- » Joystick Speed Up/Down (Kramer 6 x 1 Switcher - CVG-SW61CS)
- » Automatically adjusted joystick speed sensitivity for pan/tilt movement

The Telemetrics inTELEgent® Camera Control Panel CP-ITV4-S is an RS-232 serial desktop control panel designed to control Sony EVI-HD1,3,7 EVI-H100, EVI-D90, EVI-D80, EVI-D100 EVI-D70, EVI-D30, BRC-330, BRC-Z700, BRC-H700, and BRC-H900 cameras. The new intelligent proportional rate joystick provides smooth, simultaneous control of pan, tilt and zoom. Switches are provided to control focus and iris of each camera lens. Offers six stored presets, pan, tilt, zoom and focus positions to four cameras, can be recalled by selecting provided switches. In addition, user adjustable joystick speeds provide extreme fine control of the pan, tilt, and zoom. The Auto Speed function will automatically vary the speed of the pan/tilt joystick based on the current zoom position, with tighter zooms the joystick speeds will be slower allowing for more precise control. Interacting local and remote control panels, RS-232 interconnected, can control the cameras at either location by selecting the front panel. Local/Remote switch. RS-232 addressable external video switchers are also controllable when operating camera select buttons.

Accessories include P/T/Z camera ceiling mount bracket (CAM-CMBKT) and wall mount brackets (CAMWMBKTDH, CAMWMBKTHD1). The pan/tilt video cameras may be connected using daisy chain wiring or home run wiring. Various interconnecting cable accessories are available (not included).
