DATALOCKER® **DL3FE with RFID**

RFID Setup Guide

1 Connect the DL3/DL3FE with RFID, enter the "Admin" passcode and select "Setup".

2 Select the "System" option then select the "Arrow" icon to move to the next screen.

3 Select the "RFID" option and select "On" to enable RFID.

4 Select the "Add RFID Tag" option.

5 Swipe the RFID tag at the bottom right corner of the device until you hear a beep.

6 Record the Tag ID in case the physical tag is lost.

7 Select the back arrow until you get back to the "Connect" screen. Select "Connect" to save.

✔ Your settings have been saved and your RFID is setup and ready for use.
