Glossary
Antenna Connection

If you are not connecting your TV to a cable or satellite box, you must connect an antenna or a cable outlet to the TV to receive broadcast signals.

Connect a cable from an antenna or cable outlet to the ANT IN connector as shown in the diagram below.

An antenna connection is not necessary when a cable box or satellite receiver is used.

Video Device Connection

Your TV has a variety of connectors for video input from external devices such as cable boxes, satellite receivers, Blu-ray players, DVD players, camcorders, and gaming consoles. Below is a list of featured connectors shown in descending order of picture quality.

- HDMI
- Component
- External Input

Connect a video device to the TV via an HDMI connector for the best picture quality. If the device does not have an HDMI connector, try a component connector to get the next best picture quality.

The number of connectors and their names and locations may vary depending on the model.

Refer to the external device’s operating manual when connecting it to the TV. The number of external device connectors and their names and locations may vary depending on the manufacturer.
HDMI Connection

Before connecting any external devices and cables to the TV, first verify the model number of the TV you purchased. A sticker containing the model number is attached to the back of the TV.

The connection method varies depending on the model.

The following types of HDMI cables are recommended:

- High-Speed HDMI Cable
- High-Speed HDMI Cable with Ethernet

Use an HDMI cable with a thickness of 14 mm or less.

Using a non-certified HDMI cable may result in a blank screen or a connection error.

Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.

This TV does not support HDMI Ethernet Channel. Ethernet is a LAN (Local Area Network) built with coaxial cables standardized by the IEEE.

Refer to the diagram and connect the HDMI cable to the video device's HDMI output connector and the TV's HDMI input connector.

The number of connectors and their names and locations may vary depending on the model.

Once the connection has been made, you will be able to select the connected external device using the SOURCE button.
Component Connection

Before connecting any external devices and cables to the TV, first verify the model number of the TV you purchased. A sticker containing the model number is attached to the back of the TV.

The connection method varies depending on the model.

Refer to the diagram and connect the component cable to the TV’s component input connectors and the device’s component output connectors.

Make sure the cable colors match the connector colors.

Once the connection has been made, you will be able to select the connected external device using the SOURCE button.
External Input Connection

Before connecting any external devices and cables to the TV, first verify the model number of the TV you purchased. A sticker containing the model number is attached to the back of the TV.

The connection method varies depending on the model.

Refer to the diagram and connect the AV cable to the TV’s AV input connectors and the device’s AV output connectors.

If you are using the TV’s AV input connectors, connect the device’s audio output to the TV using a Y connector.

Once the connection has been made, you will be able to select the connected external device using the SOURCE button.
TV Audio through the External Speakers

Your TV has a variety of connectors for audio input from devices such as Blu-ray players and DVD players and for audio output to such devices as amplifiers. The connectors are listed below:

- Digital Audio (Optical)
- Audio

For better audio quality, it is a good idea to use an AV receiver.

The number of connectors and their names and locations may vary depending on the model.

Refer to the external device’s operating manual when connecting it to the TV. The number of external device connectors and their names and locations may vary depending on the manufacturer.

Digital Audio (Optical) Connection

Before connecting any external devices and cables to the TV, first verify the model number of the TV you purchased. A sticker containing the model number is attached to the back of the TV.

The connection method varies depending on the model.

Connecting an AV receiver to the TV via a digital audio (optical) connector lets you listen to digital audio.

Connecting a device using an optical cable does not automatically turn off the TV speakers. To turn off the TV’s speakers, set TV Sound Output (Sound > Speaker Settings > TV Sound Output) to something other than TV Speaker.

Adjust the audio device’s volume using its remote control.

An unusual noise coming from the audio device while you are using it may indicate a problem with the audio device itself. If this occurs, ask for assistance from the audio device manufacturer.

Digital audio is only available with 5.1-channel broadcasts.

Refer to the diagram and connect the optical cable to the TV’s digital audio output connector and the device’s digital audio input connector.
Audio Output Connection

Before connecting any external devices and cables to the TV, first verify the model number of the TV you purchased. A sticker containing the model number is attached to the back of the TV.

The connection method varies depending on the model.

Refer to the diagram and connect the audio cable to the TV’s audio output connector and the device’s audio input connector.
Connecting to a Computer

You can directly connect a computer to the TV or to the network to view the computer screen or content on the TV. Connect the computer to the TV as follows.

- **Connecting through the HDMI Port**
  You can connect the computer to the TV using the HDMI cable to display the computer screen on the TV.

- **Connecting with the DVI to HDMI cable**
  You can connect a computer to the TV by connecting the computer’s DVI port to the TV’s HDMI port with the DVI to HDMI cable to display the computer screen on the TV.

- **Connecting Through Samsung Link**
  Quickly access the photo, video and music files saved on a computer on which Samsung Link software is installed, even if you do not connect the TV directly to the computer.

- **Connecting Through Home Network (DLNA)**
  Quickly access the photo, video and music files saved on a computer by connecting the TV and the computer to the same router or AP.
Connecting Through the HDMI Port

First, check the TV model before connecting an external device to the TV. On the back of the TV, the model number sticker is attached.

The connection method differs depending on the model.

For HDMI connection, one of the following HDMI cable types is recommended:

- High-Speed HDMI Cable
- High-Speed HDMI Cable with Ethernet

Use an HDMI cable with a thickness of 14 mm or less. Using a non-certified HDMI cable may result in a blank screen or a connection error.

Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.

This TV does not support HDMI Ethernet Channel. Ethernet is a LAN (Local Area Network) built on coaxial cables standardized by the IEEE.

Some computers do not support HDMI interface depending on the graphics adapter specifications. In this case, use a DVI to HDMI cable to connect the computer to the TV. For more information, refer to “Connecting With the DVI to HDMI Cable”.

Refer to the diagram and connect the HDMI cable to the external video device’s HDMI output connector and the TV’s HDMI input connector.

The number of ports, and their names and locations may vary depending on the model.

Once the connection has been made, you will be able to select the connected external device using the SOURCE button.
Connecting With the DVI to HDMI Cable

If the graphics adapter of your computer does not support HDMI interface, connect the computer to the TV with the DVI (Digital Visual Interactive) to HDMI cable. However, the DVI to HDMI connection is only supported by the HDMI port for DVI and it does not support audio signal transmission. To listen to the computer sound, connect the external speaker to the computer’s audio output connector.

For the resolutions supported by the TV, refer to “Read Before Connecting a Computer (Supported Resolutions) - For the LED 5, 6 series models”.

Refer to the diagram and connect an HDMI-to-DVI cable to the TV’s HDMI (DVI) port and the computer’s DVI output port.

Once the connection has been made, you will be able to select the connected external device using the SOURCE button.
Connecting Through Samsung Link

Quickly access the photo, video and music files saved on a computer on which Samsung Link software is installed. In addition, using Samsung Link, you can play the content of the computer, which is registered to Samsung Link with your Samsung account even if the computer and the TV are not connected to the same router or AP.

1. On a computer, connect to the Samsung content and service portal (http://link.samsung.com) and sign into a Samsung account.
   ✍ To install the Samsung Link desktop software, you need to sign into your Samsung account. If you don’t have a Samsung account, create one first.

2. Install the Samsung Link desktop software. When the installation is complete, the computer will be registered to Samsung Link.

3. Specify a folder to connect to the TV. You can play the photo, video and music files in the specified folder on the TV screen.
   ✍ For more information on using the Samsung Link desktop software, refer to the Help section of the software.

Connecting Through Home Network (DLNA)

Quick access and play the photo, video and music files in a computer on the TV screen.

1. Connect the TV and the computer to the same router or AP. Once you connect them to one router or AP, a home network is configured.
   ✍ Home Network (DLNA) refers to the technology to share content between TV, computer and mobile device by connecting them to one wired or wireless router.

2. On the computer, select [Control Panel] > [Network and Internet] > [Network and Sharing Center] > [Change advanced sharing settings] and select [Choose media streaming options...] to activate media streaming.

3. From the list, set the TV to [Allowed].

4. Launch Windows Media Player on a computer, select [Settings] > [Library Management], add the location where photo, video and music files are saved to play them on the TV screen.
   ✍ Alternatively, once you move the files to the folder that is specified by Windows Media Player by default, you can play them on the TV screen.
   ✍ As long as File Sharing is activated, unauthorized access may be allowed. When you do not need to access data, disable the File Sharing.
Connecting to a Mobile Device

You can directly connect a mobile device such as a smartphone or tablet to the TV, or connect it to the network and play the mobile device screen or content on the TV screen. Connect the mobile device to the TV as follows.

- **Mobile Device Screen on TV (Screen Mirroring)**
  Wirelessly connect the TV and the mobile device with the Screen Mirroring function, you can view the mobile device screen on the TV screen.

  ✏️ This option is available only on a mobile device that supports the mirroring function.

- **Connecting Mobile Devices without a Wireless Router (Wi-Fi Direct)**
  Wi-Fi Direct enables you to connect the TV and the mobile device without a router or AP. Quick access and play the photo, video and music files in the connected mobile device on the TV screen.

  ✏️ This option is available only on a mobile device that supports the Wi-Fi Direct function.

- **Connecting Through Samsung Link**
  Samsung Link enables you to play the photo, video and music files saved on a Samsung Link enabled mobile device with ease without the need for connection to the TV.

- **Connecting Through Home Network (DLNA)**
  You can conveniently play the photo, video and music files saved on a mobile device by connecting the mobile device and the TV to the same router or AP.
Mobile Device Screen on TV (Screen Mirroring)

Wirelessly connect a mirroring function-enabled mobile device to the TV to play the video and listen to the audio of the mobile device on the TV. Screen Mirroring refers to the function that outputs the video and audio of the mobile device on the TV as well as the mobile device.

❗ To use the Screen Mirroring function, the mobile device must support the Screen Mirroring function such as AllShare Cast. To check whether your mobile device supports the Screen Mirroring function, please visit the mobile device manufacturer’s website.

❗ The video or audio may intermittently stop depending on the network condition.

Connecting via a mobile device…

1. On the mobile device, run Screen Mirroring. The mobile device searches for available devices to connect to.
2. From the search result list, select TV. The TV displays a pop-up window.
3. In the pop-up window, select Allow to connect the mobile device.

❗ All previously allowed mobile devices will automatically connect without needing approval.

❗ If you select Deny, the device won’t appear and can’t be activated in this way. Navigate to Network > Screen Mirroring > Device Manager to allow the previously denied mobile device.
Not searching for the TV on mobile devices...

1. Navigate to Network > Screen Mirroring to run Screen Mirroring. Also, you can select Screen Mirroring on a list by pressing SOURCE button.

2. Run mirroring on the mobile device. Display a list while automatically searching for mobile devices.

3. Select the TV and it connects automatically.

   📘 When the mobile devices cannot connect, try turning the TV off and on.

Allow/Reject the connection via mobile devices

📝 This is only available for watching when mobile devices allow the connection.

1. Navigate to Network > Screen Mirroring > Device Manager to select Device Manager. This displays a list of required mobile devices connection.

2. You can allow access or deny connections with mobile devices.
Connecting Mobile Devices without a Wireless Router (Wi-Fi Direct)

*MENU > Network > Wi-Fi Direct (Try Now)*

You can directly connect a mobile device with Wi-Fi Direct feature to the TV without using a wireless router or AP. By connecting a mobile device with the TV through **Wi-Fi Direct**, you can play photo, video and music files saved in the mobile device on the TV.

⚠️ This option is available only on a mobile device that supports the Wi-Fi Direct function. Please check if your mobile device supports Wi-Fi Direct.

1. Enable Wi-Fi Direct on the mobile device and then navigate to **Network** and select **Wi-Fi Direct** on the TV. The TV automatically scans for and displays a list of available devices. The TV’s name also appears on the mobile device.

2. Select the device from the list to initiate a connection. If a connection request is made by the TV, a permission message appears on the mobile device and vice versa.

3. Allow the connection. Then, the TV and the mobile device are connected.

Connecting Through Samsung Link

Samsung Link enables you to play the photo, video and music files saved on a Samsung Link-enabled mobile device with ease. In addition, using Samsung Link, you can play the content of the mobile device, which is registered to Samsung Link with your Samsung account, even if the mobile device and the TV are not connected to the same router or AP.

1. Run the Samsung Link app on the mobile device and then sign in with your Samsung account.

⚠️ To use Samsung Link, you have to sign in with a Samsung account. If you don’t have a Samsung account, create one first.

2. Quickly access and play the photo, video and music files saved on the mobile device on which you launched the Samsung Link app with your Samsung account.

⚠️ For more information on using the Samsung Link app, refer to the Help section of the manual.
Connecting Through Home Network (DLNA)

You can conveniently play the photo, video and music files in a mobile device on the TV.

1. Connect both the TV and the mobile device to the same router or AP. Once you connect them to a single router or AP, a home network is configured.

   Home Network (DLNA) refers to the technology to share content between TV, computer and mobile device by connecting them to one wired or wireless router.

2. Enable File Sharing on the mobile device. You can play the content shared by the mobile device on the TV.

   As long as File Sharing is activated, unauthorized access may be allowed. When you do not need to access data, disable the File Sharing.

The name of the TV on the Network

MENU > Network > Device Name (Try Now)

Choose or specify the name of the TV that will appear on mobile devices and laptop computers.

1. Select Device Name from the Network menu, and then choose a name from the list that appears.
   Alternatively, select User Input to enter a name manually.

2. Check the name from a mobile device or laptop computer.
Switching Between Video Sources

Press the **SOURCE** button to switch between external devices connected to the TV. For example, to switch to a game console connected to the second HDMI connector, press the **SOURCE** button. From the **Source** list on the Source screen, select **HDMI2**.

*The connector names may vary depending on the product.*

The following options are also available on the **Source** screen:

- **Option menu (Tools)**
  
  Using your remote, highlight the source you want to assign a device name to.

  Open the option menu using your remote.

  *The available options for each of the connectors may vary.*

  - **Edit Name**: You can rename devices connected to the TV to more easily identify external sources. For example, you can designate a computer connected to the TV via an HDMI-DVI cable as **DVI PC**. Alternatively, simply designate a computer connected to the TV via an HDMI cable as **PC**. You can also designate an AV device connected to the TV via an HDMI-DVI cable as **DVI Devices**.

  - **Information**: View detailed information about the connected devices.

  - **Remove USB**: Use to safely remove a USB device connected to the TV.

    *This option is only available when a USB device has been selected.*
Using the Remote Control on the Screen (Virtual Remote Control)

Availability depends on the specific model and area.

Press the KEYPAD item to display the Onscreen Remote control on the screen. You can easily enter digits, control content, and use TV buttons with the Onscreen Remote.

