ADDING A SPACER TO THE USB PORT LOCK
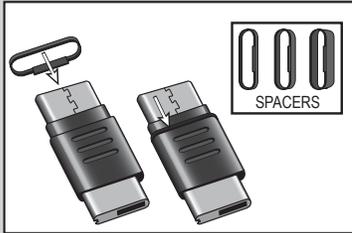

SPACERS

NOTE: For the most secure fit, it is recommended to use a spacer on all USB Port Lock installations. Snap on a small spacer, and if the lock does not fit snuggly once installed, switch to a different size. If you have difficulty locking the lock with a spacer installed, it is sufficient to use the lock without any spacers.

LOCKING A USB PORT WITH THE USB PORTLOCK
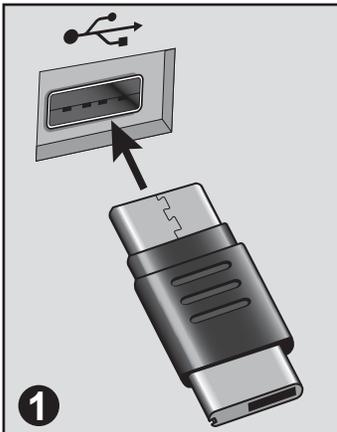

❶ Hold the plastic housing of the USB Port Lock and firmly slide into the USB port
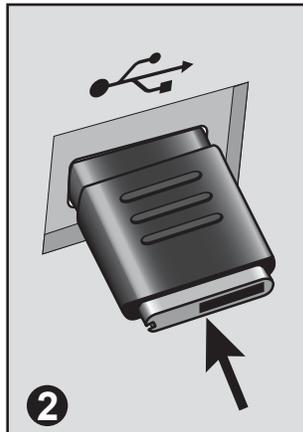

❷ Push in the locking button until it clicks. The USB port is now locked.

UNLOCKING THE USB PORT LOCK

Grip patterns face same sides
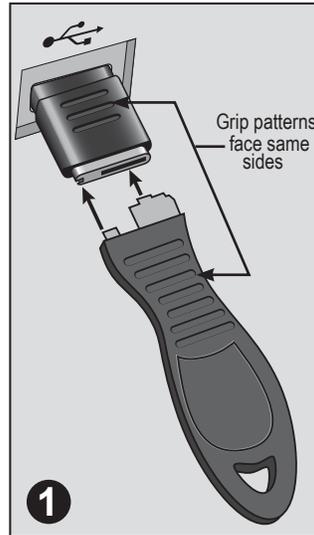

❶ Align the grip patterns on the key and lock, and insert the key into the locking button.

B

C

A
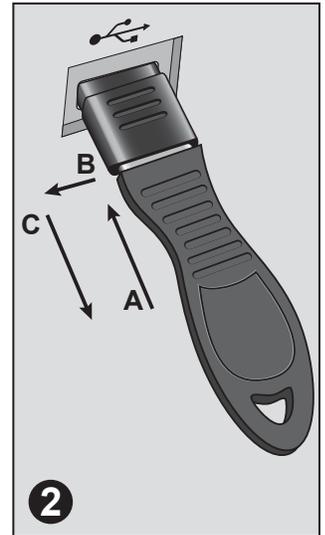

❷ Push the key into the lock in (**A**) until it is fully depressed. Then slide the key sideways (**B**) until the locking mechanism is released. Continue holding in position **B** while allowing the lock button to slide out (**C**).
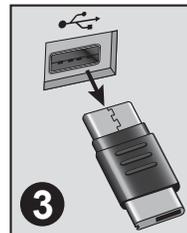

❸ The USB Port Lock is now unlocked and can be removed by slowly pulling it out of the USB port

SECURING TWO USB PORTS WITH THE USB PORT LOCK & PORT BLOCK *(not included in all packages)*

Rectangular Port Block | Square Port Block

Rectangular Port Block | Square Port Blocker

Rectangular Port Block | Square Port Block
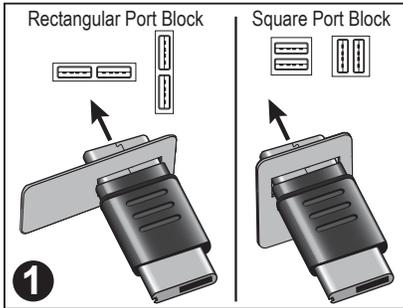

❶ Insert the USB Port Lock into the rectangular window of the USB Port Block.
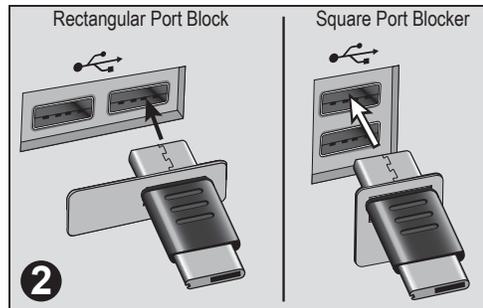

❷ Position the lock and port block so that the lock is aligned with a USB port and the port block is positioned over an additional port. Holding the plastic housing, insert the lock into the USB port.
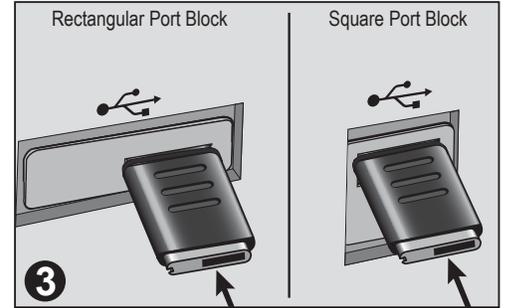

