

Logitech®

Wireless Mouse M545

New Dual-Axis wheel

- Two extra thumb buttons
- New Dual-Axis wheel
- Plug-and-forget pico receiver
- 18-month** battery life
- Laser-grade tracking

Logitech® Wireless Mouse M545 is designed for effortless navigation, so you can be more efficient in Windows® 8. Its two extra thumb buttons come programmed for Windows® 8 Start screen and Desktop switching functions, or can be configured to do exactly what you want them to.* And the new Dual-Axis wheel gives you more power and control than a traditional scroll wheel. It is optimised for smooth scrolling and lets you instantly access your open apps as well as universal tools like Search, Share and the Start Menu.* The M545 includes the plug-and-forget pico receiver—our smallest-ever. You can work or play for up to 18 months between battery changes.** And the laser-grade optical sensor lets you work on just about any surface—from the local café's metal tables to your tile countertops to your polished wood desk.

* Customisation requires Logitech® SetPoint™ software, available for download at www.logitech.com/downloads.

** Battery life may vary based on user and computing conditions.
