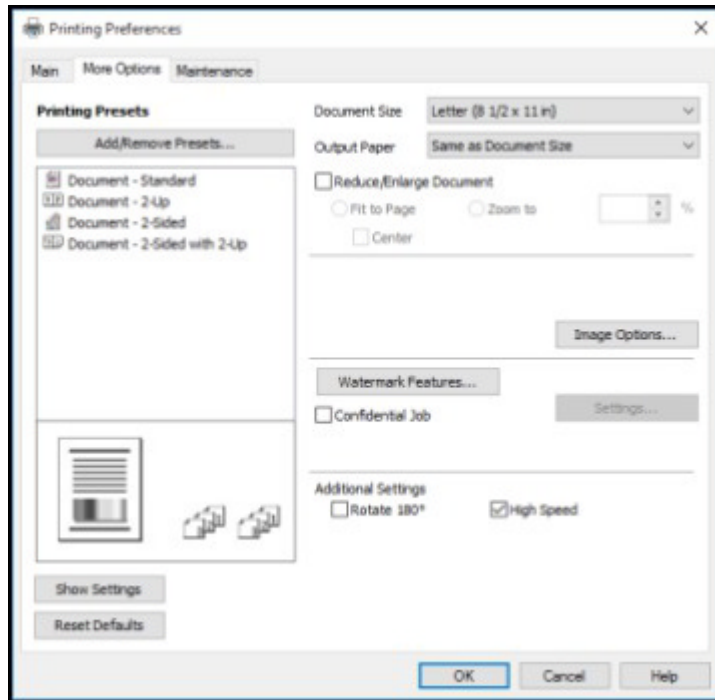

12. To preview your job before printing, select **Print Preview**.

13. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

**Parent topic:** [Printing with the Epson Universal Print Driver - Windows](#)

## Selecting Additional Layout and Print Options - Epson Universal Print Driver - Windows

You can select a variety of additional layout and printing options for your document or photo on the More Options tab.

**Note:** For more information about a setting, right-click it and select **Help**.

1. To change the size of your printed document or photo, select the **Reduce/Enlarge Document** checkbox and select one of these sizing options:
  - Select the **Fit to Page** option to size your image to fit the paper you loaded. Select the size of the your document or photo as the **Document Size** setting, and the size of your paper as the **Output Paper** setting. If you want to center your image on the paper, select the **Center** option.
  - Select the **Zoom to** option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the % menu.

2. Select **Image Options** to access additional settings for improving printed images.

3. To add the following features, click the **Watermark Features** button:

- **Watermark:** adds a visible watermark to your printout.

**Note:** Click the **Add/Delete** button to create your own watermark, and click the **Settings** button to customize the watermark.

- **Header/Footer:** adds information such as the date and time to the top or bottom of your printout.

**Note:** Click the **Settings** button to customize the text and location of the header or footer.

4. To add a password to your print job, select the **Confidential Job** checkbox, then enter a password. Confidential jobs are stored in the product's memory without being printed. To print the job, enter the password for the confidential job on the product's control panel.

**Note:** Confidential print jobs are cleared from the product's memory after printing.

5. Select any of the Additional Settings options to customize your print.

**Parent topic:** [Printing with the Epson Universal Print Driver - Windows](#)

## Selecting Maintenance Options - Epson Universal Print Driver - Windows

You can select maintenance and other optional settings on the Maintenance tab.

**Note:** For more information about a setting, right-click it and select **Help**.

- **Nozzle Check** lets you print a nozzle check pattern to check for clogged nozzles.
- **Head Cleaning** lets you clean the print head.
- **Network printer search** lets you search for and connect to a product on the network.
- **Job Arranger Lite** lets you save your print job as a project that can be modified and combined with other print jobs.
- **Extended Settings** lets you change a variety of print settings.
- **Print Queue** displays all the print jobs in queue. You can also cancel or restart print jobs.

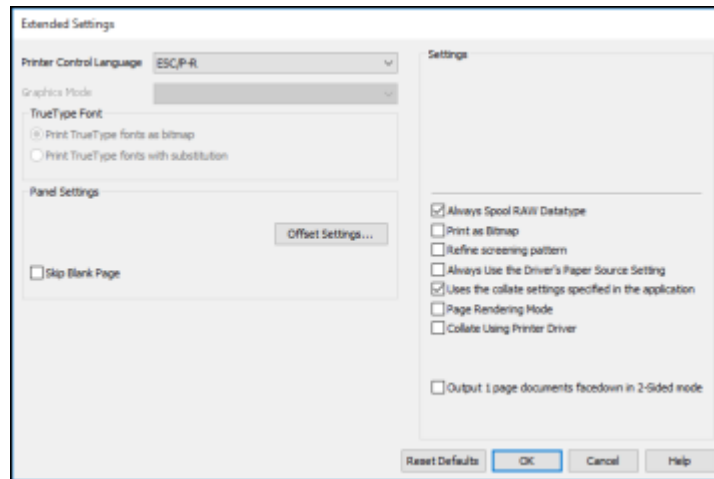

- **Printer and Option Information** displays information on the printer settings and any optional equipment installed.
- **Language** lets you change the language of the printer software screens.

[Extended Settings - Epson Universal Print Driver - Windows](#)

**Parent topic:** [Printing with the Epson Universal Print Driver - Windows](#)

## Extended Settings - Epson Universal Print Driver - Windows

You can select from these settings on the Extended Settings window.

### Printer Control Language

Lets you select the printer control language.

### Graphics Mode

Lets you select the mode by which to output PDL commands to the product.

### TrueType Font

Lets you select how you want to print TrueType fonts.

### Offset Settings

Lets you make fine-tune adjustments to the print position of data on your printout.

### Skip Blank Page

Ensures that your product does not print pages that contain no text or images.

**Always Spool RAW Datatype**

Increases print speed and may solve other printing problems.

**Print as Bitmap**

Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

**Refine screening pattern**

Prints graphics with a finer screening pattern.

**Always Use the Driver's Paper Source Setting**

Prints using the paper source setting in the printer driver, rather than the setting in your application.

**Uses the collate settings specified in the application**

Prints using the collate setting in your application.

**Page Rendering Mode**

Increases print speed when printing is extremely slow or the print head stops during printing.

**Collate Using Printer Driver**

Prints and collates multi-page documents using the printer driver. Deselect this checkbox to use the product to collate your print jobs instead. (This setting is automatically enabled if there is not enough memory on the product to collate your print job.)

**Output 1 page documents facedown in 2-Sided mode**

Outputs single-sided pages in a 2-sided print job facedown instead of faceup.

## Selecting Default Print Settings - Epson Universal Print Driver - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

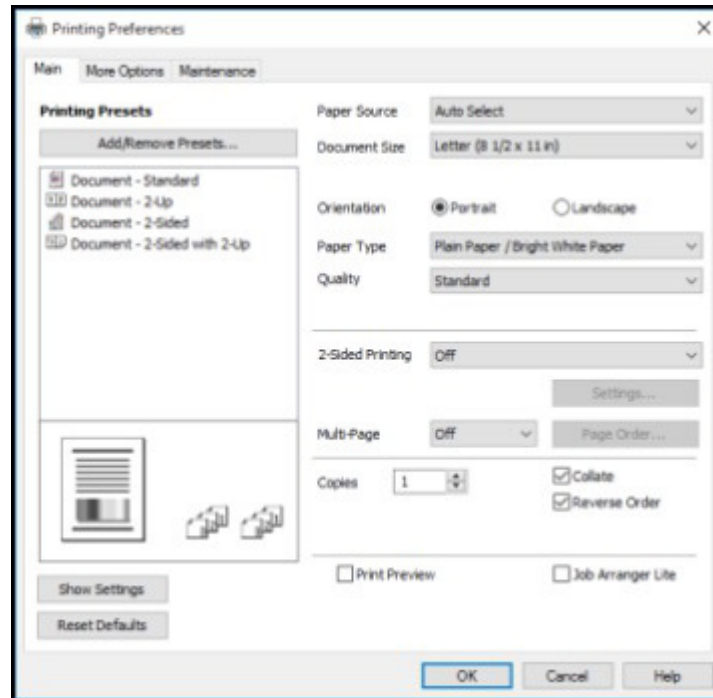

1. Do one of the following:

- **Windows 10:** Right-click  and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click **EPSON Universal Print Driver** and select **Print Preferences**.
- **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click **EPSON Universal Print Driver** and select **Print Preferences**.
- **Windows 7:** Click  and select **Devices and Printers**. Right-click **EPSON Universal Print Driver** and select **Printing Preferences**.

- **Windows Vista:** Click  and select **Control Panel**. Click **Printer** under **Hardware and Sound**, right-click **EPSON Universal Print Driver**, and select **Printing Preferences**.
- **Windows XP:** Click **Start** and select **Printers and Faxes**. Right-click **EPSON Universal Print Driver** and select **Printing Preferences**.

You see the printer settings window:

**Note:** For more information about a setting, right-click it and select **Help**.

2. Select the print settings you want to use as defaults in all your Windows programs.
3. Click **OK**.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

**Parent topic:** [Printing with the Epson Universal Print Driver - Windows](#)

## Locking Printer Settings - Epson Universal Print Driver - Windows

Administrators can lock some printer settings to prevent unauthorized changes.

1. Do one of the following:
  - **Windows 10:** Right-click  and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click **EPSON Universal Print Driver** and select **Printer properties**.
  - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click **EPSON Universal Print Driver** and select **Printer properties**.
  - **Windows 7:** Click  and select **Devices and Printers**. Right-click **EPSON Universal Print Driver** and select **Printer properties**.
  - **Windows Vista:** Click  and select **Control Panel**. Click **Printer** under **Hardware and Sound**, then right-click **EPSON Universal Print Driver** and select **Properties**.
  - **Windows XP:** Click **Start** and select **Printers and Faxes**. Right-click **EPSON Universal Print Driver** and select **Properties**.
2. Click the **Optional Settings** tab.
3. Click **Driver Settings**.

You see this window:

4. Select the checkbox for the settings you want to lock. To lock all print settings, select **All Document Settings**.
5. Under **Advanced Settings**, select the setting option you want to use for each locked setting.
6. Click **OK**.

- **Windows XP:** Click **Start** and select **Printers and Faxes**. Right-click **EPSON Universal Print Driver** and select **Properties**.
2. Click the **Optional Settings** tab.

You see this window:

3. Click **Network printer search**.
4. When you see the search results, select **Add found printers**.

You see a screen like this:

5. Select the printer or printers you want to add.
6. Click **Add to Printer Folder**.  
The selected printer or printers appear in the lower section of the screen.
7. Select the checkbox next to the product you want to make your default printer, if necessary.
8. Click **OK**.

**Parent topic:** [Printing with the Epson Universal Print Driver - Windows](#)

## Printing with the PostScript (PS3) Printer Software - Windows

You can print with the PostScript (PS3) printer software using any Windows printing program, as described in these sections.

**Note:** The PostScript printer software supports products that are connected via Ethernet. If your product is connected via USB, you will need to install the standard Epson printer software. To download the standard Epson printer software, go to [epson.com/support/wfm5694downloads](http://epson.com/support/wfm5694downloads).

[Enabling the Optional Paper Cassette - PostScript Printer Software - Windows](#)

[Selecting Basic Print Settings - PostScript Printer Software - Windows](#)

[Selecting Additional Layout and Print Options - PostScript Printer Software - Windows](#)

[Selecting Default Print Settings - PostScript Printer Software - Windows](#)

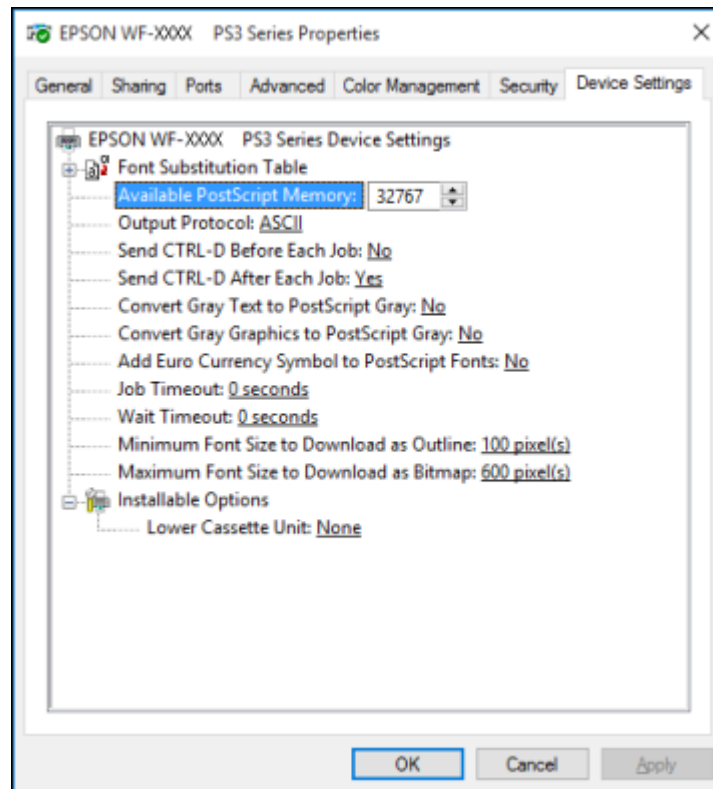

**Parent topic:** [Printing from a Computer](#)

## Enabling the Optional Paper Cassette - PostScript Printer Software - Windows

If you installed the optional paper cassette unit, you need to enable it before you can use it with the PS3 printer software.

1. Do one of the following:
  - **Windows 10:** Right-click  and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click your product name and select **Printer properties**.
  - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click your product name and select **Printer properties**.
  - **Windows 7:** Click  and select **Devices and Printers**. Right-click your product name and select **Printer Properties**.
  - **Windows Vista:** Click  and select **Control Panel**. Click **Printer** under **Hardware and Sound**, then right-click your product name, and select **Properties**.
  - **Windows XP:** Click **Start** and select **Printers and Faxes**. Right-click your product name and select **Properties**.
2. Click the **Device Settings** tab.

You see a window like this:

3. Select the optional cassette installed as the Lower Cassette Unit setting.
4. Click **OK**.

The optional paper cassette is now enabled.

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - Windows](#)

## Selecting Basic Print Settings - PostScript Printer Software - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.

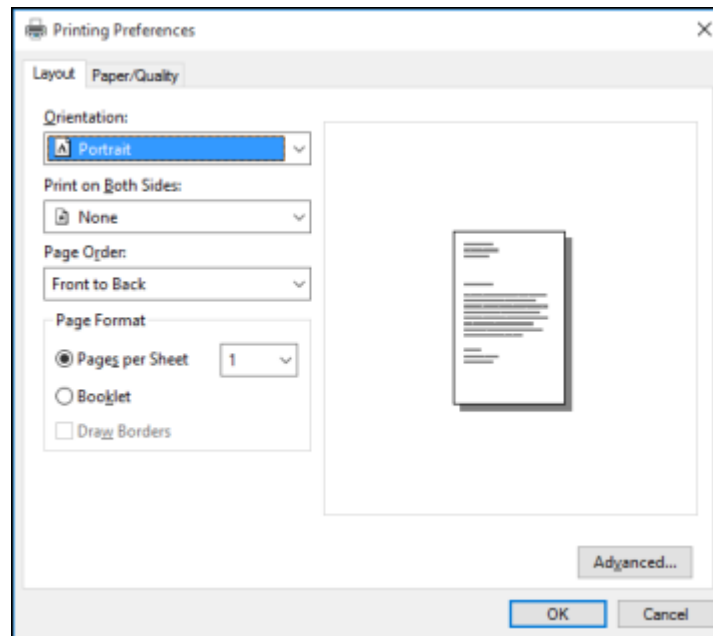

2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use, and then click the **Preferences** button.

You see the Layout tab of your printer settings window:

4. Select the orientation of your document.
5. To print on both sides of the paper, select one of the **Print on Both Sides** settings.
6. To change the printing order of the pages, select one of the **Page Order** settings.
7. To print multiple pages on one sheet of paper, adjust the **Pages per Sheet** setting.
8. To create a folded booklet out of your photo or document, select the **Booklet** option.
9. Click the **Paper/Quality** tab.

You see this window:

10. Select the **Paper Source** that matches where you loaded the paper you want to print on.

11. Select **Plain** as the **Media** setting.

**Note:** The PostScript printer software supports plain paper printing on these paper and envelope sizes:

- A4 (8.3 × 11.7 inches [210 × 297 mm])
- Letter (8.5 × 11 inches [216 × 279 mm])
- No. 10 (4.1 × 9.5 inches [105 × 241 mm])

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - Windows](#)

## Selecting Additional Layout and Print Options - PostScript Printer Software - Windows

You can select a variety of additional layout and printing options for your document or photo by clicking the **Advanced** button.

1. Select the size of the paper you loaded as the **Paper Size** setting.
2. Select the **Print Quality** option that matches the print quality you want to use.
3. Adjust the **Scaling** setting to reduce or enlarge your document or photo by a specific percentage.
4. Adjust the **Pages Per Sheet Layout** setting to change the order of multiple pages on a single sheet of paper when you have adjusted the **Pages Per Sheet** setting on the **Layout** tab.
5. Adjust the **Booklet Binding Edge** setting to change the orientation of your printed booklet.
6. Expand the PostScript Options heading to access the advanced PostScript printer software features.
7. Select any of the remaining **Printer Features** options to customize your printouts.

Parent topic: [Printing with the PostScript \(PS3\) Printer Software - Windows](#)

## Selecting Default Print Settings - PostScript Printer Software - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Do one of the following:

- **Windows 10:** Right-click  and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click your product name and select **Printer properties**.
- **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click your product name and select **Print Preferences**.
- **Windows 7:** Click  and select **Devices and Printers**. Right-click your product name and select **Printing Preferences**.
- **Windows Vista:** Click  and select **Control Panel**. Click **Printer** under **Hardware and Sound**, right-click your product name, and select **Printing Preferences**.
- **Windows XP:** Click **Start** and select **Printers and Faxes**. Right-click your product name and select **Printing Preferences**.

You see the printer settings window:

2. Select the print settings you want to use as defaults in all your Windows programs.
3. Click **OK**.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - Windows](#)

## Printing with the PostScript (PS3) Printer Software - OS X

You can print with the PostScript (PS3) printer software using any OS X printing program, as described in these sections.

[Enabling the Optional Paper Cassette - PostScript Printer Software - OS X](#)

[Selecting Basic Print Settings - PostScript Printer Software - OS X](#)

[Selecting Page Setup Settings - PostScript Printer Software - OS X](#)

[Selecting Print Layout Options - PostScript Printer Software - OS X](#)

[Sizing Printed Images - PostScript Printer Software - OS X](#)

[Managing Color - PostScript Printer Software - OS X](#)

[Printing Your Document or Photo - PostScript Printer Software - OS X](#)

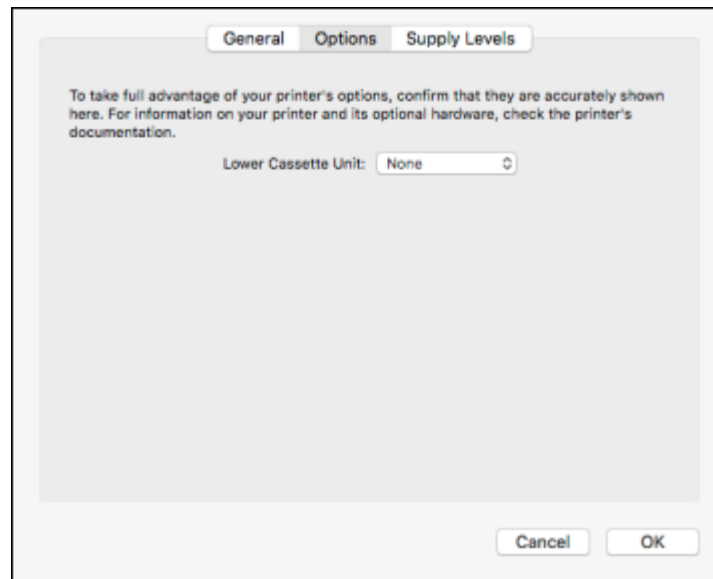

**Parent topic:** [Printing from a Computer](#)

## Enabling the Optional Paper Cassette - PostScript Printer Software - OS X

If you installed the optional paper cassette unit, you need to enable it before you can use it with the PS3 printer software.

