Using the INFO button (Now & Next guide)

The display identifies the current channel and the status of certain audio-video settings.

The Now & Next guide shows daily TV programme information for each channel according to the broadcasting time.

- Scroll ◀, ▶ to view information for a desired programme while watching the current channel.
- Scroll ▲, ▼ to view information for other channels. If you want to move to the currently selected channel, press the ENTER button.

- The displayed image may differ depending on the model.
Using Channel menu

MENU → Support → Contents Home → ENTER

Press the CONTENT button to select Watch TV, then select the desired menu. Each screen will be displayed.

Guide

The EPG (Electronic Programme Guide) information is provided by broadcasters. Using programme schedules provided by broadcasters, you can specify programmes you want to watch in advance so that the channel automatically changes to the selected programme channel at the specified time. Programme entries may appear blank or out of date depending on a channel status.

The displayed image may differ depending on the model.
Dani is devastated when Scott makes clear his views on marriage...

2. B Green (-24 Hours): Viewing the list of programmes to be broadcasted before 24 hours.

3. C Yellow (+24 Hours): Viewing the list of programmes to be broadcasted after 24 hours.

4. D Blue (Ch. Mode): Select the type of channels you want to display on the Channel List window. (All, TV, Radio, Data/Other, Favourites 1-5)

5. i (Information): Displays details of the selected programme.

6. ◇ (Page): Move to previous or next page.

7. ➡ (Watch / Schedule)
   - When selecting the current programme, you can watch the selected programme.
   - When selecting the future programme, you can reserve to watch the selected programme. To cancel the schedule, press the ENTER ➡ button again and select Cancel Schedules.
Schedule Manager
Cancel or set the **Timer Viewing** to display the channel you want at the intended time.

**Using Timer Viewing**
You can set a desired channel to be displayed automatically at the intended time. Set the current time first to use this function.

1. Press the ENTER button to add programme to schedule manually.
2. Press the ◀/▶/▲/▼ button to set the Antenna, Channel, Repeat, Date, Start Time.
   - **Antenna**: Select the desired broadcasting signal.
   - **Channel**: Select the desired channel.
- **Repeat**: Select **Once**, **Manual**, **Sat~Sun**, **Mon~Fri** or **Everyday** to set at your convenience. If you select **Manual**, you can set the day you want.
  - The (✓) mark indicates the day you’ve selected.
- **Date**: You can set the desired date.
  - It is available when you select **Once** in **Repeat**.
- **Start Time**: You can set the start time you want.
  - If you want to edit or cancel the schedule, select the reserved schedule on the **Schedule List**, and select the **Edit** or **Cancel Schedules**.
Channel List

You can view channel information, **All**, **TV**, **Radio**, **Data/Other**, **Analogue** or **Favourites 1-5**.

When you press the **CH LIST** button on the remote control, **Channel List** screen will be displayed at once.

- **All**: Shows all currently available channels.
- **TV**: Shows all currently available TV channels.
- **Radio**: Shows all currently radio channels.
- **Data/Other**: Shows all currently available MHP or other channels.
- **Analogue**: Shows all currently available analogue channels.
- **Favourites 1-5**: Shows all favourite channels.

The displayed image may differ depending on the model.
Favourites 1-5 will be displayed when you set Add to Favourites.

If you want to view favourite channels you added, press the CH LIST button and use ◀ (Ch.Mode) button to move Favourites 1-5.

Using the remote control buttons with the Channel List.

- **Red (Antenna):** Switches to Air or Cable.
- **Yellow (Programme View / Channel View):** Displays the programme when digital channel is selected. Returns to the channel view.
- **◀ (Ch.Mode / Channel):** Move to the All, TV, Radio, Data/Other, Analogue, Favourites 1-5. / Change channels.

When you press the **C (Programme View) button, you can move to other channels using ◀ (Channel) button.
- **Watch / Information**: Watches the channel you select. / Displays details of the selected programme.
- **Page**: Move to next or previous page.

How to use Timer Viewing in Channel List (digital channels only)

When you set the **Timer Viewing** in **Channel List**, you can only set the programme in **Programme View**.

1. Press the **CH LIST** button, then select a desired digital channel.
2. Press the **c** (Programme View) button.
3. Press the ▲ / ▼ buttons to select the desired programme, then press the **ENTER** (Information) or **INFO** button.
4. Select **Timer Viewing**, then press the **ENTER** button when done.

If you want to cancel **Timer Viewing**, follow steps 1 through 3. Select **Cancel Schedules**.
**Channel Manager**

You can edit the channel to your preference.

- **Channels**: Shows the channel list according to the channel type.

- **Favourites 1-5**: Shows favourite channels.

Using the colour buttons with the Channel Manager.

- **Red (Antenna)**: Switches to Air or Cable.

- **Blue (Sorting)**: Changes the list ordered by channel number or channel name.

The displayed image may differ depending on the model.

</table>
Channel Manager Option Menu

Set each channel using the Channel Manager menu options (Watch, Add to Favourites/Edit Favourites, Lock/Unlock, Edit Channel Name, Edit Channel Number, Delete, Select All/Deselect All).

Option menu items may differ depending on the channel status.

1. Select a channel and press the TOOLS button.
2. Select a function and change its settings.
- **Watch**: Watch the selected channel.

- **Add to Favourites / Edit Favourites**: Set channels you watch frequently as favourites. / Add or Delete the selected channel in **Favourites 1-5**.