**❸** Push in the locking button until it clicks. The USB port is now locked and the additional USB port is blocked.

For the most secure fit, it is recommended to use a spacer. Try the smallest spacer first, and adjust to larger sizes if needed. If the lock will not fit properly with a spacer installed, it is sufficient to use the lock without a spacer. (See NOTE on reverse)

SECURING TWO USB PORTS WITH A PERIPHERAL USING THE USB PORT LOCK & CABLE GUARD
(not included in all packages)

Rectangular USB Cable Guard | Square USB Cable Guard

Rectangular USB Cable Guard | Square USB Cable Guard
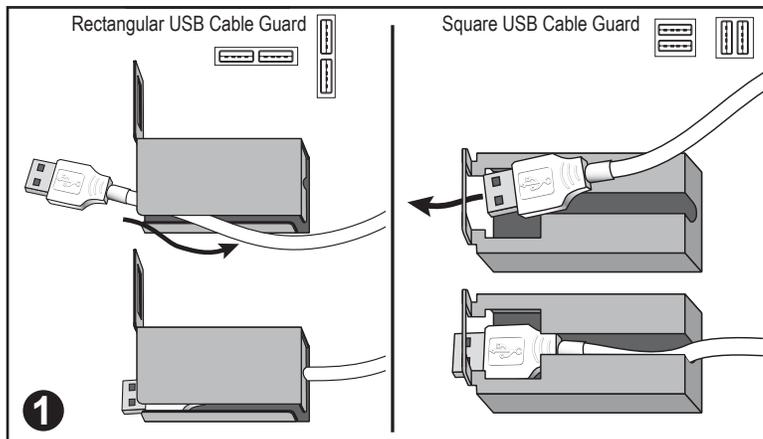

❶ Thread the USB cable through the slot in the USB Cable Guard's compartment.
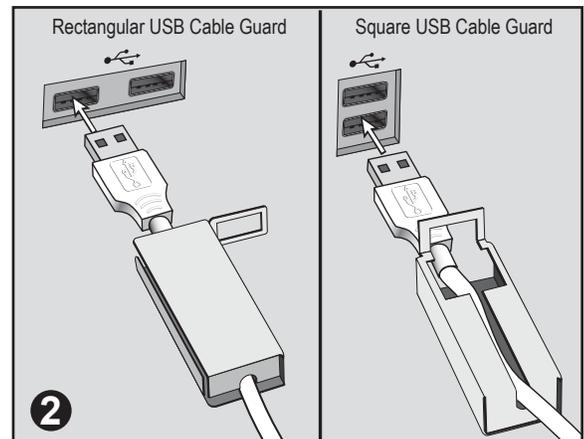

❷ Connect the USB device to the desired USB port configuration

Rectangular Retainer | Square Retainer

Rectangular Retainer | Square Retainer
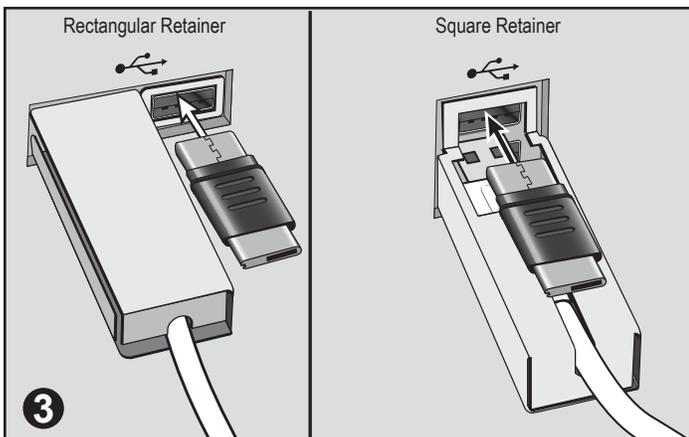

❸ Position the cable guard so the window is aligned with the second USB port and, holding the plastic housing of the USB Lock, insert the lock firmly into the USB port.
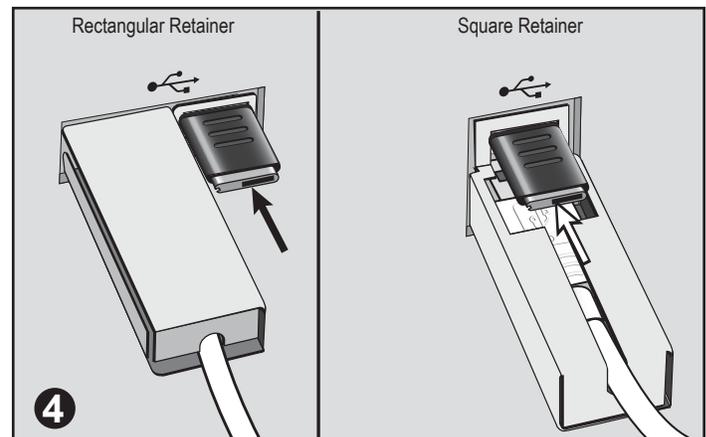

❹ Push in the locking button until it clicks.
The USB ports are are now secured.

For the most secure fit, it is recommended to use a spacer. Try the smallest spacer first, and adjust to larger sizes if needed. If the lock will not fit properly with a spacer installed, it is sufficient to use the lock without a spacer. (See NOTE on reverse)