1. In the Apple menu or the Dock, select **System Preferences**.
2. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**.
3. Select **Driver** or **Options**.

You see a screen like this:

4. Select the optional cassette installed as the Lower Cassette Unit setting.
5. Click **OK**.

The optional paper cassette is now enabled.

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - OS X](#)

## Selecting Basic Print Settings - PostScript Printer Software - OS X

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.

You see the expanded printer settings window for your product:

**Note:** The print window may look different, depending on the version of OS X and the application you are using.

5. Select the **Two-Sided**, **Copies**, and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing.

6. Select the page setup options: **Paper Size** and **Orientation**.

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.
8. Select **Paper Feed** from the pop-up menu.

You see these settings:

9. Select **All Pages From** or **First Page From** and select the paper source you want to print from.

10. Select **Printer Features** from the pop-up menu.

You see these settings:

11. Select **Plain** as the **MediaType** setting.

**Note:** The PostScript printer software supports plain paper printing on these paper and envelope sizes:

- A4 (8.3 × 11.7 inches [210 × 297 mm])

- Letter (8.5 × 11 inches [216 × 279 mm])
  - No. 10 (4.1 × 9.5 inches [105 × 241 mm])
12. Select one of the following **Print Quality** options:
    - For fast printing with reduced quality, select **Fast**.
    - For printing text and graphics with good quality and print speed, select **Fine**.
    - For the best printing with reduced speed, select **Maximum**.
  13. Select any of the available print options.

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - OS X](#)

## Selecting Page Setup Settings - PostScript Printer Software - OS X

Depending on your application, you may be able to select the paper size and orientation settings from the print window.

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

1. Select the size of the paper you loaded as the **Paper Size** setting. You can also select a custom setting to create a custom paper size.
2. Select the orientation of your document or photo as shown in the print window.

**Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - OS X](#)

## Selecting Print Layout Options - PostScript Printer Software - OS X

You can select a variety of layout options for your document or photo by selecting **Layout** from the pop-up menu on the print window.

- To print multiple pages on one sheet of paper, select the number of pages in the **Pages per Sheet** pop-up menu. To arrange the print order of the pages, select a **Layout Direction** setting.
- To print borders around each page on the sheet, select a line setting from the **Border** pop-up menu.
- To print on both sides of the page, select one of the **Two-Sided** settings.
- To invert or flip the printed image, select the **Reverse page orientation** or **Flip horizontally** settings.

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - OS X](#)

## Sizing Printed Images - PostScript Printer Software - OS X

You can adjust the size of the image as you print it by selecting **Paper Handling** from the pop-up menu on the Print window.

- To print only selected pages in a multi-page document, select an option from the **Pages to Print** pop-up menu.
- To adjust the order in which pages are printed, select an option from the **Page Order** pop-up menu.
- To scale the image to fit on a specific paper size, select the **Scale to fit paper size** checkbox and select a paper size from the **Destination Paper Size** pop-up menu.

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - OS X](#)

## Managing Color - PostScript Printer Software - OS X

You can adjust the Color Matching settings to fine-tune the colors in your printout.

1. Select **Color Matching** from the pop-up menu in the print window.

2. Do one of the following:
  - To print using standard color profiles for your product and paper to help match image colors, select **ColorSync**. Select one of the available **Profile** options to change the active color profile.
  - To use the product's default color matching, select **In printer**.

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - OS X](#)

## Printing Your Document or Photo - PostScript Printer Software - OS X

Once you have selected your print settings, you are ready to print.

Click **Print** at the bottom of the print window.

[Checking Print Status - PostScript Printer Software - OS X](#)

**Parent topic:** [Printing with the PostScript \(PS3\) Printer Software - OS X](#)

### **Checking Print Status - PostScript Printer Software - OS X**

During printing, you can view the progress of your print job, control printing, and check ink status.

1. Click the printer icon when it appears in the Dock.

You see the print status window:

2. Select the following options as necessary for your version of OS X:

- To cancel printing, click the print job and click  or **Delete**.
- To pause a print job, click the print job and click  or **Hold**. To resume a print job, click the paused print job and click  or **Resume**.
- To pause printing for all queued print jobs, click **Pause** or **Pause Printer**.
- To display other printer information, click **Settings** or **Supply Levels**.

**Parent topic:** [Printing Your Document or Photo - PostScript Printer Software - OS X](#)

## Cancelling Printing Using a Product Button

If you need to cancel printing, press the  **Stop** button on your product.

[Starting a Scan from a Scanning Program](#)

**Parent topic:** [Scanning](#)

**Related topics**

[Placing Originals on the Product](#)

## Starting a Scan Using the Product Control Panel

You can scan an image to a memory device or to your computer using your product's control panel.

1. Make sure you installed the product software and connected the product to your computer or network.

**Note:** Restart your computer after installing the product software to enable scanning from the control panel. Also make sure the Event Manager program is not being blocked by your firewall or security software.

2. Place your original on the product for scanning.

**Note:** To scan a double-sided document, place it in the ADF and select the **2-Sided** setting.

3. Press the  home button, if necessary.

4. Select **Scan**.

You see a screen like this:

5. Select one of the following **Scan to** options:

- **Email** lets you send scanned files through a pre-configured email server.
- **Network Folder/FTP** saves your scan file to a specified folder on a network.
- **Memory Device** saves your scan file on a memory or USB device and lets you select the file format, quality, and other settings.
- **Cloud** sends your scanned files to a destination that you have registered with Epson Connect.
- **Document Capture Pro** allows you to scan over a network using your saved job settings in Document Capture Pro or Document Capture.

**Note:** You cannot use this option to scan an image to Document Capture or Document Capture Pro when your product is connected to your computer's USB port.

- **Computer (WSD)** lets you manage network scanning in Windows 10, Windows 8, Windows 7, or Windows Vista (English only). To use this feature, you must first set up WSD (Web Services for Devices) on the computer.

6. Select **Preset** to save your scan settings.

**Note:** Presets can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

7. Do any of the following, as necessary:

- Select the email address, location, destination, or computer.

- Select **Contacts** to choose an email address or network folder.
- Select **Format** to choose the file format.
- Select **Settings** or **Menu** to display additional scanning options.

#### **Related topics**

[Placing Originals on the Product](#)

## **Adding and Assigning Scan Jobs**

You can view, change, or add available default scan settings when you scan using the Document Capture Pro option on the product control panel. You do this by accessing the scan jobs in the Document Capture Pro (Windows) or Document Capture (OS X) program.

1. Start Document Capture Pro or Document Capture on a computer connected to the product.
2. Click the  Manage Job icon from the toolbar at the top of the window.  
You see a window showing the current scan job list.
3. If you want to add a scan job, click **Add** or the **+** icon, enter a name for the new job, select settings as necessary, and click **OK**.

You can now use the new scan job when you scan with Document Capture Pro or Document Capture.

**Note:** See the Help information in Document Capture Pro or Document Capture for details.

4. If you want to assign scan jobs to the selection list on the product control panel, do one of the following:
  - **Windows:** Click **Event Settings**.
  - **OS X:** Click the  icon at the bottom of the window, then click **Event Settings**.

5. Select the jobs that you want to assign to any of the pull-down menus.

You can now use the added scan jobs when you scan from the product control panel.

6. Click **OK**, then click **OK** again.

**Parent topic:** [Starting a Scan Using the Product Control Panel](#)

## Starting a Scan with Document Capture Pro or Document Capture

When you scan with Document Capture Pro (Windows) or Document Capture (OS X), the program automatically saves your scanned file on your computer in the folder you specify. You can select settings, preview, and change the scanned file settings as necessary.

1. Do one of the following to start Document Capture Pro or Document Capture:
  - **Windows 10:** Click  and select **All apps**. Select **EPSON Software**, then select **Document Capture Pro**.
  - **Windows 8.x:** Navigate to the **Apps** screen and select **Document Capture Pro**.
  - **Windows (other versions):** Click  or **Start**, and select **All Programs** or **Programs**. Select **EPSON Software**, then select **Document Capture Pro**.

- **OS X:** Open the **Applications** folder, select the **Epson Software** folder, and select **Document Capture**. Select your product and click **OK**, if necessary.

You see a window like this:

2. Click the  Scan icon.

You see a window like this:

**Note:** With OS X, you can download and install Epson Scan scanning software, which will provide additional image adjustment features within Document Capture. To download Epson Scan, visit Epson's driver download site ([U.S. downloads](#) or [Canadian downloads](#)).

3. If you want to use a scan job that you created instead, select it from the Job list in the Document Capture Pro or Document Capture window, click the  Start Job button, and skip the rest of these steps.
4. Select any displayed scan settings you want to use.

**Note:** See the Help information in Document Capture Pro or Document Capture for details.

5. If you want to select detailed scan settings, do one of the following:
  - **Windows:** Click **Detailed Settings**. Select any displayed scan settings you want to use and click **OK**.

- **OS X:** If you installed Epson Scan, close the Scan Settings window, open the **Scan** menu at the top of the screen and select **Displays the EPSON Scan Setup Screen**. Click the  Scan icon. Select any displayed scan settings you want to use and click **OK**.
6. Click **Scan**.  
You see a preview of your scan in the Document Capture Pro or Document Capture window.
  7. Check the scanned images and edit them as necessary.
  8. Click one of the Destination icons to choose where to save your scanned file.

**Note:** You may need to click the arrow next to the icons in order to see all of them. The available icons may vary, depending on the software version you are using.

9. Select settings as necessary, then click **OK**, **Send**, or **Print** to save the scanned file.

Parent topic: [Starting a Scan](#)

## Starting a Scan Using the Epson Scan Icon

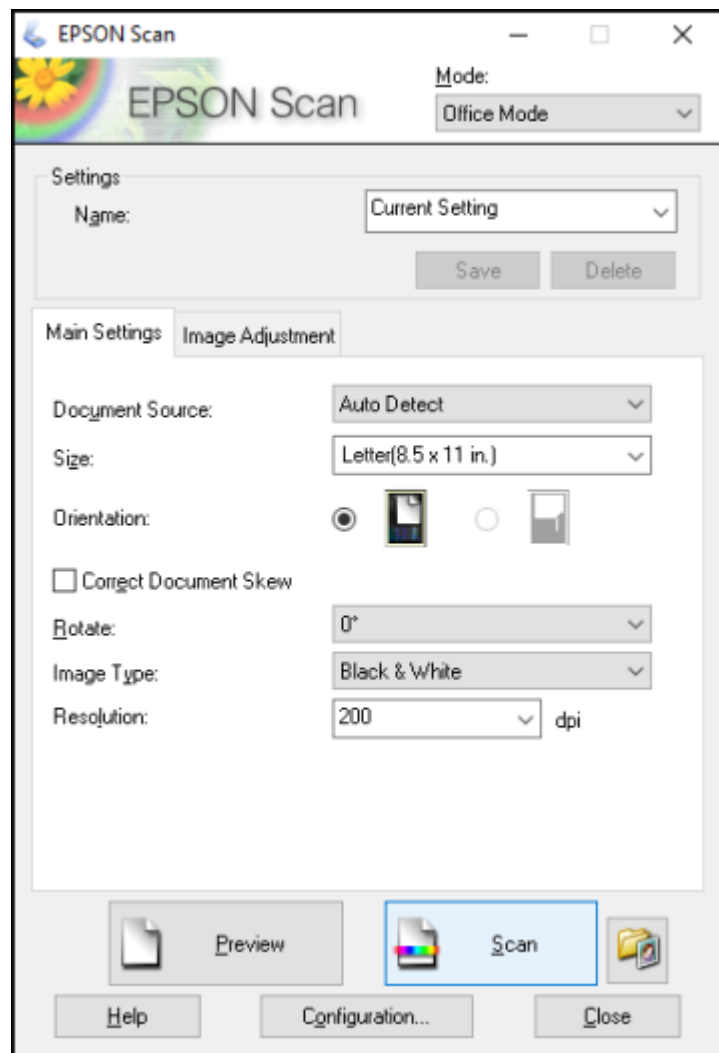

You can start the Epson Scan program to select scan settings, scan, and save the scanned image to a file.

- **Windows 10:** Click  and select **All apps**. Select **EPSON Software**, then select **EPSON Scan**.
- **Windows 8.x:** Navigate to the **Apps** screen and select **EPSON Scan** under **EPSON** or **EPSON Software**.
- **Windows (other versions):** Click  or **Start**, and select **All Programs** or **Programs**. Select **EPSON** or **EPSON Software** and click **EPSON Scan**.
- **OS X:** Open the **Applications** folder, open the **Epson Software** folder, and double-click the **EPSON Scan** icon.

**Note:** With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To download Epson Scan, visit Epson's driver download site ([U.S. downloads](#) or [Canadian downloads](#)).

**Note:** In OS X 10.11, if you see a message asking if you want to use TWAIN to scan with your product, select **Yes** to scan using Epson Scan.

You see an Epson Scan window like this:

## Scan Modes

Epson Scan provides a choice of scan modes with different levels of control over your settings.

### Office Mode

You can quickly scan text documents and adjust them on a preview screen. You can also select various image adjustment options and preview your scanned image.

### Professional Mode

You can manually customize all available settings, and preview and size your scanned image.

**Parent topic:** [Selecting Epson Scan Settings](#)

## Selecting the Scan Mode

Select the Epson Scan mode you want to use from the Mode box in the upper right corner of the Epson Scan window:

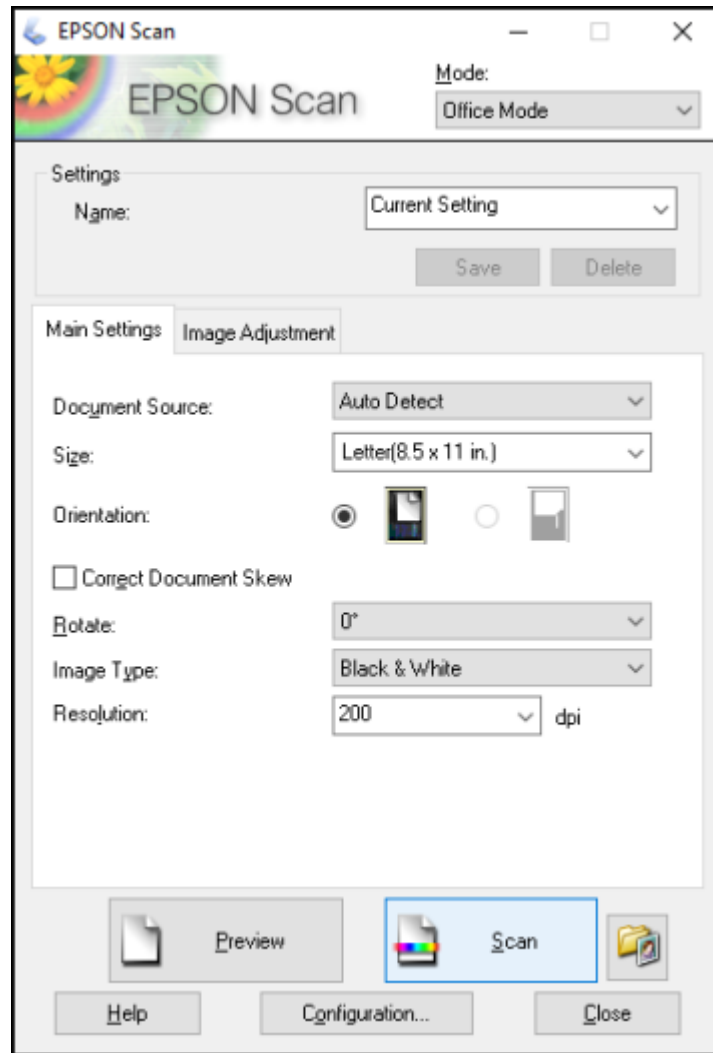

Parent topic: [Selecting Epson Scan Settings](#)

## Scanning in Office Mode

When you scan in Office Mode, Epson Scan automatically saves your scanned file in PDF format in your operating system's Documents or My Documents folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select **Office Mode** as the Mode setting.

You see this window:

2. Select the **Document Source** setting indicating where you placed your original.

**Note:** If you are using the ADF, remove any documents from the scanner glass.

3. Select the **Size** and **Orientation** settings that match your original.
4. To scan both sides of a 2-sided original into one image, select a **Stitch Images** setting.

**Note:** To use the Stitch Images setting, you must select **ADF-Double-sided** as the **Document Source** setting.

5. To allow Epson Scan to detect and correct any skew in your original, select **Correct Document Skew**.
6. To rotate your original in your scan, select a **Rotate** setting.
7. Select the **Image Type** setting that matches your original.
8. Select the **Resolution** setting you want to use for your scan.
9. Click the **Preview** button.

Epson Scan previews your original and displays the result in a separate Preview window.

10. If you are using the ADF, reinsert your original into the ADF.
11. If desired, select the area in your preview image that you want to scan (scan area).

**Note:** You cannot select a scan area if you chose **ADF-Double-sided** as the **Document Source** setting.

12. Click the **Image Adjustment** tab and select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.
13. Click **Scan**.

You see the File Save Settings window.

14. Change any of the necessary file save settings and click **OK**.

Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or OS X Finder, where you can view and print the image, if desired.

[Selecting Scan File Settings](#)

**Available Document Source Settings - Office Mode**

You can select these Document Source options in Epson Scan Office Mode.

**Scanner Glass**

Selects the scanner glass as the location where the originals are placed on your product for scanning.

**ADF - Single-sided**

Selects the Automatic Document Feeder as the location where the originals are placed on your product for single-sided scanning.

**ADF - Double-sided**

Selects the Automatic Document Feeder as the location where the originals are placed on your product for double-sided scanning.

**Auto Detect**

Automatically detects where the originals are placed on your product for scanning.

**Parent topic:** [Scanning in Office Mode](#)

**Selecting a Scan Area - Office Mode**

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas.

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.

1. In the Preview window, click the  Auto Locate icon to create a marquee (dotted line) on the preview image.

2. Do the following, as necessary, to work with the selected scan area:
  - If the marquee is correct, continue with the next step.
  - To move the marquee, click inside the scan area and drag the marquee where you want it.

- To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the **Shift** key as you resize the marquee to retain the same width/height proportions.)
- To create additional marquees (up to 50, if available), click the  Copy Marquee icon to copy the existing marquee and paste it on the preview image.

**Note:** If you draw multiple marquees, make sure you select the **All** button in the Preview window before you scan. Otherwise, only the area inside the currently selected marquee will be scanned.

- To delete a marquee, click the marquee, then click the  Delete Marquee icon.
- To rotate your original in your scan, click one of the **Rotate** icons.