The Onscreen Remote buttons may vary depending on the current status of the TV.

Controlling the TV with a Keyboard

**MENU > System > Device Manager > Keyboard Settings**

You can use a keyboard to control the TV with greater ease and comfort.

"Certain models do not support USB HID class keyboards.

Connecting a Keyboard

Connecting a USB Keyboard

Plug the keyboard cable into the TV's USB port. A connection message will appear on the screen.

Using the Keyboard

Use the following remote features with the USB keyboard connected to the TV.

- Arrow Keys (moving the focus), Windows Key (MENU Button), Menu List Key (TOOLS Button), Enter Key (Select/run item), ESC (RETURN Button), Number Keys (Number Buttons)
- F1 (ellaneous), F2 (b), F3 (c), F4 (d), F5 (e), F6 (SOURCE Button), F7 (CH LIST Button), F8 (MUTE Button), F9/F10 (Volume Buttons), F11 / F12 (Channel Buttons)
- Page Up/Page Down: Scroll web browser pages up/down.

Changing Keyboards

Select **System > Device Manager > Keyboard Settings > Select Keyboard**, Designate which keyboard to use.

"Only one keyboard can be used at a time.
Input Languages, Keyboard Type, and Switch Language Key

Select System > Device Manager > Keyboard Settings > Keyboard Options. The following options are available: Try Now

- **Keyboard Language**
  If the keyboard supports multiple languages, choose which language you want to use from the list.

- **Keyboard Type**
  Specify the type of language selected under Keyboard Language.
  
  The Keyboard Type list varies depending on which language was selected under Keyboard Language.

- **Switch Input Language**
  If the keyboard supports multiple languages, choose from the list which key to use to switch between languages.

Controlling the TV with a Mouse

MENU > System > Device Manager > Mouse Settings Try Now

You can use a keyboard to control the TV with greater ease and comfort.

Certain models do not support USB HID class keyboards.

Connecting a Mouse

Connecting a USB Mouse

Plug the mouse cable into the TV's USB port. A connection message will appear on the screen,
Using the Mouse

Once a USB mouse is connected to the TV, a pointer will appear on the TV’s screen. You can use this pointer to control the TV as you would a computer.

- **Selecting and Running an Item**
  Left-click on the mouse.

- **Displaying the Volume, Mute, and Channel Buttons**
  Select the volume/channel icon on the screen while watching TV. Use the on-screen buttons to adjust the volume or switch the channel.

  Select the volume/channel icon again to hide the buttons.

- **Showing Tools Buttons**
  Right-clicking shows the Tools buttons on the screen so that you can easily use the TV functions.

  The Tools buttons may vary depending on the function.

- **Displaying the Context-sensitive Menu on Smart Hub**
  On the Smart Hub screen, navigate to an item, and hold down the left mouse button for 1 second. The context-sensitive menu available to the selected item appears.

  The context-sensitive menu may vary depending on the item you selected.

- **Scrolling the TV Menu or Screen**
  Move the mouse wheel up or down. This scrolls the TV menu or screen up/down.

- **Exiting the TV Menu or Feature**
  Click on the X button. This closes the menu.

  The X button appears on the TV menu when a mouse is being used. Left-clicking once while using a feature displays the X button on the current screen.

Changing Mouse

Select **System > Device Manager > Mouse Settings > Select Mouse**, Designate which mouse to use. Only one mouse may be used at a time.

Changing Mouse Buttons and Pointer Speed

Select **System > Device Manager > Mouse Settings > Mouse Options**, The following options are available:

- **Primary Button**
  Choose which (left or right) button to use to select and run items.

- **Pointer Speed**
  Adjust the movement speed of the pointer that appears on the screen.
Entering Text Using QWERTY

A QWERTY keypad appears when you need to enter text (entering the network password, logging into your Samsung account, etc.), allowing you to enter text using your remote control.

Using Additional Functions

Select ☀ on the QWERTY keyboard screen. The following options are available:

- **Recommended text**
  
  Enable/disable the Recommended Text feature. Enabling the Recommended text feature allows you to quickly enter text starting with the characters you typed in by showing the recommended words. To enter the word "Internet," for example, all you have to do is enter "In" and select the word "Internet" from the list of recommended words. And the selected word will be memorized by the keyboard so that you can enter the same text with ease using this function.

- **Reset recommended text data**
  
  Delete both the recommended words and the memorized words to clear the list.

- **Predict Next Letter**
  
  Enable/disable the Predict Next Letter feature. Enabling the Predict Next Letter feature eliminates the need to find and select individual character keys. To enter the word "Internet," for example, select "I". A predicted word will then appear next to the I key. Simply select the predicted word to enter "Internet".

  
  This feature is limited to words that have previously been added to the dictionary.
Establishing a Wired Internet Connection

Connecting the TV to the Internet gives you access to online services and SMART features, and lets you update the TV’s software quickly and easily through the Internet.

Using Cat 7 LAN Cables

Use Cat 7 LAN cables to link your TV to the Internet Access Points.

The TV will not be able to connect to the Internet if the network speed is below 10Mbps.

There are three ways to connect the TV to your Internet Access Points. Using Cat 7 cables, connect the TV to the Access Points as shown in one of the following illustrations.

- External Modem

- ① IP Router + ② External Modem

- Wall-mounted LAN Outlet
Connecting to a Wired Internet Network Automatically

Automatically connect to an available network.

1. Set the **Network type** to **Wired**, and then select **Connect**.

2. The TV attempts to connect to an available network. Once it is successful, you will see a confirmation message. Select **OK**. If the attempt fails, try again, or connect manually.

Connecting to a Wired Internet Network Manually

With networks that require a static IP address, you will need to enter the IP address, subnet mask, gateway, and DNS values manually to connect to the network. To get these values, contact your Internet Service Provider (ISP).

- Refer to the “Dynamic versus Static IP Addresses” section for more information on dynamic IP and static IP addresses.

1. Set the **Network type** to **Wired**, and then select **Connect**.
2. Select Stop when the TV attempts to connect to the network. Once the network connection has been interrupted, select IP Settings.

![Network Settings](image)

3. In the IP Settings screen, set IP Setting to Enter Manually.

![IP Settings](image)

4. Press the button, enter a value for the IP Address using the number buttons, and then select OK.

5. Repeat the process for Subnet Mask, Gateway, and DNS Server.

6. When done, select OK.

7. The TV attempts to connect to the network again using the settings you entered. Once it has established the connection, it displays a confirmation message. Select OK.

   - The network connection speed may differ depending on the DNS server settings.
   - For details on the DNS server settings, contact your Internet service provider (ISP).
Establishing a Wireless Internet Connection

Connecting the TV to the Internet gives you access to online services and SMART features, and lets you update the TV's software quickly and easily through the Internet.

Connecting to a Wireless Internet Network Automatically

MENU > Network > Network Settings

Connect the TV to the Internet via a wireless router. Make sure you have the wireless router's SSID (name) and security key settings before attempting to connect. The security key can be found on the wireless router’s configuration screen.

2. Select a network (SSID). If the network you want doesn't appear in the list, select Add Network, and enter the network's SSID manually.

3. Using the on-screen keyboard that appears, enter the security key. When finished, select Done. If the selected network is not security-enabled, the TV will bypass the on-screen keyboard and attempt to connect right away.
   - To select a character on the on-screen keyboard, highlight the character and then press the button. Select Caps to view capital letters. Select the 123#& key to view additional characters.
   - To view the security key as you enter it, select Show Password.

4. The TV attempts to connect to the network. Once a connection is established, the TV displays a confirmation message. Select OK. If the attempt fails, try again or connect manually.
Connecting to a Wireless Internet Network Manually

MENU > Network > Network Settings

With networks that require a static IP address, you will need to enter the IP address, subnet mask, gateway, and DNS values manually to connect to the network. To get the IP address, subnet mask, gateway and DNS values, contact your Internet Service Provider (ISP).

Refer to the "Dynamic versus Static IP Addresses" section for more information on dynamic IP and static IP addresses.

1. On the Network Settings screen, set **Network type** to **Wireless**. The TV automatically displays a list of available wireless networks.

2. Select a network (SSID). If the network you want doesn’t appear in the list, select **Add Network**, and enter the network’s SSID manually.

3. Using the on-screen keyboard that appears, enter the security key. When finished, select **Done**. If the selected network is not security-enabled, the TV will by-pass the on-screen keyboard and attempt to connect right away.

4. Select **Stop** when the TV attempts to connect to the network. Once the network connection has been interrupted, select **IP Settings**.
5. In the **IP Settings** screen, set **IP Setting** to **Enter Manually**.

![IP Settings screen]

6. Press the 📫 button, enter a value for the **IP Address** using the number buttons, and then select **OK**.

7. Repeat the process for **Subnet Mask**, **Gateway**, and **DNS Server**.

8. When done, select **OK**.

9. The TV attempts to connect to the network again using the entered settings. Once it has established the connection, it displays a confirmation message. Select **OK**.

   📌 Network connection speeds may differ depending on the DNS server settings.

   ⚠️ For details on the correct DNS server settings, contact your Internet service provider (ISP).

### Connecting to a Wireless Internet Network with WPS

**MENU** > **Network** > **Network Settings**

If the router has a WPS push button, you can use it to connect the TV to the router automatically. WPS automatically configures the SSID and WPA key settings.

- Your router must support WPS to use the WPS functionality.

1. On the **Network Settings** screen, set **Network type** to **Wireless**. The TV automatically displays a list of available wireless networks.

2. Select **WPS (PBC)**, and then press the router’s WPS or PBC button within two minutes.

3. The TV automatically acquires the SSID and security key settings, and then connects to the network. Once a connection is established, the TV displays a connection message. Select **OK**.
Troubleshooting Internet Connectivity Issues

If you are not able to connect the TV to the Internet read the information below.

Troubleshooting Wired Internet Connectivity Issues

No network cable found

Make sure the network cable is plugged in. If it is connected, make sure the router is turned on. If it is on, try turning it off and on again.

IP auto setting failed

Do the following or configure the IP Settings manually.

1. Ensure that the DHCP server is enabled on the router and reset the router.
2. If this does not work, contact your Internet Service Provider for more information.

Unable to connect to the network

Do the following:

1. Check all IP Settings.
2. Ensure that the DHCP server is enabled on the router. Then, unplug the router and plug it back in.
3. If this does not work, contact your Internet Service Provider for more information.

Connected to a local network, but not to the Internet

1. Make sure that the Internet LAN cable is connected to the router’s external LAN port.
2. Check the DNS values in the IP Settings.
3. If the problem persists, contact your Internet Service Provider.

Network setup is complete, but unable to connect to the Internet

If the problem persists, contact your Internet Service Provider.
Troubleshooting Wireless Internet Connectivity Issues

Wireless network connection failed, [Try Now] [Try Now]
Selected wireless router not found. Go to Network Settings and select the correct router.

Unable to connect to a wireless router [Try Now] [Try Now]
Check the following:
1. Check if the router is turned on. If it is, turn it off and on again.
2. Enter the correct security key if required.

IP auto setting failed [Try Now]
Do the following or configure the IP Settings manually.
1. Make sure that the DHCP server is enabled on the router. Then, unplug the router and plug it back in.
2. Enter the correct security key if required.
3. If this does not work, contact your Internet Service Provider for more information.

Checking the Internet Connection Status

MENU > Network > Network Status

The screen shown may vary depending on the model.

View the current network and Internet status.
With Smart Hub, you can surf the web, download apps, and stay in touch with family and friends through social networking services. In addition, you can enjoy photo, video, and music files stored on external storage devices.

Some of the Smart Hub services for pay services. To use a for pay service, you must have an account with the service provider or a Samsung Apps TV account. Refer to the "Using Smart Hub with a Samsung Account" section for more information about a Samsung account.

The TV must be connected to the Internet in order to use Smart Hub.

Smart Hub features may not be available depending on the service provider, language, or region.

To use Smart Hub, you must agree to the end user agreement and privacy policy. Otherwise, you will not be able to access the features and services associated with them. You can view the entire content of the Terms & Policy by navigating to Smart Hub > Terms & Policy. If you want to stop using Smart Hub, you can cancel the agreement.

If Smart Hub is not functioning, navigate to Support > Self Diagnosis > Smart Hub Connection Test. Diagnose the problem by checking the internet connection, your ISP, the Samsung server and the Samsung Apps panels.

After completing the test, if Smart Hub continues to have problems, contact your Internet Service Provider or a Samsung Contact Center.
Opening the First Screen

Press the button while watching TV to open the First Screen. On the First Screen, search through favorite apps, channels or sources and quickly access previously run or frequently used functions.

Setting your favorite item

1. Press the button to open the First Screen, and move to a desired item.
2. Press and hold the button. The Options menu appears.
3. In the Options menu, select Add to Favorites to add the selected item to the favorite list, which will move top of the list.

   To delete a favorite item, select it and press and hold the button to display the context menu, Then, select Remove from Favorites.

Deleting browsing history

1. Press the button to open the First Screen, and select Clear All. You will be asked to confirm your selection.
2. Select Yes on the screen. Your browsing history is deleted completely.

   However, the Favorites list items will not be deleted.

   You can also delete your browsing history by selecting Clear All in the Smart Hub > First Screen Settings menu.
Moving to the Panel Screen

Press the button to launch Smart Hub. Select an icon on top of the screen to use the services of the corresponding panel.

- **SAMSUNG APPS**
  You can enjoy variety of free and for pay news, sports, weather, and gaming apps on the TV as you would on a smart phone or tablet.

Using the Smart Hub Tutorial

**MENU > Support > Smart Hub Tutorial**

Select **Support > Smart Hub Tutorial**, This will familiarize yourself with the basics of Smart Hub and panels.

Resetting Smart Hub

**MENU > Smart Hub > Smart Hub Reset**

It is possible to remove Samsung accounts and everything linked to them, including apps, from the TV. Enter the password when accessing this menu.
Creating a Samsung Account

MENU > Smart Hub > Samsung Account

Some of the Smart Hub services are paid services. To use a for pay service, you must have an account with the service provider or a Samsung Apps TV account (a Samsung account).

You can create a Samsung account using your email address as your ID.

- To create a Samsung account, you must be over 14 years old.
- To create a Samsung account, you must agree to the Samsung account end user agreement and privacy policy. Otherwise, you cannot create a Samsung account. You can view the entire content of the agreement by navigating to Smart Hub > Samsung Account > Terms and Conditions, Privacy Policy.
- Alternatively, you can create a Samsung account at http://content.samsung.com. You can use one ID for both the TV and the website.
Creating a Samsung Account using Sign Up Samsung Account Menu

1. Navigate to Smart Hub > Samsung Account > Create Account and select Create Samsung Account.
2. Agree to use a Samsung account and select Next.
3. Create a Samsung account according to the instructions on the Create Account screen.
4. Once a Samsung account is created, you are automatically logged in to Smart Hub.

