

# QUICKSTART GUIDE

## ION TP5 POS TERMINAL

**1**

### Connect Power & Additional Cables

- Remove the terminal's back cover by sliding the plastic cover up and out
- Connect the power supply cable to the **GREEN** 'DC 19V in' port on the terminal
- Loop the power cable
- Connect other cables (see port diagram)

**2**

### Lock Rear Cover (optional/select models)

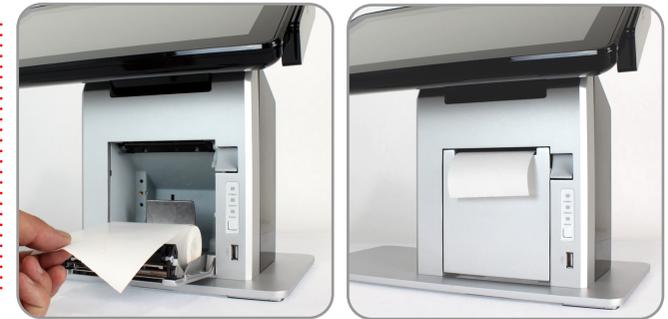

- After all cables have been connected to the terminal, attach the rear cover
- Set the terminal face down on a soft material to prevent damage
- Use a coin or a screwdriver to turn the two screws to the "LOCK" position

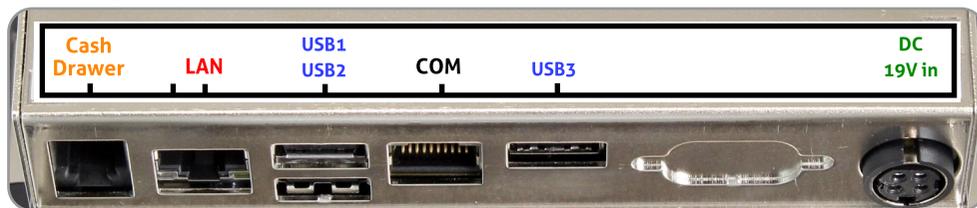

**3**

### Install Receipt Paper (select models)

- Press the paper door release button to open the door
- Insert paper roll thermal side up
- Close the door with the end of the paper coming out of the door
- Tear off excess paper

### Port Diagram (see step 1 to access)

- ↑ Plug in your cash drawer into the **ORANGE** 'Cash Drawer' port.
- ↑ Plug in your network cable to the **RED** LAN port.
- ↑ Plug in your USB devices to the **BLUE** ports.

**4**

### Power On Terminal

- The Power button is located on bottom left side of the display

**Caution: Connecting the wrong cable to a port may cause physical or electrical damage that is not covered under warranty**