3. Click inside each scan area and make any necessary settings in the Epson Scan window.

**Parent topic:** [Scanning in Office Mode](#)

[Selecting Scan File Settings](#)

## Available Image Adjustments - Office Mode

You can select these Image Adjustments options in Epson Scan Office Mode. Not all adjustment settings may be available, depending on other settings you have chosen.

**Note:** Select the **Image Option** checkbox if you need to set any of the grayed-out image adjustments beneath the checkbox. Not all adjustment settings may be available, depending on the Image Type setting.

### Unsharp Mask

Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

### Descreening

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

### Text Enhancement

Sharpens the appearance of letters in text documents.

### Auto Area Segmentation

Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

**Color Enhance**

Enhances the red, green, or blue shades in the scanned image.

**Skip Blank Pages**

Ensures that your product does not scan pages that contain no text or images.

**Edge Fill**

Corrects shadowing around the edges of the image by filling the shadows with the color you select.

**Brightness**

Adjusts the overall lightness and darkness of the scanned image.

**Contrast**

Adjusts the difference between the light and dark areas of the overall scanned image.

**Threshold**

Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

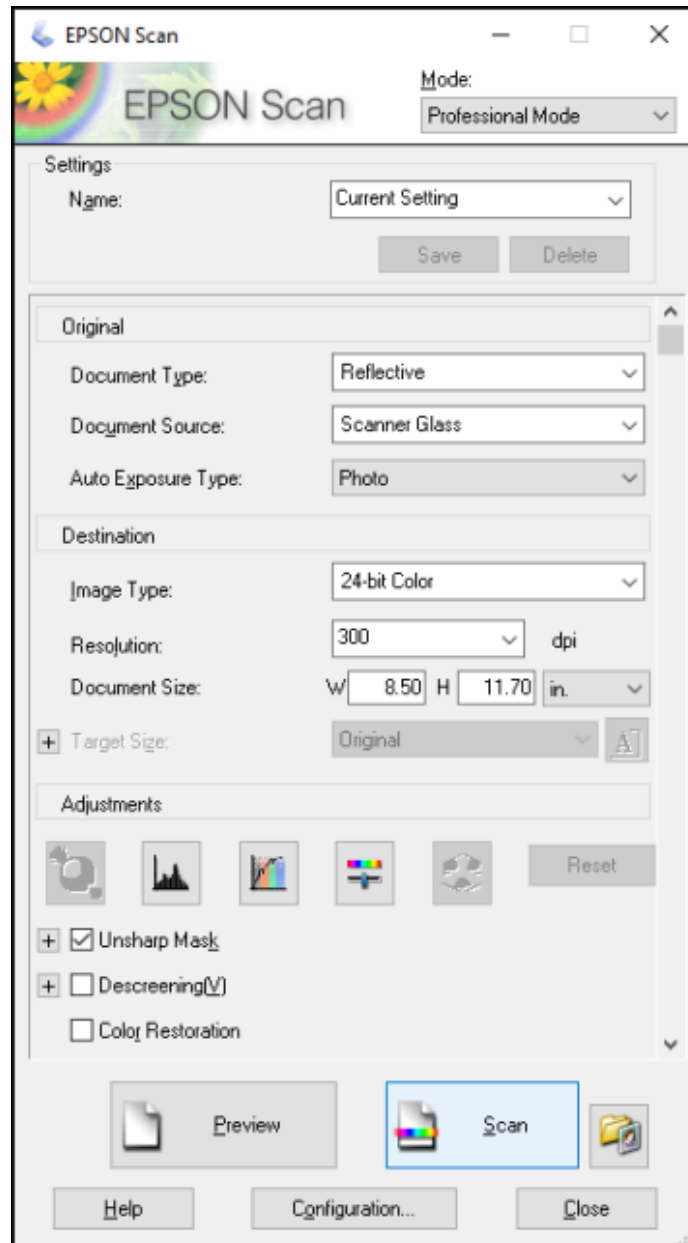

Parent topic: [Scanning in Office Mode](#)

## Scanning in Professional Mode

When you scan in Professional Mode, Epson Scan automatically saves your scanned file in PDF format in your operating system's Documents or My Documents folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select **Professional Mode** as the Mode setting.

You see this window:

2. Select the **Document Type** setting that matches your original, such as **Reflective** for documents or photos.
3. Select the **Document Source** setting indicating where you placed your original. To scan a 2-sided document in the ADF, select **ADF - Double-sided**.
4. Select the specific type of original you are scanning as the **Auto Exposure Type** setting: **Document** or **Photo**.
5. Select the details of your original and how you want it scanned as the **Image Type** setting.
6. Select the **Resolution** setting you want to use for your scan.
7. Select the size of your document as the **Document Size** or adjust the size by altering the selection on the Preview window.
8. Click the **Preview** button.

**Note:** If you are using the ADF, you can only preview one page at a time.

Epson Scan previews your original and displays the result in a separate Preview window.

9. If you are using the ADF, reinsert your original into the ADF.
10. If desired, select the area in your preview image that you want to scan (scan area).

**Note:** You cannot select a scan area if you chose **ADF-Double-sided** as the **Document Source** setting.

11. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.
12. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.

**Note:** You cannot select a target size if you chose **ADF-Double-sided** as the **Document Source** setting.

13. Click **Scan**.

You see the File Save Settings window.

14. Change any of the necessary file save settings and click **OK**.

Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or OS X Finder, where you can view and print the image, if desired.

**Parent topic:** [Scanning in Professional Mode](#)

**Selecting a Scan Area - Professional Mode**

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas (Normal Preview mode only).

You can also use the scan area to select specific image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.

**Note:** In Professional Mode, the default Preview mode is Normal Preview mode. To use Thumbnail Preview mode instead, click the **Thumbnail** tab.

1. Do one of the following to select your scan area in the Preview image:

- **Normal preview:** Click the  Auto Locate icon to create a marquee (dotted line) on the preview image.

- **Thumbnail preview:** Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.

2. Do the following, as necessary, to work with the selected scan area:
  - If the marquee is correct, continue with the next step.
  - To move the marquee, click inside the scan area and drag the marquee where you want it.

- To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the **Shift** key as you resize the marquee to retain the same width/height proportions.)
- **Normal preview:** To create additional marquees (up to 50, if available), click the  Copy Marquee icon to copy the existing marquee and paste it on the preview image.
- To delete a marquee, click the marquee, then click the  Delete Marquee icon.

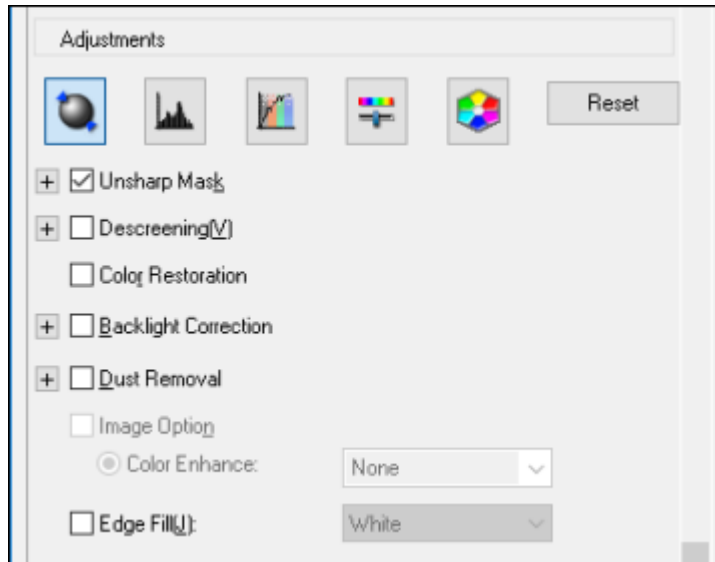

**Note:** If you draw multiple marquees, make sure you select the **All** button in the Preview window before you scan. Otherwise, only the area inside the currently selected marquee will be scanned.

3. Click inside the scan area and make any necessary settings in the Epson Scan window.

**Parent topic:** [Scanning in Professional Mode](#)

### Available Image Adjustments - Professional Mode

You can select these Adjustments options in Epson Scan Professional Mode. Not all adjustment settings may be available, depending on other settings you have chosen.

**Note:** Select the **Image Option** checkbox if you need to set any of the grayed-out image adjustments beneath the checkbox.

Click the  image adjustment icon to access additional settings.

Click the + (Windows) or ► (OS X) icon next to a setting to change the level of adjustment.

### **Unsharp Mask**

Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

### **Descreening**

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

### **Color Restoration**

Restores the colors in faded photos automatically.

### **Backlight Correction**

Removes shadows from photos that have too much background light.

### **Dust Removal**

Removes dust marks from your originals automatically.

### **Auto Exposure**

Automatically adjusts the image exposure settings when you click the  Auto Exposure icon. To automatically adjust image exposure settings continuously, click the **Configuration** button, click the **Color** tab, and select **Continuous auto exposure**. You can adjust the level of auto exposure using a slider.

### **Histogram Adjustment**

Provides a graphical interface for adjusting highlight, shadow, and gamma levels individually. (For advanced users only.) Click the  histogram icon to access the settings.

### **Tone Correction**

Provides a graphical interface for adjusting tone levels individually. (For advanced users only.) Click the  tone correction icon to access the settings.

### **Brightness**

Adjusts the overall lightness and darkness of the scanned image.

### **Contrast**

Adjusts the difference between the light and dark areas of the overall scanned image.

### **Saturation**

Adjusts the density of colors in the overall image.

### **Color Balance**

Adjusts the balance of colors in the overall image.

### Color Palette

Provides a graphical interface for adjusting mid-tone levels, such as skin tones, without affecting the highlight and shadow areas of the image. (For advanced users only.) Click the  Color Palette icon to access the settings.

### Threshold

Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

**Parent topic:** [Scanning in Professional Mode](#)

## Selecting a Scan Size - Professional Mode

You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the **Preview** button to preview your image.
2. In the Epson Scan window, select the size you want your scanned image to be from the **Target Size** list.

**Note:** If you need to rotate the orientation of the target size for your image, click the  orientation icon.

A marquee (dotted line) appears on your preview image proportioned for the size you selected.

3. Do the following, as necessary, to work with the selected scan area:
  - To move the marquee, click inside the scan area and drag the marquee where you want it.
  - To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edge where you want it.

**Note:** Manually adjusting the marquee will not change the target size of the scanned file. The marquee only indicates the area of the image that will be scanned.

4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

You see this window:

The screenshot shows a dialog box titled "Target Size" with a close button in the top right corner. On the left side, there is a label "Target Size:" above a large empty rectangular preview area. Below the preview area are two buttons: "Save" and "Delete". On the right side, there is a label "Target Size Name:" above a text input field containing the text "User Defined". Below this are three more input fields: "Width:" with an empty text box, "Height:" with an empty text box, and "Units:" with a dropdown menu currently showing "in.". At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

5. Name the custom size, enter the size, click **Save**, and click **OK**. Then adjust the marquee on the preview image.

The marquee is automatically proportioned for your custom scan size.

6. To use additional sizing tools, click the + (Windows) or ► (OS X) icon next to the Target Size setting and select options as desired.

- **Scale:** Reduces or enlarges your image by the percentage you enter.
- **Trimming:** Turns automatic image cropping on or off.
-  **Unlock icon:** Unlocks the width/height proportions of the scanned image size so you can adjust it without constraint.

Parent topic: [Scanning in Professional Mode](#)

## Image Preview Guidelines

You can preview your scanned image so you can adjust the scan settings using the preview as a guide. There are two types of preview available, depending on the scan mode and selected settings:

### Thumbnail preview

A thumbnail preview displays your previewed images as thumbnails with the scanned image area and exposure automatically selected.

### Normal preview

A normal preview displays your previewed images in their entirety so you can select the scanned image area and other settings manually.

Parent topic: [Selecting Epson Scan Settings](#)

## Scan Resolution Guidelines

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan. Follow these guidelines to determine the resolution setting you need:

- You will enlarge the image as you scan it.

If you will enlarge the image using Epson Scan's Target Size setting, you do not need to increase the Resolution setting.

- You will scan the image at its original size but enlarge it later in an image-editing program.

Increase Epson Scan's Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

- You will scan the image at 100% or smaller size.

Select Epson Scan's Resolution setting based on how you will use the scanned image:

- Email/view on a computer screen/post on the web: 96 to 150 dpi
- Print/convert to editable text (OCR): 300 dpi
- Fax: 200 dpi

**Parent topic:** [Selecting Epson Scan Settings](#)

## Selecting Scan File Settings

You can select the location, name, and format of your scan file on the File Save Settings window. You can also select various optional settings that control how Epson Scan behaves when you scan and save files.

The File Save Settings window may appear after you click **Scan** on the Epson Scan window. You may also be able to access the window by clicking the  icon on the Epson Scan window.

1. Do one of the following to select the folder in which you want to save your scanned image:
  - Click the button for one of the displayed folders.

- Click the **Other** button, click the **Browse** or **Choose** button, and select a folder.
2. If you want to change the default name for your scanned image, click **Edit** and select the options you want.
  3. Select the file format you want to use in the Image Format **Type** menu.
  4. If your file format provides optional settings, click the **Options** button to select them.
  5. Choose any of the optional settings you want to use by selecting their checkboxes.
  6. Click **OK**.

If you selected **PDF** or **Multi-TIFF** as the **Type** setting, you see this window after Epson Scan scans your document:

7. Choose one of the following options:
  - If you are scanning only one page, click **Save File**.
  - If you need to scan additional pages in a document, click **Add page**. Place additional pages on the product for scanning, click **Scan**, and repeat until you have scanned all the pages. When you are finished, click **Save File**.

- If you need to delete or reorder the scanned pages, click **Edit page**. Delete or reorder the pages using the icons that appear on the bottom of the editing window. When you are finished, click **OK**.

**Note:** If you installed an OCR (Optical Character Recognition) program, you may see a screen indicating the program is converting your page to text. Wait until the program re-scans the page and close the program, if necessary.

### [Available Scanned File Types and Optional Settings](#)

**Parent topic:** [Selecting Epson Scan Settings](#)

## **Available Scanned File Types and Optional Settings**

You can select from a variety of scanned file types and optional settings on the File Save Settings window in Epson Scan.

### **File Formats**

#### **Bitmap (\*.bmp)**

A standard image file format for most Windows programs.

#### **JPEG (\*.jpg)**

An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)

#### **Multi-TIFF (\*.tif)**

A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

#### **PDF (\*.pdf)**

A document format that is readable by Windows and OS X systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

#### **PICT (\*.pct)**

A standard image file format for most OS X programs.

#### **PRINT Image Matching II (\*.jpg or \*.tif)**

File formats that include Epson PRINT Image Matching II data for enhanced quality and a wider color range (does not affect the way the image displays on the screen).

#### **TIFF (\*.tif)**

A file format created for exchanging data between many programs, such as graphic and DTP software.

## Optional Settings

### Overwrite any files with the same name

Select to overwrite previous files with the same names.

### Show this dialog box before next scan

Select to have the File Save Settings window appear automatically before you scan (in certain Epson Scan modes).

### Open image folder after scanning

Select to have Windows Explorer or OS X Finder automatically open to the folder where your scanned image is saved after scanning.

### Show Add Page dialog after scanning

If you are scanning a multi-page document using the PDF or Multi-TIFF format, select to display a prompt for scanning additional pages after the first page is scanned.

Parent topic: [Selecting Scan File Settings](#)

## Scanning with OS X Using Image Capture

With OS X, you can scan with your product using an image-editing application such as Image Capture.

**Note:** With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To download Epson Scan, visit Epson's driver download site ([U.S. downloads](#) or [Canadian downloads](#)).

1. Open an image editing application, such as Image Capture.
2. Select your Epson product from the **DEVICES** or **SHARED** list in the Finder, if necessary. (You may need to hover over the **DEVICES** or **SHARED** list, click **Show**, and select your product.)
3. If you see the **Show Details** button, click it.

If you are scanning an item on the scanner glass, your product begins a preview scan.

4. Select the **Scan Mode** setting indicating where you placed your original (if available). Select any other available scan settings as necessary.

The image shows a scan software settings dialog box with the following options:

- Kind: Color
- Resolution: 50 dpi
- Use Custom Size
- Size: 0 inches
- Rotation Angle: 0°
- Auto Selection: Detect Separate Items
- Scan To: Pictures
- Name: Scan
- Format: JPEG
- Image Correction: None
- Unsharp Mask: None
- Descreening: None
- Backlight Correction: None
- Dust Removal: None
- Color Restoration
- Quiet Mode: Off

Buttons at the bottom: Hide Details, Overview, Scan

**Note:** If you are scanning a multi-page document in the ADF, you can have Image Capture combine all the pages into a single document. After all pages have been scanned, you see the message **No document loaded**.

5. Select the folder in which you want to save your scanned file in the **Scan To** pop-up menu.
6. Click **Scan**.

Your scanned file is saved in the folder you selected.

## Scanning Special Projects

Your product's scanning software offers various options to help you quickly complete special scan projects.

[Scanning to a SharePoint Server or Cloud Service](#)

[Scanning Multi-Page Originals as Separate Files](#)

**Parent topic:** [Scanning](#)

## Scanning to a SharePoint Server or Cloud Service

You can use Document Capture Pro to upload scanned images to a SharePoint server or a cloud service.

1. Do one of the following to start Document Capture Pro:
  - **Windows 10:** Click  and select **All apps**. Select **EPSON Software**, then select **Document Capture Pro**.
  - **Windows 8.x:** Navigate to the **Apps** screen and select **Document Capture Pro**.
  - **Windows (other versions):** Click  or **Start**, and select **All Programs** or **Programs**. Select **EPSON Software**, then select **Document Capture Pro**.
  - **OS X:** Open the **Applications** folder, select the **Epson Software** folder, and select **Document Capture**. Select your product and click **OK**, if necessary.

You see a window like this:

2. Click the  **Scan** icon.
3. Select any displayed scan settings you want to use.

**Note:** See the Help information in Document Capture Pro or Document Capture for details.

4. Click **Scan**.  
You see a preview of your scan in the Document Capture Pro or Document Capture window.
5. Click one of the cloud service Destination icons to choose where to save your scanned file.
  -  Web Folder (WebDAV)
  -  Evernote (Windows only)
  -  Google Drive
  -  SugarSync

- Microsoft SharePoint server (Windows only)

**Note:** You may need to click the arrow next to the icons in order to see all of them. The available icons may vary, depending on the software version you are using.

6. Select your Destination settings.

**Note:** The settings may vary, depending on the software version you are using. See the Help information in Document Capture Pro or Document Capture for details.

7. Select any other scan settings as necessary, and click **Send**.

Your originals are scanned and uploaded to the indicated server.

**Note:** You can also create a scan job for uploading scanned images to a SharePoint server or a cloud service. You can use the scan job when you scan with Document Capture Pro or Document Capture or when you scan using the Document Capture Pro option on the product control panel.

**Parent topic:** [Scanning Special Projects](#)

## Scanning Multi-Page Originals as Separate Files

You can use Document Capture Pro (Windows only) to scan multi-page originals as separate scanned files. You indicate where you want the new scanned files to start by inserting a blank page or barcode between the pages of your original.

**Note:** The settings may vary, depending on the software version you are using. See the Help information in Document Capture Pro for details.

1. Load a multi-page original with blank pages or barcodes inserted where you want to start a new scanned file.
2. Do one of the following to start Document Capture Pro:
  - **Windows 10:** Click  and select **All apps**. Select **EPSON Software**, then select **Document Capture Pro**.
  - **Windows 8.x:** Navigate to the **Apps** screen and select **Document Capture Pro**.

