

Tape Colours

Brother's unique, patented TZ tapes are designed to be extra hard wearing. Tests have shown that they can withstand heavy abrasion, electrical resistance and lengthy exposure to chemicals, sunlight, water and extreme temperatures. Brother laminated tapes consist of six layers of materials, resulting in a thin, extremely strong label. Characters formed with thermal transfer ink are actually printed onto the underside of the laminate. Sandwiched between two layers of PET (polyester film) this lets you create characters that are virtually indestructible.

Tape options

- Options include standard laminated tape including fluorescent and transparent options. Specialist tapes include Non-laminated, Matt, Strong Adhesive, Security Tape, and Flexi ID. All are available in varying widths, character and tape colour options.
- Tape widths of 6, 9, 12, 18 and 24mm
- Standard tape length of 8m*

*Providing approximately 100 labels (based on 10 characters & standard label length 8cm)

LAMINATED BROTHER TAPES WITH PATENTED BROTHER UNDER-TAPE PRINTING

Brother Laminate Tape Construction

Brother TZ tapes have a unique construction comprising of six layers of material. These scratch-proof, water-proof labels can resist temperatures from -50°C to 300°C.

Brother P-touch 2460

Includes templates for creating staff name badges, price labels and other common label formats.

Tapes can be cut manually to any length, and the tape cut pause function makes printing and cutting the same label several times so much easier.

Over 450 accents, symbols and characters.

The LCD screen allows you to preview font styles and sizes, width, style, frames, alignment margins and length, so you can customise your label before you decide to print.

The P-touch 2460 from Brother.

Any retail environment where labelling is paramount will welcome this portable, easy-to-handle machine. Durable bar code labels, price tags and sale messages can be printed easily and efficiently to create a totally professional in-store look.

Ready to label all round the store

The P-touch 2460 has been designed specifically with the retailer in mind. This light, compact, durable, handheld labelling machine has an easy-to-use layout, with all functions created specifically for producing clear, professional labels that will last.

Always at your side

- BAR CODE LABELS
- PRICE TAGS
- SALES MESSAGES
- SHELVING LABELS
- SIGNAGE
- HARDWARE LABELS

Performance based on speed and versatility

Customised labels to suit any retailer

The P-touch 2460 delivers labels of outstanding quality, suitable for all retail environments. Nine of the most common bar codes are included as standard, and you can choose from a wide range of fonts, frames and margins as well as over 450 accents, symbols and characters, so labels can be customised to suit your needs. The P-touch 2460 even provides templates for creating staff name badges, price labels and other common label formats covering all of your retail labelling requirements.

Labels in an instant

With print speed at an impressive 10mm per second and 180 dpi, you can produce clear labels in an instant, so you won't have to wait even if you need to print several labels at once.

Versatile labels

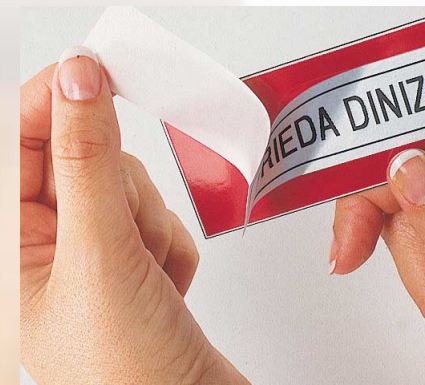

Tape width options span from 6mm to 24mm in a range of colours, so you can select the right label for the right job. Up to seven lines of text can be printed to accommodate the levels of detail required in retailing.

Print Options

The P-touch 2460 has a wide range of print functions including rotate and repeat, panel and vertical printing, mirror printing and flagging that makes everything so much easier.

Memory function

Text, format and templates can be saved so that your most often used labels can be reproduced whenever they are required.

Long Lasting Labels

Brother laminated tapes

Brother TZ tapes have a unique construction comprising of six separate layers, so as a result no other labels offer such levels of resistance and wear. These labels are able to withstand heavy abrasion, electrical resistance, lengthy exposure to chemicals, sunlight, water and temperatures from -50C to 300C.