1. Select the **Add to Favourites/Edit Favourites**, then press the **ENTER** button.
   - If the channel is already added to favourite channel, **Edit Favourites** will be shown.

2. Press the **ENTER** button to select **Favourites 1-5**, then press the **OK** button.
   - One favourite channel can be added in several of Favourites among **Favourites 1-5**.
- **Lock/Unlock**: Lock a channel so that the channel cannot be selected and viewed.

  - **NOTE**
    - This function is available only when the **Channel Lock** is set to **On**.
    - The PIN input screen appears. Enter your 4-digit PIN. Change the PIN using the **Change PIN** option.

- **Edit Channel Name** (analogue channels only): Assign your own channel name.

- **Edit Channel Number**: Edit the number by pressing the number buttons desired.

  - Some area may not be able to support **Edit Channel Name** and **Edit Channel Number** function.
● **Delete**: You can delete a channel to display the channels you want.

● **Deselect All**: Deselect all the selected channels.

  - You can only select **Deselect All** when one or more channels are selected.

● **Select All**: Select all the channels in the channel list.
Retuning Channels

MENU → Channel → ENTER

Antenna (Air / Cable)

Before your television can begin memorising the available channels, you must specify the type of signal source that is connected to the TV (i.e. an Air or Cable system).
Country
(depending on the country)
The PIN input screen appears. Enter your 4 digit PIN number.

- **Digital Channel**: Change the country for digital channels.
- **Analogue Channel**: Change the country for analogue channels.
Auto Tuning
(depending on the country)
Scans for a channel automatically and stores in the TV.

Automatically allocated programme numbers may not correspond to actual or desired programme numbers. If a channel is locked, the PIN input window appears.

- Auto Tuning
  Air / Cable: Select the antenna source to memorise.
  Digital & Analogue / Digital / Analogue: Select the channel source to memorise.
When Antenna Source is set to Air or Cable:

When selecting **Cable → Digital & Analogue** or **Digital**: Provide a value to scan for cable channels.

- **Search Mode (Full / Network / Quick)**: Scans for all channels with active broadcast stations and stores them in the TV.
  
  - If you select **Quick**, you can set up the **Network, Network ID, Frequency, Modulation** and **Symbol Rate** manually by pressing the button on the remote control.

- **Network (Auto / Manual)**: Selects the **Network ID** setting mode among **Auto** or **Manual**.

- **Network ID**: When **Network** is **Manual**, you can set up **Network ID** using the numeric buttons.
- **Frequency**: Displays the frequency for the channel. (differs in each country)
- **Modulation**: Displays available modulation values.
- **Symbol Rate**: Displays available symbol rates.

**Cable Search Option**
(depending on the country & cable channels only)
Sets additional search options such as the frequency and symbol rate for a cable network search.

**Start frequency / Stop frequency**: Set the start or stop frequency (differs in each country).

**Symbol Rate**: Displays available symbol rates.
**Modulation**: Displays available modulation values.
Manual Tuning

Scans for a channel manually and stores in the TV.

If a channel is locked, the PIN input window appears.

According to the channel source, Manual Tuning may be supported.

When Antenna Source is set to Air or Cable:

- **Digital Channel Tuning**: Scans for a digital channel manually and stores in the TV. Press the A (New) button to search the digital channels. When scanning has finished, a channel is updated in the channel list.
  - When selecting Antenna → Air: Channel, Frequency, Bandwidth
  - When selecting Antenna → Cable: Frequency, Modulation, Symbol Rate
• **Analogue Channel Tuning**: Scans for an analogue channel. Press the **A (New)** button to search the digital channels by adjusting the **Programme, Colour System, Sound System, Channel, Search**.

📝 **Channel mode**

- **P** (programme mode): When tuning is complete, the broadcasting stations in your area have been assigned to the position numbers from P0 to P99. You can select a channel by entering the position number in this mode.

- **C** (aerial channel mode) / **S** (cable channel mode): These two modes allow you to select a channel by entering the assigned number for each aerial broadcasting station or cable channel.
Edit Channel Number (Disable / Enable)

(depending on the country)

Use this to change channel number. When channel number is changed, channel information is not updated automatically.
Fine Tune

(analogue channels only)

If the signal is weak or distorted, fine tune the channel manually.

- Fine tuned channels are marked with an asterisk “*”.
- To reset the fine-tuning, select Reset.
Transfer Channel List
(depending on the country)
Imports or exports the channel map. You should connect a USB storage to use this function.

- The PIN number input screen appears. Enter your 4 digit PIN number.
  - Import from USB: Import channel list from USB.
  - Export to USB: Export channel list to USB.
Changing the Preset Picture Mode

MENU → Picture → Picture Mode → ENTER

Picture Mode
Select your preferred picture type.

When connecting a PC, you can only make changes to the Entertain and Standard.

- **Dynamic**: Suitable for a bright room.
- **Standard**: Suitable for a normal environment.
- **Natural** for LED 5 series 40 inches and LCD 5 series: Suitable for reducing eye strain.
- **Movie**: Suitable for watching movies in a dark room.
- **Entertain**: Suitable for watching movies and games.

It is only available when connecting a PC.
Adjusting Picture Settings

**Samsung MagicAngle** for LED 4 series 19-22 inches, 5 series 22 inches

MENU → Picture → Samsung MagicAngle → ENTER

Adjust screen viewing angle to optimize screen quality according to your viewing position.

- **Samsung MagicAngle**: When viewing the screen at an angle from below or above by setting the appropriate mode for each position you can obtain a similar picture quality as viewing the screen directly from the front.