- **Windows (other versions):** Click  or **Start**, and select **All Programs** or **Programs**. Select **EPSON Software**, then select **Document Capture Pro**.

You see this window:

3. Click the  **Scan** icon.
4. Select any displayed scan settings you want to use.  
**Note:** See the Help information in Document Capture Pro for details.
5. Click **Scan**.  
You see a preview of your scan in the Document Capture Pro window.
6. Open the **File** menu and select **Batch Save**.
7. Click **File Name Settings**.
8. Select **Apply Job Separation** and click **Separation Settings**.
9. Select the method you used to separate the originals, select a folder name specification and click **OK**.

10. Select any other settings from the File Name settings window as necessary and click **OK**.
11. Select any other settings from the Batch Save window as necessary and click **OK**.

Your originals are saved into separate files as specified.

**Note:** You can also create a scan job for scanning multi-page originals as separate scanned files. You can use the scan job when you scan with Document Capture Pro or when you scan using the Document Capture Pro option on the product control panel.

[Sending Faxes](#)

[Receiving Faxes](#)

[Checking Fax Status](#)

[Printing Fax Reports](#)

## Connecting a Telephone or Answering Machine

You must connect your product to a telephone wall jack to send or receive faxes. If you want to use the same telephone line to receive calls, you can connect a telephone or answering machine to your product using an additional phone cable.

**Note:** If you do not connect a telephone to your product, make sure Receive Mode is set to **Auto**. Otherwise, you cannot receive faxes.

1. Connect a phone cable to your telephone wall jack and to the **LINE** port on your product.

**Note:** If you have a DSL or ISDN connection, you must connect the appropriate DSL filter, or ISDN terminal adapter or router to the wall jack to be able to use the line for faxing or voice calls using your product. Contact your DSL or ISDN provider for the necessary equipment.

### DSL connection

- 1 Telephone wall jack

- 2 DSL filter
- 3 DSL modem

**ISDN connection**

- 1 ISDN wall jack
- 2 Terminal adapter or ISDN router

- 2. If you are connecting a telephone or answering machine to your product using a second phone cable, remove the cap from the **EXT** port on your product.

3. Connect a second phone cable to your telephone or answering machine and to the **EXT** port on your product.

**Note:** If you connect an answering machine and Receive Mode is set to **Auto**, set the number of rings before your product answers a call to a number that is higher than your answering machine's setting for the number of rings.

Any phone or answering machine must be connected to the **EXT** port for your product to detect an incoming fax call when the phone is picked up. Epson cannot guarantee compatibility with VoIP, cable phone systems, or fiberoptic digital services such as FIOS.

## Setting Up Basic Fax Features

See these sections to select the basic settings you need to use the product's fax features.

[Selecting Your Country or Region](#)

[Selecting the Date and Time](#)

[Using the Fax Setup Wizard](#)

[Selecting the Line Type](#)

[Setting the Number of Rings to Answer](#)

**Parent topic:** [Setting Up Fax Features](#)

### Selecting Your Country or Region

Before faxing, select the country or region in which you are using your product.

**Note:** If you change the country or region, your fax settings return to their defaults and you must select them again. This setting can be locked by an administrator. If you can't access or change this setting, contact your administrator for assistance.

1. Press the  home button, if necessary.
2. Select **Setup**.

3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.

4. Select **Common Settings**.
5. Scroll down and select **Country/Region**.
6. Scroll up or down, if necessary, then select your country or region.  
You see a confirmation screen.
7. If the setting is correct, select **Yes**. (If not, select **No** and retry.)

**Note:** Changing the country or region restores the fax settings to the default settings.

**Parent topic:** [Setting Up Basic Fax Features](#)

### Selecting the Date and Time

Before faxing, select the current date, time, and daylight saving phase in your area, and choose your preferred date and time format.

**Note:** This setting can be locked by an administrator. If you can't access or change this setting, contact your administrator for assistance.

1. Press the  home button, if necessary.

2. Select **Setup**.

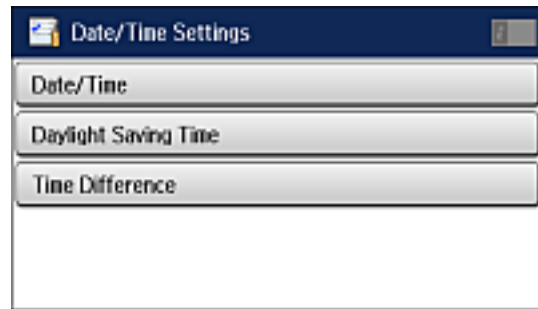

3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.
4. Select **Common Settings**.

5. Select **Date/Time Settings**.

You see a screen like this:

6. Select **Daylight Saving Time**.
7. Select the setting that applies to your area:
  - **Winter**: it is winter or your region does not use Daylight Saving Time (DST)
  - **Summer**: it is spring or summer and your region uses Daylight Saving Time (DST)

**Note:** If your region uses Daylight Saving Time (DST), you must change this setting to match the season. When you change from **Winter** to **Summer**, your product automatically sets its clock ahead one hour. When you change from **Summer** to **Winter**, it sets its clock back one hour.

8. Select **Date/Time**.
9. Select the date format you want to use.
10. Use the numeric keypad to enter the current date.
11. Select the time format you want to use.
12. Use the numeric keypad to enter the current time.
13. If necessary, select **Time Difference** and use the icons on the screen to set the difference between UTC (Coordinated Universal Time) and your time zone.

**Parent topic:** [Setting Up Basic Fax Features](#)

### Using the Fax Setup Wizard

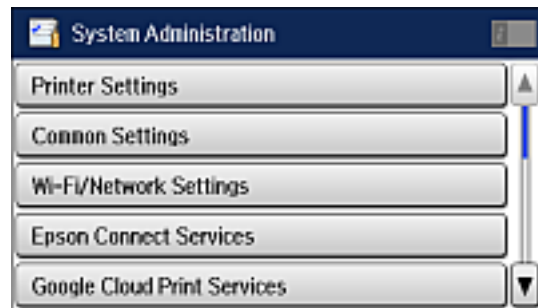

You can setup the product's basic fax settings using the Fax Setting Wizard. This wizard is automatically displayed when the product is turned on for the first time. You can also change these settings individually from the Fax Settings menu.

**Note:** These settings can be locked by an administrator. If you can't access or change these setting, contact your administrator for assistance.

1. Press the **home** button, if necessary.
2. Select **Setup**.

3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.

4. Scroll down and select **Fax Settings**.
5. Scroll down and select **Fax Setting Wizard**.  
The Fax Setting Wizard screen appears.
6. Select **Start**.

You see a Fax Header screen like the following:

7. On the Fax Header screen, use the displayed keypad to enter the sender name for your fax source, such as your name or a business name. You can enter up to 40 characters.
8. On the Your Phone Number screen, use the displayed keypad to enter your fax number, up to 20 characters.

**Note:** The name and phone number in the fax header identifies the source of the faxes you send.

9. On the Distinctive Ring Setting screen, do one of the following:
  - If you have subscribed to a distinctive ring service from your telephone company, select **Proceed**. Select the ring pattern to be used for incoming faxes or select **On**. Go to step 12.
  - If you do not have a distinctive ring service, select **Skip** and go to the next step.

**Note:** Distinctive ring services allows you to have several phone numbers on one phone line. Each number is assigned a different ring pattern. You can use one number for voice calls and another for fax calls. Select the ring pattern assigned to fax calls in the DRD Setting. If you select **On** or a ring pattern other than **All**, Receive Mode is automatically set to **Auto**.

10. On the Receive Mode Setting screen, do one of the following:
  - If you have connected an external telephone or answering machine to the product, select **Yes** and go to the next step.
  - If you did not connect an external telephone or answering machine, select **No** and go to step 12. (Receive Mode is automatically set to **Auto**; otherwise you cannot receive faxes.)

11. On the next Receive Mode Setting screen, select **Yes** to receive faxes automatically or select **No** to receive faxes manually.

**Note:** If you connect an external answering machine and select to receive faxes automatically, make sure the **Rings to Answer** setting is correct. If you select to receive faxes manually, you need to answer every call and operate the product's control panel or your phone to receive faxes.

12. On the Confirm Settings screen, confirm the displayed settings and select **Proceed**, or press  back to change the settings.
13. On the Run Check Fax Connection screen, select **Start** and follow the on-screen instructions to check the fax connection and print a report of the check result. If there are any errors reported, try the solutions on the report and run the check again.

**Note:**

- If the Select Line Type screen appears, select the correct line type.
- If the Select Dial Tone Detection screen appears, select **Disable**. However, disabling the dial tone detection function may drop the first digit of a fax number and send the fax to the wrong number.

**Parent topic:** [Setting Up Basic Fax Features](#)

**Related tasks**

[Entering Characters on the LCD Screen](#)

### Selecting the Line Type

If you connect the product to a PBX phone system or terminal adapter, you must change the product's line type. PBX (Private Branch Exchange) is used in office environments where an external access code such as "9" must be dialed to call an outside line. The default Line Type setting is PSTN (Public Switched Telephone Network), which is a standard home phone line.

**Note:** This setting can be locked by an administrator. If you can't access or change this setting, contact your administrator for assistance.

1. Press the  home button, if necessary.

2. Select **Setup**.

3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.

4. Scroll down and select **Fax Settings**.
5. Select **Basic Settings**.
6. Select **Line Type**.
7. Select **PBX**.

You see a screen like this:

8. Select **Use**.
9. Select **Access Code**.
10. Use the displayed keypad to enter the external access code such as 9, and select **OK**.

**Parent topic:** [Setting Up Basic Fax Features](#)

### **Setting the Number of Rings to Answer**

If you connect an external answering machine and select to receive faxes automatically, make sure the Rings to Answer setting is correct. The number of rings should be higher than the number of rings your answering machine is set to for answering a call.

**Note:** This setting can be locked by an administrator. If you can't access or change this setting, contact your administrator for assistance.

1. Press the  home button, if necessary.

2. Select **Setup**.

3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.

4. Scroll down and select **Fax Settings**.
5. Select **Receive Settings**.

6. Select **Rings to Answer**.

7. Select the number of rings, and select **OK**. Make sure to select a number higher than the number of rings your answering machine is set to for answering a call.

**Note:** An answering machine picks up every call faster than the product, but the product can detect fax tones and start receiving faxes. If you answer the phone and hear a fax tone, check that the product has started receiving the fax, then hang up the phone.

**Parent topic:** [Setting Up Basic Fax Features](#)

## Selecting Advanced Fax Settings

You can select a variety of advanced fax settings.

**Note:** These settings can be locked by an administrator. If you can't access or change these setting, contact your administrator for assistance.

1. Press the  home button, if necessary.

2. Select **Setup**.

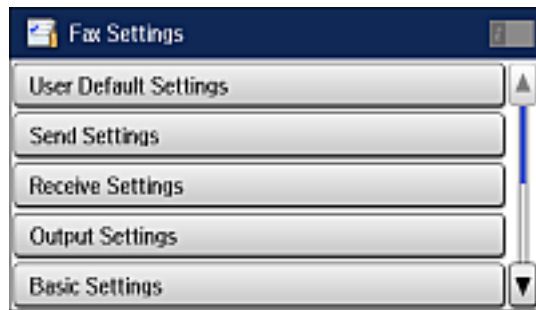

3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.

4. Scroll down and select **Fax Settings**.

You see a screen like this:

5. Select the group of settings you want to change.

### **User Default Settings - Fax**

Set the default settings you want to use for faxing.

<b>Setting</b>	<b>Options</b>	<b>Description</b>
<b>Resolution</b>	<b>Standard</b>	Adjusts the scan resolution and print quality of outgoing faxes.
	<b>Fine</b>	
	<b>Super Fine</b>	
	<b>Ultra Fine</b>	
	<b>Photo</b>	
<b>Density</b>	<b>Auto</b>	Automatically adjusts the darkness of outgoing faxes. Select this option when sending black-and-white text documents.
	<b>Manual</b>	Lets you select from various density levels.
<b>Document Size (Glass)</b>	<b>Half Letter</b>	Sets the size for a document placed on the scanner glass.
	<b>A5</b>	
	<b>Letter</b>	
	<b>A4</b>	

Setting	Options	Description
<b>ADF 2-Sided</b>	<b>Off</b>	Select <b>On</b> to enable 2-sided faxing from the ADF. The Direct Send option and color faxing are disabled when you turn on this setting.
	<b>On</b>	
<b>Direct Send</b>	<b>Off</b>	Select <b>On</b> to send black-and-white faxes to a single recipient as soon as the connection is made, without saving the scanned image to memory. You cannot use this setting when sending a color fax or sending a fax to multiple recipients.
	<b>On</b>	
<b>Continuous Scan from ADF</b>	<b>Off</b>	Select <b>On</b> to have the product to ask if you want to scan another page after a document in the ADF has finished scanning.
	<b>On</b>	
<b>Transmission Report</b>	<b>Print on Error</b>	Lets you select when to print transmission reports.
	<b>Print</b>	
	<b>Do Not Print</b>	

Parent topic: [Selecting Advanced Fax Settings](#)

### Send Settings - Fax

Set the send options you want to use for outgoing faxes.

Setting	Options	Description
<b>Batch Send</b>	<b>Off</b>	Sorts outgoing faxes by recipient in the product's memory, and then sends them as a batch.
	<b>On</b>	
<b>Save Failure Data</b>	<b>Off</b>	Saves faxes that failed to be sent in the product's memory. You can resend the faxes from the product's Status Menu.
	<b>On</b>	

Parent topic: [Selecting Advanced Fax Settings](#)

### Receive Settings - Fax

Set the receive options you want to use for incoming faxes.

Setting	Options	Description
<b>Receive Mode</b>	<b>Manual</b>	Lets you confirm whether an incoming fax should be printed; a telephone must be connected to the product
	<b>Auto</b>	Automatically receives and prints faxes.
<b>Distinctive Ring</b>	<b>All</b>	If you are using a Distinctive Ring Service on your phone line, your telephone company can assign two or more phone numbers to the same line and assign different ring patterns to each. If you use this service, select the number of rings for your fax number so your product can receive faxes on the correct number of rings. Select <b>All</b> for phones lines that do not use this service.
	<b>Single</b>	
	<b>Double</b>	
	<b>Triple</b>	
	<b>Double&amp;Triple</b>	
<b>Rings to Answer</b>	1 to 9	Sets the number of rings before your product receives a fax. If Receive Mode is set to <b>Auto</b> and an answering machine is connected to the product, make sure this setting is set higher than the number of rings your answering machine is set to answer a call.
<b>Remote Receive</b>	<b>Off</b>	Lets you start receiving faxes using your phone instead of operating the product (if the Receive Mode is set to <b>Auto</b> ). When you select <b>On</b> , you must also set a <b>Start Code</b> . If you are using a cordless handset with its base connected to the product, you can start receiving the fax by entering the code using the handset.
	<b>On</b>	
	<b>Start Code</b>	

Parent topic: [Selecting Advanced Fax Settings](#)

### Output Settings - Fax

Set the output options you want to use for incoming faxes.

**Note:** If you select **Save to Inbox**, faxes are saved in the product's memory. Delete faxes after viewing or printing to prevent the memory from filling up. Even if you select other options for saving faxes, they may be saved temporarily in the product's memory.

Setting	Options	Description
Fax Output	Other Settings	Lets you create a folder for saving faxes on a memory device and select settings for forwarding faxes.
	Save to Inbox	Saves incoming faxes in the product's memory. You can view the faxes on the LCD screen and print if needed. Select how to process incoming faxes when the memory is full by selecting the option to receive and print faxes, or to reject incoming faxes.
	Save to Computer	To use this option, you must use the Epson FAX Utility. Select <b>Yes and Print</b> to have faxes saved to your computer and printed automatically.
	Save to Memory Device	Saves incoming faxes to a connected memory device or USB storage device. Select <b>Yes and Print</b> to have faxes saved to the memory device and printed automatically.
	Forward	Forwards incoming faxes to as many as 5 numbers in your contact list. Select <b>Yes and Print</b> to have faxes forwarded and printed automatically.  <b>Note:</b> Color faxes cannot be forwarded.
Auto Reduction	On	Select to reduce the size of large received faxes to fit on the paper size in the selected paper source.
	Off	Select to print large incoming faxes at their original size on multiple sheets, if necessary.
Auto Rotation	On	If you have loaded A5-size paper, select <b>On</b> to rotate landscape-oriented incoming faxes so that they print correctly on the paper.
	Off	
Collation Stack	On	Select <b>On</b> to print incoming faxes so that the pages are stacked in the correct page order. (When the product is low on memory, this option may not be available.)
	Off	

Setting	Options	Description
<b>Print Suspend Time</b>	<b>Off</b>	Select <b>On</b> to set a time period to stop automatic printing of faxes or reports and save received faxes in the product's memory. (Make sure there is enough free memory before using this function.)
	<b>On</b>	
	<b>Time to Stop</b>	
	<b>Time to Restart</b>	
<b>Forwarding Report</b>	<b>Print on Error</b>	Selects whether or when to print a report after an incoming fax is forwarded.
	<b>Print</b>	
	<b>Do Not Print</b>	
<b>Attach Image to Report</b>	<b>Off</b>	Does not include an image of the fax on transmission reports.
	<b>On(Small Image)</b>	Prints transmission reports with an image of the first faxed page. (Does not work when you select <b>Direct Send</b> .)
	<b>On(Large Image)</b>	
<b>Fax Log Auto Print</b>	<b>Off</b>	Does not print the fax log.
	<b>On(Every 30)</b>	Prints the fax log after 30 faxes are sent or received.
	<b>On(Time)</b>	Prints the fax log at a time you select using the numeric keypad displayed on the LCD screen.
<b>Report Format</b>	<b>Simple</b>	Selects the amount of information on fax reports.
	<b>Detail</b>	

Parent topic: [Selecting Advanced Fax Settings](#)

### Basic Settings - Fax

Set the basic options you want to use for incoming and outgoing faxes.

Setting	Options	Description
<b>Fax Speed</b>	<b>Fast(33,600bps)</b>	Sets the speed at which you send and receive faxes.
	<b>Medium(14,400bps)</b>	
	<b>Slow(9,600bps)</b>	

Setting	Options	Description
<b>ECM</b>	<b>On</b>	Turns on Error Correction Mode (ECM) to automatically correct errors in sent or received fax data.
	<b>Off</b>	Turns off Error Correction Mode (ECM); color faxes cannot be sent or received.
<b>Dial Tone Detection</b>	<b>On</b>	Automatically dials the number you enter for faxing when the product detects a dial tone.
	<b>Off</b>	Turns off automatic dial tone detection, which may be necessary if the product is connected to a PBX (Private Branch Exchange) or a TA (Terminal Adapter). However, turning this setting off may cause the product to drop the first digit of a fax number.
<b>Line Type</b>	<b>PSTN</b>	Selects a standard phone line (Public Switched Telephone Network).
	<b>PBX</b>	Selects Private Branch Exchange, the type of phone line used in office environments where an access code such as 9 must be used to call an outside line.
<b>Header</b>	<b>Fax Header</b>	Select to enter the header information and your phone number for inclusion on outgoing faxes.
	<b>Your Phone Number</b>	

Parent topic: [Selecting Advanced Fax Settings](#)

### Security Settings - Fax

Set the security options you want to use for fax data.