Creating a Samsung Account using a Facebook Account

A Facebook user can easily obtain necessary information from Facebook and create a Samsung account.

1. Navigate to Smart Hub > Samsung Account and select Log In. The Sign In screen appears.
2. Select + and select the Create with Facebook on the Sign In screen.
3. Enter your Facebook ID and password and select Sign In.
4. Agree to use a Samsung account and select Next.
5. Create a Samsung account according to the instructions on the Create Account screen.
6. Once a Samsung account is created, you are automatically signed in.

💡 If you create a Samsung account using your Facebook account, they are automatically linked.
Signing in to a Samsung Account

MENU > Smart Hub > Samsung Account > Log In

Logging Into and Saving a Samsung Account on the TV

1. Navigate to Smart Hub > Samsung Account and select Log In.

2. Select + and select Sign In on the Sign In screen.
   - If you save your Samsung account on the TV, you can easily sign up later on.

3. Enter your ID and password and then select Sign In.
   - Check the Sign me in automatically option if you wish to log into Smart Hub automatically.
   - If you forgot your password, select Reset Password to receive the password resetting instructions via email.

4. Agree to use a Samsung Account and select Next.

5. Select an image to be used as the profile picture.

6. The Samsung account has been saved on the TV. Select Done to log into your Samsung account.

Easily Logging Into Your Samsung Account Saved on the TV

1. Navigate to Smart Hub > Samsung Account and select Log In.

2. Choose your Samsung account on the Sign In and select Sign In.

3. Using the login method configured for the selected Samsung account, log into your Samsung account. To change the login method, refer to the "Changing and Adding Information to Samsung Account" section.
Linking Your Samsung Account to External Service Accounts

MENU > Smart Hub > Samsung Account > Link Service Accounts

Linking your Samsung account to an app account of the app installed on the TV lets you automatically log into your linked app accounts when you log into your Samsung account. For example, you can download the Facebook app and link your Facebook account to your Samsung account. In this case, logging into your Samsung account then automatically logs you into your Facebook account as well.

To use Link Service Accounts, you must first log into your Samsung account.

Linking a Service Account

1. Navigate to Smart Hub > Samsung Account and select Link Service Accounts. The available apps that can be linked to your Samsung account are listed.
2. Select an app from the list. The Link to other accounts window appears on the screen.
3. Enter the current ID and password of the app to log in and select OK.
4. When the login is complete, the app account is linked to the Samsung account.

Disconnecting a Linked Account

1. Navigate to Smart Hub > Samsung Account, select Link Service Accounts. Select an app to unlink.
2. A confirmation dialog box appears. Select Yes to unlink the app.
Changing and Adding Information to Samsung Account

MENU > Smart Hub > Samsung Account

Using the Samsung Account menu, you can manage your Samsung account.

To change the account information, you must be logged into your Samsung account.

1. Navigate to Smart Hub > Samsung Account and select Edit Profile. The keyboard appears.
2. Enter your password, and then select Done. The Edit Profile screen appears.

The Edit Profile screen lets you do the following:

- **Changing Profile Picture**
  If you select Edit Profile Picture on the login screen, you can change the profile image.

- **Choosing a Samsung Account Login Method for TV**
  Select Sign-in Method on the login screen and choose a login method. You can determine how to log into the TV with the saved Samsung account.

- **Turn Auto Login On or Off**
  Select Sign me in automatically from the login screen and select the checkbox. Then, you are automatically logged into the TV with your Samsung account when the TV is turned on.

- **Entering Basic User Information**
  You can enter your given name, surname, and date of birth.

- **Add a Credit Card to Your Samsung Account**
  Select Add Card to add a credit card to your Samsung Account. Adding a credit card to your account makes it easier to purchase online movies and TV shows. Follow the easy directions on the screen.

- **Setting Newsletter Subscription**
  You can determine whether to subscribe to the newsletter containing the latest information.

Deleting All Samsung Accounts from the TV

MENU > Smart Hub > Samsung Account > Remove Accounts from TV

Navigate to Smart Hub > Samsung Account and select Remove Accounts from TV. The account and password information saved on the TV is deleted, and the account information of any linked apps are also deleted.
Using the SAMSUNG APPS Panel

Smart Hub offers a variety of free news, sports, weather, and gaming content you can directly install and enjoy on your TV as you do on your smartphone or tablet.

Before you use SAMSUNG APPS, check if the TV is connected to the Internet. Your TV must be connected to the Internet in order to use SAMSUNG APPS.

When the Smart Hub is launched for the first time, the default apps are automatically installed. The default apps may differ depending on the region.
Using Supported Features via the Pop-Up Menu - Downloaded Apps

Move the focus to an app in the second row or below, and then press and hold the button. The Tools menu appears displaying the following functions.

- **Move**
  
  Lets you relocate an app on the screen.

- **Delete**
  
  Lets you remove a selected app from your TV.

- **Multi Delete**
  
  Lets you remove multiple apps from the TV.

- **View Details**
  
  Displays detailed information about a selected app.

- **Change View**
  
  You can change view mode sort by **Custom** or **Most Played**.

- **Lock/Unlock**
  
  You can lock or unlock a selected app from the screen.

- **Update apps**
  
  Displays a list of apps that have updates available. You can select which apps to update.
Installing an App

- When the TV's internal memory is insufficient, you can install an app on a USB device.
- You can view icons for the apps saved on the USB device on the SAMSUNG APPS screen only when the device is connected to the TV. You can use an app installed on a USB device only when the USB device is connected to the TV. If the USB device is disconnected while the app is running, the app is terminated.
- You can use the app installed on the USB device on another PC or TV.

Quick Installation

1. On the SAMSUNG APPS screen, select Most Popular, What's New, or Categories.
   - The Most Popular and What's New show the most popular and new Samsung Apps. To view the entire app list, select Categories. You can view all Samsung Apps classified by genre.
2. Move the focus to an app, and then press and hold the E button. A pop-up menu appears.
3. On the pop-up menu, select Download.
   - Most apps are free to install.
   - While an app is being installed, the progress bar appears so that you can easily figure out the installation progress.
4. The selected app is installed on the TV.
   - You can view installed apps on the SAMSUNG APPS screen.

Installing an App in the Detailed App Information Screen

1. On the SAMSUNG APPS screen, select Most Popular, What's New, or Categories.
   - The Most Popular and What's New show the most popular and new Samsung Apps. To view the entire app list, select Categories. You can view all Samsung Apps classified by genre.
2. Select an app from the list. Detailed information about your selection appears on the screen.
3. Select Download on the detailed information screen to install the selected app on the TV.
   - Most apps are free to install.
   - While an app is being installed, the progress bar appears so that you can easily figure out the installation progress.
4. When the installation is complete, the Download button turns to Open.
   - You can view installed apps on the SAMSUNG APPS screen.
Launching an App

Select an app on the SAMSUNG APPS screen to launch it.
The icons indicate the following:

- \[\text{\textbullet\textcircled{\(\downarrow\)}}\]: The app is installed on a USB device.

Default Apps

e-Manual

The embedded e-manual contains information about your TV's key features.

Web Browser

Web Browser is an Internet browsing app. Using Web Browser, you can surf the Internet on the TV in the same manner as you would using a PC even while watching a TV program on PIP. Use a keyboard and mouse for a more convenient web browsing experience.

"The browsing page may differ from that on a PC.

Rearranging Apps on the SAMSUNG APPS Screen

1. On the SAMSUNG APPS screen, move to the app you wish to change the order.
2. Press and hold the \[\text{\textcircled{\(\uparrow\)}}\] button. A pop-up menu appears.
3. On the pop-up menu select Move.
4. Move an app to a desired location and select the app again.
Deleting an App from the TV

If an app is deleted, the data related to the app is also deleted.

Deleting an App

1. On the SAMSUNG APPS screen, move to the app you wish to remove.
2. Press and hold the button. A pop-up menu appears.
4. Select Yes. The selected app is removed.

Removing Multiple Apps

1. On the SAMSUNG APPS screen, move to the app you wish to remove.
2. Press and hold the button. A pop-up menu appears.
3. On the pop-up select Multi Delete. A check box appears on the app icons.
4. Select all the apps you wish to remove and then select Delete. A removal confirmation window appears.
5. Select Yes. The selected app is removed.

Rating/Reviewing an App

On the detailed app information screen, you can rate the app or send a review to the app developer.

To rate or review an app, you must log into your Samsung account. You can only rate or review with a TV purchasing apps and games.
Updating an App

1. On the SAMSUNG APPS screen, move to the app you wish to update.
2. Press and hold the ⚡ button. A pop-up menu appears.
3. On the pop-up select Update apps. A pop-up window appears.
4. Select all the apps you wish to update and then select Update. All the selected apps are updated to the latest version.

Setting Auto App Update

To update apps automatically, navigate to Smart Hub > Apps Settings and set Auto Update to On. The apps will then be updated automatically when an update becomes available.

SAMSUNG APPS Features

You can configure the features related to the apps installed on your TV.

Setting Push Notification

The Push notification function enables apps installed on the TV to send alarm messages notifying users of news, messages, etc.

1. Navigate to Smart Hub > Apps Settings > Push Notification Settings and set the Push Notification to On.
2. Set the desired apps below the Push Notification to On to allow them to send push notifications. The push notification function of the selected app is activated.

The Push Notification app list only the apps that supports Push Notification Settings from among the apps installed on the TV.

Using an App while Watching TV

If an app linked to a channel is installed on the TV, you can view the program information and use the related service through the app while watching TV.

Navigate to Smart Hub > Apps Settings and set Channel-Bound Apps to On.

You can use this feature only when an app supporting Channel-Bound Apps is installed on the TV.
Using the Multimedia (Playing Photos, Videos, and Music)

- However, you cannot play media content if the content is not supported by the TV. For more information, refer to "Read Before Playing Photo, Video, or Music Files".
- Backup important files before connecting a USB device. Samsung is not responsible for damaged or lost files.

Playing Media Content Saved on a USB Device

1. The USB devices connected to the TV are listed.
2. Select the device you want to connect to. The folders and files in the selected USB are listed.
3. Select the media content you want to play from the list. The media content plays.
   - Alternatively, navigate to the media content you want to play, and then ▶ button to play the content.
   - If you connect a USB device to the TV while watching the TV, a pop-up window appears on the screen so that you can easily navigate the folders and files of the USB device.
   - Alternatively, if you select a USB device on the Source screen, a pop-up window appears on the screen so you can easily navigate the folders and files of the USB device.

Safely Removing a USB Device

1. Press the SOURCE button. The Source screen appears.
2. Navigate to the USB device you want to remove. Press and hold the ▬ button on a standard remote. An options window appears.
3. Select Remove USB in the list.
Buttons and Functions Available While Viewing Photos

The TV displays the buttons below when you press the E button while viewing photos from a multimedia source. The playback buttons will disappear if the RETURN button is pressed.

- **Pause / Play**
  
  Start or stop the slideshow. Using slideshow, you can play all the photos in a folder one by one.

- **Previous / Next**
  
  View the previous or the next photo.

- **Settings**
  
  The following functions are available when you select the Settings button.

  \[\text{This function is available only when the media content is music.}\] |
Digital Broadcast Information at a Glance

**MENU > Broadcasting > Guide**

Availability depends on the specific area.

The Guide provides an overview of each digital channel’s program lineup. You can check the program schedules and set up a Schedule Viewing.

Press the **GUIDE** button on the remote to launch the Guide.

The information in the **Guide** is for digital channels only. Analog channels are not supported.

### Using the Guide

Availability depends on the specific area.

To access the Guide functions, press and hold the touch pad. A pop-up window listing the following functions appears.

- **Changing the Channel List**
  
  If you select **Channel Filter**, you can change the channels displayed in the channel lists.

- **Navigating the Program Schedule**
  
  Press the ‹‹ or >> button to navigate the program schedule by 2 hours. You can only view the future program schedule.
  
  It is available for moving the page using the ‹ or › button.

- **Moving to the Schedule Manager**
  
  You can move to the **Schedule Manager** screen.

- **Adding Favorites**
  
  Select **Edit Favorite Channels** to add the selected program to the Favorites.

- **Viewing Detailed Information**
  
  View detailed information about the selected program. The program information may vary depending on the type of incoming signal and may not be available at all for certain programs.
  
  - Select a current program on another channel and select **View Details** to **Watch** the program.
  
  - Select an upcoming program and select **View Details** for **Schedule Viewing**.
Checking the Current Program Info

While watching TV, select **INFO** using the remote to view information about the current program.

- To view the program info, you must first set the TV’s clock. Go to **Clock (System > Time > Clock)**.
- The program information may vary depending on the type of incoming signal and may not be available at all for certain programs.

Select the current program in the Program Info window to instantly record the program. Press the ![left arrow](▼) or ![right arrow](►) buttons, you can view the upcoming programs. If you select a desired program you can set the **Schedule Viewing** for the program.

For more information on **Schedule Viewing**, refer to "Setting Up a Schedule Viewing".

Changing the broadcast signal

**MENU > Broadcasting > Antenna**  
**Try Now**

You can choose the appropriate DTV mode for your viewing environment. Choose **Air** or **Cable**. **Air** is suitable for homes equipped with a separate, over-the-air antenna. **Cable** is suitable for homes that have subscribed to a local cable-service or satellite-service provider.

- Do not use this function if your TV is connected to a cable or satellite box.

Digital Channel Signal Info and Strength

- Availability depends on the specific area.

**MENU > Support > Self Diagnosis > Signal Information**  

Select **Support > Self Diagnosis > Signal Information**, Displays the digital channel’s signal information and strength.

- If your TV is attached to a separate, over-the-air antenna, you can use the signal strength information to adjust the antenna for increased signal strength and improved HD channel reception.
- Signal information is only available for digital channels.
Setting Up a Schedule Viewing

Configure the TV to show a specific channel or program at a specific time and date. The icon appears next to programs that have been configured for a Schedule Viewing.

To set up a Schedule Viewing, you must first set the TV's clock. Go to Clock (System > Time > Clock).

Setting Up Schedule Viewing

Digital Channel Schedule Viewing

You can set up Schedule Viewing for programs on digital channels on the following screens:

- The Guide Screen
  
  Select an upcoming program from the Guide to set up a Schedule Viewing for it.

- The Program Info Screen
  
  Press the INFO button to display information about the current program. From the program information screen, select right button to view information about the next program, and press enter, to set up a Schedule Viewing for the upcoming program.