  **Off**: Select when viewing from the front position.

  **Lean Back Mode**: Select when viewing from a slightly lower position.

  **Standing Mode**: Select when viewing from the upper position.

- **Mode**: Adjust screen viewing angle.

  When **Samsung MagicAngle** is set to **Lean Back Mode** or **Standing Mode**, **Gamma** is not available.
Your television has several setting options for picture quality control.

NOTE

- In analogue **TV, Ext.** modes of the PAL system, the **Tint (G/R)** function is not available.
- When connecting a PC, you can only make changes to **Backlight** / **Cell Light**, **Contrast**, **Brightness** and **Sharpness**.
- Settings can be adjusted and stored for each external device connected to the TV.
- Lowering picture brightness reduces power consumption.
Screen Adjustment
Set the various picture options such as picture size and aspect ratio.

- **Picture Size**: Your cable box/satellite receiver may have its own set of screen sizes as well. However, we highly recommend you use 16:9 mode most of the time.

  *Auto Wide*: Automatically adjusts the picture size to the **16:9** aspect ratio.

  **16:9**: Sets the picture to 16:9 wide mode.

  **Wide Zoom**: Magnifies the picture size more than 4:3.

  - Adjusts the **Position** by using ▲, ▼ buttons.

  **Zoom**: Magnifies the 16:9 wide pictures vertically to fit the screen size.

  - Adjusts the **Zoom** or **Position** by using ▲, ▼ button.
4:3: Sets the picture to basic (4:3) mode.

Do not watch in 4:3 format for a long time. Traces of borders displayed on the left, right and centre of the screen may cause image retention (screen burn) which are not covered by the warranty.

Screen Fit: Displays the full image without any cut-off when HDMI (720p / 1080i / 1080p) signals are inputted.

Smart View1 for LED 5 series 40 inches and LCD 5 series: Reduces original screen by 50%.

Smart View2 for LED 5 series 40 inches and LCD 5 series: Reduces original screen by 25%.

NOTE

● Smart View1 is enabled only in HDMI mode.
● Smart View2 is enabled only in DTV and HDMI modes.
- **Position**: Adjust the picture position. It is only available in **Wide Zoom**.
- **Zoom/Position**: Adjust the picture size and position. It is only available in **Zoom**.

**NOTE**
- After selecting **Screen Fit** in HDMI (1080i / 1080p), you may need to centre the picture:
  1. Press the ▲ or ▼ button to select **Position**.
  2. Press the **ENTER** button.
  3. Press the ▲, ▼, ◀ or ▶ button to move the picture.
- Depending on the input source, the picture size options may vary.
- If you want to reset the position you adjusted, select **Reset** in the **Position** screen. The picture will be set to its default position.
● The available items may differ depending on the selected mode.
● When connecting a PC, only 16:9 and 4:3 modes can be adjusted.
● Settings can be adjusted and stored for each external device connected to an input on the TV.
● If you use the **Screen Fit** function with HDMI 720p input, 1 line will be cut at the top, bottom, left and right as in the overscan function.

**4:3 Screen Size (16:9 / Wide Zoom / Zoom / 4:3):** Available only when picture size is set to **Auto Wide**. You can determine the desired picture size at the 4:3 WSS (Wide Screen Service) size or the original size. Each European country requires different picture size.
Changing the Picture Options

Advanced Settings

MENU → Picture → Advanced Settings → ENTER

(available in Standard / Movie mode)

You can adjust the detailed setting for the screen including colour and contrast.

When connecting a PC, you can only make changes to **Gamma** and **White Balance**.

- **Black Tone (Off / Dark / Darker / Darkest)**: Select the black level to adjust the screen depth.

The displayed image may differ depending on the model.
• **Dynamic Contrast (Off / Low / Medium / High):** Adjust the screen contrast.

• **Shadow Detail for LED and LCD TV:** Increase the brightness of dark images.

• **Gamma:** Adjust the primary colour intensity.

• **RGB Only Mode (Off / Red / Green / Blue):** Displays the Red, Green and Blue colour for making fine adjustments to the hue and saturation.

• **Colour Space (Auto / Native):** Adjust the range of colours available to create the image.
- **White Balance**: Adjust the colour temperature for a more natural picture.
  - **R-Offset / G-Offset / B-Offset**: Adjust each colour’s (red, green, blue) darkness.
  - **R-Gain / G-Gain / B-Gain**: Adjust each colour’s (red, green, blue) brightness.
  - **Reset**: Resets the **White Balance** to its default settings.

- **Flesh Tone**: Emphasize pink “Flesh Tone”.

- **Edge Enhancement (Off / On)**: Emphasize object boundaries.

- **Motion Lighting (Off / On)**: Reduce power consumption by brightness control adapted motion.

- **LED Motion Plus (Off / On)**: Removes drag from fast scenes with a lot of movement to provide a clear picture.
When connecting a PC, you can only make changes to the Colour Tone.

- **Colour Tone** (Cool / Standard / Warm1 / Warm2)
  - **Warm1** or **Warm2** will be deactivated when the picture mode is **Dynamic**.
  - Settings can be adjusted and stored for each external device connected to an input on the TV.

- The displayed image may differ depending on the model.
• **Digital Noise Filter (Off / Low / Medium / High / Auto / Auto Visualisation):**
  If the broadcast signal received by your TV is weak, you can activate the **Digital Noise Filter** feature to reduce any static and ghosting that may appear on the screen.

  🥳 When the signal is weak, try other options until the best picture is displayed.

