

Getting Connected

Best Positioning

Play games or watch videos in comfort with a stand that offers a wide range of adjustment options. The back of the monitor has a built-in handle for carrying the monitor to a LAN party or gaming tournament.

Designed for Gaming

The rear cabinet design features an LED backlit EIZO logo on a glossy surface surrounded by a vermilion frame. The logo glows brilliantly in a dimly-lit room or in a tournament setting. The front cabinet has a simple design so you can focus on the screen.

Built to Last Five Years

EIZO's five-year warranty is two years or 67% longer than the standard three-year warranty of most brands.

Cabinet Color	Black
Panel Type	VA
Panel Size	23.5" / 59.8 cm (598 mm diagonal)
Native Resolution	1920 x 1080 (16: 9 aspect ratio)
Display Size (H x V)	521.3 x 293.2 mm
Pixel Pitch	0.272 x 0.272 mm
Grayscale Tones	256 tones
Display Colors	16.77 million
Viewing Angles (H / V, typical)	176°, 176°
Brightness (typical)	400 cd/m² (Turbo 240: OFF)
Contrast Ratio (typical)	5000:1
Response Time (typical)	Less than 1 ms (Turbo 240: ON, Monitor spec)
Video Input Terminals	PC: DisplayPort, DVI-D 24 pin (with HDCP) PC / AV: HDMI x 1

Always on Target

Ultra-Smooth Gaming with Turbo 240

Experience fluid gameplay free from motion blur with the gaming industry's first 240 Hz monitor. EIZO's Turbo 240 converts 120 Hz input signals to 240 Hz for a refresh rate double that of conventional gaming monitors so you can enjoy the smoothest motion display yet for first-person shooter, racing, and other fast-action genres.

Quick Scoping with Extremely Low Input Lag

Input lag, or the time it takes for commands from a keyboard, mouse, or controller to appear on the screen, can be the difference between hitting your target and missing it. EIZO developed its own integrated circuit to ensure your commands appear onscreen without delay.