Analog Channel Schedule Viewing

MENU > Broadcasting > Schedule Manager (Try Now)

The Schedule Viewing function for programs on analog channels can be set up by specifying the time and date.

1. Select Broadcasting > Schedule Manager.

2. Select Schedule from the Schedule Manager to bring up a pop-up menu. Select Schedule Viewing.

3. Specify the Antenna, Channel, Repeat, and Start Time options for the program you want to watch and then select OK to finish.
Managing the Schedule Viewing List

**MENU > Broadcasting > Schedule Manager**

You can change the settings of **Schedule Viewing** sessions or cancel scheduled sessions altogether.

**Deleting Schedule Viewing Sessions**

You can delete **Schedule Viewing** sessions.

1. Select **Broadcasting > Schedule Manager**.
2. Select a session from the Schedule Manager. A pop-up window appears.
3. Select **Delete**. This cancels the selected viewing session.

**Editing Schedule Viewing Sessions**

1. You can change the settings of **Schedule Viewing** sessions. Select **Broadcasting > Schedule Manager**.
2. Select a session from the **Schedule Manager**. A pop-up window appears.
3. Select **Edit** and change the settings of the selected session.
4. Once finished, select **OK**. This applies the changes you made to the selected viewing session.
Using the Channel List

MENU > Broadcasting > Channel List

Press the CH LIST button while watching TV to bring up the Channel List and change the channel or check programs on other digital channels.

Select a channel from the Channel List to jump to it right away. To quickly scroll through the list, use the channel up/down buttons. This moves the focus one page at a time.

The Channel List screen contains the following icons:

- 📺: An analog channel
- 💖: A favorite channel
- ⛽️: A locked channel

• Using Options

Press the ▼ button, and then select Options. The following options are available:

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Antenna</td>
<td>Choose Air or Cable as the DTV mode. Air is suitable for homes equipped with separate, over-the-air. Cable is suitable for homes that subscribe to a local cable-service or satellite-service provider.</td>
</tr>
<tr>
<td>Sorting</td>
<td>(Digital channels only) Sort the list by Channel Number or by Name. Availability depends on the area. Availability depends on the specific area.</td>
</tr>
<tr>
<td>Edit Favorites</td>
<td>Designate favorite channels. Refer to the &quot;Creating a Personal Favorites List&quot; section for more information.</td>
</tr>
</tbody>
</table>

• Viewing the Added Channels or Favorites Lists

Press the ▼ button, and then select Added Ch. or Favorites. Favorites will only appear if you have registered at least one favorite channel. For more information, refer to "Creating a Personal Favorites List".
Registering, Removing, and Editing Channels

MENU > Broadcasting > Edit Channel

Remove channels from the index of channels, restore removed channels, and rename analog channels. The Edit Channel screen icons indicate the following:

- 📺: An analog channel
- ❤️: A favorite channel
- 🛠️: A locked channel

Registering and Removing Channels

MENU > Broadcasting > Edit Channel

Removing Registered Channels

Remove registered channels from the index.

1. Select the channels you want to remove. Unselect channels by choosing them again. To select all the channels, select Options and then select Select All from the list.
2. Once you have made your selection, select Delete from the left of the screen to remove the selected channels.

Adding Back Removed Channels

Availability depends on the specific area.

You restore channels to the index of channels by adding them back. Removed channels are displayed in gray in the All list only. In addition, the Add option is only available for removed channels.

1. Select Options to display a list of options. Select Category from the list, and then select All.
2. From the All list, select the channels you wish to restore. Unselect channels by choosing them again. To select all the channels, select Options and then select Select All from the list.
3. Once you have made your selection, select Add to restore the channels.
Editing Registered Channels

MENU > Broadcasting > Edit Channel
Select Options at the bottom left of the screen to access the following options. The available options may vary depending on the broadcast signal.

- **Select All**
  Selects all channels displayed the Edit Channel screen.

- **Antenna**
  Choose Air or Cable as the DTV mode.

  📝Availability depends on the specific area.

- **Sorting**
  (Digital channels only)
  Change the list ordered by Channel Name or Number.

  📝Availability depends on the specific area.

- **Category**
  Channels stored in the TV are grouped into the following categories: All and Added Ch.

- **Edit Favorites**
  Designate favorite channels. For more information, refer to "Creating a Personal Favorites List".

- **Rename Channel**
  Rename analog channels. The new name can be up to 5 characters long.

- **Channel Info**
  (Digital channels only)
  Check the information of the channel.

  📝Availability depends on the specific area.

- **Information**
  View detailed information about the current program.
**Program Rating Lock**

**MENU > Broadcasting > Program Rating Lock**

The Program Rating Lock blocks programs with ratings higher than those desired. This is useful for controlling what children watch on TV. This will not function for programs originating from external sources, such as DVD players or USB files.

This PIN is required to watch a blocked program.

The Program Rating Lock is available only in TV mode.

**Enabling/Disabling Password Protection on Channels**

**MENU > Broadcasting > Edit Channel**

Availability depends on the area.

You can lock channels you don’t want your children to view.

To enable password protection, set Channel Lock to On. First, navigate to Broadcasting > Channel Lock and set it to On.

**Locking/ Unlocking Channels**

Select channels from the Edit Channel screen and then select Lock or Unlock at the bottom of the screen. When the password entry window appears, enter the password. This locks or unlocks the selected channels.
Creating a Personal Favorites List

You can designate frequently watched channels as favorite channels. Favorite channels are highlighted in the Edit Channel and Channel List screens with the ❤ symbol. You can create up to 5 favorite channel lists.

Registering Channels as a Favorites

Registering the Current Channel as a Favorites

Add the current channel to a Favorites list.

1. While watching a TV channel, press the TOOLS button. Select Edit Favorites from the list.

2. From the pop-up window, select all the Favorites lists you want to add the current channel to and then select OK.

3. This adds the current channel to the selected Favorites list(s). Select OK.
Registering Multiple Channels as Favorites

It’s possible to register multiple channels as favorites at the same time.

1. Select Broadcasting > Edit Favorites.

2. Select the channels from the list in the middle of the screen.

3. Select Change Fav, and then change the Favorites list on the right side of the screen to the Favorites list you want to use.

4. Select Add on the screen. The TV adds the channels you selected to the Favorites list you chose.

Viewing Favorites List Channels Only

It’s possible to flip through Favorites list channels using only the channel up/down buttons.

A Favorites list can only be selected if it contains at least one favorite channel.

1. Run Channel List. (Broadcasting > Channel List).

2. Press the ▶ button to select Favorites 1 through Favorites 5.

3. Choose a channel from the selected Favorites list. This changes the channels and Channel List changes to the selected Favorites channel.
Editing a Favorites List

MENU > Broadcasting > Edit Favorites
You can rename and edit Favorites lists.

Edit Favorites Screen Menu Items

Select Options on the Edit Favorites screen to access the following options:

- **Copy to Favorites**
  Copy channels from one favorite channels list to another. Refer to the "Copying a Favorites List to a Different Favorites List" section for more information.

  You can use Copy to Favorites only if you have registered one or more channels to at least one Favorites list.

- **Rename Favorites**
  Rename an existing favorite channels list. Refer to the "Renaming a Favorites List" section for more information.

  You can use Rename only if you have registered one or more channels to at least one Favorites list.

- **Antenna**
  Choose between Air and Cable.

- **Sorting**
  Availability depends on the specific area.
  (Digital channels only)
  Change the list ordered by Channel Name or Number.

- **Edit Channel**
  Lets you manage the channels saved on the TV. For more information, refer to "Registering, Removing, and Editing Channels".

- **Information**
  View detailed information about the current program.
Removing Registered Channels from a Favorites List

Remove channels from the favorites list,

1. Select **Change Fav.** at the bottom of the screen and then change the Favorites list to the Favorites list you want to use.
2. Select the channels you want to remove from the selected Favorites list.
3. Select **Delete.**

Rearranging a Favorites List

Rearrange the order of the channels in a Favorites Channels List,

1. Select **Change Fav.** at the bottom of the screen and then change the Favorites list to the Favorites list you want to use.
2. From the selected Favorites list, select the channels you want to rearrange.
3. Select **Change order** from the bottom of the screen and then rearrange the selected channels.
   Press enter to finish.
Renaming a Favorites List

Rename an existing favorites channels list.

1. Select Change Fav, at the bottom of the screen and then change the Favorites list to the Favorites list you want to use.

2. From the selected Favorites list, select the channels you want to rename.

3. Select Options. A list appears.

4. Select Rename Favorites from the list, A pop-up window appears. Rename the list in the pop-up window. The new name can be up to 20 characters long.

Copying a Favorites List to a Different Favorites List

Copy channels from one favorites channels list to another.

1. Select Change Fav, and then change the Favorites list on the side of the screen to the Favorites list you want to use.

2. From the Favorites list displayed on the side of the screen, select all the channels you want to copy.

3. Select Options. A list appears.

4. Select Copy to Favorites from the list. A pop-up window appears.

5. From the pop-up window that appears on the screen, select the Favorites lists you want to copy the selected channels to. This copies the selected channels to the selected Favorites lists.

FYI Copy to Favorites is only available when there are channels in the Favorites list.
Watching a Sports Game Realistically (Soccer Mode)

MENU > System > Soccer Mode > Soccer Mode
Go to System > Soccer Mode and then set Soccer Mode to On. The picture and sound modes of the TV are automatically optimized for sports events.

- Enabling Soccer Mode changes the Picture Mode to Stadium and the Sound Mode to Stadium, and disables some Picture and Sound menus.

- Press the TOOLS button to turn Soccer Mode on or off.

TV-Viewing Support Features

Showing Subtitle

Availability depends on the specific area.

System > Accessibility > Subtitle

This function is only available for digital channels.

Show subtitles. Subtitles will be displayed when you choose a broadcast that supports subtitles. Switches subtitles On or Off.

- DVD subtitles are only available if the DVD player is connected to an external input connector.

  - Subtitle Mode
    Sets the subtitle mode.

  - Subtitle Language
    Sets the subtitle language.

  The TV cannot control or modify DVD or Blu-ray subtitles. To control DVD or Blu-ray subtitles, use the sub-title feature of the DVD or Blu-ray player and the player’s remote control.

Subtitle Options

System > Accessibility > Subtitle

Select a subtitle mode. The list of modes may vary depending on the broadcast.

- Primary Subtitle
  Set the primary subtitle language.

- Secondary Subtitle
  Set the secondary subtitle language.
Showing Captions

Availability depends on the specific area.

MENU > System > Accessibility > Caption Try Now

You can watch TV broadcasts with captions.

Even if enabled, captions will not be displayed by programs that do not support captions.

Enabling Captions Try Now

Select System > Accessibility > Caption > Caption

The TV cannot control or modify DVD or Blu-ray subtitles. To control DVD or Blu-ray subtitles, use the subtitle feature of the DVD or Blu-ray player and the player’s remote control.

Selecting the Caption Mode Try Now

Select System > Accessibility > Caption > Caption Mode to display a list of subtitle modes. Select a subtitle mode. The list of modes may vary depending on the broadcast.

- Default / CC1 ~ CC4 / Text1 ~ Text4

   (Analog channels only) The analog caption function operates in either analog TV channel mode or when a signal is supplied from an external device to the TV. (Depending on the broadcasting signal, the analog caption function may or may not work with digital channels.)
PIP Broadcast Viewing

MENU > Picture > PIP Try Now

Use the PIP ("Picture-In-Picture") function to watch TV in a small window while also watching content from a DVD player, Blu-ray player, computer, or a different external device in the background.

Select Picture > PIP to display the PIP settings screen. The PIP settings screen contains the following options:

- **PIP**
  - Activates/deactivates PIP.

- **Antenna**
  - Choose Air or Cable as the digital channel method.

- **Channel**
  - Select the PIP sub-picture channel.

- **Size**
  - Select the PIP sub-picture size.

- **Position**
  - Select the PIP sub-picture position.

- **Sound Select**
  - Select the audio source.

Choose a broadcast.

- You cannot use PIP while using Smart Hub or the 3D function. (Corresponding for countries or models supporting 3D.)
- Turning off the TV automatically disables PIP.
- Playing a game or using the karaoke feature on the main screen can result in lower PIP picture quality.
- For PIP to work, the main screen's source must be Component or HDMI and the input resolution must be less Full HD (FHD - 1080p). The subscreen supports digital channels only.
Scanning for Available Channels (Auto)

Availability depends on the specific area.

**MENU > Broadcasting > Auto Program or Auto Tuning**
Automatically scans and indexes all channels received through the TV’s antenna input connector.

- Do not use this function if your TV is connected to a cable or satellite box.
- If the TV has saved channels, Auto Program or Auto Tuning deletes the existing list, and then saves the newly scanned channels.

1. Select **Broadcasting > Auto Program or Auto Tuning**.
2. Select **Start** when prompted. This initiates the Auto Program or Auto Tuning function. The process can take up to 30 minutes to complete.

Storing for available digital channel (Manual)

Availability depends on the specific area.

**MENU > Broadcasting > Channel Settings > Digital Manual Tuning**
Scans for a digital channel manually and stores in the TV. This function is available only when the **Antenna** is set to **Air**.

- If a channel is locked using the **Channel Lock** function, the PIN input window appears.

1. Select the **New**, and then input the desired digital channel information.
2. Select the **Search**. When scanning has finished, a channels is updated in the channel list.

Selecting the Broadcast Audio Options

**MENU > Broadcasting > Audio Options [Try Now]**
Configure the program’s audio language. Audio Options functions differently for analog and digital channels.

- Press the **INFO** button to view the current broadcast’s audio signal information.

Digital Broadcast Audio Options

- **Audio Language [Try Now]**
  Select **Audio Options > Audio Language** and then choose a language. Digital broadcasts contain audio signals in multiple languages. Digital programs that include the language you selected in **Audio Language** are automatically played using that language. If the language you selected is not supported by the broadcast signal, the TV will use the default audio language broadcast by the TV station.

- **Audio Format**
  Availability depends on the specific area.
  Select **Audio Options > Audio Format**. Select the audio format of current broadcasting. The available items may differ depending on the broadcasting status.
Analog Broadcast Audio Options

- **Multi-Track Sound**

  Select Audio Options > Multi-Track Sound. Configure the audio for the current broadcast. Multi-Track Sound can be set to mono or stereo, depending on the broadcast signal or program. However, this option is automatically set to mono if the broadcast signal or program does not support stereo.

  - Press the **INFO** button to view the current broadcast’s audio signal information.
  - While watching TV, press the **TOOLS** button, and then select Multi-Track Sound.