  **Auto Visualisation:** When changing analogue channels, displays signal strength.

  🥳 Only available for analogue channels.

  🥳 When the **INFO** button is pressed, the signal strength bar is displayed.

  🥳 When bar is green, you are receiving the best possible signal.

• **MPEG Noise Filter (Off / Low / Medium / High / Auto):** Reduces MPEG noise to provide improved picture quality.
- **HDMI Black Level (Low / Normal)**: Selects the black level on the screen to adjust the screen depth.
  - Available only in **HDMI** mode (RGB signals).

- **Film Mode (Off / Auto1 / Auto2 / Cinema Smooth)**: Sets the TV to automatically sense and process film signals from all sources and adjust the picture for optimum quality.
  - Available in TV mode, EXT and HDMI (1080i).
  - If the screen does not seem natural, change its option to **Off / Auto1 / Auto2** in **Film Mode**.
  - The **Cinema Smooth** function is only activated when HDMI 24Hz signal is inputted.
Reset Picture (OK / Cancel)

 Resets your current picture mode to its default settings.
Changing the Preset Sound Mode

MENU → Sound → Sound Mode → ENTER

Sound Mode

- **Standard**: Selects the normal sound mode.
- **Music**: Emphasizes music over voices.
- **Movie**: Provides the best sound for movies.
- **Clear Voice**: Emphasizes voices over other sounds.
- **Amplify**: Increase the intensity of high-frequency sound to allow a better listening experience for the hearing impaired.
Adjusting Sound Settings

MENU → Sound → Sound Effect → ENTER

Sound Effect
(standard sound mode only)

Use the up and down arrow keys to select an option, and then press ENTER.

- SRS TruSurround HD (Off / On)

(standard sound mode only)

This function provides a virtual 5.1 channel surround sound experience through a pair of speakers using HRTF (Head Related Transfer Function) technology.
- **SRS TruDialog (Off / On)**  
  (standard sound mode only)
  This function allows you to increase the intensity of a voice over background music or sound effects so that dialog can be heard more clearly.

- **Equalizer**
  Use Equalizer to customize sound setting for each speaker.
  **Balance**: Adjusts the balance between the right and left speaker.
  **100Hz / 300Hz / 1kHz / 3kHz / 10kHz** (Bandwidth Adjustment): Adjusts the level of specific bandwidth frequencies.
  **Reset**: Resets the equalizer to its default settings.
Broadcast Audio Options

- **Audio Language** (digital channels only)
  Change the default value for audio languages.
  
  The available language may differ depending on the broadcast.

- **Audio Format** (digital channels only)
  Select the audio format.
Audio Description
(not available in all locations) (digital channels only)
This function handles the Audio Stream for the AD (Audio Description) which is sent along with the Main audio from the broadcaster.

Audio Description (Off / On): Turn the audio description function on or off.

Volume: Adjust the audio description volume.
Additional Settings

- **DTV Audio Level (MPEG / HE-AAC)** (digital channels only): This function allows you to reduce the disparity of a voice signal (which is one of the signals received during a digital TV broadcast) to a desired level.

  According to the type of broadcast signal, **MPEG / HE-AAC** can be adjusted between -10dB and 0dB.

  To increase or decrease the volume, adjust between the range 0 and -10 respectively.
• **Dolby Digital Comp (Line / RF):** This function minimizes signal disparity between a dolby digital signal and a voice signal (i.e. MPEG Audio, HE-AAC, ATV Sound).

   ![Note] Select **Line** to obtain dynamic sound, and **RF** to reduce the difference between loud and soft sounds at night time.

   **Line:** Set the output level for signals greater or less than -31dB (reference) to either -20dB or -31dB.

   **RF:** Set the output level for signals greater or less than -20dB (reference) to either -10dB or -20dB.
Speaker Settings

- **Auto Volume (Off / Normal / Night)**

  To equalize the volume level on each channel, set to **Normal**.

  **Night**: This mode provides an improved sound experience compared to **Normal** mode, making almost no noise. It is useful at night.

  To use the volume control on the source device connected to the TV, set **Auto Volume** to **Off** on the TV. Otherwise, a change to the volume control of the source device may not be applied.
Reset Sound (OK / Cancel)
Reset all sound settings to the factory defaults.
When you set to **Dual I-II**, the current sound mode is displayed on the screen.

<table>

</table>

- If the stereo signal is weak and an automatic switching occurs, then switch to the mono.
- Only activated in stereo sound signal.
- Only available when the **Source** is set to **TV**.
Setting the Time

MENU → System → Time → ENTER

Time

The current time will appear every time you press the INFO button.

- **Clock**: Setting the clock is for using various timer features of the TV.
  - If you disconnect the power cord, you have to set the clock again.

**Clock Mode**: Set up the current time manually or automatically.

- **Auto**: Set the current time automatically using the time from a digital channel.
  - The antenna must be connected in order to set the time automatically.
- **Manual**: Set the current time manually.

⚠ Depending on the broadcast station and signal, the auto time set up may not be correct. In this case, set the time manually.

**Clock Set**: Set the **Day, Month, Year, Hour** and **Minute** manually.

⚠ Available only when **Clock Mode** is set to **Manual**.

**Time Zone** (depending on the country): Select your time zone.

⚠ This function is only available when the **Clock Mode** is set to **Auto**.

⚠ When selecting **Manual** in **Time Zone**, **GMT** and **DST** will be activated.
Using the Sleep Timer

MENU → System → Time → Sleep Timer → ENTER

- Sleep Timer: Automatically shuts off the TV after a preset period of time. (30, 60, 90, 120, 150 and 180 minutes).