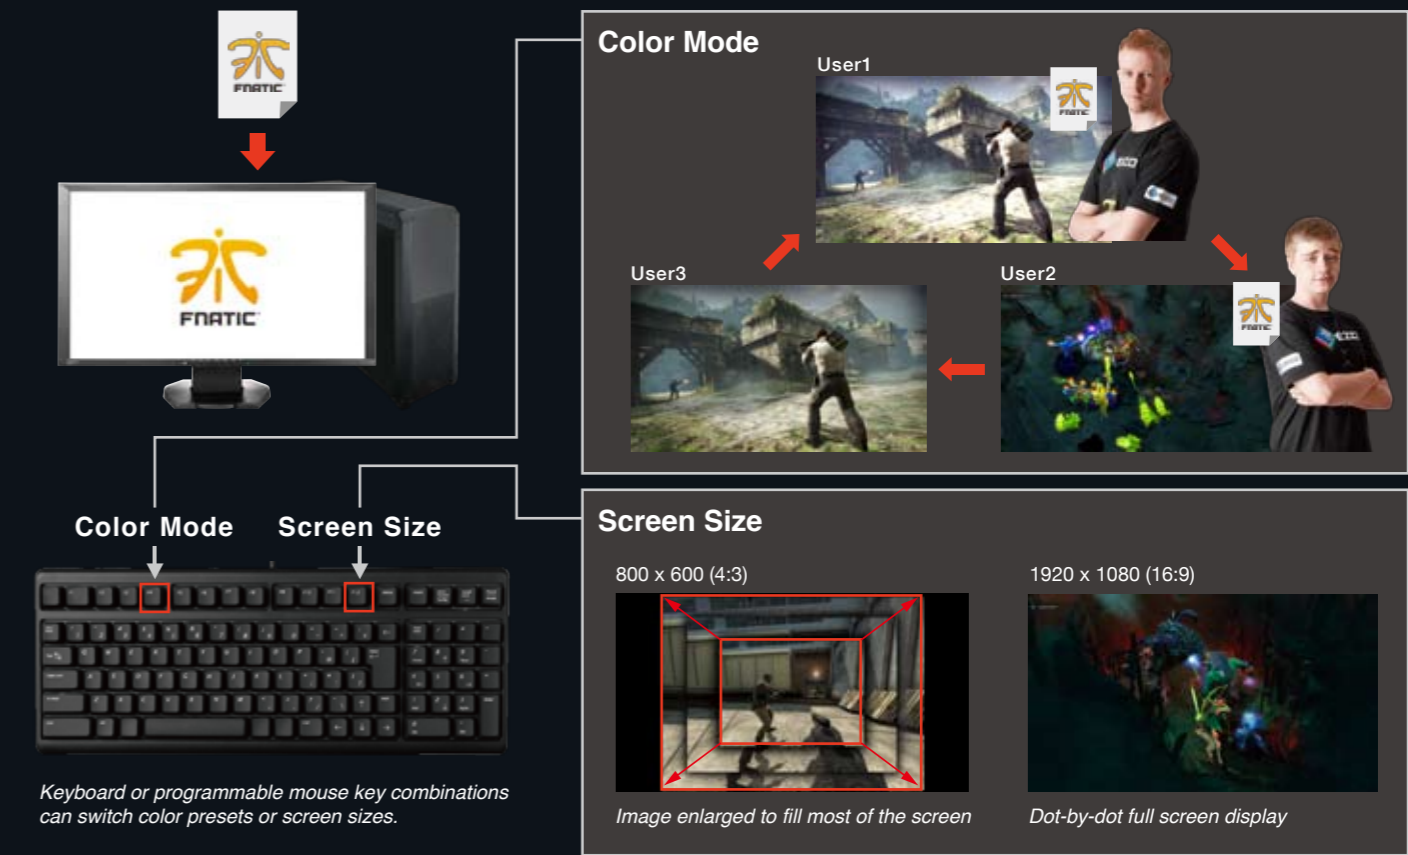

Other Monitors with input lag

FORIS FG2421

Download Pro Gamers' Color Presets

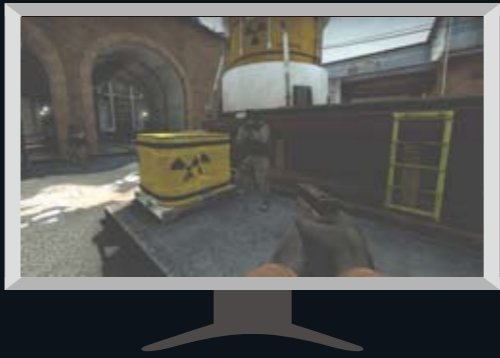

Play like the pros with gaming presets from pro gamers such as Counter-Strike legend Patrik "cArn" Sättermon and Dota 2 player Johan "n0tail" Sundstein. Use the bundled software, ScreenManager Pro for Gaming, to download these and other presets from gaming.eizo.com or to export your own presets.

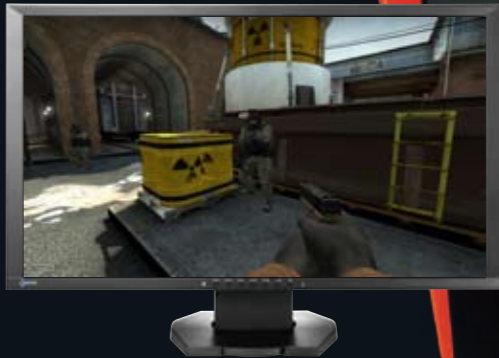

Clear Visibility with High-Contrast VA Panel

The FORIS FG2421 uses a new VA (vertical alignment) panel with a native contrast ratio of 5000:1. This is 5 times more than what other gaming monitors offer and increases the visibility in dark scenes so you can spot enemies more quickly.
