RemotePoint®

Air Point Presenter

The new Air Point Presenter® carries on the RemotePoint® tradition of performance and ease of use. Its dark soft-touch case seems to disappear in your hand: where large keys control PowerPoint® and Keynote® slides, a bright red laser pointer stands ready to focus all eyes, and a slide blank key waits to toggle your visual content.

Best of all, the Air Point has 'no learning curve.' Just insert the batteries, plug in the USB receiver, flip the 'On' switch, and you're ready to get down to business—from up to 75 feet away.

- **Large Slide Control Keys**
- **Bright Red Laser Pointer**
- **'In Air' Mouse Pointing**
- **Windows® & OS X® Compatible**
- **Up to 75' wireless range**

RemotePoint®

Air Point Presenter

Business Presentations

Need to give a presentation? Enlist the new Air Point Presenter and win the day using Air Point's intuitive slide controls, bright red laser pointer and *In-Air* cursor control. It's easy to use and reliable —from up to 75' away.

Classroom Lectures

Using Air Point Presenter, move freely about the classroom, interacting with students while maintaining complete control of your lecture slides. With no learning curve, Air Point will have you up and running in seconds.

In-Air Cursor Control

Along with slide control and laser pointing, Air Point provides *In-Air* cursor control for slides with hyperlinks and Internet content. Control your computer and desktop from across the room with simple wrist movements.
