V1206-PD Zero Client
Tera2 PCoIP Portal Processor, Dual DP + DVI Display Capability

The V1206-PD is the latest 10ZiG TERA2 PCoIP Zero Client optimized for VMware and Amazon AWS VDI environments. This device supports the efficiency and security of centralized computing while offering an uncompromised desktop experience. The V1206-PD's TERA2 chipset delivers a powerful, secure and easy to manage desktop environment. This Zero Client offers a seamless solution with dynamic features and performance that will meet the needs of any VDI environment.

Specifically designed with a small carbon footprint, the V1206-PD consumes only 8 watts of power. This helps organizations save on power consumption, resulting in a much lower total cost of ownership.

This Zero Client eliminates the need for running, managing, maintaining and securing high maintenance PCs, while still delivering a high end computing experience. With six USB ports, rich multimedia playback, HD audio and dual monitor support, the V1206-PD is the perfect fit for any VDI environment.