Setting	Options	Description
<b>Direct Dialing Restrictions</b>	<b>Off</b>	Does not restrict dialed fax numbers.
	<b>On</b>	Allows faxing only to numbers stored in the contacts list or history.
	<b>Enter Twice</b>	Requires you to enter fax numbers twice to prevent errors.

Setting	Options	Description
<b>Confirm Address List</b>	<b>Off</b>	Selects whether or not to display a recipient confirmation screen before a fax is sent.
	<b>On</b>	
<b>Inbox Password Settings</b>	<b>Register</b>	Select to set a password for viewing incoming faxes.
<b>Backup Data Auto Clear</b>	<b>Off</b>	Automatically erases sent or received fax data from your product's memory.
	<b>On</b>	
<b>Clear Backup Data</b>	—	Deletes all sent or received fax data remaining in your product's memory; run this function if you are giving away or disposing of your product.

## Sending a Fax Using the Keypad, Contact List, or History

You can send a fax from your product control panel by entering the fax number, or selecting the number from either the contact list or fax history.

**Note:** You can send a black-and-white fax to up to 200 recipients at a time, or send a color fax to one recipient at a time. If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

**Note:** The product can queue up to 50 black-and-white fax jobs. You can check or cancel fax jobs in the queue using the Status Menu.

1. Place your original on the product for faxing.
2. Press the  home button, if necessary.
3. Select **Fax**.

**Note:** To fax a double-sided document, place your document in the ADF and turn on the **ADF 2-Sided** setting. (You cannot fax double-sided documents in color.)

4. Do one of the following to select fax recipients:
  - **Manually enter a fax number:** Press the **Enter a Fax Number** field and enter a fax number. Press  when done. To add another fax number, repeat the same steps. You can also use the numeric keypad on the control panel to enter a fax number.

**Note:** If direct dialing has been restricted, you can only select the number from the contact list or fax history. If necessary, enter an outside line access code (such as 9) at the beginning of the fax number. If the access code has been set up in the **Line Type** setting, enter the # pound sign instead of the code.

- **Select from the contact list:** Select **Contacts** to display the contact list screen. Select the checkbox next to one or more contact (select the checkbox again to deselect it). You can also select the **Search** field to search for recipients by name, index name, or entry number. Select **Proceed** when you are finished.

- **Select from the sent fax history:** Select **History** to display the sent fax history. Select a recipient from the list, select **Menu**, and select **Send to this number**.

**Note:** To delete entered recipients, select the **Enter a Fax Number** field, select the recipient you want to delete, and select **Delete from the List**.

5. If you need to change any fax settings, select **Menu**, select **Fax Send Settings**, and select your settings.
6. If you want to preview your fax in black-and-white on the LCD, select **Preview**. (If the preview looks incorrect, select **Retry**, reposition the document or change the fax settings, and repeat this step.)

**Note:** If you do not touch the preview screen for 20 seconds, your product sends the fax automatically. You cannot preview images when the Direct Send setting is turned on.

7. If you want to save your fax settings for later use, select **Presets** and add a new entry.
8. Press one of the **Start** buttons.

**Note:** To cancel faxing, press the **Stop** button. You can also cancel the job or check the job status from the Status Menu.

Your product scans your original and prompts you to place additional pages, if necessary.

After scanning your originals, your product dials the number and sends the fax.

**Note:** Your product does not save sent color faxes to its memory. If the Save Failure Data option is enabled, faxes that failed to be sent are stored to the product's memory and you can resend them from the Status Menu screen.

**Parent topic:** [Sending Faxes from the Product Control Panel](#)

### **Fax Sending Options**

While sending a fax, you can select **Menu** and select these options from the Fax Send Settings menu.

**Note:** You can also select these options in the User Default Settings menu.

Setting	Options	Description
<b>Resolution</b>	<b>Standard</b>	Adjusts the scan resolution and print quality of outgoing faxes.
	<b>Fine</b>	
	<b>Super Fine</b>	
	<b>Ultra Fine</b>	
	<b>Photo</b>	
<b>Density</b>	<b>Auto</b>	Automatically adjusts the darkness of outgoing faxes. Select this option when sending black-and-white text documents.
	<b>Manual</b>	Lets you select from various density levels.
<b>Document Size (Glass)</b>	<b>Half Letter</b>	Sets the size for a document placed on the scanner glass.
	<b>A5</b>	
	<b>Letter</b>	
	<b>A4</b>	
<b>ADF 2-Sided</b>	<b>Off</b>	Select <b>On</b> to enable 2-sided faxing from the ADF. The Direct Send option and color faxing are disabled when you turn on this setting.
	<b>On</b>	
<b>Direct Send</b>	<b>Off</b>	Select <b>On</b> to send black-and-white faxes to a single recipient as soon as the connection is made, without saving the scanned image to memory. You cannot use this setting when sending a color fax or sending a fax to multiple recipients.
	<b>On</b>	
<b>Priority Send</b>	<b>Off</b>	Select <b>On</b> to send the current fax before other faxes waiting to be sent.
	<b>On</b>	
<b>Continuous Scan from ADF</b>	<b>Off</b>	Select <b>On</b> to have the product to ask if you want to scan another page after a document in the ADF has finished scanning.
	<b>On</b>	
<b>Transmission Report</b>	<b>Print on Error</b>	Lets you select when to print transmission reports.
	<b>Print</b>	
	<b>Do Not Print</b>	

**Parent topic:** [Sending Faxes from the Product Control Panel](#)

### **Sending a Fax at a Specified Time**

You can send a fax at a time of your choice.

**Note:** Make sure the product's date and time settings are correct. You can only send faxes in black-and-white when you use this option.

1. Place your original on the product for faxing.
2. Press the  home button, if necessary.
3. Select **Fax**.

**Note:** To fax a double-sided document, place your document in the ADF and turn on the **ADF 2-Sided** setting.

4. Enter a fax number or select a number from the Contacts list or History.
5. Select **Menu**.
6. Select **Send Fax Later**.
7. Select **On**.
8. Select **Time**, use the displayed keypad on the LCD screen to enter your desired time, and select **OK**.
9. Press one of the  **Start** buttons.

**Note:** To cancel faxing, press the  **Stop** button.

After scanning your originals, your product dials the number and sends the fax at the specified time.

**Note:** If the product is turned off at the specified time, the fax is sent when it is powered on.

### **Sending a Stored Fax**

You can store one scanned document (up to 100 black-and-white pages) and send it whenever necessary.

1. Place your original on the product for faxing.
2. Press the  home button, if necessary.
3. Select **Fax**.

4. Select **Menu**.
5. Select **Store Fax Data** and select **On**.
6. If you need to change any fax settings, select **Menu**, select **Fax Send Settings**, and select your settings.
7. Press the  **B&W** button.  
Your document is scanned, stored, and briefly previewed.
8. When you are ready to send the document, press the **i Status** button.

You see a screen like this:

9. Select **Job Monitor**.
10. Select **Communication Job**.
11. Select the stored fax job you want to send.
12. Select **Send/View** and select **Send**.

You can store only one document at a time. Subsequent documents overwrite the existing document. You can also delete a stored document from the Status Menu.

**Dialing Fax Numbers from a Connected Telephone**

If you have connected a telephone to the **EXT** port on your product, you can send a fax by dialing the fax number from the connected telephone. If the recipient's phone number and fax number are the same, you can speak to the recipient before sending the fax.

1. Place your original on the product for faxing.
2. Press the  home button, if necessary.
3. Dial the fax number from the connected telephone. Speak to the recipient if necessary.

**Note:** If you are using a pre-paid calling card, enter the number and password required to use the card before entering the destination fax number.

4. Select **Start Fax** on the LCD screen.
5. Select **Send**.

**Note:** Your product now communicates with the recipient's fax machine. Do not hang up the telephone.

6. When you hear a fax tone, press one of the  **Start** buttons to start sending the fax.

**Note:** If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

7. Hang up the telephone.

## **Sending Faxes Using the Fax Utility - Windows**

You can send a fax from a printing program in Windows. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax and select the print command.

You see a window like this:

2. Select your product with the **FAX** option as the printer.
3. To change the Paper Size, Orientation, Color, Image Quality, or Character Density settings, click the **Preferences** or **Properties** button.

**Note:** If you see a **Setup**, **Printer**, or **Options** button, click it. Then click **Preferences** or **Properties** on the next screen. For more information about selecting fax print settings, click **Help**.

4. Select the Page Range as necessary. (Leave the Number of copies set to 1.)
5. Click **Print** or **OK**.

If you're faxing for the first time, you see a window like this one:

The image shows a dialog box titled "Enter Sender Information" with a close button (X) in the top right corner. The dialog contains several input fields: "Nickname:" with the text "Sender1" entered; "Name:" which is empty; "Phone Number:" and "Fax Number:" which are empty; "Address:" which is a large empty text area; "Company/Corp.:" which is empty; and "Division/Title:" which is empty. At the bottom right, there are two buttons: "OK" and "Cancel".

6. Enter your sender information so that recipients can identify the origin of the fax. Then click **OK** to save the sender information.

You see a window like this:

Recipient Settings (1 / 3)

Recipient List: Recipient Total: 0

Name/Group Name	Fax Number	Company/Corp.	Division/Title
-----------------	------------	---------------	----------------

Add Delete

Phone Book | Manual Dial

Name:  Fax Number:

Title:  Because "-" acts as a pause, do not use it to punctuate phone numbers.

Company/Corp.:  Division/Title:

Save to Phone Book... Clear

< Back Next > Cancel Help

7. Enter the recipient's name and fax number or select a recipient from the phonebook, then click **Next**.

**Note:** For detailed instructions on using the Epson FAX Utility, click **Help**.

8. Select a cover sheet and enter a subject and message, then click **Next**.
9. Click **Send** to transmit your fax.

**Parent topic:** [Sending Faxes](#)

## Sending Faxes Using the Fax Utility - OS X

You can send a fax from a OS X printing program using the FAX Utility. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax.

2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

The image shows a print settings dialog box with the following controls:

- Printer:** A dropdown menu set to "FAX".
- Presets:** A dropdown menu set to "Default Settings".
- Copies:** A text input field containing the number "1".
- Pages:** Radio buttons for "All" (selected), "From: 1 to: 1", and "Page Range".
- Paper Size:** A dropdown menu set to "US Letter" with the dimensions "8.50 by 11.00 inches" displayed to the right.
- Orientation:** Two icons: one for portrait orientation (vertical arrow) and one for landscape orientation (horizontal arrow).

3. Select your product **FAX** option as the **Printer** setting.
4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
5. Select the number of pages you are faxing as the **Pages** setting.

**Note:** Leave the **Copies** setting set to **1**.

6. Select **Recipient Settings** from the pop-up menu.

You see this window:

Recipient Settings

Recipient List:

Name	Company/Corp.	Fax Number
------	---------------	------------

Add:

Name:

Company/Corp.:

Fax Number:

A hyphen (-) is available only at the beginning of the phone number because it acts as a pause in dialing.

External Access Prefix:

Cancel Fax

7. Do one of the following to choose your recipient:
  - Select a name or group from the **Recipient List**.
  - Enter a name, company, and fax number and click the **+** button.
  - Click the  icon and select a recipient from your address book.
8. Select **Fax Settings** from the pop-up menu.

You see this window:

9. Select the **Color** and **Image Quality** settings you want to use for your fax.

10. Click **Fax**.

**Parent topic:** [Sending Faxes](#)

## Receiving Faxes

See these sections to receive faxes with your product.

[Fax Reception](#)

[Receiving Faxes Automatically](#)

[Receiving Faxes Manually](#)

[Forwarding Received Faxes](#)

[Receiving a Fax by Polling](#)

[Viewing a Fax on the LCD Screen](#)

**Parent topic:** [Faxing](#)

## Fax Reception

Your product will automatically receive and print faxes when you set the Receive Mode to **Auto**.

If you connected a telephone to your product so you can use the same phone line for faxes and voice calls, you can also set your product to receive faxes manually. This allows you to check for a fax tone using the telephone and press a button on your product to receive the fax.

Make sure to load paper in your product and select your fax settings before receiving a fax.

**Note:** If you run out of paper during fax printing, load more paper and press the button indicated on your product's LCD screen to continue.

**Parent topic:** [Receiving Faxes](#)

## Receiving Faxes Automatically

To receive faxes automatically, make sure Receive Mode is set to **Auto** (the default setting for the product).

To change the Receive Mode if necessary, select **Setup > System Administration > Fax Settings > Receive Settings > Receive Mode**.

If an answering machine is connected, make sure the product's **Rings to Answer** setting is set higher than the number of rings your answering machine is set to answer a call. For example, if the answering machine is set to pick up on the fourth ring, set the product to pick up on the fifth ring or later.

[Receiving Faxes Manually](#)

## Receiving Faxes Manually

You can set up your product to receive faxes manually by setting the Receive Mode to **Manual**. This lets you check for a fax tone on the connected telephone before receiving a fax.

1. To change the Receive Mode, select **Setup > System Administration > Fax Settings > Receive Settings > Receive Mode** and select **Manual**.
2. When the connected telephone rings, answer the call.
3. If you hear a fax tone, select **Start Fax** on the LCD display.
4. Select **Receive**.
5. Press one of the  **Start** buttons to start receiving the fax.

6. Hang up the telephone.

**Parent topic:** [Receiving Faxes](#)

[Receiving Faxes Automatically](#)

## Forwarding Received Faxes

You can forward received faxes to another fax machine, or convert the faxes into PDF documents and forward them to a shared folder on the network or to an email address. Forwarded faxes are deleted from the product's memory. Before using this feature, make sure the date and time are set correctly, the forwarding destination is set up in the contact list, and the email server settings are configured.

**Note:** Color documents cannot be forwarded to another fax machine.

**Note:** This setting can be locked by an administrator. If you can't access or change this setting, contact your administrator for assistance.

1. Press the  home button, if necessary.
2. Select **Setup**.

3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.

4. Scroll down and select **Fax Settings**.
5. Select **Output Settings**.
6. Select **Fax Output**.
7. Select **Settings**.
8. Select **Forward**.
9. Select **Yes**.

**Note:** If you want to print the fax automatically before forwarding it, select **Yes and Print**.

10. Select **Other Settings**.
11. Select **Where to Forward**.
12. Select the forwarding destination from the contact list.

**Note:** Select **View** to sort your contacts by the printer's features. You can select up to 5 forwarding destinations.

13. When you are finished selecting your forwarding destinations, select **Proceed**.
14. Confirm the displayed forwarding destinations are correct and select **Close**.
15. Select **Options When Forwarding Failed**.
16. Select the option you want to occur when received faxes fail to be forwarded; print the faxes or save them in the printer's inbox.

17. If you are forwarding to an email address, you can specify the subject by selecting **Email Subject to Forward**.

**Note:** If you are forwarding faxes to a shared folder on the network or an email address, you can test if fax forwarding was set up correctly by sending a scanned image to the destination using the scan to email or scan to network folder/ftp option. If you are forwarding faxes to a shared folder on the network, you can set up the FAX Utility to notify you whenever a new fax is received.

Parent topic: [Receiving Faxes](#)

## Receiving a Fax by Polling

You can use polling to receive a fax from another fax machine (such as a fax information service).

**Note:** This procedure does not work if the fax information service includes audio guidance.

1. Press the  home button, if necessary.
2. Select **Fax**.

You see a screen like this:

3. Select **Menu**.
4. Select **Polling Receive** and select **On**.
5. Enter the fax number you expect to receive the fax from.
6. Press one of the  **Start** buttons to start receiving the fax.

Parent topic: [Receiving Faxes](#)

## Viewing a Fax on the LCD Screen

You can save received faxes in your product's memory and view them on the LCD screen.

**Note:** To use this feature, you must first enable Save to Inbox from the Output Settings menu. The Inbox can be locked by an administrator. If you cannot access the Inbox, contact your administrator for assistance.

1. Press the  home button, if necessary.
2. Check the  icon on the LCD screen. It turns on if there are any unread or unprinted faxes in the product's memory.
3. Select **Fax**.
4. Select **Open Inbox**. Enter the administrator password, if necessary.
5. Select the fax you want to view.  
You see the fax displayed on the screen.
6. Select **Menu**.
7. Select one of the printing or deleting options, and follow the on-screen instructions.

**Note:** Delete faxes after you print or view them to prevent the product's memory from filling up. When the memory is full, you can forward or print incoming faxes.

Parent topic: [Receiving Faxes](#)

## Checking Fax Status

You can use the **i Status** button to check the status of current fax jobs, or faxes that have been received or sent.

1. Press the **i Status** button.

You see a screen like this:

2. Do one of the following:
  - To check the status of current fax jobs, select **Job Monitor**, select **Communication Job**, and select the fax job you want to check.
  - To check the history of faxes that have been sent or received, select **Job History**, select **Receive Job** or **Send Job**, and select the job you want to check.
  - To check received faxes that have been saved or temporarily saved in the product's memory, select **Job Storage** and select **Inbox**.

**Note:** If you see a numbered icon on top of the **Fax** icon on your product's LCD screen, received faxes have been temporarily saved to the product's memory.

Parent topic: [Faxing](#)

## Printing Fax Reports

You can select from several fax reports to print whenever necessary. You can also have the fax log printed automatically by turning on **Fax Log Auto Print**.

1. Press the  home button, if necessary.
2. Select **Fax**.

You see a screen like this:

3. Select **Menu**, select **Fax Report**, and select the report you want to print.

# Using an External Device with Your Product

Follow the instructions in these sections to use your product with an external device, such as a camera, smartphone, or other device.

[Connecting and Using a USB Flash Drive or External Device](#)

[Disconnecting a USB Device](#)

[Viewing and Printing From the LCD Screen](#)

[Transferring Files on a USB Device](#)

## Connecting and Using a USB Flash Drive or External Device

You can view and print files from a USB thumb drive or other external storage device, such as an external hard drive. Before you connect your thumb drive or device, make sure the product is turned on but not printing.

**Note:** Epson cannot guarantee the compatibility of your device. Make sure the files on the device are compatible with the product.

1. Remove any memory cards from the product.
2. Insert your USB thumb drive or the USB cable that came with your device into the USB port on the front of your product.
3. When you see a message that the device is recognized, select **OK**.

When you finish printing, make sure the access light on the drive is not flashing, then remove or disconnect it from the product.

**Caution:** Do not remove the USB drive or turn off the product when the access light is flashing, or you may lose photos on the drive.

[USB Device Photo File Specifications](#)

**Parent topic:** [Using an External Device with Your Product](#)

## USB Device Photo File Specifications

You can use USB devices with your product containing files that meet these specifications.

<b>File format</b>	JPEG with the Exif version 2.3 standard TIFF 6.0-compliant uncompressed images: RGB full-color or binary (not CCITT-encoded) PDF version 1.7-compliant
<b>Image size</b>	80 × 80 pixels to 10200 × 10200 pixels
<b>File size</b>	Up to 2GB
<b>Number of files</b>	JPEG: Up to 9990 TIFF: Up to 999 PDF: Up to 999

**Parent topic:** [Connecting and Using a USB Flash Drive or External Device](#)

## Disconnecting a USB Device

After you finish working with a USB device, follow these steps to remove it.

1. If your product is connected to your computer using a USB cable, do one of the following:
  - **Windows:** Open the **My Computer**, **Computer**, **This PC**, or **Windows Explorer** utility. Then right-click the name of your USB device (listed as a removable disk) and select **Eject**.
  - **OS X:** Drag the removable disk icon for your USB device from the desktop into the trash.

