

Fibre Connector Tool Kit

No-epoxy, no-polish ceramic-tip
fibre connection. Just crimp!

FEATURES

- » Get an instant ceramic-tip fibre connection.
- » Prepolished Fibre Connectors handle ST, SC, FC, LC, and MT-RJ connections.
- » Prepolished fibre connectors are comprised of the connector housing, two sleeves, and two compression-hood fittings.
- » One push with the Fibre Optic Cleaver (FT538) cuts fibre cable cleanly.
- » Stress-free splicing! No gluing or alignment problems with the No-Adhesive Mechanical Splice (FO030).
- » Hold up to six splices securely in the Mechanical 6-Splice Tray (WP602).

OVERVIEW

Get ready for the easiest fibre connections you've ever made with the [Fibre Connector Tool Kit](#) and Prepolished Fibre Connectors.

The rotating cam on the ST* and FC Prepolished Fibre Connectors makes termination quick and smooth.

All connectors come with a fibre optic stub in the connector tip, which is cemented firmly in place. The stub is polished to a physical-contact (PC) finish. Because the connectors are prepolished, you get the strength of a bonded connection without polishing or epoxy during installation. That makes it easy to get peak performance.

The connector housing is designed to make matching up the fibre stub and cable easy. Insert a stripped and cleaved fibre cable in the connector, and when you feel little or no resistance, the fibre and stub are matched up correctly. Then just crimp!

Mechanical Splice and Tray

To splice fibre cables, choose the No-Adhesive Mechanical Splice. Insert a stripped and cleaved fibre cable into each end of the splice and twist. A cam locks the fibres into position for accurate alignment. To protect and organise your splices, use the Mechanical 6-Splice Tray. The tray holds six spliced connections securely.

NOTE: You can also order the tools separately.

What's included

FT535- R3:

- Installation Tool/Bench Clamp, Crimp Tool, and Fibre Optic Cleaver
- Assembly manual
- Buffer tube stripper
- Ruler, strip-length gauge, scissors, and tweezers
- Electrical tape, cleaning spray, wipes, and marker