Fine-Tuning the Screen

**MENU > Broadcasting > Channel Settings > Fine Tune**

Available for analog broadcasts only.

Analog pictures can become shaky and full of noise. If this happens, you can fine-tune the signal and/or reduce noise to clear up the picture.

1. Select Broadcasting > Channel Settings > Fine Tune. An adjustment bar appears on the screen.
2. Press the ◀ or ▶ button to make adjustments. Select Save or Close to apply the new setting. Select Reset to reset the Fine-Tune operation.

Color System

Available for analog broadcasts only.

**MENU > Broadcasting > Channel Settings > Color System**

Normally the TV can receive image and sound with good quality when in the mode auto. This mode detects the signal color system automatically. In case of some signal reception with color unsatisfactory, select the Color System mode to PAL-M, PAL-N or NTSC.
Changing the Picture Mode and Adjusting the Picture Quality

Choosing the Right Picture Mode for the Viewing Environment

MENU > Picture > Picture Mode

The following picture modes utilize different contrast and brightness settings to provide the best viewing experience for the environment.

Navigate to Edit Name, if you use the PC setting for PC or DVI PC, you can only available Standard and Entertain.

- **Dynamic**
  If the ambient lighting is too bright and makes the screen blurry, use this mode to make the picture clearer.

- **Standard**
  This is the default mode suitable for most environments.

- **Natural**
  This mode is useful for reducing eye strain.

  Availability depends on the specific model.

- **Movie**
  Appropriate for darkened rooms, for watching movies, and when experiencing eye fatigue. Darkens the screen and reduces glare.

- **Entertain**
  Sharpens images for a more dynamic viewing experience.

  This mode is only available when you use a PC setting for PC or DVI PC on Edit Name.
Adjusting the Picture Quality for Each Picture Mode

**MENU > Picture**

Select one of the settings below from the **Picture** menu to display the slide bar for the selected setting. Adjust the value by pressing the ⇐ or ⇒ arrow button on your remote. Choose a different setting by pressing the ▲ or ▼ button. Adjusted values are applied to the current source and picture mode.

*The Color and Tint (G/R) settings cannot be adjusted when the TV is connected to a computer via an HDMI to DVI cable.*

Choose a **Picture Mode** - Dynamic, Standard, Natural, Movie - and then adjust the settings.

- **Backlight**
  - Adjusts the brightness of individual pixels. Decreasing the brightness reduces power consumption.

- **Contrast**
  - Adjusts the screen contrast.

- **Brightness**
  - Adjusts the overall brightness.

- **Sharpness**
  - Sharpens or dulls the edges of objects.

- **Color**
  - Adjusts the overall color saturation.

- **Tint (G/R)**
  - Adjusts the ratio of green to red. Increase the green value to saturate the greens and the red value to saturate the reds.

*Adjusted values are saved by the TV for the current source and picture mode, and remain in effect each time the source and picture mode is selected. Consequently, the TV can have different picture settings for each external source.*

Applying the Current Picture Settings to Other Input Sources

**MENU > Picture > Apply Picture Mode**

You can apply the picture quality setting that you configured for the TV to all external devices connected to the TV or to the current source only.

To apply the setting to all external devices connected to the TV, select **All Sources**. To apply the setting to the current input only, select **Current Source**.
Fine-Tuning Each Picture Mode (Advanced Settings)

MENU > Picture > Advanced Settings

Select Picture > Advanced Settings to fine-tune how images are displayed on the TV screen for each Picture Mode.

- **Advanced Settings** is only available when the Picture Mode is set to Standard or Movie.

- When the TV is connected to a computer via an HDMI-DVI cable, only **White Balance** and **Gamma** can be adjusted.

Choose a Picture Mode and then adjust the settings.

- **Dynamic Contrast**
  - Automatically adjusts the screen contrast. Use this option to achieve the optimal contrast setting.

- **Black Tone**
  - Adjusts the black color depth.

- **Flesh Tone**
  - Darkens or lightens skin tones.

- **RGB Only Mode**
  - Adjusts the red, green, and blue levels individually.

- **Color Space**
  - Adjusts the range of colors (the color space) that the TV can display. **Auto** automatically adjusts the color space depending on the input signal. **Native** applies a range that is wider than the input signal. **Custom** allows you to adjust the color space manually.

- The availability of **Custom** depends on the specific model.
• **White Balance**
  
  For the LED 4, 5 series models
  
  You can adjust the color temperature of the picture to make white objects look white, and the overall picture appear natural. You can adjust each of the 3 color’s luminosity with the offset menu and the brightness with the gain menu. To restore the default values, select Reset.

  For the LED 6 series models
  
  You can adjust the color temperature of the picture to make white objects look white, and the overall picture appear natural.

  **2 Point**: Lets you adjust red, green, and blue luminosity with the offset menu and brightness with the gain menu. To restore the default values, select *Reset*.

  **10 Point**: Divides red, green, and blue into 10 sections each, and lets you modify the white balance by adjusting the brightness of each section. Select the section to adjust in the *Level* field.

  You can use the **10 Point** function only when the *Picture Mode* is set to *Movie*. Some external devices may not support the function.

• **Gamma**
  
  Adjusts the primary color intensity.

• **Motion Lighting**
  
  Adjusts the brightness in response to on-screen movements to reduce power consumption.

  This feature is only available when the *Picture Mode* is set to *Standard* and is not available in 3D mode. (Corresponding for countries or models supporting 3D.)

  Adjusting the **Contrast**, **Brightness**, and other picture quality settings deactivates **Motion Lighting**.
Select Picture > Picture Options to make additional adjustments for an easier viewing experience.

When the TV is connected to a computer via an HDMI-DVI cable, only Color Tone can be adjusted.

Choose a Picture Mode and then adjust the settings.

- **Color Tone**
  
  Adjusts the color tone. The setting is applied on an individual Picture Mode basis. When you select a new Picture Mode, the TV applies the Color Tone you selected for that mode automatically.

  - If the Picture Mode is set to Dynamic, you will only be able to choose Cool or Standard.

- **Digital Clean View**
  
  Reduces static and ghosting caused by a weak signal. Selecting Auto Visualization displays the signal strength at the screen. Green indicates the best possible signal.

  - Available by analog channels only.

- **MPEG Noise Filter**
  
  Reduces MPEG noise and improves video quality.

- **HDMI Black Level**
  
  Some external devices connected to the TV via an HDMI cable can have issues such as low black level, low contrast, and dull colors. Use HDMI Black Level to adjust the black level to compensate.

  - HDMI Black Level is only available when you are viewing content from an external device connected to the TV via an HDMI connection.

- **Film Mode**
  
  Optimizes the picture quality for movies. Select this mode for watching movies.

  - This feature is only available when you are watching a TV broadcast or when the input signal is AV, Component (480i, 1080i), or HDMI (1080i).

- **Auto Motion Plus**
  
  Availability depends on the specific model.

  Removes blurring and judder from scenes with rapid movement. If you select Custom, you can configure Blur Reduction and Judder Reduction manually and set LED Clear Motion on for a sharper LED image.

  - If you have Auto Motion Plus on, and then bring up the INFO screen, the INFO screen displays the resolution and frequency of the incoming video signal (60Hz). This frequency is not the same as the frequency of the picture the TV is displaying when Auto Motion Plus is on.

- **LED Clear Motion**
  
  Availability depends on the specific model.

  Removes drag from fast scenes with a lot of movement to provide a clear picture.
Viewing in 3D

Availability depends on the specific model.

**MENU > Picture > 3D**

The 3D option lets you view 3D media content and broadcasts. You will need to wear Samsung 3D Active Glasses to play 3D content. IR-type Samsung 3D Active Glasses and third-party 3D glasses are not supported.

Carefully read the health and safety information concerning 3D viewing before viewing 3D content. Refer to the "3D Precautions" section for more information.

Whether 3D video is displayed in true HD is usually determined by the quality of the content.

Starting 3D

1. Play 3D content or turn on a channel that’s showing a 3D broadcast.
2. Put on the Samsung 3D glasses, and then set the **3D Mode** you want to view from **Picture > 3D** menu. The 3D viewing is enabled.

The ideal viewing distance is three times the height of the screen or more. 3D images may not appear if you do not adhere to the recommended viewing angle or distance.

The 3D feature may not work properly if there is another 3D product or an electronic device running nearby. If there is a problem, keep other electronic devices as far away as possible from the 3D Active Glasses.

The left and right 3D images may initially overlap when the TV is turned on. It takes a moment for the display to optimize and the overlapping to go away.

There are several restrictions when using 3D TV:

- Launching Smart Hub automatically disables 3D mode,
- **PIP** cannot be used,
- Certain **Picture** options are disabled,
Changing the 3D Mode

MENU > Picture > 3D > 3D Mode

1. Launch 3D and then select 3D Mode under Picture > 3D.

2. Choose from the 3D modes that appear on the screen. The supported 3D Modes may vary depending on the 3D content.

   3D Mode is automatically configured for most 3D content.

The following 3D Modes are available. However, mode availability may vary depending on the 3D content’s format.

   The supported resolutions vary for each mode. Refer to the "Supported Resolutions for 3D Modes" section for more information.

- (Off)
  Deactivates 3D viewing.

- (Normal)
  Converts normal images to 3D images.

  Some formats do not support this mode.

- (L/R)
  Splits a single image into left and right overlapping images to create the 3D effect.

- (T/B)
  Splits a single image into top and bottom overlapping images to create the 3D effect.
Adjusting the 3D Effect

**MENU > Picture > 3D**

Configure the viewpoint, depth, and other 3D settings for a custom viewing experience.

- **Adjusting the 3D Viewpoint**
  
  Select **Picture > 3D > 3D Perspective**. Use the adjustment bar shown on the screen to adjust the viewpoint.

- **Adjusting the 3D Depth**
  
  Select **Picture > 3D > Depth**. Use the adjustment bar shown on the screen to adjust the depth.

  This option cannot be used if 3D mode is set to **L/R** or **T/B**.

- **Reversing the Left/Right 3D Images**
  
  Select **Picture > 3D > L/R Change**. This option is used to reverse the left and right images.

- **Displaying 3D Content in 2D**
  
  Select **Picture > 3D > 3D → 2D**. This option is used to enable 2D viewing of 3D content.

  This function is not available if 3D mode is set to **Normal** or **Off**.
Picture Support Functions

**PIP Broadcast Viewing**

**MENU > Picture > PIP**

Watch video from an external device such as a Blu-ray player on the main screen while viewing a TV broadcast in a picture-in-picture window.

Select **Picture > PIP** to display the PIP settings window. The PIP settings window contains the following options:

- **PIP**
  
  Activates/deactivates PIP.

- **Antenna**
  
  Choose **Air** or **Cable** as the input source for the PIP sub-picture window.

- **Channel**
  
  Selects the PIP sub-picture channel.

- **Size**
  
  Selects the PIP sub-picture size.

- **Position**
  
  Selects the PIP sub-picture position.

- **Sound Select**
  
  Selects the audio source.

Choose a broadcast.

- PIP cannot be used while **Smart Hub** or **3D** is active. (Corresponding for countries or models supporting 3D.)
- Turning off the TV automatically disables PIP.
- Playing a game or using the karaoke feature on the main screen can result in a lower PIP picture quality.
- For PIP to work, the main screen’s source must be Component or HDMI and the input resolution must be less than FHD (Full HD). The subscreen supports digital channels only.
Changing the Picture Size and Position

Choosing the Right Screen Size

Most TV programs and videos are displayed in full screen, but some programs and videos are displayed in sizes that are larger or smaller. You can change the screen size for such programs and videos so that the picture fits the screen better.

- **16:9**
  Set the picture to the 16:9 wide-screen format.

- **Zoom1**
  Magnify 16:9 pictures vertically. A magnified picture can be moved up and down.

- **Zoom2**
  Magnify Zoom1 picture even more. A magnified picture can be moved up and down.

- **Wide Fit**
  Enlarge the aspect ratio of the picture so it fits the entire screen. Enjoy 4:3 images as undistorted 16:9 images.

- **Wide Zoom**
  Magnifies the picture size more than 4:3. A magnified picture can be moved up and down.

- **Zoom**
  Magnifies the 16:9 wide pictures vertically to fit the screen size. A magnified picture can be moved up and down.

- **4:3**
  Sets the picture to basic 4:3 mode.

- **Screen Fit**
  Displays the full image without any cutoff.

- **Smart View 1**
  Reduces a 16:9 picture by 50%.

- **Smart View 2**
  Reduces a 16:9 picture by 25%.

Supported screen sizes vary depending on the input signal. Refer to the "Picture Sizes and Input Signals" section for more information about supported screen sizes.

Availability depends on the specific area.
Adjusting the Screen Position

**MENU > Picture > Picture Size > Position**

Adjusts the screen position.

This option is only available with **Picture Size** set to Zoom1, Zoom2, Wide Fit, Wide Zoom, Zoom, or Screen Fit. When the TV is tuned to a digital channel, the screen position cannot be adjusted if the **Picture Size** is set to Screen Fit.

1. To adjust the screen's position, select **Picture > Picture Size > Position**. A pop-up window appears.
2. Select **Position** again from the pop-up window.
3. Press the ▲, ▼, ◀ or ► button to move the screen. Once done, select **Position** and then **Close**. Select **Reset** to reset the screen position.

Listening to Audio Only with the Screen Turned Off (Picture Off)

**MENU > Picture > Picture Off**

Turns off the screen and plays audio through the speakers only. To turn the screen back on, press any button other than the power and volume buttons.

Resetting the Picture Mode Settings

**MENU > Picture > Reset Picture**

Use this option to reset the current **Picture Mode** to its factory settings. This does not affect the settings of other **Picture Mode**.
Changing the Sound Mode and Using Sound Effects

Choosing the Right Sound Mode for the Environment

MENU > Sound > Sound Mode Try Now

Sound modes apply preset adjustments to the sound output, optimized for different viewing and listening circumstances.

⚠ The sound modes cannot be used when you are listening to audio through external speakers.

- **Standard**
  This is the normal sound mode.

- **Music**
  This mode emphasizes normal music instead of voice.

- **Movie**
  This mode is calibrated to provide the best sound for movies.

- **Clear Voice**
  This mode emphasizes voice.

- **Amplify**
  This mode increases the overall intensity of high-frequency sounds for a better listening experience. It is designed for hearing-impaired listeners.

- **Stadium**
  This is chosen automatically when Soccer Mode is turned on under the System menu.
Using Sound Effects

MENU > Sound > Sound Effect

Use sound effects to alter how the TV projects sound.

- Sound effects can only be used with the Sound Mode set to Standard.
- The sound effects cannot be used when you are listening to audio through external speakers.

Choose a Sound Effect and then adjust the settings.