To cancel Sleep Timer, select Off.
Setting the On / Off Timer

MENU → System → Time → On Timer <or> Off Timer → ENTER

- **On Timer 1 / On Timer 2 / On Timer 3**: Three different on timer settings can be made. You must set the clock first.
  - **Setup**: Select Off, Once, Everyday, Mon~Fri, Mon~Sat, Sat~Sun or Manual to set at your convenience. If you select Manual, you can set up the day you want to activate the timer.

- The ✓ mark indicates the day you’ve selected.

The displayed image may differ depending on the model.
- **On Time**: Set the hour and minute.
- **Volume**: Set the desired volume level.
- **Source**: Select TV or USB content to be played when the TV is turned on automatically. (USB can be selected only when a USB device is connected to the TV)
- **Antenna** (when the **Source** is set to **TV**): Select ATV or DTV.
- **Channel** (when the **Source** is set to **TV**): Select the desired channel.
- **Music / Photo** (when the **Source** is set to **USB**): Select a folder in the USB device containing music or photo files to be played when the TV is turned on automatically.
NOTE

- If there is no music file on the USB device or the folder containing a music file is not selected, the Timer function does not operate correctly.

- When there is only one photo file in the USB device, the Slide Show will not play.

- If a folder name is too long, the folder cannot be selected.

- Each USB you use is assigned its own folder. When using more than one of the same type of USB, make sure the folders assigned to each USB have different names.

- It is recommended that you use a USB memory stick and a multi card reader when using **On Timer**.

- The **On Timer** function may not work with USB devices with a built-in battery, MP3 players, or PMPs made by some manufacturers because these devices take a long time to be recognized.
- **Off Timer 1 / Off Timer 2 / Off Timer 3**: Three different off timer settings can be made. You must set the clock first.

**Setup**: Select *Off, Once, Everyday, Mon~Fri, Mon~Sat, Sat~Sun* or *Manual* to set at your convenience. If you select *Manual*, you can set up the day you want to activate the timer.

- The ✓ mark indicates the day you’ve selected.

**Off Time**: Set the hour and minute.
Locking Programme

MENU → System → Security → ENTER

Security

- The PIN input screen appears before the setup screen.
- Enter your 4-digit PIN. Change the PIN using the Change PIN option.
- **Channel Lock (Off / On):** Lock channels in Channel Manager, to prevent unauthorized users, such as children, from watching unsuitable programme.
  - Only available when the Input source is set to TV.
• **Program Rating Lock** (depending on the country): Prevent unauthorized users, such as children, from watching unsuitable programme with a user-defined 4-digit PIN code. If the selected channel is locked, the “🔒” symbol will be displayed.

💡 The items of **Program Rating Lock** differs depending on the country.

• **Change PIN**: Change your password required to set up the TV.
Picture In Picture (PIP)

You can watch the TV tuner and one external video source simultaneously. PIP (Picture-in-Picture) does not function in the same mode.

NOTE

- For PIP sound, refer to the Sound Select instructions.
- If you turn the TV off while watching in PIP mode, the PIP window will disappear.
- You may notice that the picture in the PIP window becomes slightly unnatural when you use the main screen to view a game or karaoke.
- **PIP settings**

<table>
<thead>
<tr>
<th>Main picture</th>
<th>Sub picture</th>
</tr>
</thead>
<tbody>
<tr>
<td>HDMI</td>
<td>TV</td>
</tr>
</tbody>
</table>

- **PIP (Off / On):** Activate or deactivate the PIP function.
- **Channel:** Select the channel for the sub-screen.
- **Size ( / ):** Select a size for the sub-picture.
- **Position ( / / / ):** Select a position for the sub-picture.
- **Sound Select (Main / Sub):** You can choose the desired sound (Main / Sub) in PIP mode.
Economical Solutions

MENU → System → Eco Solution → ENTER

Eco Solution

- **Energy Saving (Off / Low / Medium / High / Picture Off)**: This adjusts the brightness of the TV in order to reduce power consumption. If you select Picture Off, the screen is turned off, but the sound remains on. Press any button except volume button to turn on the screen.
- **Eco Sensor (Off / On)** for LED 5 series 40 inches, LCD 5 series and PDP TV: To enhance your power savings; the picture settings will automatically adapt to the light in the room.

  - If you adjust the **Backlight** for LED and LCD TV / **Cell Light** for PDP TV, the Eco Sensor will be set to **Off**.

- **Min Backlight** for LED and LCD TV / **Min Cell Light** for PDP TV: When Eco sensor is **On**, the minimum screen brightness can be adjusted manually.

  - If Eco Sensor is **On**, the display brightness may change (become slightly darker or brighter) depending on the surrounding light intensity.
- **No-Signal Power Off (Off / 15 min / 30 min / 60 min):**
  To avoid unnecessary energy consumption, set how long you want the TV to remain on if it’s not receiving a signal.

- **Auto Power Off (Off / On):** The TV will be automatically turned off when no user operation is received for 4 hours.
Other Features

MENU → System → ENTER

Language

- **Menu Language**: Set the menu language.
- **Teletext Language** (depending on the country): Set a desired language for teletext.

  - English is the default in cases where the selected language is unavailable in the broadcast.
• Preference (Primary Audio Language / Secondary Audio Language / Primary Subtitle Language / Secondary Subtitle Language / Primary Teletext Language / Secondary Teletext Language): Select a language, which will be the default language when a channel is selected.