**Caution:** Do not remove a USB device before completing the procedure above or you may lose data from the flash drive.

2. Pull the USB device out of the USB port on the front of the product.

**Parent topic:** [Using an External Device with Your Product](#)

## Viewing and Printing From the LCD Screen

See these sections to view and print photos or other files displayed on your product's LCD screen.

Parent topic: [Using an External Device with Your Product](#)

## Printing JPEG Photos

You can select JPEG photos for printing as you view them on the LCD screen.

1. Press the  home button, if necessary.
2. Select **Memory Device**.
3. Select **JPEG**.

You see a screen like this:

**Note:** If you have more than 999 JPEG images on your device, the images are divided into groups, and you must first select the group you want to display.

4. Do one of the following to select your photos:
  - To select individual photos, select the thumbnail image of the photo you want to print, then use the numeric keypad on the control panel or press **+** or **-** on the LCD screen to select the number of copies (up to 99). Press the left or right arrow buttons to scroll through and select additional photos, or press the  back button to return to the thumbnail image view and select another photo.
  - To select all photos, select **Options** > **Select Images** > **Select All Images**.
  - To select all photos, select **Menu** > **Select All Images**.
5. To adjust a photo (adjustments modify only your printed copy, not the original file), select its thumbnail image, and select **Adjustments**. Make the necessary adjustments and press the  back button.
6. To change the print settings, select **Settings**, and select the necessary settings. When you are finished, press the  back button.

7. When you are ready to print, press the  **B&W** button.

**Note:** To cancel printing, press the  **Stop** button or select **Cancel**.

## Photo Adjustment Options - Device Mode

Select the **Image Adjustments** you want to use when viewing and printing photos displayed on the LCD screen.

Photo adjustment settings	Available options	Description
<b>Fix Photo</b>	<b>On</b>	Automatically adjusts the brightness, contrast, and saturation of the photo based on the <b>Advanced &gt; Scene Detection</b> setting that is selected
	<b>Off</b>	Turns off automatic adjustments; see <b>Note</b> below
	<b>P.I.M.</b>	Uses your camera's PRINT Image Matching or Exif Print adjustments

Photo adjustment settings	Available options	Description
<b>Fix Red-Eye</b>	<b>Off - This Image</b>	Automatically fixes the red-eye effect in photos
	<b>On - This Image</b>	
	<b>Off - All Image</b>	
	<b>On - All Image</b>	

**Note: Fix Photo** uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off **Fix Photo** to retain the special color effects.

Parent topic: [Viewing and Printing From the LCD Screen](#)

## Print Setting Options - Device Mode

Select the **Print Settings** you want to use when printing from a USB flash drive or other memory device.

**Note:** Not all options or settings may be available, depending on the file format.

Print settings	Available options	Description
<b>Paper Source</b>	Various paper size and type settings	Indicates the source that contains the paper size and type you want to print on
<b>Quality</b>	<b>Standard</b>	Provides good quality for most prints
	<b>Best</b>	Provides the highest quality for special prints
<b>Date</b>	Various date formats	Prints the date the photo was taken on the photo in the format you select
<b>Fit Frame</b>	<b>On</b>	Automatically crops the photo to fit into the selected photo layout
	<b>Off</b>	Turns off automatic cropping
<b>Bidirectional</b>	<b>On</b>	Prints at normal speed
	<b>Off</b>	Slows down printing to improve print quality

Print settings	Available options	Description
Print Order	Last Page on Top	Select the order for printing multi-page TIFF files.

## Setting Up File Sharing for File Transfers From Your Computer

Before you transfer files from a computer to a USB flash drive inserted into the USB port on the front of your product, you may need to set up your product's file sharing settings.

**Caution:** Remove the flash drive before you change this setting or you may lose data from the flash drive.

**Note:** These settings can be locked by an administrator. If you cannot access these settings, contact your administrator for assistance.

1. Press the  home button, if necessary.
2. Select **Setup**.
3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.
4. Select **Printer Settings**.
5. Select **Memory Device Interface**.

You see a screen like this:

6. Make sure **Memory Device** is set to **Enable**.
7. Select **File Sharing**.
8. Select the way your computer is connected to the product: either **USB** or **Wi-Fi/Network**.

**Parent topic:** [Transferring Files on a USB Device](#)

## Transferring Files from a USB Device to Your Computer

You can transfer files to and from a USB device inserted into the USB port on the front of your product and a computer connected to your product.

**Note:** Do not transfer files to and from a USB device while you are printing from the device.

1. Make sure your product is connected to a computer.
2. Insert a USB device into the USB port on the front of your product.
3. Do one of the following to access your USB device files from your computer:
  - **Windows:** Open the **My Computer**, **Computer**, **This PC**, or **Windows Explorer** utility, then select the removable disk icon.
  - **OS X with a USB connection:** Look for the removable disk icon on your desktop, then select it.
  - **OS X with a network connection:** Select the hard drive icon on your desktop or select **Computer** from the **Go** menu, select your product in the **SHARED** section of the sidebar (you may need to widen the sidebar to see the name), and select the **USBSTORAGE** icon.
4. Select the folder that contains your files.

5. Drag the files you want to transfer to the desired folder on your computer or on your USB device.

**Note:** Your product's LCD screen does not update to display new information about your USB device after you copy files to it or delete files from it. Remove and insert the USB device to update the information.

## Replacing the Ink Cartridge and Maintenance Box

The maintenance box stores ink that gets flushed from the system during print head cleaning. When the ink cartridge is expended or the maintenance box is at the end of its service life, you need to replace it.

You may also need to replace a cartridge that is more than six months old if your printouts do not look their best, even after cleaning and aligning the print head.

**Note:** Please dispose of your used Epson branded ink cartridges and maintenance boxes responsibly and in accordance with local requirements. If you would like to return your used ink cartridges and maintenance boxes to Epson for proper disposal, please go to [epson.com/recycle](http://epson.com/recycle) for more information.

[Check Status of the Ink Cartridge and Maintenance Box](#)

[Purchase Epson Ink Cartridges and Maintenance Box](#)

[Removing and Installing the Ink Cartridge](#)

[Replacing the Maintenance Box](#)

## Check Status of the Ink Cartridge and Maintenance Box

Your product and its software will let you know when the ink cartridge is low or expended, or when the maintenance box needs to be replaced.

**Note:** When using the Epson Universal Print Driver or PostScript (PS3) printer software with the product, you can check ink cartridge and maintenance box status by using the printer buttons or the utilities included with the standard Epson printer software. To download the standard Epson printer software, go to [epson.com/support/wfm5694downloads](http://epson.com/support/wfm5694downloads).

[Checking Cartridge Status on the LCD Screen](#)

[Checking Cartridge and Maintenance Box Status with Windows](#)

[Checking Cartridge and Maintenance Box Status with OS X](#)

**Parent topic:** [Replacing the Ink Cartridge and Maintenance Box](#)

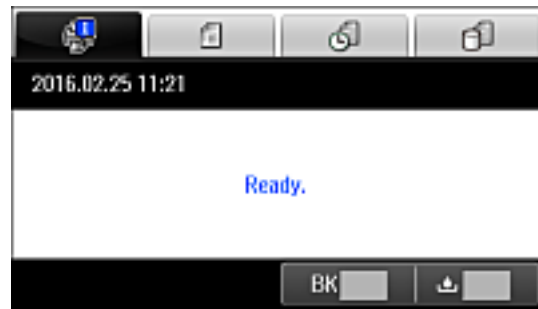

## Checking Cartridge Status on the LCD Screen

When your cartridge is low on ink, you see the  icon on the LCD screen and the orange **i Status** light flashes. When the cartridge is expended, you see the  icon and the orange **i Status** light stays on. You can use the **i Status** button check the status of the cartridge and maintenance box.

1. Press the **i Status** button.

2. Select **Printer Information**.

You see a screen like this:

The ink and maintenance box levels are displayed at the bottom of the screen.

**Note:** The displayed ink and maintenance box levels are approximate.

3. For more information, select the images at the bottom of the screen.

**Parent topic:** [Check Status of the Ink Cartridge and Maintenance Box](#)

## Checking Cartridge and Maintenance Box Status with Windows

A low ink reminder appears if you try to print when ink is low, and you can check your cartridge or maintenance box status at any time using a utility on your Windows computer.

1. To check your status, access the Windows Desktop, double-click the product icon in the Windows taskbar, and click **Details**.

You see this window:

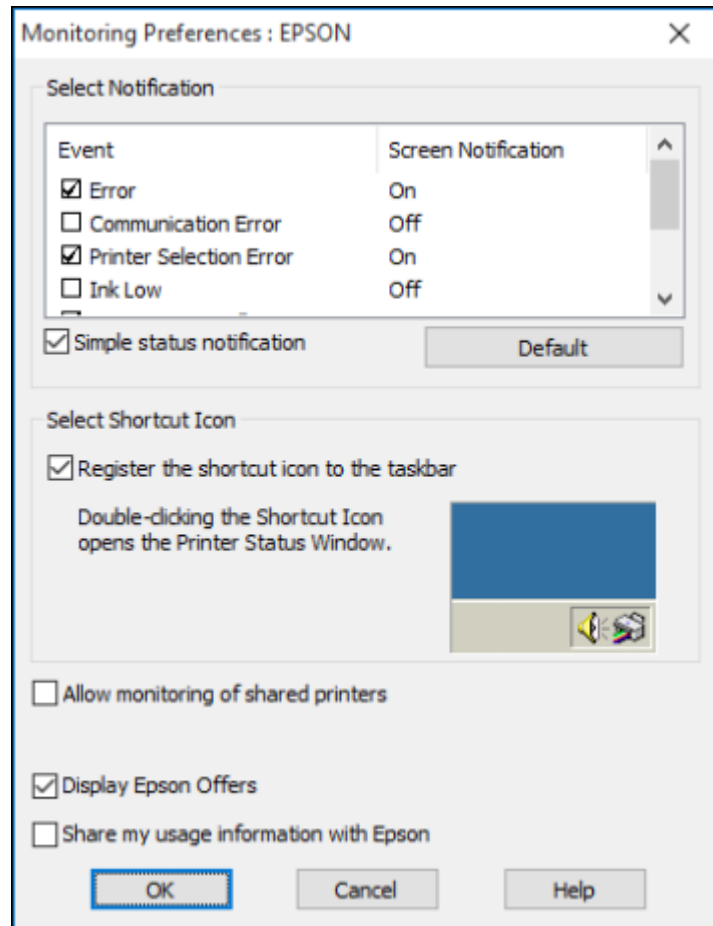

2. Replace or reinstall the maintenance box or ink cartridge as indicated on the screen.

**Note:** If the cartridge installed in the product is broken, incompatible with the product model, or improperly installed, Epson Status Monitor will not display an accurate cartridge status.

3. To disable the low ink reminder, right-click the product icon in the Windows taskbar and select **Monitoring Preferences**.

You see this window:

4. Deselect the **See Low Ink Reminder alerts** checkbox at the bottom of the screen.
5. To disable promotional offers, deselect the **Display Epson Offers** checkbox.
6. Click **OK**.

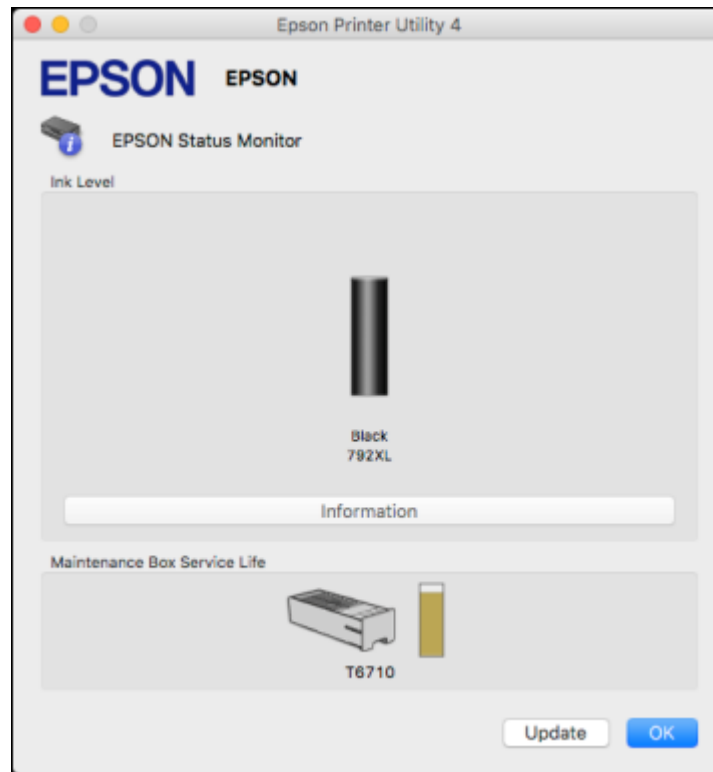

**Parent topic:** [Check Status of the Ink Cartridge and Maintenance Box](#)

## Checking Cartridge and Maintenance Box Status with OS X

You can check the status of your ink cartridge and maintenance box using a utility on your Mac.

1. In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
2. Select **EPSON Status Monitor**.

You see this window:

3. Do the following as necessary:
  - You can update the ink cartridge and maintenance box status by clicking **Update**.

- Replace or reinstall the maintenance box or ink cartridge as indicated on the screen.

**Note:** If the cartridge installed in the product is broken, incompatible with the product model, or improperly installed, Epson Status Monitor will not display an accurate cartridge status.

**Parent topic:** [Check Status of the Ink Cartridge and Maintenance Box](#)

## Purchase Epson Ink Cartridges and Maintenance Box

You can purchase genuine Epson ink, maintenance boxes, and paper at [epson.com/ink3](http://epson.com/ink3) (U.S. sales) or [epson.ca](http://epson.ca) (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

**Note:** This product uses only genuine Epson-brand cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly.

The cartridge included with the printer is designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

[Ink Cartridge and Maintenance Box Part Numbers](#)

**Parent topic:** [Replacing the Ink Cartridge and Maintenance Box](#)

## Ink Cartridge and Maintenance Box Part Numbers

Use these part numbers when you order or purchase a new ink cartridge or maintenance box.

Maintenance box part number: T6710

Ink cartridge: Black 792XL High-capacity

**Note:** For best printing results, use up a cartridge within 6 months of opening the package.

**Parent topic:** [Purchase Epson Ink Cartridges and Maintenance Box](#)

## Removing and Installing the Ink Cartridge

Make sure you have your replacement cartridge handy before you begin. You must install the new cartridge immediately after removing the old one.

**Caution:** Leave your old cartridge in the printer until you are ready to replace it to prevent the print head nozzles from drying out. Do not open ink cartridge package until you are ready to install the ink. The cartridge is vacuum packed to maintain reliability.

1. Turn on your product.
2. If the ink cartridge is low or expended, a message appears on your product and on your computer screen.
3. Open the front cover.

4. Push the ink cartridge in, then pull it out of the slot.

**Note:** Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.

5. Remove the cartridge from the package.

**Caution:** Do not touch the green chip on the cartridge. Install the new cartridge immediately after removing the old one; if you do not, the print head may dry out and be unable to print.

6. Gently shake the ink cartridge horizontally for about five seconds as shown.

**Caution:** Do not remove any labels or seals, or ink will leak.

7. Insert the new cartridge into the holder and push it in until it clicks into place.

8. Select **Check** on the LCD screen to make sure the cartridge is installed correctly.

**Caution:** If you see a message that the ink cartridge is installed incorrectly, press in the ink cartridge until it clicks into place.

9. When you are finished, close the front cover.

The product starts charging the ink and returns to its previous state when finished.

**Note:** Do not turn off the printer during ink replacement.

**Caution:** If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

## Replacing the Maintenance Box

Make sure you have a new maintenance box before you begin.

**Caution:** Do not reuse a maintenance box that has been removed and left uninstalled for more than a week. Keep the maintenance box away from direct sunlight.

1. Make sure the product is not printing.
2. Remove the new maintenance box from its package.

**Caution:** Do not touch the green chip on the maintenance box.

3. Press the buttons on the sides of the rear cover and remove it.

4. Grasp the maintenance box as shown and pull it out of its holder.

**Note:** Do not tilt the used maintenance box or take it apart.

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep the maintenance box out of the reach of children and do not drink the ink.

5. Place the used maintenance box in the plastic bag that came with the new maintenance box. Seal the bag and dispose of it carefully.
6. Insert the new maintenance box into the holder and push it all the way in.

7. Press the buttons on the sides of the rear cover and reattach it.

## Adjusting Print Quality

If your print quality declines, you may need to run a utility to clean or align the print head.

**Note:** When using the Epson Universal Print Driver or PostScript (PS3) printer software with the product, you can clean and align the print head and run a nozzle check by using the printer buttons or the utilities included with the standard Epson printer software. To download the standard Epson printer software, go to [epson.com/support/wfm5694downloads](http://epson.com/support/wfm5694downloads).

If running these utilities does not solve the problem, you may need to replace the ink cartridge.

[Print Head Maintenance](#)

[Print Head Alignment](#)

[Cleaning the Paper Guide](#)

### Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.

You can check for clogged nozzles before you clean them so you don't clean them unnecessarily.

**Note:** You cannot clean the print head if the ink cartridge is expended, and may not be able to clean it when the cartridge is low. You must replace the cartridge first.

# Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

[Cleaning Your Product](#)

[Transporting Your Product](#)

## Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

**Note:** Close the rear paper feed slot and the output tray when you are not using the product to protect it from dust.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper from the product.

5. Clean the scanner glass and the glass area on the left with a soft, lint-free cloth (microfiber is recommended) moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

**Note:** If lines appear on the printout or in scanned images, carefully clean the glass area on the left.

6. Open the ADF cover and use a soft, dry, lint-free cloth (microfiber is recommended) to clean the rollers and the interior of the ADF.

7. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

**Parent topic:** [Cleaning and Transporting Your Product](#)

## Transporting Your Product

If you need to store your product or transport it a long distance, prepare it for transportation as described here.

**Caution:** During transportation and storage, follow these guidelines:

- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
- Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the product from printing.

**Note:** Before storing your product for a long period, replace low, expended, or expired ink to help prevent the print head from drying out. Store your product in a cool, dry place.

1. Turn off the product.
2. Remove all the paper from the product.
3. Unplug the power cable.
4. Disconnect any connected cables.
5. Close the rear paper feeder and the output tray.
6. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product. Make sure the box adequately protects the product control panel.

Keep the product level during transportation. If print quality has declined when you print again, clean and align the print head.

## Product Status Messages

You can often diagnose problems with your product by checking the messages on its LCD screen. You can also check for errors by pressing the **i Status** button to display the Status Menu.

**Note:** If the screen is dark, press the screen to wake the product from sleep mode.

LCD screen message	Condition/solution
Printer error. Turn the power off and on again.	Turn the product off and then back on again. If the error continues, check for a paper jam. If there is no paper jam, contact Epson for support.
You need to replace the following ink cartridge.	Replace the ink cartridge.

LCD screen message	Condition/solution
No dial tone detected.	Make sure the phone cable is connected correctly and the phone line works. If you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the <b>Line Type</b> setting to <b>PBX</b> . If you still cannot send a fax, turn off the <b>Dial Tone Detection</b> setting. (Turning off the Dial Tone Detection setting may cause the product to drop the first digit of a fax number.)
Failed to receive faxes because the fax data capacity is full. Press <b>i Status</b>	Received faxes may not be processed. Check the following: <ul style="list-style-type: none"> <li>• Cannot print because of a printer error. Press the <b>i Status</b> button, then select <b>Printer Information</b>.</li> <li>• Cannot save the fax in the computer or memory device. Check whether the faxes have been saved by pressing the <b>i Status</b> button, then select <b>Job Monitor &gt; Communication Job</b>. Make sure your computer is turn on or the memory device is connected to the product.</li> </ul>
Combination of IP address and subnet mask is invalid.	There is a problem with the network connection to your product.
Recovery mode	An error has occurred during firmware updating. Connect your product using a USB cable and try downloading the Firmware Update from the Epson support site. If you still need help, contact Epson for support.

