Connecting the System

1. Connecting Monitor or LCD TVs
   Digital and analog connections are available so the device can be connected to computer monitors, flat-panel displays, plasma or LCD TVs.

2. Connecting Keyboard/Mouse or USB Devices
   Connect USB devices to the USB ports.

3. Connecting LAN
   Connect the LAN port to a network.

4. Connecting Speakers and Microphones
   Connect microphones to the headphone/line-out jack.

5. Connecting Power
   Connect power to the power jack (DC-in).

6. Powering on the system
   Insert the power button to power on the system.

A. Begin Installation
   - For safety reasons, please ensure that the power cord is disconnected before opening the case.
   1. Undo one screw of the chassis cover.
   2. Slide the cover backwards and upwards.

B. Memory Module Installation
   1. Locate the SO-DIMM slot on the mainboard.
   2. Align the notch of the memory module with the one of the memory slot.
   3. Gently insert the module into the slot in a 45-degree angle.
   4. Carefully push down the memory module until it snaps into the locking mechanism.

C. HDD or SSD Installation
   1. Mount the HDD or SSD into the bracket with four screws.
   2. As shown, install the HDD or SSD in its bracket and carefully push it towards the direction as indicated by the red arrow. Then connect the drive.

D. Complete
   - Using the Vertical Stand, install the vertical stand and check that it is properly aligned, then tighten securely with one screw.

Safety Information

CAUTION
Improper installation may damage the computer. Please install the cover only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer’s instructions.

The product’s color and specifications may vary from the actually shipping product.
