

HP All-in-One Remote app

Boost your productivity and make it easier to manage your documents

With the HP All-in-One (AiO) Remote app, you can take charge of your HP printer using your iPad®, iPhone®, iPod touch®, or Android™ mobile device.¹ Think of it as getting a full-featured remote control that allows you to print, copy, scan, and manage your printer remotely—so you can be more productive.²

Connect quickly and easily

The HP All-in-One Remote app works with any HP ePrint-enabled printer or All-in-One manufactured after 2010.³ After downloading the app to your smartphone or tablet, this simple yet robust app helps you quickly connect your device to the right printer via a Wi-Fi network or a wireless direct connection.⁴ Having trouble finding your printer over a wireless network? The HP All-in-One Remote app provides intuitive troubleshooting tools to help you connect your devices.⁵

Take your office with you

With a full on-screen interface for printing and scanning, the HP All-in-One Remote app makes it a snap to work remotely. You can send scanned documents and photos from your HP All-in-One printer straight to your smartphone or tablet for easy sharing. Or use the intelligent mobile scanner Capture feature and your device's camera⁶ to create sharp JPEG images or multi-page PDF documents and send them to your printer or store them in the cloud. It's all about flexibility.

Manage your printer remotely

The HP All-in-One Remote app puts information at the tips of your fingers. You can monitor printer status. Check settings. And you can even check ink or toner levels—and then order supplies with the HP SureSupply app if you're running low.^{7,8}

Make your single-function printer work harder

Need to scan or copy, but your HP printer doesn't have a scanner? No problem. The HP All-in-One Remote app features intelligent mobile scanning, which you can use to make copies with your printer. These documents are high-quality digital files—the app even detects edges, and straightens, crops, and sharpens the image.⁹

Get it now

The app is available for iPad, iPhone, iPod touch, and Android devices, and can be downloaded for free from the App Store and the Google Play store.

Notes

- ¹ Mobile device requires wireless access point and Internet connection. Features controlled may vary by mobile device operating system. Scan/copy control requires mobile device and printer be on the same wireless network or through wireless direct connection to printer. Android does not support the copy function. For more details, see hp.com/go/mobileapps.
- ² Android does not support the copy function. To print from the HP AiO Remote app on an Android device, you must first install the HP ePrint app. Download for free from the Google Play store. Mobile device must be wireless-enabled. Printer must be HP ePrint-enabled. Feature may require driver or apps, available for download at hp.com/go/eprintcenter.
- ³ Local printing requires mobile device and printer to be on the same network or have a direct wireless connection to printer. Wireless performance is dependent upon physical environment and distance from access point. Wireless operations are compatible with 2.4 GHz operations only. Remote printing requires an internet connection to an HP web-connected printer. App or software and HP ePrint account registration may also be required. Wireless broadband use requires separately purchased service contract for mobile devices. Check with service provider for coverage and availability in your area. See hp.com/go/mobileprinting for more details.
- ⁴ Mobile device must be wireless-enabled. Printer must be HP ePrint-enabled. Feature may require driver or apps, available for download at hp.com/go/eprintcenter.
- ⁵ iPad, iPhone, and iPod touch provide a troubleshooting checklist; Android devices provide a Wireless Test Report and a Network Configuration report to help troubleshoot connection issues.
- ⁶ Requires 5 megapixels or greater camera with auto-focus capability.
- ⁷ To order ink or toner cartridges from HP SureSupply, you must first install the HP SureSupply app. Download for free from the App Store and the Google Play store.
- ⁸ Receiving scans and checking printer status requires mobile device and web-connected printer to be on the same wireless network or through HP wireless direct connection to printer. Wireless performance is dependent upon physical environment and distance from access point.
- ⁹ Scan and copy control requires mobile device and web-connected printer be on the same wireless network or through HP wireless direct connection to printer.