**Note:** The ink pads in the printer collect, distribute, and contain the ink that is not used on printed pages. During the life of your product it may reach a condition where either satisfactory print quality cannot be maintained or the ink pads have reached the end of their usable life. The Epson Status Monitor, your LCD screen, or lights on the control panel will advise you when these parts need replacing. If this happens during the standard warranty of the product, the exchange of the product or replacement of the pads is covered under the standard warranty. If the product is out of warranty, the pads can be replaced by any Epson authorized service provider. The waste ink pads are not a user-replaceable part.

## Status Menu Error Codes

If a job does not complete successfully, you can check the error code. Press the **i Status** button, then select **Job History** and locate the incomplete job. Select the job to display the error code and additional information.

Code	Condition/solution
001	The product was turned off by a power failure.
101	Memory is full. Reduce the size of the print job.
102	Collated printing has failed due to a lack of available memory. Reduce the size of the print job or print one copy at a time.
103	Print quality was decreased due to a lack of available memory. If the quality of the printout is unacceptable, try simplifying the page by reducing the number of graphics or the number and size of the fonts.
104	Reverse printing has failed due to a lack of available memory. Reduce the data size of the print job.
106	Cannot print from the computer due to the access control settings. Contact your printer administrator.
107	User authentication failed and the job has been canceled. Contact your printer administrator.
108	Confidential job data was deleted when the product was turned off.
109	The received fax was already deleted.
110	The job was printed 1-sided because the loaded paper does not support 2-sided printing.
111	Short of available memory. Reduce the size of the print job.
201	The product's memory is full. You can send pages individually, or print received faxes and delete them to free up memory space.
202	The line was disconnected by the recipient's fax machine. Wait a moment, then try again.

Code	Condition/solution
203	<p>The product cannot detect a dial tone.</p> <p>Make sure the phone cable is connected correctly and the phone line works. If you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the <b>Line Type</b> setting to <b>PBX</b>. If you still cannot send a fax, turn off the <b>Dial Tone Detection</b> setting. (Turning off the Dial Tone Detection setting may cause the product to drop the first digit of a fax number.)</p>
204	The recipient's fax machine is busy. Wait a moment, then try again.
205	The recipient's fax machine does not answer. Wait a moment, then try again.
206	The phone cable is incorrectly connected to the product's <b>LINE</b> and <b>EXT</b> ports. Connect the phone cable correctly.
207	The phone cable is not connected. Connect the phone cable.
208	<p>The fax could not be sent to some of the specified recipients.</p> <p>Print a fax log to check which recipients failed to receive the fax. If the <b>Save Failure Data</b> setting is turned on, you can resend a fax from Job Monitor in the Status Menu.</p>
301 401	There is not enough storage space available on the external memory device. Clear space on the device or use a different device.
302 402	The external memory device is write-protected. Disable write protection.
303	No folder is available for saving the scanned file. Create a folder or use a different memory device.
304 404	The external memory device has been removed. Reinsert the device.
305 405	An error occurred while saving data to an external memory device. Reinsert the memory device or use a different device.
306	The product's memory is full. Wait until current jobs are finished processing.
311 321 411 421	A DNS error has occurred. Check the DNS settings for the server, computer, or access point. DNS settings for the server can be checked from the DNS Server option in the <b>Setup</b> menu.

<b>Code</b>	<b>Condition/solution</b>
312 412	An authentication error has occurred. Check the Server Settings from the Setup menu.
313 413	A communication error has occurred. Check the Server Settings or network connection by running a connection check. If you selected <b>Off</b> as the authentication method, make sure to select <b>None</b> for the email server authentication method.
314	The data size exceeds the maximum size for the attached files. Increase the <b>Attached File Max Size</b> setting in the scan settings or lower the file size of the scanned image.
315 327	The memory is full. Retry after other ongoing jobs have finished.
322	An authentication error occurred. Check the <b>Location</b> settings.
323	A communication error has occurred. Check the <b>Location</b> settings or the network connection.
324	A file with the same name already exists in the specified folder. Delete the duplicate file or change the file name prefix in <b>File Settings</b> .
325 401	There is not enough storage space available in the specified folder. Increase the storage space in the specified folder, delete unnecessary files, or reduce the file size of the scanned image.
328	The destination was wrong or the destination does not exist. Check the <b>Location</b> settings.
331	A communication error occurred while acquiring the destination list. Make sure the product is connected to the network correctly.
332	There is not enough space available for saving the scanned files in the specified folder.
333	The destination could not be found because the destination information was uploaded to the server before sending the scanned data. Select the destination again.
334	An error occurred while sending the scanned data.
341	A communication error has occurred. Make sure the product is connected to the computer or network correctly. Make sure you have installed Document Capture Pro or Document Capture. Make sure the Event Manager program is not being blocked by your firewall or security software.
402	The memory device is write-protected. Disable write protection on the memory device.

Code	Condition/solution
422	An authentication error has occurred. Make sure the settings are correct for the folder selected in the <b>Where to Forward</b> setting in the <b>Setup</b> menu.
423	A communication error has occurred. It is also possible that a file with the same name is open or the file is a read-only file.  Check the network connection, make sure the settings are correct for the folder selected in the <b>Where to Forward</b> setting in the <b>Setup</b> menu, close the duplicate file, or disable read-only protection.
425	There is not enough storage space available in the forwarding destination folder. Increase the storage space in the destination folder.
428	The destination was wrong or the destination does not exist. Make sure the settings are correct for the folder selected in the <b>Where to Forward</b> setting in the <b>Setup</b> menu.

## Running a Product Check

Running a product check helps you determine if your product is operating properly.

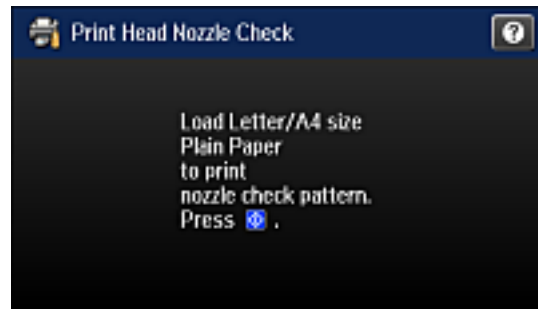

1. Disconnect any interface cables connected to your product.
2. Load plain paper in the product.
3. Press the  home button, if necessary.
4. Select **Setup**.
5. Select **Maintenance**.

You see a screen like this:

6. Select **Print Head Nozzle Check**.

You see a screen like this:

7. Press the **◆ B&W** button.

The nozzle pattern prints.

8. Do one of the following, depending on the results of the product check:

- If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this book or try uninstalling and reinstalling your printer software.
- If the page prints but the nozzle check pattern has gaps, clean or align the print head.
- If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

## Resetting Control Panel Defaults

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

**Note:** This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the **⬆** home button, if necessary.
2. Select **Setup**.
3. Scroll down and select **System Administration**. Enter the administrator password, if necessary.
4. Scroll down and select **Restore Default Settings**.

You see a screen like this:

5. Select one of these options:
  - **Wi-Fi/Network Settings:** Resets all network settings.
  - **Copy Settings:** Resets all settings for copying.
  - **Scan Settings:** Resets all settings for scanning.
  - **Fax Settings:** Resets all settings for faxing.
  - **Clear All Data and Settings:** Resets all control panel settings to their defaults and deletes the contacts list.

You see a confirmation screen.

6. Select **Yes** to reset the selected settings. (Select **No** if you want to cancel the operation.)

## Solving Setup Problems

Check these sections if you have problems while setting up your product.

[Noise After Ink Installation](#)

[Software Installation Problems](#)

Parent topic: [Solving Problems](#)

### Noise After Ink Installation

If you hear noises from your product after installing ink, check the following:

- The first time you install the ink cartridges, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on.
- If the product's print head stops moving or making noise, and the charging process has not finished after approximately 5 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Parent topic: [Solving Setup Problems](#)

### Software Installation Problems

If you have problems while installing your product software, try these solutions:

- Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the *Start Here* sheet. Also make sure your system meets the requirements for your operating system.
- Close any other programs, including screen savers and virus protection software, and install your product software again.
- In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.
- If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your System Administrator.

## Solving Network Problems

Check these solutions if you have problems setting up or using your product on a network.

**Note:** Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

[Product Cannot Connect to a Wireless Router or Access Point](#)

[Network Software Cannot Find Product on a Network](#)

[Product Does Not Appear in OS X Printer Window](#)

[Cannot Print Over a Network](#)

[Cannot Scan Over a Network](#)

**Parent topic:** [Solving Problems](#)

### Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.
- Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Verify that your router or access point is operating correctly by connecting to it from your computer or another device.

- You may need to disable the firewall and any anti-virus software on your wireless router or access point.
- Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.
- If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.
- If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.
- Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.
- If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi direct password on your device may have been changed. If necessary, delete the existing **DIRECT-xxxxxxx** connection settings from your device and enter a new password. See your device documentation for instructions.
- If you connected your product to a Windows computer using Wi-Fi Direct and it automatically selected Access Point Mode, you may have trouble accessing a low-priority Internet connection. Check the network connection or adapter settings in the Windows Control Panel and set the **Internet metric** setting to **100** for your version of the Internet Protocol.

## Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

- Make sure your product is turned on and connected to your network. Verify connection using your product control panel.

- Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.
- Make sure your product is not connected to a guest network.
- If necessary, reinstall your product software and try running EpsonNet Setup again:
  1. Reset your product's network settings to their factory defaults.
  2. Windows only: uninstall your product software.
  3. Initialize your router following the instructions in your router documentation.

**Note:** If you are reading these instructions online, you will lose your Internet connection when you initialize your router, so note the next step before initializing it.

4. Download your product software from the Epson website using the instructions on the *Start Here* sheet.
- If you have replaced your router, reinstall your product software to connect to the new router.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

## Product Does Not Appear in OS X Printer Window

If your product does not appear in the OS X printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

- If you are connecting the product wirelessly via EpsonNet Setup and the Wi-Fi icon does not appear lit on your LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

**Parent topic:** [Solving Network Problems](#)

**Related concepts**

[Uninstall Your Product Software](#)

## Cannot Print Over a Network

If you cannot print over a network, try these solutions:

- Make sure that your product is turned on.
- Make sure you install your product's network software as described in your product documentation.
- Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.
- If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
- Make sure your computer and product are both using the same wireless network.
- If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

- Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD is not lit, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

- Check your wired LAN router or access point to see if the LED for the port to which your product is connected is on or flashing. If the link LED is off, try the following:
  - Make sure the Ethernet cable is securely connected to your product and to your router, access point, switch, or hub.
  - Try connecting your product to a different port or a different router, access point, switch, or hub.
  - Try connecting with a different Ethernet cable.
  - Try printing to your product from another computer on the network.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

- If you are connecting the product via EpsonNet Setup and the Wi-Fi icon does not appear lit on the LCD, make sure your product software was installed correctly. If necessary, reinstall your software.

[Wi-Fi or Wired Networking](#)

## **Cannot Scan Over a Network**

If you cannot start Epson Scan for scanning over a network, try these solutions:

- If you cannot scan from your product control panel, make sure you restarted your computer after installing the product software. Make sure the Event Manager program is not being blocked by your firewall or security software.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.

- If network communication was interrupted while starting Epson Scan, exit Epson Scan, wait a few seconds, and restart it. If Epson Scan cannot restart, turn off your product, turn it back on, and try restarting Epson Scan again.
- Check the connection setting and test the connection using Epson Scan Settings:

**Windows 10:** Click , select **All apps**, and select **EPSON Scan Settings**. Make sure the **Connection** setting is set to **Network**, then click the **Test** button.

**Windows 8.x:** Navigate to the **Apps** screen and select **EPSON Scan Settings**. Make sure the **Connection** setting is set to **Network**, then click the **Test** button.

**Windows (other versions):** Click  or **Start > All Programs** or **Programs > EPSON > EPSON Scan > EPSON Scan Settings**. Make sure the **Connection** setting is set to **Network**, then click the **Test** button.

**OS X:** Open the **Applications** folder, click **Epson Software**, and click **EPSON Scan Settings**. Make sure the **Connection** setting is set to **Network**, then click the **Test** button.

- If the user restriction feature (Access Control) is enabled, a user ID and password are required to scan. If you do not know the user ID or password, contact your administrator for assistance.
- Make sure the option selected as the **Timeout Setting** in the Epson Scan Settings program is long enough to complete scanning over a network.
- You may need to disable the firewall and any anti-virus software on your wireless router or access point.

**Note:** With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To download Epson Scan, visit Epson's driver download site ([U.S. downloads](#) or [Canadian downloads](#)).

[Document Jams in the Automatic Document Feeder](#)

[Paper Ejection Problems](#)

**Parent topic:** [Solving Problems](#)

## Paper Feeding Problems

If you have problems feeding paper, try these solutions:

- If paper does not feed for printing, remove it from the rear feed slot or cassette. Reload it, then adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette or rear feed slot.
- Be sure to insert the paper cassette all the way into your product.
- If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
- Do not load more than the recommended number of sheets.
- Make sure your paper meets the specifications for your product.
- If paper jams when you print on both sides of the paper, try loading fewer sheets.
- Make sure the paper size and paper type settings are correct for the paper source.
- For best results, follow these guidelines:
  - Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  - Load paper in the cassette printable side down.
  - Follow any special loading instructions that came with the paper.

**Parent topic:** [Solving Paper Problems](#)

[Paper Jam Problems Inside the Product](#)

[Paper Jam Problems in the Cassette](#)

## Document Jams in the Automatic Document Feeder

If you have problems with document jams in the automatic document feeder (ADF), follow the steps here to clear the jam.

1. Cancel the print job, if necessary.
2. Remove your originals from the ADF.
3. Open the ADF cover.

4. Carefully remove any jammed pages.

**Caution:** Make sure you open the ADF cover before removing any jammed paper. Otherwise the product may be damaged.

5. Close the ADF cover, then raise the document cover.

6. Carefully remove any jammed pages as shown:

7. Lower the document cover.

8. Raise the ADF input tray.

9. Carefully remove any jammed pages.

10. Lower the ADF input tray.

11. Reload your originals.

**Caution:** Make sure you do not load the ADF beyond its capacity for your paper size. Also make sure the originals you load are not bent, folded, or curled and do not have tape, staples, or other materials that could obstruct the feeder.

12. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

Check these sections if you have problems while printing from your computer.

**Note:** When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

**Note:** For problems while printing with the Epson Universal Print Driver or PostScript (PS3) printer software, see the sections covering that software in this manual.

[Nothing Prints](#)

[Product Icon Does Not Appear in Windows Taskbar](#)

[Printing is Slow](#)

**Parent topic:** [Solving Problems](#)

## Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

- Make sure your product is turned on.
- Make sure any interface cables are connected securely at both ends.
- If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
- Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
- In Windows, make sure your product is selected as the default printer.
- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel and stalled print jobs.

**Parent topic:** [Solving Problems Printing from a Computer](#)

**Related tasks**

[Running a Product Check](#)

## Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:

- **Windows 10:** Right-click  and select **Control Panel > Hardware and Sound > Devices and Printers**.

- **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel > Hardware and Sound > Devices and Printers**.
  - **Windows 7:** Click  and select **Devices and Printers**.
  - **Windows Vista:** Click , select **Control Panel**, and click **Printer** under **Hardware and Sound**.
  - **Windows XP:** Click **Start** and select **Printers and Faxes**. (Or open the **Control Panel**, select **Printers and Other Hardware**, if necessary, and **Printers and Faxes**.)
2. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.
  3. Click the **Maintenance** tab.
  4. Click the **Extended Settings** button.
  5. Select **Enable EPSON Status Monitor 3**, then click **OK**.
  6. Click the **Monitoring Preferences** button.
  7. Click the checkbox for the option that adds the shortcut icon to the taskbar.
  8. Click **OK** to close the open program windows.

**Parent topic:** [Solving Problems Printing from a Computer](#)

## Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the **Devices and Printers** window before you print.
- If you are using OS X, make sure you download and install the Epson printer driver.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.
- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.
- Turn on any high speed settings in your product software.
- Select a lower print quality setting.
- Make sure the ink drying time has not been increased for double-sided printing.
- **Windows:** Click the **Maintenance** or **Utility** tab, select **Extended Settings** or **Speed and Progress**, and select the following settings:
  - **Always Spool RAW Datatype**
  - **Page Rendering Mode**
  - **Print as Bitmap**

## Blurry or Smearred Printout

If your printouts are blurry or smearred, try these solutions:

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Use a support sheet with special paper, or load special paper one sheet at a time.
- Make sure your paper meets the specifications for your product.
- Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
- Make sure the paper type setting in your product software matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- If you are printing on thick paper or envelopes, turn on the **Thick Paper** setting from the control panel or select **Thick Paper and Envelopes** in the Extended Settings of the printer software. (Turning this setting on will decrease print speed.)
- Remove each sheet from the output tray as it is printed.
- Avoid handling printouts on glossy paper right after printing to allow the ink to set.
- Turn off any high speed settings in your product software.
- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the **Print Density** and/or **Increase Ink Drying Time** settings.
- If printed copies are smearred, lower the copy density setting on the product control panel.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- Clean the paper path.

**Note:** Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

**Parent topic:** [Solving Print Quality Problems](#)

**Related concepts**[Print Head Cleaning](#)[Print Head Alignment](#)**Related references**[Available Epson Papers](#)[Paper Specifications](#)**Related tasks**[Selecting Basic Print Settings - Windows](#)[Selecting Double-sided Printing Settings - Windows](#)[Selecting Additional Layout and Print Options - Windows](#)[Selecting Basic Print Settings - OS X](#)[Selecting Double-sided Printing Settings - OS X](#)[Selecting Printing Preferences - OS X](#)[Cleaning the Paper Guide](#)**Related topics**[Loading Paper](#)

## Faint Printout or Printout Has Gaps

If your printouts are faint or have gaps, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink cartridge may be old or low on ink, and you may need to replace it.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Align the print head.
- Clean the paper path.

## Grainy Printout

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper correctly for your product.
- Select a higher print quality setting and turn off any high speed settings in your product software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- You may need to increase the image resolution or print a smaller size; see your software documentation.

**Note:** Images from the Internet may be low resolution and not result in a high quality printout.

- If you enlarged the image in an image-editing program, you need to increase the resolution setting to retain a high image quality. Increase the resolution by the same amount you increased the image size. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the resolution setting to 600 dpi.

**Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

## Solving Scanning Problems

Check these solutions if you have problems scanning with your product.

[Scanning Software Does Not Operate Correctly](#)

[Cannot Start Epson Scan](#)

[Scanning to a Network Folder or FTP is Slow](#)

**Parent topic:** [Solving Problems](#)

## Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

- Make sure your computer has adequate memory and meets the system requirements for your operating system.
- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
- If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.

**Note:** With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To download Epson Scan, visit Epson's driver download site ([U.S. downloads](#) or [Canadian downloads](#)).

