

The VisionTek DisplayPort to Dual Link DVI-D active adapter allows you to connect your favorite DP device to your DL DVI-D display or projector. This active adapter works without any additional power or drivers. Watch movies in perfect 1080p clarity or tackle your most demanding software applications across multiple displays. The adapter allows ample length so you can configure your desk or presentation setup however you wish.

Unlike passive adapters, this DP to DVI converter offers an active chipset for compatibility with any DisplayPort output - ideal for graphics cards and devices that do not support outputting multi-mode DP++ signals (e.g. AMD Eyefinity). This DisplayPort to DVI video adapter converter features a latching DisplayPort connector, so you can fasten and secure the connector to the system port.

PN 900639 | UPC 7 84090 03205 8

NOTE: This adapter is not bi-directional. This adapter converts DisplayPort to DL DVI-D only, not vice-versa.