- Primary Teletext Language and Secondary Teletext Language may not be supported in some locations.
Subtitle

Use this menu to set the **Subtitle** mode.

- **Subtitle (Off / On)**: Switches subtitles on or off.
- **Subtitle Mode (Normal / Hearing Impaired)**: Sets the subtitle mode.
- **Subtitle Language**: Sets the subtitle language.

⚠️ If the programme you are watching does not support the **Hearing Impaired** function, **Normal** automatically activates even if the **Hearing Impaired** mode is selected.

⚠️ English is the default in cases where the selected language is unavailable in the broadcast.
Digital Text (Disable / Enable)
(UK only)
If the programme broadcasts with digital text, this feature is enabled.

📝 MHEG (Multimedia and Hypermedia Information Coding Experts Group)
An International standard for data encoding systems used in multimedia and hypermedia. This is at a higher level than the MPEG system which includes data-linking hypermedia such as still images, character service, animation, graphic and video files as well as multimedia data. MHEG is user runtime interaction technology and is being applied to various fields including VOD (Video-On-Demand), ITV (Interactive TV), EC (Electronic Commerce), teleeducation, tele-conferencing, digital libraries and network games.
Auto Protection Time

- Auto Protection Time (Off / 2 hours / 4 hours / 8 hours / 10 hours): If the screen remains idle with a still image for a certain period of time defined by the user, the screen saver is activated to prevent the formation of ghost images on the screen.
Screen Burn Protection for PDP TV

To reduce the possibility of screen burn, this unit is equipped with screen burn prevention technology. The Time setting allows you to programme the time between movement of the picture in minutes.

- **Pixel Shift (Off / On):** Using this function, you can minutely move pixels on the PDP in horizontal or vertical direction to minimize after image on the screen.

  Optimum condition for pixel shift

<table>
<thead>
<tr>
<th>Item</th>
<th>TV / HDMI</th>
</tr>
</thead>
<tbody>
<tr>
<td>Horizontal</td>
<td>0~4</td>
</tr>
<tr>
<td>Vertical</td>
<td>0~4</td>
</tr>
<tr>
<td><strong>Time (minute)</strong></td>
<td>1~4 min</td>
</tr>
</tbody>
</table>
The **Pixel Shift** value may differ depending on the monitor size (inches) and mode.

This function is not available in the **Screen Fit** mode.

- **Auto Protection Time (Off / 10 min / 20 min / 40 min / 1 hour)**: If the screen remains idle with a still image for a certain period of time defined by the user, the screen saver is activated to prevent the formation of ghost images on the screen.

- **Scrolling**: This function removes after-images on the screen by moving all the pixels on the PDP according to a pattern. Use this function when there are remaining after images or symbols on the screen, especially when you displayed a still image on the screen for a long time.
The after-image removal function has to be executed for a long time (approximately 1 hour) to effectively remove after-images on the screen. If the after-image is not removed after performing the function, repeat the function again.

Press any key on the remote control to cancel this feature.

- **Side Grey (Light / Dark):** When you watch TV with the screen ratio set to 4:3, the screen is prevented from any damage by adjusting the white balance on both extreme left and right sides.
General

- **Game Mode (Off / On):** When connecting to a game console such as PlayStation™ or Xbox™, you can enjoy a more realistic gaming experience by selecting game mode.

**NOTE**

- Precautions and limitations for game mode
  - To disconnect the game console and connect another external device, set **Game Mode** to **Off** in the setup menu.
  - If you display the TV menu in **Game Mode**, the screen shakes slightly.

- **Game Mode** is not available in **TV** mode.
● After connecting the game console, set **Game Mode** to **On** to prevent poor picture quality.

● If **Game Mode** is **On**:
  
  – **Picture Mode** is set to **Standard** and **Sound Mode** is set to **Movie**.

● **Menu Transparency (Bright / Dark)**: Set the Transparency of the menu.

● **Boot Logo (Off / On)**: Display Samsung logo when the TV is turned on.
Common Interface

- **CI Menu**: This enables the user to select from the CAM-provided menu. Select the CI Menu based on the menu PC Card.

- **Application Info**: View information on the CAM inserted into the CI slot and on the “CI or CI+ CARD” which is inserted into the CAM. You can install the CAM anytime whether the TV is on or off.

1. Purchase a CI CAM module at your nearest dealer or by phone.
2. Firmly insert the “CI or CI+ CARD” into the CAM in the direction of the arrow.
3. Insert the CAM with the “CI or CI+ CARD” into the common interface slot, in the direction of the arrow so that it aligns parallel with the slot.
4. Check if you can see a picture on a scrambled signal channel.
Support Menu

MENU → Support → e-Manual → ENTER

e-Manual

You can read the introduction and instructions about the TV features stored in your TV.

Self Diagnosis

Self Diagnosis might take few seconds, this is part of the normal operation of the TV.

- **Picture Test (Yes / No):** Use to check for picture problems.
  
  **Yes:** If the test picture does not appear or there is noise in the test picture, select Yes. There may be a problem with the TV. Contact Samsung's Call Centre for assistance.
  
  **No:** If the test picture is properly displayed, select No. There may be a problem with your external equipment. Please check your connections. If the problem persists, refer to the external device’s user manual.
• **Sound Test (Yes / No):** Use the built-in melody sound to check for sound problems.

**Yes:** If you can hear sound only from one speaker or not at all during the sound test, select **Yes.** There may be a problem with the TV. Contact Samsung’s Call Centre for assistance.