**Parent topic:** [Solving Scanning Problems](#)

**Related concepts**

[Uninstall Your Product Software](#)

**Related references**

[Windows System Requirements](#)

[OS X System Requirements](#)

**Related tasks**

[Scanning with OS X Using Image Capture](#)

## Cannot Start Epson Scan

If you cannot start Epson Scan, try these solutions:

- Make sure your product is turned on and any interface cables are securely connected at both ends.
- Make sure Epson Scan is selected in your scanning program.
- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan.
- Check the connection setting and test the connection using Epson Scan Settings:

**Windows 10:** Click  and select **All apps**. Select **EPSON**, then select **EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.

**Windows 8.x:** Navigate to the **Apps** screen and select **EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.

**Windows (other versions):** Click  or **Start > All Programs** or **Programs > EPSON > EPSON Scan > EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.

**OS X:** Open the **Applications** folder, click **Epson Software**, and click **EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.

- Make sure you do not have multiple versions of Epson Scan installed. If you do, uninstall both versions and install one version.
- If you upgraded your operating system but did not reinstall Epson Scan, try reinstalling it.
- If the user restriction feature (Access Control) is enabled, a user ID and password are required to scan. If you do not know the user ID or password, contact your administrator for assistance.

**Note:** With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To download Epson Scan, visit Epson's driver download site ([U.S. downloads](#) or [Canadian downloads](#)).

[Back of Original Image Appears in Scanned Image](#)

[Ripple Patterns Appear in an Image](#)

[Scanned Image Colors Do Not Match Original Colors](#)

[Scan Area is Not Adjustable in Thumbnail Preview](#)

[Scanned Image Edges are Cropped](#)

**Parent topic:** [Solving Problems](#)

## Image Consists of a Few Dots Only

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If you are scanning using the Epson Scan **Black & White** setting, adjust the **Threshold** setting and scan again.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

### Related references

[Placing Originals on the Product](#)

## Line of Dots Appears in All Scanned Images

If a line of dots appears in all your scanned images, clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

**Caution:** Do not spray glass cleaner directly on the scanner glass.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

### Related tasks

[Cleaning Your Product](#)

## Straight Lines in an Image Appear Crooked

If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

### Related topics

[Placing Originals on the Product](#)

## Image is Distorted or Blurry

If a scanned image appears distorted or blurry, try these solutions:

- Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.
- Do not move your original or your product during scanning.
- Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.
- Adjust these Epson Scan settings (if available) and try scanning again:
  - Select the **Unsharp Mask** setting.
  - Adjust the **Auto Exposure** setting.
  - Increase the **Resolution** setting.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

### Related topics

[Selecting Epson Scan Settings](#)

## Image Colors are Patchy at the Edges

If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

## Image is Too Dark

If your scanned image is too dark, try these solutions:

- Adjust these Epson Scan settings (if available) and try scanning again:
  - **Auto Exposure**
  - **Brightness**
  - **Histogram Adjustment**
- Check the brightness and contrast settings of your computer monitor.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

### Related topics

[Selecting Epson Scan Settings](#)

## Back of Original Image Appears in Scanned Image

If an image from the back of a thin original appears in your scanned image, place a piece of black paper on the back of the original and scan it again.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

## Ripple Patterns Appear in an Image

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan settings (if available) and try scanning again:

- Select the **Descreening** setting.
- Select a lower **Resolution** setting.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

### Related topics

[Selecting Epson Scan Settings](#)

## Scanned Image Colors Do Not Match Original Colors

Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these Epson Scan settings (if available) and try scanning again:

- Change the **Image Type** setting and experiment with different combinations of the next settings.
- Adjust the **Tone Correction** setting.
- Adjust the **Auto Exposure** setting.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

### Related topics

[Selecting Epson Scan Settings](#)

## Scan Area is Not Adjustable in Thumbnail Preview

If you cannot adjust the scan area while viewing a Thumbnail preview in Epson Scan, try these solutions:

- Create a scan area by drawing a marquee on your preview image and adjusting it as necessary.
- Switch to Normal preview mode, if available, and preview your image again.

**Parent topic:** [Solving Scanned Image Quality Problems](#)

## Solving Faxing Problems

Check these solutions if you have problems faxing with your product.

[Cannot Send or Receive Faxes](#)

[Cannot Receive Faxes with a Telephone Connected to Your Product](#)

**Parent topic:** [Solving Problems](#)

## Cannot Send or Receive Faxes

If you cannot send or receive faxes, try these solutions:

- If you are faxing from a computer, use the Epson FAX Utility to send your fax.
- Make sure the recipient's fax machine is turned on and working.
- Make sure paper is loaded correctly in your product.
- Make sure you have set up your header information and have not blocked your caller ID. Otherwise, your faxes might be rejected by the recipient's fax machine.

- If user restriction has been enabled, you may need to enter a user name and password. Contact your administrator for assistance.
- If you did not connect a telephone to your product, set the Receive Mode setting to **Auto** so you can receive faxes automatically.
- Check that the cable connecting your telephone wall jack to your product's **LINE** port is secure.
- Print a fax connection report using your product control panel or fax software to help diagnose the problem.
- Verify that the telephone wall jack works by connecting a phone to it and testing it.
- If there is no dial tone and you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the **Line Type** setting to **PBX**. If you still cannot send a fax, turn off the turn off the product's dial tone detection setting. (Turning off the dial tone setting may cause the product to drop the first digit of a fax number.)
- If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.
- If your telephone line has static, turn off your product's error correction mode fax communication setting and try faxing again.
- Try lowering your product's fax speed setting.
- Make sure the error correction mode (ECM) setting is turned on if you are trying to send or receive a color fax.
- If your telephone line uses call waiting and you have trouble receiving faxes, turn off call waiting to prevent disruption of incoming faxes.
- If you have subscribed to a call forwarding service, the product may not be able to receive faxes. Contact your service provider for assistance.
- Check your inbox and delete faxes after reading or printing them. If the inbox is full, the product cannot receive faxes.

**Note:** If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.

If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

## Uninstall Your Product Software

If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

[Uninstalling Product Software - Windows](#)

[Uninstalling Product Software - OS X](#)

**Parent topic:** [Solving Problems](#)

## Uninstalling Product Software - Windows

You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.

2. Disconnect any interface cables.
3. Do one of the following:
  - **Windows 10:** Right click  and select **Control Panel > Programs > Programs and Features**. Select the uninstall option for your Epson product, then select **Uninstall/Change**.  
  
**Note:** If you see a **User Account Control** window, click **Yes** or **Continue**.  
  
Select your product again, if necessary, then select **OK**, and click **Yes** to confirm the uninstallation.
  - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel > Programs > Programs and Features**. Select the uninstall option for your Epson product, then select **Uninstall/Change**.  
  
**Note:** If you see a **User Account Control** window, click **Yes** or **Continue**.  
  
Select your product again, if necessary, then select **OK**, and click **Yes** to confirm the uninstallation.
  - **Windows (other versions):** Click  or **Start**, and select **All Programs** or **Programs**. Select **EPSON**, select your product, then click **EPSON Printer Software Uninstall**.  
  
**Note:** If you see a **User Account Control** window, click **Yes** or **Continue**.  
  
In the next window, select your product and click **OK**. Then follow any on-screen instructions.
4. Do one of the following to uninstall Epson Event Manager, then follow any on-screen instructions:
  - **Windows 10:** Select **Epson Event Manager** and click **Uninstall**.
  - **Windows 8.x:** Select **Epson Event Manager** and click **Uninstall**.
  - **Windows 7/Windows Vista:** Open the Windows **Control Panel** utility. Select **Programs and Features**. (In Classic view, select **Programs** and click **Uninstall a program**.) Select **Epson Event Manager** and click **Uninstall/Change**.
  - **Windows XP:** Open the Windows **Control Panel** utility. Double-click **Add or Remove Programs**. Select **Epson Event Manager** and click **Change/Remove**.
5. Do one of the following to uninstall Epson Scan, then follow any on-screen instructions:
  - **Windows 10:** Select **EPSON Scan** and click **Uninstall**.
  - **Windows 8.x/Windows 7/Windows Vista:** Select **EPSON Scan** and click **Uninstall/Change**.

- **Windows XP:** Select **EPSON Scan** and click **Change/Remove**.
6. Restart your computer, then see the *Start Here* sheet to re-install your software.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

**Parent topic:** [Uninstall Your Product Software](#)

## Uninstalling Product Software - OS X

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit the Epson download site ([U.S. downloads](#) or [Canadian downloads](#)).
2. Follow the instructions on the screen to install the Uninstaller utility.
3. Quit all applications currently running on your Mac.
4. Double-click the **Uninstaller** icon.
5. Select the checkbox for each software program you want to uninstall.
6. Click **Uninstall**.
7. Follow the on-screen instructions to uninstall the software.
8. Reinstall your product software.

**Note:** If you uninstall the printer driver and your product name remains in the **Print & Fax**, **Print & Scan**, or **Printers & Scanners** window, select your product name and click the – (remove) icon to remove it.

**Parent topic:** [Uninstall Your Product Software](#)

## Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

## **Internet Support**

Visit Epson's support website at [epson.com/support](http://epson.com/support) (U.S.) or [epson.ca/support](http://epson.ca/support) (Canada) for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

## **Speak to a Support Representative**

Before you call Epson for support, please have the following information ready:

- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

Then call:

- U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
- Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

## **Purchase Supplies and Accessories**

You can purchase genuine Epson ink and paper at [epson.com/ink3](http://epson.com/ink3) (U.S. sales) or [epson.ca](http://epson.ca) (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

Parent topic: [Technical Specifications](#)

## Printable Area Specifications

**Note:** When printing borderless, quality may decline in the expanded printable area.

### Single sheets

- 1 Top/bottom/sides: 0.12 inch (3.0 mm) minimum
- 2 Reduced print quality area/top: 1.77 inches (45.0 mm) minimum
- 3 Reduced print quality area/bottom: 1.97 inches (50.0 mm) minimum

## Envelopes

- 1 Sides: 0.12 inch (3.0 mm) minimum
- 2 Top/bottom: 0.20 inch (5.0 mm) minimum
- 3 Reduced print quality area/right: 0.71 inch (18.0 mm) minimum
- 4 Reduced print quality area/left: 1.77 inches (45.0 mm) minimum

Parent topic: [Technical Specifications](#)

## Ink Cartridge Specifications

**Note:** This product uses only genuine Epson-brand cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly.

The cartridge included with the printer is designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

### Color

Black

### Cartridge life

Opened package: 6 months

Unopened package: do not use if the date on the package has expired

**Temperature** Storage: -4 °F (-20 °C) to 104 °F (40 °C)  
1 month at 104 °F (40 °C)  
Ink freezes at 14 °F (-10 °C)  
Ink thaws and is usable after 3 hours at 77 °F (25 °C)

**Note:** For best printing results, use up a cartridge within 6 months of opening the package.

**Parent topic:** [Technical Specifications](#)

## Dimension Specifications

<b>Height</b>	Stored: 13.5 inches (342 mm) Printing: 15.1 inches (383 mm)
<b>Width</b>	Stored: 18.1 inches (461 mm) Printing: 18.1 inches (461 mm)
<b>Depth</b>	Stored: 16.6 inches (422 mm) Printing: 25.8 inches (655 mm); with the output tray extension extended
<b>Weight</b> (without ink cartridges or power cord)	31.1 lb (14.1 kg)

**Parent topic:** [Technical Specifications](#)

## Electrical Specifications

<b>Power supply rating</b>	100 to 240 V
<b>Rated frequency range</b>	50/60 Hz
<b>Rated current</b>	0.8 to 0.4 A

<b>Power consumption</b>	Printing: 22 W (ISO/IEC24712)
	Ready mode: 8.9 W
	Sleep mode: 2.6 W
	Power off mode: 0.4 W

Parent topic: [Technical Specifications](#)

## Environmental Specifications

<b>Temperature</b>	Operating: 50 to 95 °F (10 to 35 °C)
	Storage: -4 to 104 °F (-20 to 40 °C)
	1 month at 104 °F (40 °C)
<b>Humidity</b> (without condensation)	Operating: 20 to 80% RH
	Storage: 5 to 85% RH

Parent topic: [Technical Specifications](#)

## Interface Specifications

<b>Interface type</b>	Hi-Speed USB (Device Class for computers)
	Hi-Speed USB (for Mass storage class for external storage)
<b>External USB devices</b>	MO drive: 1.3 GB maximum capacity
	Hard disk drive: 2 TB maximum capacity
	USB flash drive: 2 TB maximum capacity, formatted in FAT, FAT32, or exFAT

**Note:** Epson cannot guarantee the operation of externally connected devices. External storage devices that are powered via USB are not recommended. Use only external storage devices with independent AC power sources.

Parent topic: [Technical Specifications](#)

# Network Interface Specifications

## Wi-Fi

**Standard** IEEE 802.11 b/g/n; complies with either IEEE 802.11 b/g or IEEE 802.11 b/g/n, depending on purchase location

**Security** WEP (64/128 bit)  
WPA-PSK (TKIP/AES); complies with WPA2 with support for WPA/WPA2 Personal  
WPA2-Enterprise

**Frequency band** 2.4 GHz

**Communication mode** Infrastructure mode  
Ad hoc mode  
Wi-Fi Direct

**Note:** Wi-Fi Direct Simple AP mode available even if you connect the product to an Ethernet network.

## Ethernet

**Standard** IEEE802.3i/u/ab, IEEE802.3az

**Communication mode** Ethernet 100BASE-TX/10BASE-T  
Ethernet 1000BASE-T; use a category-5e or higher cable, preferably an STP (Shielded Twisted Pair) cable, to prevent risk of radio frequency interference

**Note:** The connected device should be IEEE802.3az compliant.

## Security Protocol

IEEE802.1X

IPsec/IP Filtering

SSL/TLS: HTTPS Server/Client or IPPS

SNMPv3

## Safety and Approvals Specifications

### United States

Safety: UL60950-1

EMC: FCC part 15 Subpart B class B

### Canada

Safety: CAN/CSA C22.2 No. 60950-1

EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:

- Manufacturer: Askey Computer Corporation.
- Type: WLU6117-D69 (RoHS)

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

## Symbol Sets

Your product can access a variety of symbol sets. Many of these symbol sets differ only in the international characters specific to each language.

**Note:** Since most software handles fonts and symbols automatically, you may never need to adjust your product settings. However, if you write your own product control programs, or if you use older software that cannot control fonts, refer to these tables for details on the typefaces and symbol sets.

When you consider which font to use, also consider which symbol set to combine with the font. Available symbol sets vary depending on the mode and font you choose.

### PCL5 Mode Typefaces and Symbol Sets

In the PCL5 mode symbol sets table, you can use any of these typefaces in the left column:

- Zapf Humanist 601
- Ribbon 131
- Clarendon 701
- Swiss 742 Condensed
- Incised 901
- Aldine 430
- Calligraphic 401

## Important Safety Instructions

Before using your Epson product, read and follow these safety instructions.

[General Product Safety Instructions](#)

[Ink Cartridge Safety Instructions](#)

[LCD Screen Safety Instructions](#)

[Wireless Connection Safety Instructions](#)

[Telephone Equipment Safety Instructions](#)

**Parent topic:** [Notices](#)

## General Product Safety Instructions

- Be sure to follow all warnings and instructions marked on the product.
- Use only the type of power source indicated on the product's label.
- Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
- Place the product near a wall outlet where the plug can be easily unplugged.
- Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
- Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end.

- If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- Always turn off the product using the power button, and wait until the power light stops flashing before unplugging the product or cutting off power to the electrical outlet.
- If you will not be using the product for a long period, unplug the power cord from the electrical outlet.
- Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.
- Allow space behind the product for the cables, and space above the product so that you can fully raise the document cover.
- Leave enough space in front of the product for the paper to be fully ejected.
- Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.
- Do not place or store the product outdoors.
- Do not place the product near excessive heat sources or in direct sunlight.
- Leave enough room around the product for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.
- Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.
- When connecting the product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
- Do not touch the flat white cable inside the product.
- Do not move the print head by hand; this may damage the product.
- Do not spill liquid on the product or use the product with wet hands.
- Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.
- Do not press too hard on the document table when placing originals.
- Do not open the scanner section while the product is copying, printing, scanning, or performing any other functions.
- Be careful not to trap your fingers when closing the document cover or scanner.
- Except as specifically explained in your documentation, do not attempt to service the product yourself.

- Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.
- Leave the ink cartridge installed. Removing the cartridge can dehydrate the print head and may prevent the product from printing.
- When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise ink may leak.

## **Ink Cartridge Safety Instructions**

- Keep ink cartridges out of the reach of children and do not drink the ink.
- Be careful when you handle used ink cartridges; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water.
- Do not put your hand inside the product or touch any cartridges during printing.
- Install a new ink cartridge immediately after removing an expended one. Leaving cartridges uninstalled can dry out the print head and may prevent the product from printing.
- Do not remove or tear the label on the cartridge; this can cause leakage.
- Do not remove the transparent seal from the bottom of the cartridge. This may cause the cartridge to become unusable.
- Do not break the hooks on the side of the cartridge when removing it from the packaging.
- Do not touch the green IC chip on the side of the cartridge. This may prevent normal operation.
- Do not shake cartridges after opening their packages; this can cause them to leak.
- If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the product. Note that there is a valve in the ink supply port, making covers or plugs unnecessary, but care is needed to prevent the ink from staining items that the cartridge touches. Do not touch the ink cartridge ink supply port or surrounding area.
- Use an ink cartridge before the date printed on its package.
- Do not dismantle an ink cartridge. This could damage the print head.
- Store ink cartridges in a cool, dark place.
- After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.

- Store ink cartridges with their labels facing upward. Do not store cartridges upside down.

## **LCD Screen Safety Instructions**

- Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.
- If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.
- Do not press too hard on the LCD screen.
- Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.

## **Wireless Connection Safety Instructions**

Radio waves from this product may adversely affect the operation of medical equipment or automatically controlled devices, such as pacemakers, automatic doors or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

## **Telephone Equipment Safety Instructions**

When using telephone equipment, you should always follow basic safety precautions to reduce the risk of fire, electric shock, and personal injury, including the following:

- Do not use the Epson product near water.
- Avoid using a telephone during an electrical storm. There may be a remote risk of electric shock from lightning.
- Do not use a telephone to report a gas leak in the vicinity of the leak.

**Caution:** To reduce the risk of fire, use only a No. 26 AWG or larger telecommunication line cord.

# FCC Compliance Statement

## For United States Users

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the Administrative Council for Terminal Attachments ("ACTA"). On the surface of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

Applicable certification jack Universal Service Order Codes ("USOC") for the equipment: RJ11C.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If you have problems with this product and require technical or customer support, please visit [www.epson.com](http://www.epson.com) for more information.

This product is not intended to be repaired by the customer. If you experience trouble connecting this equipment to a telephone line, please contact:

Name: Epson America, Inc.

Address: 3840 Kilroy Airport Way, Long Beach, CA 90806 U.S.A.

Telephone: (562) 981-3840

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

This equipment may not be used on coin service provided by the telephone company. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

In order to program this information into your fax machine, click the link below for instructions on entering fax header information.

According to the FCC's electrical safety advisory, we recommend that you may install an AC surge arrester in the AC outlet to which this equipment is connected. Telephone companies report that electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources and that this is a major nationwide problem.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### **WARNING**

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded

equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

### **For Canadian Users**

1. This product meets the applicable Industry Canada technical specifications.
2. The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

CAN ICES-3(B)/NMB-3(B)

Le présent matériel est conforme aux spécifications techniques applicables d'Industrie Canada.

L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d'une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme d'indices d'équivalence de la sonnerie de tous les dispositifs n'excède pas 5.

CAN ICES-3(B)/NMB-3(B)
