

## ASUSPRO E810 Mini PC

# SLIM AND FLEXIBLE DESKTOP PC WITH ENTERPRISE-CLASS PERFORMANCE

The ASUSPRO E810 Mini PC is a compact PC with a 1-liter chassis, which offers enterprise-class management and security that is suitable for multiple applications. Powered by 4th-generation Intel® Core™ vPro™ processors, it provides enhanced computing power and streamlined management for better work efficiency. The slim design also features a detachable extension bay for greater expandability and flexibility. E810 is VESA-mount-compatible, so it fits perfectly into any business environment, from offices, banks, public departments, hospitals and schools through to retail counters.

### Take control of your business

#### Business-class Management Solutions

ASUSPRO E810 supports Intel® vPro™ technology and Intel® Stable Image Platform Program (SIPP), which provide remote manageability and reduced total cost of ownership (TCO) for large enterprises. Optional ASUS Inventory and Out of Band Management allow business owners to track hardware information, installed software packages, and operating system settings easily for all IT assets throughout their lifecycle. ASUSPRO desktops also come with ASUS Business Manager, a set of software tools that simplifies routine PC maintenance and optimization tasks.

### Designed to do more

#### Full connectivity and expandability

E810 is a small but powerful desktop PC that is VESA-mount-compatible for flexible placement. Even with its compact size, E810 isn't short on connectivity options. The E810 features DVI-I and DisplayPort graphics outputs with dual-display support, plus easily-accessible front-mounted USB 3.0 ports. For more expansion, simply connect the optional detachable extension bay, which allows the addition of an optical disk drive, more USB ports, and legacy ports such as serial (COM) and parallel (LPT) ports.

### Business-class security

#### Enhanced protection for your business

Information and database security is always a priority for any business. ASUSPRO E810 desktops feature an integrated Trusted Platform Module (TPM) security chip that helps safeguard your data against real-world threats. ASUS AI Security is a management tool that restricts users' access to confidential data, including selectively enabling or disabling read or write capabilities on external USB devices or optical drives. For physical asset protection, the E810 offers a Kensington Lock slot, a padlock slot and a chassis intrusion alert, helping to keep your data safe and secure.

### Proven reliability

#### Built for the real world

All ASUSPRO PCs are subjected to a series of rigorous tests, including noise, vibration, drop and thermal-shock tests, to ensure they meet our exacting standards and exceed those used by other manufacturers. So you can rest assured that your new computer will work in harsh environments — from dry and icy to hot and humid — as well as surviving the regular bumps and knocks of shipping.