**No:** If you can hear sound from the speakers, select **No.** There may be a problem with your external equipment. Please check your connections. If the problem persists, refer to the external device’s user manual.
- **Signal Information:** (digital channels only) HDTV channel’s reception quality is either perfect or the channels are unavailable. Adjust your antenna to increase signal strength.

- **Troubleshooting:** If the TV seems to have a problem, refer to this description.

  📂 If none of these troubleshooting tips apply, contact the Samsung customer service centre.
Software Upgrade

Software Upgrade can be performed by downloading the latest firmware from “www.samsung.com” to a USB memory device.

Current Version - the software already installed in the TV.

Software is represented as “Year/Month/Day_Version”.

- The displayed image may differ depending on the model.
Installing the Latest Version

- **By USB**: Insert a USB drive containing the firmware upgrade file, downloaded from “www.samsung.com” into the TV. Please be careful not to disconnect the power or remove the USB drive until upgrades are complete. The TV will be turned off and on automatically after completing the firmware upgrade. When software is upgraded, video and audio settings you have made will return to their default settings. We advise you to write down your settings so that you can easily reset them after the upgrade.

- The displayed image may differ depending on the model.
- **By Channel**: Upgrade the software using the broadcasting signal.
  - If the function is selected during the software transmission period, software will be automatically searched and downloaded.
  - The time required to download the software is determined by the signal status.

- **Alternative Software** (backup): If there is an issue with the new firmware and it is affecting operation, you can change the software to the previous version.
  - If the software was changed, existing software is displayed.

- **Standby Mode Upgrade** (Off / 1 hour later / 2 hours later / 00:00 / 02:00 / 12:00 / 14:00): A manual upgrade will be automatically performed at selected time. Since the power of the unit is turned on internally, the screen may be turned on slightly for the product. This phenomenon may continue for more than 1 hour until the software upgrade is complete.
Contact Samsung
View this information when your TV does not work properly or when you want to upgrade the software. You can find information regarding our call centres, and how to download products and software.

Contents Home
You can enjoy useful and various contents.
Using the My Downloads

Enjoy photos, music files saved on a USB Mass Storage Class (MSC) device.

1. Press the CONTENT button to select My Downloads.

2. Press ▲/▼ button to select desired menu (Photos, Music), then press the ENTER button.

- The displayed image may differ depending on the model.
Connecting a USB Device

1. Turn on your TV.
2. Connect a USB device containing photo, music files to the USB jack on the back of the TV.
3. When USB is connected to the TV, popup window appears. Then you can select New device connected.

● The displayed image may differ depending on the model.
It might not work properly with unlicensed multimedia files.

Need-to-Know List before using **My Downloads**

- MTP (Media Transfer Protocol) is not supported.
- The file system supports FAT16, FAT32 and NTFS.
- Certain types of USB Digital camera may not be compatible with this TV.
- **My Downloads** only supports USB Mass Storage Class (MSC) devices. MSC is a Mass Storage Class Bulk-Only Transport device. Examples of MSC are Thumb drives, Flash Card Readers and USB HDD (USB HUB are not supported). Devices should be connected directly to the TV's USB port.
- Before connecting your device to the TV, please back up your files to prevent them from damage or loss of data. SAMSUNG is not responsible for any data file damage or data loss.
- USB (HDD) is not supported.
- Do not disconnect the USB device while it is loading.
- The higher the resolution of the image, the longer it takes to display on the screen.
- The maximum supported JPEG resolution is 15360 x 8640 pixels.
- For unsupported or corrupted files, the “Not Supported File Format” message is displayed.
- If the files are sorted by **Folder View**, up to 1000 files can be displayed in each folder.
• MP3 files with DRM that have been downloaded from a non-free site cannot be played. Digital Rights Management (DRM) is a technology that supports the creation, distribution and management of the content in an integrated and comprehensive way, including the protection of the rights and interests of the content providers, the prevention of the illegal copying of contents, as well as managing billings and settlements.

• If more than 2 PTP devices are connected, you can only use one at a time.

• If more than two MSC devices are connected, some of them may not be recognized. A USB device that requires high power (more than 500mA or 5V) may not be supported.
● If an over-power warning message is displayed while you are connecting or using a USB device, the device may not be recognized or may malfunction.

● If the TV has been no input during time set in Auto Protection Time, the Screensaver will run.

● The power-saving mode of some external hard disk drives may be released automatically when connected to the TV.
- If a USB extension cable is used, the USB device may not be recognized or the files on the device may not be read.
- If a USB device connected to the TV is not recognized, the list of files on the device is corrupted or a file in the list is not played, connect the USB device to the PC, format the device and check the connection.
- If a file deleted from the PC is still found when My Downloads is run, use the “Empty the Recycle Bin” function on the PC to permanently delete the file.
- My Downloads only supports sequential jpeg format.
Screen Display

Move to the desired file using the ◀/▶/▲/▼ buttons and then press the ENTER. The file is played. My Downloads screen may differ depending on the way to enter the screen.

Information:
You can ascertain the selected device name, contents mode, folder/file name, page and sorting list.

Contents mode / Device name:
You can select the desired Contents mode or Device name.

Operation Buttons:
- Yellow (Edit Mode): Selects the desired music. The check box is shown in the screen to check the music you want. It is only available in Music.
- Tools: Displays the option menu.
- Return: Move to the previous step.
- Select: Select the contents in Edit Mode.

