

Jaco J48 SLA Replacement Batteries Only

Part Number: 51-3473

Quote Description: KIT, REPLACEMENT, J48, 12V BATTERIES,
TRAC

Product Group: HC-Replacement - Power Systems

Minimum Order Qty: 1

Weight: 38.00 LB

Length: 12.00"

Width: 8.00"

Height: 4.00"

Warranty: 6 Months Consumable

Product Description:

A replacement kit for the J48 SLA Battery System. Includes Four 12V Batteries approved for use with the Jaco Battery System.

Key Selling Points:

Voltage and Impedance Testing prior to shipment:

When you purchase approved Sealed Lead Acid (SLA) batteries from Jaco we perform Voltage and Impedance tests and match like batteries together to ensure best runtime and cell life. Matching the Voltage and Impedance of the battery sets designated for your battery system ensures that the batteries work in unison during both charging and discharging. Not performing the Voltage and Impedance tests and not matching like SLA Batteries together creates a situation that some batteries will have to "work" harder than others and over time the batteries that work harder will expire sooner. Matching the batteries will prolong the useful life of the batteries and the effectiveness of the power system that they are installed into.

Maintaining "fresh" batteries and charging prior to shipment:

Jaco works with the battery manufacturers and also have internal processes in place where the batteries are kept charged ("fresh"). If SLA batteries sit too long without being charged ("refreshed") they can be permanently damaged and hamper function and in some cases not be fit for use. Jaco monitors the age and voltages of our batteries and refreshes inventory when needed as well as ensures they are charged properly prior to shipment.