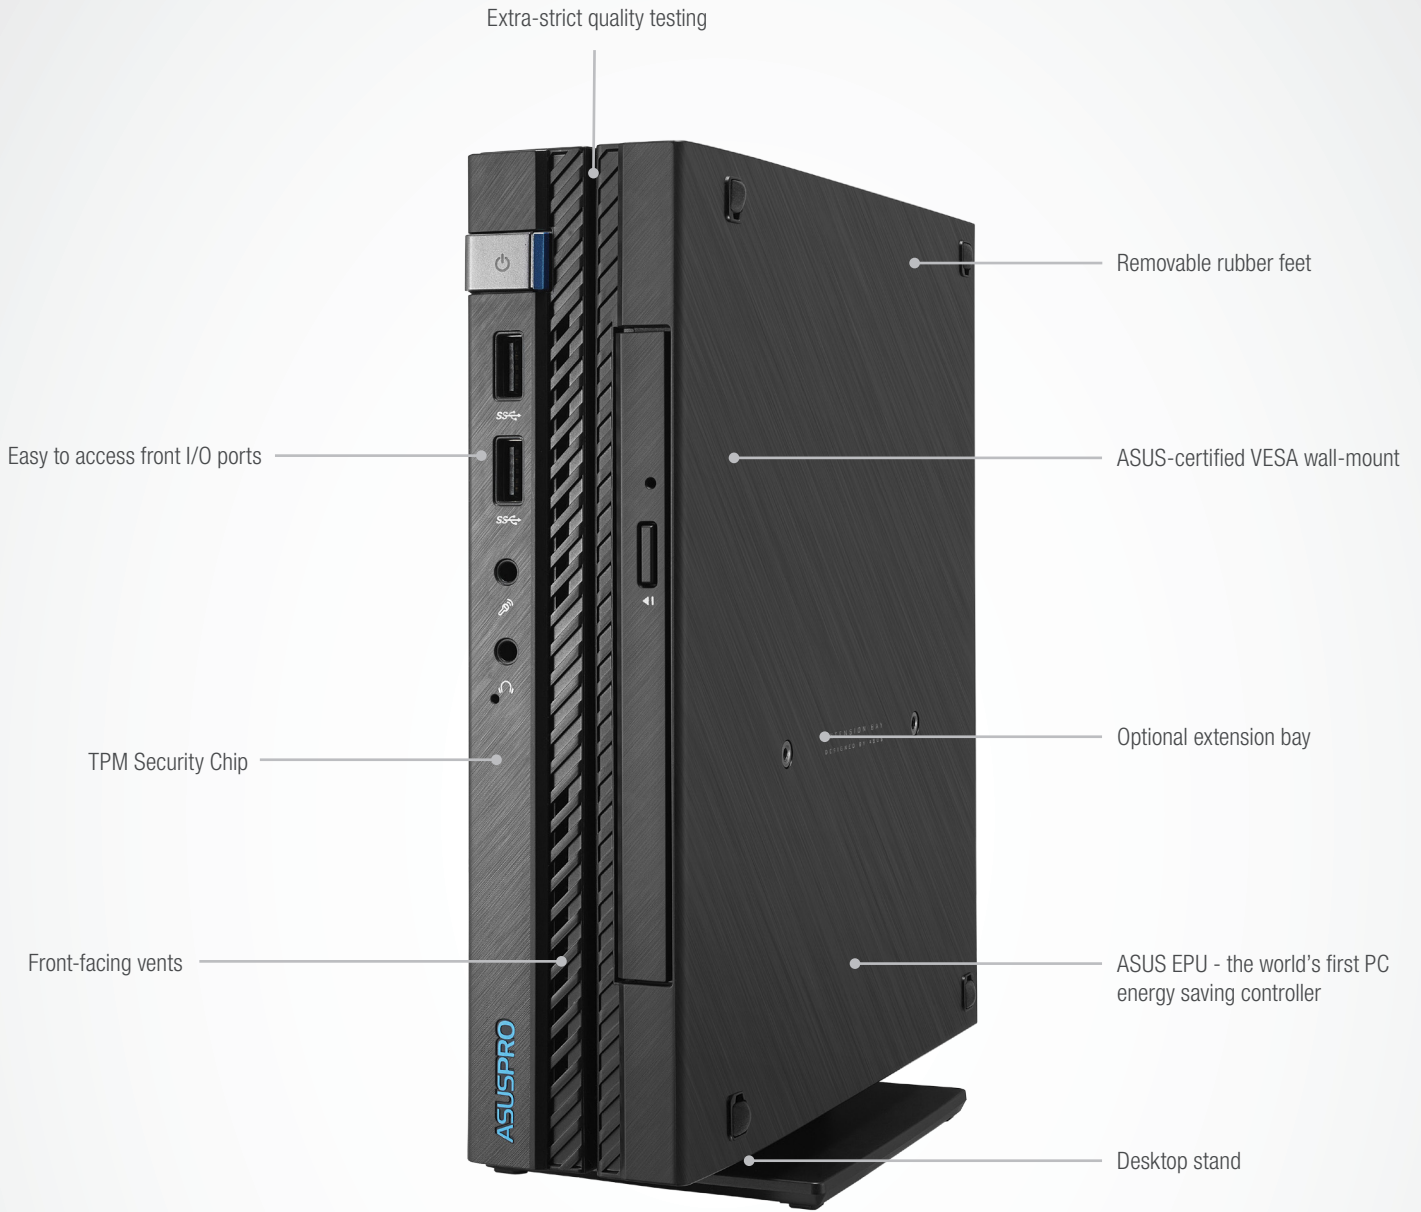

## SPECIFICATIONS

Model Name	E810
<b>Operating System</b>	Windows 8.1 Pro Windows 8.1 Windows 7 Professional
<b>CPU</b>	The 4th generation Intel® Core™ i3T/i5T/i7T/Pentium®T/Celeron® Processor T Processor (Support CPU up to 35W)
<b>Chipset</b>	Intel® Q87
