## Product overview

With global data center and public/private cloud network traffic growing at more than 25 percent annually, network providers and hyperscalers alike are rapidly adopting 400GE as the basis for their mass-scale core and aggregation networks. The Cisco® Network Convergence System 5700 Series builds on the success of previous Cisco NCS 5500 fixed systems by combining the latest in forwarding ASIC design with the advanced innovation of Cisco IOS® XR7.

The NCS-57B1-6D24-SYS and NCS-57B1-5DSE-SYS break new ground by combining 4.8 Terabits of 400GE/100GE optimized forwarding capacity, QSFP-DD optics, deep packet buffering, full line-rate MACsec, Class C 1588 Precision Time Protocol (PTP), and Synchronous Ethernet (SyncE) in an extremely power-efficient, 1-rack-unit package. The industry-leading Cisco IOS XR7 pushes the scalability of the hardware even further through the use of flexible database profiles that allow ASIC and TCAM resources to be reconfigured by network role. Next-generation security, automation, telemetry, segment routing, EVPN, and Equal-Cost Multipathing (ECMP) capabilities make XR7 the perfect complement to the NCS-57B1 series.

## Cisco IOS XR Software overview

The Cisco NCS-57B1 Series is powered by an industry-leading, carrier-class 64-bit version of IOS XR7 (XR7) NOS designed on operational efficiency, optimized utilization, and service agility ([evolved programmable network](#)). Cisco IOS XR Software offers rich features such as iPXE boot, autoprovisioning, and native support for third-party application hosting, machine-to-machine interface, telemetry, and flexible software package delivery.

## Software requirement

The Cisco NCS-57B1-6D24-SYS fixed chassis supports Cisco IOS XR Software Release 7.3.1 and later.

The Cisco NCS-57B1-5DSE-SYS fixed chassis supports Cisco IOS XR Software Release 7.3.1 and later.

## Specifications

Tables 1 through 4 list key specifications for the Cisco NCS-57B1-6D24-SYS and NCS-57B1-5DSE-SYS fixed chassis.

## Service and support

Cisco offers a wide range of services to help accelerate your success in deploying and optimizing the Cisco NCS 5500 Series. These innovative Cisco Services offerings are delivered through a unique combination of people, processes, tools, and partners, and they are focused on helping you increase operating efficiency and improve your data center network. Cisco Advanced Services uses an architecture-led approach to help you align your data center infrastructure with your business goals and achieve long-term value. The Cisco Smart Net Total Care® service helps you resolve mission-critical problems with direct access at any time to Cisco network experts and award-winning resources. With this service, you can take advantage of the Cisco Smart Call Home service, which offers proactive diagnostics and real-time alerts on your Cisco NCS 5500 Series. Spanning the entire network lifecycle, Cisco Services offerings help increase investment protection, optimize network operations, support migration operations, and strengthen your IT expertise.

## Cisco Capital

### Flexible payment solutions to help you achieve your objectives

Cisco Capital® makes it easier to get the right technology to achieve your objectives, enable business transformation, and help you stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services, and complementary third-party equipment in easy, predictable payments.