- **DTS TruSurround**
  Produces sound that will make you feel like you are sitting in a movie theater or concert hall.

- **DTS TruDialog**
  Increases voice intensity to make dialog clearer.

- **Equalizer**
  Lets you adjust the speaker balance and make bandwidth adjustments. Select Reset to reset the settings.
Sound Support Functions

Selecting Speakers

**MENU > Sound > Speaker Settings > TV Sound Output**

This lets you choose which speakers the TV uses for audio output. To listen to the audio through the speakers of a connected receiver or home theater only, select **Receiver** or **Audio Out**. To listen to audio through the TV's speakers and the speakers of a connected AV receiver or home theater simultaneously, select **TV Speaker**. If this causes an echo effect, choose any speaker option other than **TV Speaker** to mute the TV speakers, or turn off the receiver or home theater.

Using external speakers alone disables the volume button and the mute function. In addition, certain **Sound** options will are also disabled.

Designating the TV's Installation Type

**MENU > Sound > Speaker Settings > TV Installation Type**

Specify the TV's installation type. Choose between **Wall Mount** and **Stand** to optimize the TV's sound automatically.
Enabling Digital Audio Output

MENU > Sound > Additional Settings

This Smart TV is SPDIF-enabled. The Sony Philips Digital Interface (SPDIF) provides digital audio output to speakers and various digital devices, including A/V Receivers and home theaters.

- **DTV Audio Level**
  - Availability depends on the specific area.
  - (Digital channels only)
  - The TV cannot freely control the volume of the digital audio that it sends to the AV receiver. Use this to set the digital audio volume at a comfortable level.
  - According to the type of broadcast signal, MPEG / HE-AAC can be adjusted between -10dB and 0dB.
  - To increase or decrease the volume, adjust between the range 0 and -10 respectively.

- **Audio Format**
  - Availability depends on the specific area.
  - Selects the Digital Audio output (SPDIF) format. The available Digital Audio output (SPDIF) formats may vary depending on the input source.

- **Audio Delay**
  - Availability depends on the specific area.
  - This setting helps correct timing mismatches between the audio and video tracks when you are watching TV and listening to audio through a digital audio device. Enabling the feature displays a slide bar that you can use to adjust the delay by up to 250ms.

- **Dolby Digital Comp**
  - Availability depends on the specific area.
  - Some digital TV programs provide 5.1-channel Dolby audio. This TV converts Dolby audio to stereo audio so that it can play the sound through the TV’s speakers. There are two methods to choose from, **RF** is for better sound at lower volumes, and **Line** is for higher volumes.

- **Auto Volume**
  - Availability depends on the specific area.
  - Because each station has its own set of broadcasting conditions, the volume may fluctuate as the channel changes. The **Auto Volume** function automatically adjusts the volume of a channel by lowering or raising the sound output. **Normal** applies a normal level of volume adjustment, whereas **Night** applies a slightly lower volume level than **Normal** and is ideal for nighttime TV viewing. To use the volume control of a connected source device, deactivate the **Auto Volume** function. When using the **Auto Volume** function with a source device, the device’s volume control may not function properly.
Listening to 3D Audio in 3D Mode

Availability depends on the specific model.

MENU > Sound > 3D Audio

3D audio technology provides immersive sound that matches the pop-up effect of 3D video by using perspective in the audio depth control.

Only available in 3D mode.

Resetting All Sound Settings

MENU > Sound > Reset Sound

Try Now

Use to reset all sound settings to the factory defaults.
Setting the Time and Using the Timer

Setting the Current Time

Availability depends on the specific area.

**MENU > System > Time > Clock or Clock Set**

Set the clock manually or automatically. Once the clock has been set, you can select the virtual remote panel’s **INFO** to check the current time.

The clock must be reset every time the power is disconnected.

Setting the Clock using Digital Broadcast Info

Availability depends on the area supported digital channels.

**MENU > System > Time > Clock > Clock Mode**

The TV automatically downloads the correct time from a digital channel. To enable this option, the TV’s Antenna jack must be connected to either an antenna or a cable output and must be receiving digital broadcasts. The accuracy of the time information received may vary depending on the channel and signal. If your TV is connected to a set-top-box or satellite box using HDMI or Component connections, you must set the time manually.

1. Set the **Clock Mode** (**System > Time > Clock > Clock Mode**) to **Auto**.
2. Select the **Time Zone** (**System > Time > Clock > Time Zone**) and select your time zone.

The **Time Zone** is only available when the **Clock Mode** is set to **Auto**.
If the Clock is Wrong in Auto Mode...

Availability depends on the area supported digital channels.

**MENU > System > Time > Clock > Time Offset**

If the time set automatically is incorrect, you can offset the clock in 1-hour increments by as much as -/+ 12 hours. Select **System > Time > Clock > Time Offset** and offset the clock to the correct time.

- **Time Offset** adjusts the time through a network connections and is only available if the **Clock Mode** is set to **Auto** and the TV is connected to the Internet through a local area network.
- **Time Offset** will adjust the time if the TV fails to receive time information through normal digital broadcast signals.

**Setting the Clock Manually**

**MENU > System > Time > Clock Set or MENU > System > Time > Clock > Clock Mode**

1. Select the **Clock Mode (System > Time > Clock > Clock Mode)** to **Manual** and select the **Clock Set**.
   - When the **Country** is set to **Others** and **Digital TV System** is set to **Analog only**, you can select the **Clock Set** in the **System > Time** menu.

2. Select **Date** and enter the current date using your remote.
3. Select **Time** and enter the current time using your remote.
4. Select **Time** and enter the current time using your remote.
Using the Timers

Using the Sleep Timer

MENU > System > Time > Sleep Timer

This function automatically shuts off the TV after a preconfigured period of time. Select System > Time > Sleep Timer. You can set the timer up to 180 minutes in 30-minute increments.

Turning On the TV using On Timer

MENU > System > Time > On Timer

Set the On Timer so that the TV turns on automatically at a chosen time. You can set up three separate On Timer configurations concurrently: On Timer 1, On Timer 2, and On Timer 3. The On Timer is only available if the Clock has been set.

- **Setup**
  Select Off, Everyday, Mon~Fri, Sat~Sun, or Manual. If you select Manual, you can select the days you want the On Timer to turn on the TV by highlighting each day, and then press the button.

- **Time**
  Set the time that the TV turns on automatically. See Manual under Setting the Time for time setting instructions.

- **Volume**
  Specify the volume the TV will set itself to when it turns on.

- **Source**
  Select a signal source from the list. This is the source the TV will access when it turns on. If you want to use a USB device, that USB device must be connected to the TV before you start the On Timer set up. To play back media from an HDMI or Component source such as a DVD player, Blu-ray player, or set-top-box, you must leave the device on. It must be on and playing when the TV turns on.

- **Antenna**
  If you have set the Source to TV, select a broadcast signal source, Air or Cable.

- **Channel**
  If you have set the Source to TV, select a channel.

- **Music / Photo**
  If you have set the Source to USB, specify a USB device folder containing music files in the music field and/or a folder containing photos in the photo field. If you select a folder that contains music files and a folder that contains photo files, the TV plays the music files and displays the photos at the same time.
To select (for example) a music folder, follow these steps:

1. Select the music field. The music screen appears.

2. If you have no folders in the USB drive and all your music files are in the root directory, highlight, and then select the Select button. The USB drive is selected and the On Timer screen reappears displaying the name of the USB drive in the music field.

3. If you have folders with music on the USB drive, press the button on the standard remote. The TV displays all the folders on the drive.

4. Scroll the list of folders until the folder you want appears. Move the highlight to the Select button to the right of the folder. Press the button. The On Timer screen reappears displaying the folder name in the music field.

   - If the folder you choose has sub-folders, you can select a sub-folder in the same fashion.

5. If you want, select a photo folder in the same way. Start by selecting the photo field.

   - This feature will not function properly if the selected USB device does not contain media files or a folder has not been specified.
   - The slideshow will not start if there is only one image file on the USB device.
   - Folders with long names cannot be selected.
   - Always use different folder names for multiple USB devices.

   - Use a USB memory stick or multi-card reader. The On Timer may not work with certain battery-powered USB devices, MP3 players, or PMPs because the TV may take too long to recognize the device.

### Turning Off the TV Using the Off Timer

**MENU > System > Time > Off Timer**  

Set the Off Timer to turn the TV off automatically at a specific time. You can set up three separate Off Timer configurations concurrently: Off Timer 1, Off Timer 2, and Off Timer 3. The Off Timer is available only if the Clock has been set.

- **Setup**
  
  Select Off, Everyday, Mon~Fri, Sat~Sun, or Manual. If you select Manual, you can select the days you want the Off Timer to turn off the TV by highlighting each day, and then press the button.

- **Time**
  
  Set the time that the TV turns off automatically.
Using the Screen Burn Protection and Energy Saving Features

Preventing Screen Burn

MENU > System > Auto Protection Time

Still images can leave burned-in after-images on the screen if left on the screen for a long period of time. Use Screen Burn Protection to protect the screen. Select System > Auto Protection Time and then choose a time setting from the list. If a still image is shown on the screen for longer than the time you selected, the TV will automatically activate the Screen Burn Protection function to prevent burnt-in after-images.

Using Energy Saving Features

MENU > System > Eco Solution

Eco Solution adjusts the TV's brightness level and prevents overheating to reduce overall power consumption.

- **Energy Saving**
  Select a brightness setting from the list to reduce the TV's power consumption.

- **Eco Sensor**
  Availability depends on the specific model.

  Automatically adjusts the TV's brightness level based on the ambient light level to reduce the TV's power consumption. If the Eco Sensor has adjusted the screen's brightness level, you can manually adjust the screen's minimum brightness level by adjusting the Min. Backlight. Changing the Backlight setting while Eco Sensor is running automatically disables Eco Sensor.

- **No Signal Power Off**
  Select a time from the list. If no signal is received for the specified duration, the TV will automatically cut off the power to reduce power consumption.

- **Auto Power Off**
  If the TV remains turned on for four hours without any user input, the TV will automatically turn off to prevent overheating.
Using the e-Manual

Launching the e-Manual

MENU > Support > e-Manual

The embedded e-manual contains information about your TV’s key features.

- Alternatively, you can download a copy of the e-manual from Samsung’s website, and read it on your computer or print it out.
- Words in yellow (e.g., Picture Mode) indicate a menu item and bold words in white (e.g., Smart Hub) indicate remote control buttons.
- Arrows are used to indicate the menu path. (Example: MENU > Picture > Picture Mode)

2. Select a category from the left side of the screen. Once a selection has been made, the contents of the selected category appears on the right side of the screen.

3. Select an item from the list. This opens the e-manual on the corresponding page.

If a description doesn't fit on a single screen...

Scroll pages using one of the following methods.

- Position the focus on the page to display ✯ / ✷ on the screen and move ↑ or ↓ to scroll through the page.

Additional e-Manual Features

Loading Pages using Keywords

Select Search from the screen to bring up the search screen. Enter a search term and then select Done. Select an item from the search results to load the corresponding page.

Loading Pages from the Index Page

Select Index to bring up the index screen. Select a keyword from the list to navigate to the relevant page.
Using History to Load Previously Read Pages

Select Opened page. A list of previously read pages is shown. Select a page. The e-Manual jumps to the selected page.

Accessing the Menu from the e-Manual (Try Now)

Select Insert space. (Try Now) from the right side of a feature-description page to access the corresponding menu and try out the feature right away. If you want to read the e-Manual entry on a specific screen menu feature:

- Press the E-MANUAL button to load the corresponding e-Manual page.

 Certain menu options cannot be used.

Loading Reference Pages

Select ) (Link) from the right side of a feature-description page to access the corresponding reference page.

Updating the e-Manual to the Latest Version

You can update the e-Manual in the same way you update apps.

1. Press the button to open the First Screen, and then select the Panel icon. The Panel screen appears.

2. Go to the SAMSUNG APPS screen and the highlight the e-Manual.

3. Press and hold the button. The Tools menu appears.

4. Select Update apps from the Tools menu. A pop-up window appears.

5. Select e-Manual in the pop-up window and then select Update. To update the e-Manual to the latest version.

Configuring Auto Update

MENU > Smart Hub > Apps Settings

To update the e-manual automatically, navigate to the Smart Hub > Apps Settings menu and set the Auto Update option to On. The e-manual is updated automatically when an update becomes available.
Updating the TV’s Software

View your TV’s software version and update it if necessary.

⚠️ DO NOT turn off the TV’s power until the update is complete. The TV will turn off and on automatically after completing the software update. All video and audio settings return to the default settings after a software update.

Update now

An online upgrade downloads and installs the upgrade software directly from the Internet. Configure the TV to connect to a network and make sure it can access the Internet. Select Online.

Manual Update

Download the latest update file from the Samsung website. Decompress the file and copy it into the root directory of a flash drive. Insert the flash drive one of the TV’s USB ports to install the update.
Enabling Automatic Software Updates

From the Support > Software Update menu, set Auto Update to On. The TV can always keep to the latest software because the TV can update a software internally. It also operates when using the TV.

While updating, you may experience that the TV functions for using internet may be slower.

This option requires an Internet connection.

If you agree to the Smart Hub terms and conditions, Auto Update will be set to On. If you don’t want the TV’s software updated automatically, set Auto Update (Support > Software Update > Auto Update) to Off.

Protecting the TV from Hacking and malicious code

When the TV is connected to the Internet, it is vulnerable to hacks and malicious code. Smart Security protects the TV and storage media connected to the TV from such threats.

Navigate to System > Smart Security and set Smart Security to On.

Checking the TV and Connected Storage Media

Navigate to System > Smart Security and select Scan. This scans the TV and connected media for the presence of malicious code. If no malicious code was detected, a notification window appears on the screen.
If malicious code is detected...

If malicious code was found, the results of the scan will appear on the screen. This result window displays all malicious code found, and provides options to either quarantine the code or allow them to continue.

1. Select all malicious code to quarantine or allow.
2. Select Block or Allow. This moves the selected malicious code to the Isolated List or Allowed List.

- The Isolated List displays all blocked malicious code. You can also relocate codes from this list to the Allowed List, Try Now.
- The Allowed List displays all allowed malicious code. You can also relocate codes from this list to the Isolated List, Try Now.

Automatically Scanning when the TV is Powered On

**MENU > System > Smart Security > Settings > Auto Scan**

Navigate to System > Smart Security > Settings and then set Auto Scan to On. This automatically scans the TV and connected storage media when the TV is powered on.

