- Exclusive Turbo Drive Engine technology
- Powerful DirectX 11 graphics

DirectX11 Ready

Sound by Dynaudio

TruStudio PRO

Full-Color Backlight Keyboard

Exclusive TDE Technology

Turbo Battery +

### 'Who will you become?'

Having the most powerful gear is a must when it comes to competitive gaming. That's why MSI cooperated with SteelSeries to create a **SteelSeries keyboard** with **perfect positioned keys** and **customizable Full Color Backlight** on the MSI GT780DX. MSI also implemented high quality **Dynaudio speakers** and **THX TruStudio Pro™ sound technology** to make sure the best audio experience is achieved while playing games, watching movies or listening to music. Furthermore, the exclusive **Turbo Drive Engine technology** gives an extra graphical performance boost when needed, while the **DirectX 11 graphics** in combination with an **17.3" Full-HD Non-Glare display** makes sure the in-game graphics are displayed with the highest details possible. The MSI GT780DX is simply the most advanced gaming laptop ever made. Make your choice: who will you become?