File List Section:
You can confirm the files and groups that are sorted by category.
**Music**

**Playing Music**

1. Press the ◀/▶/▲/▼ button to select the desired Music in the file list.

2. Press the ENTER button.

- Only displays the files with MP3 file extension. Other file extensions are not displayed, even if they are saved on the same USB device.

- If the sound is abnormal when playing MP3 files, adjust the Equalizer in the Sound menu. (An over-modulated MP3 file may cause a sound problem.)
Playing the selected music

1. Press the \textbf{c} (Edit Mode) button.

2. Select the desired music.
   - The check box appears to the left of the selected files.

3. Press the \textbf{TOOLS} button and select \textbf{Play Selected Contents}.
   - You can select or deselect all music pressing the \textbf{Select All / Deselect All}. 
Photos

Viewing a Photo (or Slide Show)

1. Press the ◀/▶/▲/▼ button to select the desired photo in the file list.

2. Press the ENTER button.
   - When a selected photo is displayed, press the ENTER button to start the slide show.
   - During the slide show, all files in the file list will be displayed in order.

❖ Music files can be automatically played during the Slide Show if the Background Music is set to On.
### My Downloads - Additional Functions

#### Music/Photos Play Option menu

During playing a file, press the **TOOLS** button.

Analogue Channel Teletext Feature

The index page of the Teletext service gives you information on how to use the service. For Teletext information to be displayed correctly, channel reception must be stable. Otherwise, information may be missing or some pages may not be displayed.

You can change Teletext pages by pressing the numeric buttons on the remote control.

- **Page (mode)**: Selects the Teletext mode (LIST/FLOF). If pressed during LIST mode, switches the mode to List save mode. In List save mode, you can save a Teletext page into a list using the 8(store) button.

- **Page/Screen (Teletext on/mix/off)**: Activates the Teletext mode for the current channel. Press the button twice to overlap the Teletext mode with the current broadcasting screen. Press it one more time to exit teletext.
- (sub-page): Displays the available sub-page.
- (store): Stores the Teletext pages.
- (index): Displays the index (contents) page at any time while you are viewing Teletext.
- (size): Displays the teletext on the upper half of the screen in double-size. To move the text to the lower half of the screen, press it again. For normal display, press it once again.
- (hold): Holds the display at the current page, in the case that there are several secondary pages that follow automatically. To undo, press it again.
- (page up): Displays the next Teletext page.
- (page down): Displays the previous Teletext page.
- **⪪** (reveal): Displays the hidden text (answers to quiz games, for example). To display the normal screen, press it again.
- **🇽** (cancel): Shrinks the Teletext display to overlap with the current broadcast.
- Colour buttons (red, green, yellow, blue): If the FASTEXT system is used by the broadcasting company, the different topics on a Teletext page are colour-coded and can be selected by pressing the coloured buttons. Press the colour corresponding to the topic of your choice. A new colour-coded page is displayed. Items can be selected in the same way. To display the previous or next page, press the corresponding coloured button.
The Teletext pages are organized according to six categories:

<table>
<thead>
<tr>

Anti-theft Kensington Lock

(depending on the model)
The Kensington Lock is not supplied by Samsung. It is a device used to physically fix the system when using it in a public place. The appearance and locking method may differ from the illustration depending on the manufacturer. Refer to the manual provided with the Kensington Lock for additional information on proper use.

Please find a “

icon on the rear of the TV. A kensington slot is beside the “

icon.

The position and colour may differ depending on the model.

To lock the product, follow these steps:

1. Wrap the Kensington lock cable around a large, stationary object such as desk or chair.
2. Slide the end of the cable with the lock attached through the looped end of the Kensington lock cable.

3. Insert the locking device into the Kensington slot on the product 1.

4. Lock the lock.

**NOTE**

- These are general instructions. For exact instructions, see the User manual supplied with the locking device.
- The locking device has to be purchased separately.
- The location of the Kensington slot may be different depending on the TV model.
Connections Common Interface Slot

To watch paid channels, the “CI or CI+ CARD” must be inserted.

- If you do not insert the “CI or CI+ CARD,” some channels will display the message “Scrambled Signal”.

- The pairing information containing a telephone number, the “CI or CI+ CARD” ID, the Host ID and other information will be displayed in about 2~3 minutes. If an error message is displayed, please contact your service provider.

- When the configuration of channel information has finished, the message “Updating Completed” is displayed, indicating the channel list is updated.

- The displayed image may differ depending on the model.
NOTE

- You must obtain a “CI or CI+ CARD” from a local cable service provider.
- When removing the “CI or CI+ CARD”, carefully pull it out with your hands since dropping the “CI or CI+ CARD” may cause damage to it.
- Insert the “CI or CI+ CARD” in the direction marked on the card.
- The location of the COMMON INTERFACE slot may be different depending on the model.
- “CI or CI+ CARD” is not supported in some countries and regions; check with your authorized dealer.
- If you have any problems, please contact a service provider.
- Insert the “CI or CI+ CARD” that supports the current antenna settings. The screen will be distorted or will not be seen.
If you have any questions about the TV, first refer to this list. If none of these troubleshooting tips apply, please visit “www.samsung.com”, then click on Support.

<td>turned off.</td>
<td></td>
</tr>
<tr>
<td>You have intermittent loss of audio or video.</td>
<td>● Check the cable connections and reconnect them.</td>
</tr>
<tr>
<td></td>
<td>● Loss of audio or video can be caused by using overly rigid or thick cables. Make sure the cables are flexible enough for long term use. If mounting the TV to the wall, we recommend using cables with 90 degree connectors.</td>