Automatically Adding malicious code to the Blocked List

**MENU > System > Smart Security > Settings > Move to Isolated List automatically**

Navigate to System > Smart Security > Settings and set Move to Isolated List automatically to On. Malicious code found during the scanning process is automatically added to the Blocked List.
Using Other Functions

Adjusting the Menu Transparency

**MENU > System > Accessibility > Menu Transparency**

Navigate to **System > Accessibility** and adjust the opacity level. Adjust the menu’s transparency.

*When the **High Contrast (System > Accessibility > High Contrast)** setting is set to **On**, menu display is automatically set to opaque and you cannot change the **Menu Transparency** settings.*

White Text on Black Background (High Contrast)

**MENU > System > Accessibility > High Contrast**

Navigate to **System > Accessibility** and set **High Contrast** to **On**. This option changes major service screens to white text on black background or change the transparent TV menus to opaque so that text can be more easily read.

Expanding the Smart Hub's Focus Area

**MENU > System > Accessibility > Enlarge**

Navigate to **System > Accessibility** and set **Enlarge** to **On**. This zooms in the focused item when you use Smart Hub.

Checking Notifications

**MENU > System > Notifications**

Select **Notifications** from the **System** menu to view the list of event messages generated by the TV. **Notifications** appear on the screen when events such as an update release for an app or Samsung Account login/logout occurs.

*Select **Delete All** to delete all notifications,*

*Select **Service Notice** to check the SMART TV service notifications in a web browser,*
Changing the Menu Language

MENU > System > Menu Language

Select System > Menu Language and then choose a language from the list. Use this option to change the menu language.

Setting Up a Password

MENU > System > Change PIN

Set a PIN (Personal Identification Number) to lock channels, reset the TV, and change the TV settings.

1. Select System > Change PIN. The PIN input window appears.
2. Enter a PIN. The default PIN is 0000.
3. Enter a new PIN and then enter it again to confirm it. The PIN change is complete.

If you forget your PIN, you can reset it using your remote control. With the TV turned on, press the following buttons on the remote to reset the PIN to 0000: MUTE → + → RETURN → – → RETURN → + → RETURN. "+" is the Volume Up button, "−" is the Volume Down button.

Enabling Game Mode

MENU > System > General > Game Mode

Game Mode optimizes the TV’s settings for playing video games on a gaming console such as PlayStation™ or Xbox™.

Game Mode cannot be used for normal TV viewing.
Connect the gaming console before enabling Game Mode. Otherwise, the picture quality may suffer.
The screen may shake a little.
Enabling Game Mode automatically sets the Picture Mode to Standard and the Sound Mode to Movie.
To use a different external device, first disconnect the game console and disable Game Mode.
Enjoying Rich Colors and Superior Picture Quality (BD Wise)

Availability depends on the specific model.

**MENU > System > General > BD Wise**
Connecting a Samsung DVD player, Blu-ray player, or home theater system that supports BD Wise enables the richest colors and best possible picture quality. Enabling BD Wise automatically optimizes the TV’s resolution.

This feature is only available when the external device is connected via an HDMI cable.

Locking/Unlocking the Panel Keys

**MENU > System > General > Panel Lock**
Use to lock and unlock the TV’s front panel buttons (menu, channel, and volume). Select **System > General > Panel Lock** and lock/unlock the keys.

Showing/Hiding the Samsung Logo while Booting

**MENU > System > General > Boot Logo**
Use to enable or disable the Samsung logo display that appears when the TV starts up.

Enabling the AV Color System

Availability depends on the specific area.

**MENU > System > General > AV Color System**
Normally the TV can receive image and sound with good quality when in the mode Auto. This mode detects the signal color system automatically. In case of some signal reception with color unsatisfactory, select the **AV Color System** mode to **PAL-M**, **PAL-N** or **NTSC**.

Available only in AV mode.
Registering the TV as a DivX-Certified Device (Watching Paid DivX Movies)

To watch DivX DRM protected movies on the TV, you must register the TV as a DivX certified device.

- DRM stands for Digital Rights Management and is a technical security mechanism to protect the copyright of the content provider.
- You can watch movies that you have recorded or free DivX movies without registration.
- Visit the DivX website (http://www.divx.com) and log into your user account before registering the TV as a DivX-certified device. If you do not have an account, please create one.

2. Visit the DivX website on a computer and click [Register Your Device] under [Support] from the top menu.

3. Enter the registration code shown on the TV’s screen in the [Enter your registration code] field.

4. Enter the TV’s name in the [Name your device] field and then click [NEXT].

5. Click [DOWNLOAD] and save the [device_name.divx] file.

6. Transfer the [device_name.divx] file from the computer onto a USB device and then plug the USB device into the TV.

7. Play the [device_name.divx] file on the TV to register the TV as a DivX-certified device.
Restoring the TV to the Factory Settings

This option restores all TV settings (excluding the Internet) to the factory defaults.

2. Enter the Security PIN and then select Yes. All settings are then reset. The TV turns off and on again automatically, and then displays the Setup screen.

For more information on Setup, refer to the user manual that came with the TV.

Turning the TV into a Display Model (exclusively for retail stores)

Select Support > Use Mode > Store Demo. This turns the TV into a display model for use in a retail environment.

For all other uses, select Home Use.

Store Demo should be used in retail environments only. With Store Demo, certain functions are disabled and the TV automatically resets itself after a certain amount of time.
Getting Support

The TV has several built-in systems designed for user and TV system support.

Support through Remote Management

MENU > Support > Remote Management (Try Now)

If you need assistance with your TV, you can use this feature to let Samsung Electronics diagnose your TV remotely. You will need to read and agree to the service agreement before using this feature. A Samsung Electronics technician will then diagnose, repair, and update your TV remotely. These features are only available when your TV is connected to the Internet.

What Does Remote Service Do?

Samsung Remote Support service offers you one-on-one support with a Samsung Technician who can remotely:

- **Diagnose** your TV
- **Adjust the TV settings** for you
- **Perform a factory reset** your TV
- **Install recommended firmware updates**
How Does it Work?

Having a Samsung Tech remotely service your TV is easy.

Call the Samsung Contact Center and ask for remote support.

Open the menu on your TV and go to the Support section.

Select Remote Management, and then read and agree to the service agreements. When the PIN screen appears, provide the PIN number to the agent.

The agent accesses your TV.

Finding the Information You Need for Service

MENU > Support > Contact Samsung Try Now

Use this option to display the address of the Samsung website, the call center phone number, your TV’s model number, your TV’s software version, the Smart Hub info, and other information you need to get service support from a Samsung call agent or the Samsung website.
There is a problem with the picture.

Testing the Picture

Before you review the list of problems and solutions below, use Picture Test to determine if the problem is caused by the TV. The Picture Test displays a high definition picture you can examine for flaws or faults. If the test picture does not appear or there is noise or distortion, the TV may have a problem. Contact Samsung’s Call Center for assistance. If the test picture is displayed properly, there may be a problem with an external device. Please check the connections. If the problem persists, check the signal strength or refer to the external device’s user manual.

<table>
<thead>
<tr>
<th>The Problem</th>
<th>Try this!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flickering and Dimming</td>
<td>If your Samsung Television is flickering or dimming sporadically, you may need to disable some of the energy efficiency features. Disable Energy Saving (System &gt; Eco Solution &gt; Energy Saving) or Eco Sensor (System &gt; Eco Solution &gt; Eco Sensor).</td>
</tr>
</tbody>
</table>
| Component Connections/Screen Color   | If the color on your Samsung television screen is not correct or the black and white colors are off, run Picture Test (Support > Self Diagnosis > Picture Test). If the test results indicate that the problem is not caused by the TV, do the following:  
  - Confirm that the TV’s video input connectors are connected to the correct external device video output connectors.  
  - Check the other connections as well. If the TV is connected to an external device via a component cable, confirm that the Pb, Pr, and Y jacks are plugged into their proper connectors. |
| Screen Brightness                    | If the colors on your Samsung TV are correct but just a little too dark or bright, try adjusting the following settings first.  
  - Go to the Picture menu and adjust the Backlight, Contrast, Brightness, Sharpness, Color, and Tint (G/R) settings. |
| Auto Motion Plus/Blur                | If you notice ghosting or blurring on the screen, use the Auto Motion Plus option (Picture > Picture Options > Auto Motion Plus) to resolve the issue.  
  📺 Availability depends on the specific model. |
<p>| Unwanted Powering Off                | If your Samsung TV appears to turn off by itself, try disabling some of the TV’s energy efficiency features. See if Sleep Timer (System &gt; Time &gt; Sleep Timer) has been enabled. The Sleep Timer automatically turns the TV off after a specified period of time. If the Sleep Timer has not been enabled, see if No Signal Power Off (System &gt; Eco Solution &gt; No Signal Power Off) or Auto Power Off (System &gt; Eco Solution &gt; Auto Power Off) has been enabled and disable them. |</p>
<table>
<thead>

<tbody>
<tr>
<td>Problems Powering On</td>
<td>When the TV is turned on, the remote control receiver flashes 5 times before the screen turns on. If you are having problems powering on your Samsung television, there are a number of things to check before calling the service department. Confirm that the TV’s power cord is connected correctly at both ends and that the remote control is operating normally. Make sure that the antenna cable or cable TV cable is firmly connected. If you have a cable/satellite box confirm that it is plugged in and turned on.</td>
</tr>
<tr>
<td>Unable to find a Channel</td>
<td>If your TV is not connected to a cable box or satellite box, run Setup (System &gt; Setup) or Auto Program / Auto Tuning (Broadcasting &gt; Auto Program / Auto Tuning).</td>
</tr>
</tbody>
</table>
| The TV image does not look as good as it did in the store. | Store displays are all tuned to digital, HD (high definition) channels. If you have an analog cable/set top box, upgrade to a digital set top box. Use HDMI or Component cables to deliver HD (high definition) picture quality. Many HD channels are upscaled from SD (Standard Definition) content. Look for a channel that is broadcasting true HD content.  
  - Cable/Satellite Subscribers: Try HD channels from the channel lineup.  
  - Air/Cable Antenna Connection: Try HD channels after running the Auto Program function.  
  Adjust the cable/satellite box’s video output resolution to 1080i or 720p. |
| The picture is distorted.        | The compression of video content may cause picture distortions, especially in fast moving pictures from sports programs and action movies. A weak or bad quality signal can cause picture distortions. This is not an issue with the TV. Mobile phones used close to the TV (within 3 ft/1m) may cause noise in analog and digital channels. |
| The color is wrong or missing.   | If you’re using a Component connection, make sure that the Component cables are connected to the correct jacks. Incorrect or loose connections may cause color problems or a blank screen. |
| The color is poor or the picture is not bright enough. | Go to the Picture menu and then adjust the Picture Mode, Brightness, Sharpness, and Color settings.  
See if Energy Saving (System > Eco Solution > Energy Saving) has been enabled.  
Try resetting the picture. (Picture > Reset Picture) |
| There is a dotted line on the edge of the screen. | If the Picture Size has been set to Screen Fit, change the setting to 16:9. Change the cable/satellite box resolution. |
| The picture is black and white.  | If you are using AV composite input, connect the video cable (yellow) to the TV’s green component jack. |
I can't hear the sound clearly.

Testing the Sound

Before you review the list of problems and solutions below, make sure that the **TV Sound Output** menu item is set to **TV Speaker**, and then listen to the speakers again. If the TV still does not play audio, run the **Sound Test**. The **Sound Test** uses a built-in melody to check for sound problems. If the TV does not play sound during the Sound Test, or the sound is distorted, there may be a problem with the TV. Contact Samsung’s Call Center for assistance. If the TV plays the Sound Test melody without distortion, there may be a problem with an external device. Please check the connections. If the problem persists, refer to the external device’s user manual.

I can't see 3D images clearly.

Testing 3D Picture Quality

Availability depends on the specific model.

MENU > Support > Self Diagnosis > 3D Picture Test

To test 3D picture quality, you must be wearing 3D glasses and the glasses and the TV must be paired.

To test 3D picture quality, the TV and the 3D glasses must have been paired. Put on the 3D glasses, navigate to Support > Self Diagnosis and select 3D Picture Test. The 3D Picture Test displays a high definition picture to examine the 3D screen for flaws or faults. If the test fails to identify a problem, there may be a problem with an external device or the signal strength.

If the test picture does not appear or there is noise or distortion, the TV may have a problem. Contact Samsung’s Call Center for assistance.

If the test picture is displayed properly, there may be a problem with the external device. Please check the connections. If the problem persists, check the signal strength or refer to the external device’s user manual.

<tr>
<td>The TV is making a humming noise.</td>
<td>Your TV utilizes high-speed switching circuits and high levels of electrical current. Depending on the TV’s brightness level, the TV may seem slightly noisier than a conventional TV. Your TV has undergone strict quality control procedures that meet our demanding performance and reliability requirements. Some noise coming from the TV is considered normal and is not an acceptable cause for an exchange or refund.</td>
<td></td>
</tr>
</tbody>
</table>
Read Before Using 3D Viewing Mode

Availability depends on the specific model.

3D Precautions

⚠️ Warning

- When viewing a 3D video under a fluorescent lamp (50 Hz - 60 Hz) or 3-wavelength lamp, you may notice a small amount of screen flickering.
  - If this occurs, dim or turn off the light.
- Switching the input mode while watching a 3D movie may disable the 3D function on the TV.
  - As a result, the 3D glasses may not function and the movie may not be displayed properly.
- Ensure you are within the working distance of the glasses when you view a 3D video.
  - The images may not be viewable in 3D if you move outside of the working distance for 3 seconds.
  - If the 3D glasses are moved outside of their working distance, the signal from the TV will disconnect and the glasses’ 3D function will turn off after several seconds. When this happens, the red LED will turn on for 3 seconds.
- If you lie on your side while watching TV with 3D active glasses, the picture may appear dark or may not be visible. The actual 3D effect may be experienced differently depending on the viewer. The 3D effect may not be visible if the visual ability of your left eye differs greatly from the visual ability of your right eye.
- If a part of the 3D glasses or lenses is defective or damaged, it cannot be repaired and the glasses should be replaced. If the glasses stop working within the warranty period, the glasses can be repaired or replaced for free. If the glasses have been damaged due to the fault of the customer or the warranty period has expired, a new pair of glasses will have to be purchased.
- The 3D glasses may not work properly due to interference from other 3D products or electronic devices that operate on the 2.4GHz frequency such as a microwave oven or Internet AP. If the 3D function malfunctions due to interference, please move all other electronic or wireless communication devices as far away from the glasses and the TV as possible.
- The vividness of the image may appear degraded if you view 3D video in a place that is exposed to direct sunlight or illumination.
- The 3D glasses may malfunction if there is an electric field or metallic object such as a steel plate nearby. Keep the glasses as far away as possible from electric fields and metallic objects.
- With SSG-3570 model glasses, the glasses may power off if you remain stationary while viewing 3D video for an extended period of time.
- With SSG-3570 model glasses, if the 3D glasses do not function immediately after you put them on when the TV is in 3D mode, take them off and then put them back on.
**Caution**

**IMPORTANT HEALTH AND SAFETY INFORMATION FOR 3D IMAGES. READ THE FOLLOWING CAUTIONS BEFORE YOU OR YOUR CHILD USE THE 3D FUNCTION.**

- Adults should frequently check on children who are using the 3D function. If there are any complaints of tired eyes, headaches, dizziness, or nausea, stop the child from viewing the 3D TV and ensure that they rest.

