EVOLVEO EasyPhone

Elegant mobile phone in a modern black-silver coat, with charging station

Easy control

EVOLVEO EasyPhone control was maximally simplified, large numbers and letters are perfectly readable on the color screen. Individual keys on the keypad are separated, which makes writing SMS messages and dialing phone numbers easier. On the back side of the phone, there is an SOS button, when pressed, phone will automatically start to dial preset numbers and sends emergency messages to them.

Charging station

Phone is supplied with a practical charging station, all there needs to be done is to insert the phone in it and the charging will automatically begin.

FM radio

Easy radio on/off switching is possible thanks to a dedicated button on the side of the phone. Automatic channel tuning and possibility to play radio over the quality speaker improve user comfort. It is not necessary to plug in the headphones in order to listen to the FM radio, antenna is built in the phone.

Flashlight

Handy flashlight can be switched on or off using a dedicated button on the side of the phone and it's possible to use it even when the phone is switched off.

Memory card

The phone supports playback of audio files stored on a microSDHC card. It is also possible to use those files as a ringtone, notification for a new message or an alarm sound.
