

# Power Assurance Package

Maintenance Services

## A partner to assure uptime

As small, remote IT sites become more business-critical, managing those sites is now a major challenge. While outages are not an option, neither is sacrificing your busy IT staff to set up and maintain UPS systems.

In today's climate, businesses need convenient and cost-effective support for power delivery to small IT sites.

The Power Assurance Package from Emerson Network Power Services perfectly fits the bill—delivering worry-free power protection for network power requirements in the .5-10 kVA UPS range.

## Benefits:

- Assured critical power delivery
- Optimized use of your IT staff
- Simplified small site UPS deployment and maintenance
- Instant access to power protection information
- Improved protection for your IT investment

## Ensure business-critical continuity with comprehensive protection and vital support for your Liebert GXT or PSI

The Power Assurance Package from Emerson Network Power Services combines the best UPS systems in the business with a five-year protection plan and the industry's premier service capability to safeguard your small IT sites.

The Power Assurance Package is far more than just an extended warranty for UPS systems in the .5-10 kVA range. It puts your critical power in the capable hands of our experienced team of factory-authorized technicians from day one—ensuring network availability and peace of mind.

While Emerson Network Power UPS systems offer trouble-free operation, oversight and rapid response remain essential to business-critical continuity. The Power Assurance Package has all of your power protection needs covered.

Our Power Assurance Package for Liebert® GXT or PSI systems includes:

- Five-year protection plan with 100% parts, labor and travel coverage
- Installation and startup
- Removal and disposal of existing equipment per regulatory requirements (optional)
- On-site support and emergency response available 24/7
- Comprehensive reports

# Power Assurance Package

## Maintenance Services

### Five-Year Comprehensive Protection Plan

The Power Assurance Package provides 100% labor and travel coverage, and 100% parts coverage for maintenance, repair and replacement for a full five years, including internal batteries, Liebert® MicroPOD™ and Web card. With this level of protection, you avoid unexpected downtime costs and gain network availability.

### Installation and Startup

Factory-authorized technicians handle the rack installation and startup of the UPS at your location. You enjoy the convenience and peace of mind that comes from having the experts do the job, and IT staff is free to attend to other tasks.

### Removal and Disposal of Existing Equipment

With this Power Assurance Package option, technicians will remove and dispose of an old UPS unit of comparable make or model while following all regulatory requirements. This task is handled when visiting to install and startup the new UPS system.

### On-site Support and Emergency Response

Our experienced team of technicians offers the industry's premier service capability for maintaining and supporting your UPS system. As part of the Power Assurance Package for 5-10 kVA UPS systems, technicians perform a preventive maintenance visit any time after the second year of coverage to help ensure continuous trouble-free operation.

Should a problem ever arise with your system, you have 24/7 access to Emerson's Customer Resolution Center. You can count on quick recognition by support personnel as well as priority status during emergencies including guaranteed on-site emergency response. Technicians and other support personnel are located throughout the United States—available when and where you need them.

### Comprehensive Reports

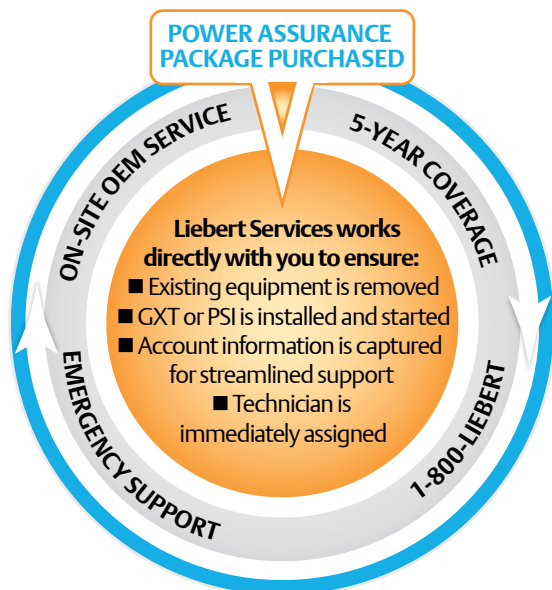

Emerson Network Power Services provides on-demand access to service histories and reports via the Customer Services Network portal. With this vital information at your fingertips, you will always know the status of your power system, and will have the information you need to simplify inventory tracking and financial planning.

### Summary

Even when your IT staff is working at capacity, there's no need to leave business-critical power unmanaged. The Power Assurance Package from Emerson Network Power Services gives you a trusted partner and a complete, worry-free power protection solution to assure uptime at your small or remote IT sites. By combining high-quality UPS systems, expert service and support, and a five-year protection plan, you'll know your power is protected.