- Do not use the 3D glasses for other purposes such as general wear, sunglasses, protective goggles, etc.

- Some viewers may experience discomfort such as dizziness, nausea, and headaches while viewing 3D TV. If you experience any of these symptoms, stop viewing the 3D TV, remove the 3D glasses, and rest for awhile.

- Watching 3D pictures for an extended period of time may cause eye strain. If you experience any eye strain, stop viewing the 3D TV, remove the 3D glasses, and rest for awhile.

- Do not use the 3D function or 3D glasses while walking or moving around. Using the 3D function or 3D Active Glasses while moving around may result in injury from running into objects, tripping, and/or falling.

- Do not sleep with the 3D glasses on. You can damage or break the temples.

- The temples on your 3D glasses are not foldable. Forcing the temples to fold will damage the 3D glasses.

- With SSG-3570 model glasses, do not shake your 3D glasses repeatedly. Shaking the glasses will power them on and can cause the battery to discharge faster than it would normally.

- With SSG-5100GB model glasses, there is a danger of explosion if the battery is incorrectly replaced.

- With SSG-5100GB model glasses, make sure to replace the battery with the same type.
Safety Precautions

The following safety instructions are to ensure your personal safety and prevent property damage. Please read the following to ensure the proper use of the product.

- Do not place the product in a location exposed to direct sunlight, heat, fire, or water. Exposure may result in a product malfunction or fire.

- Do not apply force to the lenses of the 3D glasses. Do not drop or bend the product. Applying force, dropping, or bending may result in a 3D glasses malfunction.

- Keep the components of the 3D glasses out of reach of children. Especially, ensure children do not swallow any of the components. If your child swallows a component, consult your doctor immediately.

- When cleaning the product, do not spray water or cleaner directly onto the surface of the product. Spraying water or cleaner directly onto the glasses may result in fire or electric shock, damage to the product’s surface, or cause the indicator labels on the product’s surface to come loose.

- Do not apply chemicals containing alcohol, solvent, or surfactant such as wax, benzene, thinner, pesticide, air freshener, lubricant, or cleaner to the product. These chemicals may cause the product’s exterior to be discolored or cracked, or labels or instructions to be removed. Use only a soft cloth such as superfine fibers or cotton flannels for cleaning the product as the surface or the lenses easily crack. Because the product can be easily scratched with foreign substances, make sure to dust off the cloth before using.

- Do not disassemble, or attempt to repair or modify your 3D active glasses by yourself.

- Be careful not to let the temple ends of the 3D active glasses harm your eye.

- Do not sleep with the 3D glasses on. You can break the arms.

- Use your hands to put on or remove the 3D glasses.

- Use only the specified standard batteries. When replacing the battery, insert the battery so that its polarity (+, -) is correct. Failing to do so may damage the battery or result in fire, personal injury or environmental damage caused by liquid leaking from the battery. (applicable to the SSG-5100 only).

- Keep the used battery out of the reach of children so that they do not accidentally swallow the battery. If your child has swallowed the battery, consult your doctor immediately. (applicable to the SSG-5100 only).

- Swallowing the cylindrical (button type) battery can cause serious damage to your internal organs. If this happens, contact a doctor immediately.
Supported Resolutions for 3D Modes

These specifications apply to the 16:9 display ratio only.

HDMI

Videos/Photos

Refer to the "Read Before Playing Photo, Video, or Music Files" section.

Computer via HDMI Cable

The optimal resolution for computers connected to the TV via an HDMI cable is 1920 x 1080. If you select another resolution, the TV may not display 3D images correctly and may not be able to display the computer video in full screen.
Read Before Using Apps

- Due to the product characteristics featured on the Samsung Smart Hub, as well as limitations in available content, certain features, applications, and services may not be available on all devices or in all territories. Some Smart Hub features may also require additional peripheral devices or membership fees. Visit http://www.samsung.com for more information on specific device information and content availability. Services and content availability are subject to change without prior notice.

- Samsung Electronics takes no legal responsibility whatsoever for any interruption of app services caused by the service provider for any reason.

- Application services may be provided in English only and available content may vary depending on the area.

- For more information about applications, visit the applicable service provider’s website.

- An unstable Internet connection may cause delays or interruptions. In addition, applications may terminate automatically depending on the network environment. If this occurs, check your Internet connection and try again.

- Application services and updates may become unavailable.

- Application content is subject to change by the service provider without prior notice.

- Specific services may vary depending on the version of the application installed on the TV.

- An application’s functionality may change in future versions of the application. If this occurs, run the application's tutorial or visit the service provider’s website.

- Depending on the service provider’s policies, certain applications may not support multitasking.
Read Before Using the Web Browser

1. Select **Web Browser**. The browsing screen may differ from the one on your computer.

2. The web browser is not compatible with Java applications.

3. You cannot download files. If you attempt to download a file, you will receive an error message instead.

4. The web browser may not be able to access certain websites.

5. Playing Flash videos may be restricted.

6. E-commerce for online purchases is not supported.

7. With websites that have scrollable windows, scrolling a window can result in corrupted characters.

8. ActiveX is not supported.

9. Certain options are not accessible in Link Browsing mode. (Switch to Pointer Browsing to activate those options.)

10. Only a limited number of fonts are supported. Certain symbols and characters may not be displayed properly.

11. The response to remote commands and the resulting on-screen display may be delayed while a webpage is loading.

12. Loading a webpage may be delayed or suspended completely with certain operating systems.

13. The copy and paste operations are not supported.

14. When composing an email or a simple message, certain functions such as the font size and color selection may not be available.

15. There is a limit to the number of bookmarks and the size of the log file that can be saved.

16. The number of windows that can be opened concurrently varies depending on the search conditions and the TV model.
17. The web browsing speed will vary depending on the network environment.

18. The web browser supports .mp3 audio files only.

19. The web browser supports a specific file format for importing and exporting bookmarks.
   (Compatible Format: Netscape-bookmarkfile-1)

20. The folder tree information is not included when importing and exporting bookmarks.

21. Exporting bookmarks to a USB device connected to the TV saves the bookmarks under a folder
    named "Samsung SmartTV Bookmark".

22. If the Clock (System > Time > Clock) has not been set, the browsing history will not be saved.

23. The browsing history is saved from latest to oldest, with the oldest entries being overwritten first.

24. Depending on the types of video/audio codecs supported, it might not be possible to play certain
    video and audio files while playing Flash content.

25. Video sources from PC-optimized streaming service providers may not play properly on our
    proprietary web browser.

26. Using the on-screen QWERTY keyboard automatically disables PIP. (Except when entering a URL.)
Read Before Playing Photo, Video, or Music Files

Photo, Video, and Music File Use Limitations

- The TV supports MSC (Mass Storage Class) USB devices only. MSC is a class designation for mass storage devices. Types of MSC devices include external hard drives, flash card readers, and digital cameras. (USB hubs are not supported.) These kinds of devices must be connected directly to the TV's USB port. The TV may not be able to recognize the USB device or read the files on the device if it is connected to the TV via a USB extension cable. Do not disconnect the USB device while transferring files.

- Certain digital cameras and audio devices may not be compatible with the TV.

- A USB device that requires high power (more than 500mA or 5V) may not be supported. The TV does not support HDDs (Hard Disk Drives) connected to the USB port.

- The TV supports the FAT, exFAT, and NTFS file systems.

- After sorting files in the Folder view mode, the TV can display up to 1,000 files per folder. If the USB device contains more than 8,000 files and folders, however, some files and folders might not be accessible.

- The PTP (pier to pier) connection mode is available only for digital cameras. If you connect a smartphone or tablet to the TV using PTP mode, the TV will not recognize it.

</tbody>
</table>
Other Restrictions

- Codecs may not function properly if there is a problem with the content data.
- Video content does not play or does not play correctly if there is an error in the content or container.
- Sound or video may not work if they have standard bit rates/frame rates above the TV’s compatibility ratings.
- If the Index Table is wrong, the Seek (Jump) function does not work.
- When playing video over a network connection, the video may not play smoothly because of data transmission speeds.
- Some USB/digital camera devices may not be compatible with the player.
- HEVC codec is only available in MKV/MP4/TS containers.

Video Decoders

- Supports up to H.264, Level 4.1 (does not support FMO/ASO/RS)
- VC1 AP L4 is not supported.
- All video codecs excluding WMV v7, v8, MSMPEG4 v3, MVC, and VP6:
  - Below 1280x720: 60 frame max
  - Above 1280x720: 30 frame max
- GMC 2 or above is not supported.
- Supports SVAF Top/Bottom, Side by Side, and Left/Right view sequence type (2ES)
- Supports Blu-ray/DVD MVC specs only.

Audio Decoders

- WMA 10 Pro supports up to 5.1 channels. Supports up to the M2 profile. WMA lossless audio is not supported.
- WMA 10 pro M3 is not supported.
- QCELP and AMR NB/WB are not supported.
- Vorbis is supported for up to 2 channels.
- Dolby Digital Plus is supported for up to 5.1 channels.
- The DTS LBR codec is only available for MKV/MP4/TS containers.

*Availability depends on the specific area.*

The Picture Size setting is applied to the current source. The applied Picture Size will remain in effect whenever you select that source unless you change it.

Installing an Anti-Theft Lock

An anti-theft lock is a physical device that can be used to protect the TV against theft. Look for the lock slot on the back of the TV. The slot has a icon next to it. To use the lock, wrap the lock cable around an object that is too heavy to carry and then thread it through the TV's lock slot. The lock, is sold separately.

The method of using an anti-theft lock may differ for each TV model. Refer to the lock's user manual for more information.
Read Before Setting Up a Wireless Internet Connection

Wireless Internet Precautions

- This TV supports the IEEE 802.11a/b/g/n communication protocols. Samsung recommends using IEEE 802.11n. Video files stored on a device connected to the TV via DLNA may not play back smoothly.

- To use wireless Internet, the TV must be connected to a wireless router or modem. If the wireless router supports DHCP, the TV can use a DHCP or static IP address to connect to the wireless network.

- Select a channel that is not currently in use for the wireless router. If the channel set for the wireless router is currently being used by another device, the result is usually interference and/or a communications failure.

- Most wireless networks have an optional security system. To enable a wireless network’s security system, you need to create a security key using characters and numbers. This security key is then needed to connect to a security-enabled AP.

Wireless Security Protocols

The TV only supports the following wireless network security protocols and is unable to connect to non-certified wireless routers:

- Authentication Modes: WEP, WPAPSK, WPA2PSK
- Encryption Types: WEP, TKIP, AES

In compliance with the newest Wi-Fi certification specifications, Samsung TVs do not support WEP or TKIP security encryption in networks running in the 802.11n mode.

If the wireless router supports WPS (Wi-Fi Protected Setup), you can connect the TV to your network using PBC (Push Button Configuration) or a PIN (Personal Identification Number). WPS automatically configures the SSID and WPA key settings.
Read Before Connecting a Computer (Supported Resolutions) - For the LED 5, 6 series models

When you connect your TV to a computer, set the computer’s video card to one of the standard resolutions listed in the tables below or on the next page. The TV will automatically adjust to the resolution you choose. Note that the optimal and recommended resolution is 1920 x1080.

Choosing a resolution not included in the tables can result in a blank screen or just the power indicator turning on.

Refer to the user manual of your graphics card for compatible resolutions.

**Glossary**

- **480i/480p/720p/1080i/1080p**
  Generally refers to the number of effective scanning lines that determines the screen’s resolution. There are two scanning methods: interlaced and progressive.
  - Scanning
    Sequential projection of pixels to form images. The higher the number of pixels, the clearer and more vivid the images.
  - Progressive
    A sequential scanning method that scans every line, one after another.
  - Interlaced
    A staggered scanning method that scans every other line until the end of the screen and then fills in the remaining lines.

  **Example**) If the number of horizontal scan lines is 480i
  Scans 240 lines from start to finish and then scans the remaining 240 lines for a total of 480 lines.

  * General differences between 480i and 480p are as follows:

<table>
<thead>
<tr>
<th></th>
<th>480i</th>
<th>480p</th>
</tr>
</thead>
<tbody>
<tr>
<td>Horizontal Frequency</td>
<td>15.75Khz</td>
<td>31.5Khz</td>
</tr>
<tr>
<td>FPS</td>
<td>30</td>
<td>60</td>
</tr>
<tr>
<td>Lines on Screen</td>
<td>480</td>
<td>480</td>
</tr>
</tbody>
</table>

- **DVI (Digital Visual Interface)**
  Connecting the TV’s DVI connector to a computer’s DVI connector via an HDMI-to-DVI cable lets you use the TV as a computer monitor. However, HDMI-to-DVI cables deliver video signals only. You must connect a set of speakers to the computer using a separate cable to hear the computer’s audio.

- **HDMI (High Definition Multimedia Interface)**
  HDMI is a method of transmitting both video and audio signals via a single cable.
Dynamic versus Static IP Addresses

If the network requires a dynamic IP address, use an ADSL modem or router that supports the Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway and DNS values the TV needs to access the Internet, so they do not have to be entered manually. Most home networks use a dynamic IP address.

If the network requires a static IP address, enter the IP address, subnet mask, gateway, and DNS values manually when setting up the network connection. To get the IP address, subnet mask, gateway and DNS values, contact your Internet Service Provider (ISP).

If the network requires a static IP address, use an ADSL modem that supports DHCP. ADSL modems that support DHCP also allow static IP addresses.

Ethernet

Ethernet is a LAN (Local Area Network) that uses coaxial cables standardized by the IEEE.

Component Connection

Component connections are mostly used for game consoles and transmit the video signal by splitting it into a luminance signal (Y) and two color signals (Pb and Pr). The connector is marked as [Component IN]_(Pr, Pb, Y) on the back of the TV. On some devices, it is sometimes marked as Cr, Cb, Y. Cb and Cr are the digital conversions of the Pb and Pr signals.

The connectors are normally color-coded red (R), blue (B), and green (G) and offer the best picture quality possible for an analog connection.
